A despatch from Toronto says: Mr. Alex. Niven of Haliburton, who has had a long experience in Government surveys, has returned from a survey of the outlines of ten large townships in the northern clay belt between the Mississauga River and the Mattagami River, in the district of Algoma, reports the location of a remarkable area of good agricultural land. The country he passed through in his work is, he says, the finest he has met with in northern Ontario, nearly every acre being agricultural land of good quality. The country, generally, is rolling, with an occasional muskeg, and the soil a rich clay loam, with some areas of sandy loam. The timber is the largest Mr. Niven has yet encountered in his surveys in northern Ontario. It is chiefly black and white spruce, the latter averaging from sixteen to thirty inches in diameter, and being suitable for lumbering. Considerable poplar as large in size almost as the spruce was also met with. Balm of Gilead, white birch and occasional small areas of black birch were the other woods found.

The survey for the main line of the Grand Trunk Pacific Railway passes through these townships, which are also crossed by the following rivers, all large streams: Mississauga, Opazatika, Kapuskasing, Groundhog and Mattagami. A lake of beautifully clear water, three to four miles in width and six to eight miles long, well stocked with trout, pike and pickerel, was found in one of the townships.

### CROP OF APPLES WILL BE FAIR.

Nova Scotia Expects to Export About Same as Last Year.

A despatch from Halifax, N. S., says: The Nova Scotia apple crop this season will, in quantity, be about the same as last year, when 325,000 barrels were exported to foreign markets. In quality the crop is fair, gravensteins are a failure. In regard to price it is not expected that they will be quite as high as last year, when an average of \$2.75 per barrel was noted, but the returns will be good.

Advices from England are that the crop, which at one time promised to be very abundant, has been materially diminished through drought and gales, while the recent hot weather has caused it to mature quickly so that it will not keep well, and the fruit will be off the market earlier than usual. Prices in New York will be higher than at the corresponding time last year. In Nova Scotia they are advancing. Buyers are again paying \$1.50 per barrel and are now offering \$2 in some cases for run of orchard.

### WINNIPEG SUFFERS BY FIRE.

Over \$40,000 Damage Done in Immense Lumber Yard.

A despatch from Winnipeg says: A disastrous fire occurred in the immense lumber yard in Fort Rouge of ex-Mayor Arbutnot on Saturday night, when damage to the extent of \$40,000 was done. The fire started in the boiler-room with a strong north-west breeze and was quickly beyond the control of the brigade. The heaviest loss was occasioned in the destruction of the mill and ten cars of expensive mouldings standing on a siding nearby. The loss is fully covered by insurance.

### HIGHEST ON RECORD.

Fire Losses From January to September Total \$400,587.750.

A despatch from New York says: The loss by fire in the United States and Canada during the month of September as compiled by the Journal of Commerce and Commercial Bulletin aggregates \$10,852,550, or about \$3,000,000 below

## THE WORLD'S MARKETS

### REPORTS FROM THE LEADING TRADE CENTRES.

#### Prices of Cattle, Grain, Cheese and Other Dairy Products at Home and Abroad.

Toronto, Oct. 9.—Flour—Ontario wheat 90 per cent. patents are quoted at \$2.75 in buyers' sacks outside for export. Manitoba first patents, \$4.10; second patents, \$3.90; and strong bakers', \$3.80, Toronto.

Bran—The market is firm at \$15 to \$15.50 in bulk, outside. Shorts are quoted at \$18 to \$18.50 outside.

Corn—No. 2 American is quoted at 56c on track, Toronto.

Wheat—No. 2 white offered at 72½c outside, and at 72c at 70 per cent. points, with 71½c bid. No. 2 red Winter offered at 72c outside, without bids. No. 2 mixed offered at 71c at 70 per cent. points, with 70½c bid, while 71c was bid east of Toronto. No. 1 Manitoba hard was 80½c bid on track, Point Edward, and No. 1 Northern offered at 80c, Point Edward, without bids.

Barley—No. 3 offered at 46c at 78 per cent. points, with 45c bid.

Oats—No. 2 white offered at 35½c on a 6c rate to Toronto, with 35c bid. Two cars sold at 35½c on a 5c rate to Toronto.

Rye—No. 2 wanted at 66c outside, without sellers.

Buckwheat—No. 2 offered at 52c outside, without bids.

### COUNTRY PRODUCE.

Beans—Hand-picked selling at \$1.75 to \$1.80, and primes at \$1.60 to \$1.70.

Honey—Strained honey quoted at 10 to 11c per lb. and combs at \$2 per dozen.

Hops—New quoted at 20 to 25c.

Hay—Car lots of No. 1 timothy are quoted at \$9.50 to \$10 on track, Toronto, and No. 2 at \$8.

Poultry—Turkeys, fresh killed, 12 to 14c; chickens, 9 to 11c per lb. alive; ducks, alive, 10 to 11c per lb.

Straw—\$5.50 to \$6 per ton.

### THE DAIRY MARKETS.

Butter—Pound rolls are quoted at 21 to 22c; tubs, 18 to 20c; large rolls, 18 to 20c. Creamery prints sell at 24 to 25c; and solids at 22½ to 26c.

Eggs—Good stock brings 19c per dozen, and splits 13c.

Cheese—Prices rule at 13½ to 14½c, the latter for twins.

### HOG PRODUCTS.

Dressed hogs in car lots nominal. Bacon, long clear, 12½c per lb. in case lots; mess pork, \$22 to \$22.50; short cut \$24.50.

Hams—Light to medium, 16c; do, heavy, 15c; rolls, 12½c; shoulders, 11½ to 12c; backs, 17½ to 18c; breakfast bacon, 15 to 16c.

Lard—Tierces, 11½c; tubs, 11½c; pails, 12c.

### BUSINESS AT MONTREAL.

Montreal, Oct. 9.—Grain—There was some enquiry for Manitoba wheat from over the cable, but bids showed little or no improvement, and business was quiet. The local market for oats is firm in tone though the demand is rather quiet. Flour—Manitoba Spring wheat, \$4.50; strong bakers', \$4; winter wheat patents, \$4 to \$4.10; straight rollers, \$3.80 to \$3.90; do., in bags, \$1.75 to \$1.80, extras, \$1.50 to \$1.60. Feed—Manitoba bran, in bags, \$20; shorts, \$23 per ton; Ontario bran, in bags, \$19 to \$19.50; shorts, \$22 to \$22.50; milled mouille, \$21 to \$25 per ton, and straight rollers, \$23 to \$29. Provisions—Barrels short cut mess, \$22 to \$24; half-barrels, \$11.75 to \$12.50; clear fat backs, \$23.50; long cut heavy mess, \$20.50; half-barrels do., \$10.75; dry salt long clear bacon, 12½ to 12¾c; barrels plate beef,

## Thanksgiving Dinner

A very pleasing menu containing the favorite dishes of Thanksgivings, both "ancient and modern," is the following:—

Raw Oysters.  
Brownbread Sandwiches.  
Roast Turkey Stuffed with Chestnuts.  
Cranberry Sauce. Pickled Peaches.  
Celery. Baked Ham. Cider Sauce.  
Chicken Pastry.  
Mashed Potatoes. Creamed Onions.  
Brown Sweet Potatoes.  
Scalloped Squash. Ginger Sherbet.  
Lettuce and Walnut Salad.

Cranberry Sauce. Pickled Peaches.  
Celery. Baked Ham. Cider Sauce.  
Chicken Pastry.  
Mashed Potatoes. Creamed Onions.  
Brown Sweet Potatoes.  
Scalloped Squash. Ginger Sherbet.  
Lettuce and Walnut Salad.  
Wafers. Cheese.  
Pumpkin Pie. Mince Pie.  
Cranberry Tart.  
Baked Indian Pudding. with Cream.  
Ice Cream. Sponge Cake.  
Coffee.

This may seem rather a formidable menu to the woman without superior help, yet so many of the dishes may be prepared beforehand, that it need necessitate very little more cooking when the day arrives than that required for the usual Sunday dinner. The day before, the turkey may be made ready for roasting, the chestnuts cooked and mashed for the stuffing, and all the dry ingredients for the making it mixed together, the chickens cooked for the pastry, the crust made and set away in a cool place, the cranberry sauce made, and jellies, pickles and other foods may even be placed in readiness on dishes for serving, if kept in a cold place and carefully covered. If more convenient the pies may be made two days before, and cakes at the same time, if kept where they will not dry out. Nuts may be cracked, mixed with raisins and bonbons, and placed in the dishes ready for serving. Even the vegetables may be almost ready for the table the day before, and if carefully cooked no one need ever discover that they have been warmed over. The onions may be boiled in readiness for the cream sauce, the squash boiled and mashed ready to scallop, and the sweet potatoes par-boiled for browning. Mashed potatoes must of course be prepared just before time to serve. Sauces may also be made on the previous day, and all baking done except the pudding.

Every bit of china, glass and linen should be put in readiness beforehand and the house all swept, dusted and decorated, so that when thanks giving morning arrives the least possible work and time will be required to put it in perfect order.

Autumn leaves, golden grain and rich-hued chrysanthemums are seasonable and beautiful for Thanksgiving decorations, and a charming centerpiece for the table may be arranged with different varieties of fruit or vegetables, carefully cleaned and artistically placed.

If children are to be in the gathering small cakes and wholesome sweetmeats will be in great demand. Cookies are always popular, and a very nice way to "dress" them is the following: After they have been baked spread some of them with a wash made by beating the yolk of an egg very light with two tablespoonfuls of powdered sugar and two tablespoonfuls of blanched and coarsely chopped almonds. Return these to a slow oven until slightly browned. The white of the egg may be used if preferred, but should only be beaten enough to free it from stringiness.

A very nice and wholesome sweet is made by mixing equal quantities of fresh popcorn and shelled, blanched, and coarsely chopped peanuts; heat as much molasses as will be required with one-half of its bulk in sugar, and when very hot pour just enough over the popcorn and peanuts to stick all nicely together, and form into small bars, cakes and balls. If the mixture is sticky too much molasses has been added, but this mistake is easily rectified by working in more of the popcorn.

Stuffed dates are another delicious bonbon. Stone the dates and fill the hollows with an almond or walnut meat which has been dipped in a syrup that will candy. If the hollow will hold a raisin as well, so much more delightful for the palate. When stuffed give each date a thick coating of the same syrup, roll in blanched, chopped almonds, or walnuts, and lay on buttered plates to harden. These are rather tedious to prepare, but are worth the trouble. It is a form of cooking, too, which delights the children of the household, and they may be quite safely be trusted to per-

## ENGINE CRASHED INTO VAN.

### Fatal Collision on a Railway in Nova Scotia.

A despatch from Halifax, N. S., says: The worst collision in the history of the Sydney and Louisburg Railway, owned by the Dominion Coal Company, happened near Glace Bay on Monday night, and one man is dead and another dying and nine others injured. The accident was caused by a collision in a deep cut of the road between a construction train and a train of empties coming from Louisburg. The construction train was reversed, and had all the cars ahead of her, the farthest in advance being the van in which workmen were standing. As they entered a deep cut just the other side of the cut near the town reservoir the roar of another was heard. Conductor McLeod, who had charge of the construction train, was standing on the steps, and, seeing the coming collision, jumped and escaped. With a crash and a roar the big engine crashed through the construction van, and of the 11 men inside not one escaped injuries of a more or less serious kind. The van was smashed to kindling wood and the unfortunate men were strewn in all directions along the track.

Norman McLennan, cousin of A. N. McLennan, of the Sydney and Glace Bay, was killed outright. His brother Dan is in a dying condition with terrible injuries on the head. The men's injuries include scalp wounds, broken legs and arms, bruises and minor wounds.

## SEVENTY-FIVE MEN ENTOMBED.

### Deadly Explosion in a Virginia Coal Mine.

A despatch from Bluefield, Va., says: As the result of an explosion on Wednesday afternoon at the Westfork mines of the Pocahontas Coal Collieries Company, where the explosion of 1902 occurred in which Superintendent O'Malley and sixteen others lost their lives, seventy-five men are supposed to be entombed.

The mine is reported to be on fire and the work of rescue is retarded. The cause of the explosion is not determined. Great excitement prevails in the neighborhood of the mines. Crowds of men, women and children remained around the drift mouth anxiously awaiting news of relatives and friends among the missing.

## DRANK SOOTHING SYRUP.

### Four-year-old Montreal Boy Drank Contents of Bottle.

A despatch from Montreal says: Hermonde Vermette, four years old, whose parents live at 1,059 St. Dominique street is dead, the result of an overdose of soothing syrup. While his mother was washing in the back of the house the little fellow spied a bottle of soothing syrup on the kitchen table. Liking the taste of the mixture, he drank the whole contents. Thereafter he wandered out into the back yard, where not long after his mother found him, apparently asleep. All efforts on her part to awake him proved futile, and, although medical assistance was procured, he passed away without regaining consciousness.

## KICKED TO DEATH.

### Winnipeg Man's Fate at Hands of Two Bartenders.

A despatch from Winnipeg says: Fatally kicked in the bar-room of the Stock Exchange Hotel, Logan Avenue, on Saturday night, Thomas Humphreys, an employe at Gordon, Ironsides and Fare's abattoir, died within 15 minutes of his removal to his home. Humphreys was drunk and quarrelsome and in the course of a fight in the bar two of the bartenders, Montgomery and Savage, attempted to put him out of the building. While being ejected he was kicked over the heart. Both bartenders were arrested.

A despatch from New York says: The loss by fire in the United States and Canada during the month of September as compiled by the Journal of Commerce and Commercial Bulletin aggregates \$10,852,550, or about \$3,000,000 below the record of the same month in 1905. The nine months' losses by fire now reach the sum of \$400,587,750, a figure never before equalled in the history of the country.

## TOUCHED A LIVE WIRE.

### Young Man Instantly Killed on the Street at Belleville.

A despatch from Belleville says: Wm. Walsh, 18 years of age, was instantly killed here on Friday evening by coming in contact with a live electric wire. One of the wires which is used by the Trenton Electric Company in lighting the street, fell on St. Charles Street, and Walsh, who happened to come along at the time, struck the wire, with the result that he was thrown for some distance. When picked up he was dead, having received the full shock of the voltage which was being carried about the city.

## PRAIRIE PROVINCES.

### Census Will Show Population to be About 805,000.

A despatch from Ottawa says: While the returns of the census of the three prairie provinces are incomplete, enough is known to make a close approximation possible. The whole population of Manitoba, Saskatchewan and Alberta, as is known, will come close to 805,000. By 'provinces it will be:—Manitoba, 362,000, with three or four sub-divisions to be heard from, which will make the total about 364,000; Saskatchewan about 260,000, the returns from this province are the least complete; Alberta, 184,000, with one sub-division to come in.

## TO PRESERVE MILK.

### French Physician Discovers New Method of Sterilizing.

A despatch from Paris says: The *Matin* announces that Prof. Behring has discovered a new method of sterilizing milk without boiling it or destroying any of its essential principles. The method is based on the qualities of perhydrol, simply oxygenated. One gramme per litre destroys all noxious germs. Milk thus sterilized can be kept for a long time, while it is not injured by travelling. Prof. Behring says he has proved that light has a very harmful effect on milk, whether it is sterilized or not. He recommends that it be kept in the dark, or in red or green bottles.

## MISSING GIRL IS LOCATED.

### Miss Robertson, of Goderich, Found Employed in a Buffalo Store.

A despatch from Stratford says: The news has reached here that Miss Jessie Robertson, sister of City Solicitor Robertson, who disappeared so completely at Quebec some weeks ago, has been located in Buffalo. Her state of mind had been affected by her poor health. When found she was employed with a china decorative firm. The girl will be taken back to Goderich, her home.

## AGED WOMAN CUT HER THROAT.

### Domestic Troubles Cause Suicide of Resident of Blenheim.

A despatch from Blenheim, Ont., says: Mrs. James Jeffrys, of this place, ended her life on Saturday evening by cutting her throat. She was about 75 years of age and leaves a husband and one son. Domestic troubles are supposed to be the cause of the deed, as she had been in good health.

\$21 to \$25 per ton, and straight rollers, \$28 to \$29. Provisions—Barrels short cut mess, \$22 to \$24; half-barrels, \$11.75 to \$12.50; clear fat backs, \$23.50; long cut heavy mess, \$20.50; half-barrels do., \$10.75; dry salt long clear bacon, 12½ to 13½c; barrels plate beef, \$12 to \$13; half-barrels do., \$6.50 to \$7; barrels heavy mess beef, \$11; half-barrels do., \$6; compound lard, 8 to 9½c; pure lard, 11½ to 12c; kettle rendered, 12½ to 13c; hams, 14½ to 16c; breakfast bacon, 15½ to 16½c; Wind-sor bacon, 16½c; fresh killed abattoir dressed hogs, \$9.50; alive, \$6.75 to \$6.90 per 100 lbs. Eggs—Selects, 22c; No. 1 candled, 18 to 19c. Butter—Choice creamery, salted and unsalted, 24 to 24½c; medium grades, 23 to 23½c. Cheese—Ontario, 13 to 13½c; Quebec, 12½ to 13c.

## UNITED STATES MARKETS.

Milwaukee, Oct. 9.—Wheat—No. 1 Northern, 79 to 80½c; No. 2 Northern, 76 to 78½c; December, 75½c. Rye—No. 1, 63½ to 64c. Barley—No. 2, 55c; sample, 38 to 54c. Corn—No. 3 cash, 46½ to 47c; December, 43.

Duluth, Oct. 9.—Wheat—No. 1 Northern, 76½c; No. 2 Northern, 75c; October, 76c; December, 75c; May, 78½c. Minneapolis, Oct.—Wheat—December, 74½ to 74¾c; May, 78½c; cash, 76½c; No. 1 Northern, 76c; No. 2 Northern, 74c; No. 3 Northern, 72½c. Flour—First patents, \$4.20 to \$4.30; second patents, \$4.05 to \$4.15; first clears, \$3.25 to \$3.35; second clears, \$2.40 to \$2.60.

## LIVE STOCK MARKET.

Toronto, Oct. 9.—Trade was active in good cattle at the Western Market today, and prices held pretty steady on moderate offerings thereof.

Little business was transacted in exporters' cattle. The quotations ranged in general from \$4.25 to \$4.75 per cwt. For good animals a little more than the above would be paid.

Best butchers', \$4.25 to \$4.50; good butchers', loads of, \$4 to \$4.25; fair and medium butchers', \$3.40 to \$3.90; rough to good cows, \$2.25 to \$3.45; heavy cows, \$3.35 to \$3.60; canners, \$1.25 per cwt. up.

Trade in feeders is somewhat hurt by the low prices which are offered. Short-keeps, \$3.60 to \$4; feeders, \$3.25 to \$3.50; stockers, \$2.50 to \$3 per cwt.

Export Ewes, \$4 to \$4.50; export bucks, \$3 to \$3.50; lambs, \$6.10 to \$6.25; calves, \$3.50 to \$6 each.

The offerings of milch cows were large and the demand was strong. Prices were firm at \$25 to \$50 each.

Hogs were unchanged at \$6.65 for selects, and \$6.40 for lights and fats.

## FIFTY-NINE NEW ENGINES.

### Ordered by the Grand Trunk Railway—Will be Richmond Type.

A despatch from Montreal says: The Grand Trunk Railway, after a very satisfactory test of some new engines, have placed an order for fifty-five new Richmond compound consolidation engines with the Locomotive and Machine Company of Montreal. The contract calls for the delivery of the engines before January 1st, 1908. They are a powerful machine and are nearly as big as those used in mountain service, and are 40,000 pounds heavier than the compound freight engines.

## INCREASING THEIR ARMIES.

### Germany and Austria Are Adding New Regiments.

A despatch from London says: According to the Express, Germany and Austria are considerably increasing their armies. A scheme for augmenting the German engineers and heavy artillery will be submitted to the Reichstag shortly, while Austria will add to her forces fifteen new artillery and fourteen howitzer regiments. The Express describes this as the continent's reply to the British Government's overtures for a reduction of armaments.

## Thanksgiving Dainties

**Thanksgiving Cake:** Mix 3 teaspoons of baking powder in  $2\frac{1}{2}$  lbs. of flour. Cream 2 lbs butter and 3 lbs of sugar together. Beat 18 eggs thoroughly and mix with them  $\frac{1}{2}$  lb of pounded almonds, a wineglass of red currant jelly, a teacup of marmalade, and a teaspoon of extract of cinnamon. Mix well with the butter and sugar and stir in the flour. Pour into a large cake mould lined with buttered paper, and bake in a very moderate oven  $2\frac{1}{2}$  hours. When cold spread with a thick coat of frosting and ornament with walnut meats.

**Raised Doughnuts:** Scald a quart of sweet milk, and add a generous cup each of butter and sugar. Set away until cool, then add three-fourths of a cup of soft yeast,  $1\frac{1}{2}$  teaspoons of cinnamon and enough flour to make a soft dough. Knead well, cover, and set in a warm place to rise. When light, roll out the doughnuts, and let rise again. Fry in a kettle of deep, hot fat. Drain for a minute on unglazed paper, sift well with powdered sugar and set away until cold.

**Sweet Potatoes Candied:** Boil the potatoes until tender but not mealy. Peel, slice, and place in layers in a shallow buttered dish, sprinkling each layer with sugar and little bits of butter. Pour a little maple syrup over the top, and bake just long enough to melt the sugar and brown the top.

**Cheese and Tomato Salad:** If fresh tomatoes are not at hand use those which have been canned whole; they may be purchased for very little more than the cut ones. Scoop out a portion of the centre, and fill the cavity with a mixture of grated cheese and finely chopped celery, seasoned with salt, pepper and cayenne, and moistened with olive oil and vinegar. Serve each tomato on a lettuce leaf, with or without French dressing, as preferred.

**Quickly Made Mince Meat:** One cup each of finely-chopped beef suet and tart apples, 1 cup of seeded raisins, 1 cup each of minced citron and cold beef, 1 cup of cleaned currants, 1 cup of sugar, spices to suit the taste. Mix all well together, and add unfermented grape wine to thin sufficiently. Add the juice of one lemon, and bake between two crusts.

**Oyster Cocktails:** Select small, perfectly fresh oysters. Look them over carefully and remove all bits of shell. Sprinkle lightly with salt and place on ice until time to serve. For the sauce mix together one gill of tomato catsup, the juice of a lemon, two tablespoons of grated horse-radish thinned with vinegar, a few drops of tabasco sauce, and just before serving add two tablespoons of powdered ice. Serve in small glasses, and pour the sauce over them just before sending to the table. Allow six oysters to each person. The plate underneath the glass should be very small. Pass thin brown bread sandwiches with them.

**Chicken Croquettes:** Chop cold boiled chicken very fine, season to taste, add a little minced parsley and moisten with cream sauce sufficient to make a paste. Form into croquettes, dip in beaten egg, then in bread crumbs, and fry in hot fat to a pale brown.

### THE THANKSGIVING TURKEY.

#### A Few Hints How to Prepare It for the Table.

In cooking a turkey or fowl it is much more delicate and juicy if placed in the roasting pan breast downward. Support it with skewers if necessary, and baste at least every ten minutes after it starts to roast. To make the skin an especially dainty lid-bit, rub it well all over with soft butter, sprinkle with salt and white pepper, and dust lightly with flour. The oven for roasting should be very hot

### MOSLEMS HAVE AMBITIONS.

But Lord Minto Says British Ideas Must Always Prevail in India.

A despatch from Simla, India, says: An address was presented on Tuesday to the Viceroy of India, Lord Minto, by the most influential body of Mohammedans that has ever approached the Indian Government. Headed by his Highness, Agra Khan, thirty-six delegates, representing every province and every branch of the educated Moslem community, set forth the grievances and aspirations of the Mohammedans of India, and especially their claim for a fair share in any modified system of representation that might be contemplated.

Lord Minto, in reply, said that he recognized the aspirations of the younger generation and sympathized with sincere Bengali sentiment. He understood that their hopes and ambitions were not due to disaffection, but to their educational growth, the seed of which had been sown by British rule. The educational harvest would go on increasing, but British ideas must prevail. He promised all reasonable aid to the desires of the deputation; and promised them that in any attempted modification of their religious beliefs the national traditions would be respected.

### MURDER OF ENGLISH GIRL.

Distantly Related to the British Royal Family.

A despatch from Essen, Prussia, says: A great sensation has been caused here by the murder of Miss Madeline Lake, daughter of an English army officer, whose body, terribly mutilated, was found Monday evening in the city park. The police have been unable to throw any light in the mystery surrounding her death. Both temples were beaten in, her throat was lacerated by the hands of her murderer, who, evidently strangled her in addition to beating her terribly about the head, and her arms and body were severely bruised.

The excitement caused by this horrible crime in a public park, almost in daylight, apparently, has been increased by the fact that the inquiries of the authorities have resulted in seemingly establishing the fact that Miss Lake was related, distantly, to the British Royal family, the brother of her grandmother. It is stated, having married a daughter of Caroline Amelia Elizabeth of Brunswick, the divorced wife of George IV. of England.

### RIOT AT BULL FIGHT.

Audience Climb Into Arena and Are Gored by Bulls.

A despatch from Bordeaux, France, says: Riot prevailed at a bull fight here on Tuesday, and the police had finally to be called on to clear the arena. After attacking the employees the spectators tried to set the amphitheatre on fire. It was when a matador fell dead from excitement during the fight that the management announced the performance was over. The spectators protested, and when the management ordered the performance to continue the performers refused. Several of the audience jumped into the arena and the bulls attacked them. Five of them were gored, one fatally.

### TO MEET EARLY IN NOVEMBER.

Government Hopes to Call Parliament for Session on Eighth.

A despatch from Ottawa says: The Government is straining every effort to get its business in shape in order to call Parliament together on Nov. 8th. The object of meeting so early in the month is to get in five weeks' useful work and to dispose of the tariff if possible before the Christmas holidays. Sir Wilfrid Laurier and some of his colleagues are of necessity to be in England by the 26th of April to attend the

## FLEET ROTTEN WITH SEDITION

### Disclosures at Court Martial at Russian Ports.

A despatch from St. Petersburg says. The court-martial at Cronstadt on Wednesday began the trial of the three ringleaders of the mutiny on board the torpedo gunboat Kazanatz, Aug. 2. Next week the court will begin trying 295 members of the crew of the battleship Alexander II., who refused to obey Capt. Petroff's orders to enter the ship's boats and assist in suppressing the mutiny at Cronstadt.

A court-martial at Libau, in Courland, has found 23 sailors of the transport Riga guilty of mutiny in August last and has sentenced them to various terms of imprisonment at hard labor.

The seriousness of the August mutiny was revealed at the court-martials held at Cronstadt, Helsingfors, Reval, Riga, Libau, and practically every Baltic port, showing that the whole fleet was honey-combed with sedition.

An unreported mutiny of the 21st East Siberian Regiment, which distinguished itself in several battles in Manchuria, has been disclosed by the verdict of a court-martial held at Blagovieshtchensk, Asiatic Russia, which has sentenced six of the ringleaders to death, three others to hard labor, and 19 to serve various terms in the disciplinary battalions.

Tuesday's record of executions, as the result of the sentences of drum-head court-martials, includes four Anarchists put to death at Kiev and seven bandits executed at Bakhtul. The latter were shot owing to the inability of the authorities to procure a hangman.

### TERRORISTS AS BANDITS.

A despatch from St. Petersburg says: Twenty-five robbers recently boarded a Russian steamship as passengers, seized the vessel after they had overpowered the crew, and took 12,000 roubles and the valuables of the passengers.

The police on Wednesday afternoon captured several of a party of revolutionists who had planned an attack on the cashier of the Customs House. Many shots were fired and one man is said to have been killed.

### CAPT DZIANHOWSKY KILLED.

A despatch from Moscow says. Capt. Dzianhowsky, who was shot and killed in a street here on Wednesday, was assassinated in pursuance of a sentence of the revolutionists. He was the com-

mander of a company of the 1st Cavalry Regiment, which on Aug. 16 killed two political prisoners during an outbreak among the political offenders confined in the Central Prison of Moscow. Several members of drum-head court-martials have also been sentenced to death by the revolutionists.

### WITTE IS HOPEFUL.

A despatch from Paris says: Count and Countess Witte arrived here on Wednesday from Germany. The Count, who has considerably improved in health, attended the theatre at night, his presence attracting much attention. He says he has absolutely no connection with the direction of affairs in Russia, but is following the developments with the keenest interest. Continuing, the former Premier said:

"The Empire is passing through a great crisis, but although I am a pessimist at present I have not abandoned hope of seeing eventually evolved a Parliamentary and monarchical regime suited to the needs of the country."

### THREW BOMB AT GOVERNOR.

A despatch from Simbirsk, Province of Simbirsk, Russia, says: Gen. Starynkewitch, Governor of Simbirsk, had a narrow escape from assassination on Thursday. A bomb was thrown at him, wounding him in the hand and leg. His injuries are not fatal.

### DEADLY POISON IN BOMBS.

The London Telegraph's correspondent at St. Petersburg says that bombs seized by the police in their recent raid on the Engineers' Institute contained a bar barous device for destroying life by prussic acid. When such a bomb burst even the smallest fragment that was in contact with the acid would cause speedy death if it scratched the flesh. Many injured by bombs in the past have been cured, but nobody hurt by these bombs could be cured.

### FINANCIAL OUTLOOK BETTER.

A despatch from St. Petersburg says: The official telegraph agency has circulated a calming explanation of Minister Kokovtzeff's report, winding up with the declaration that the financial outlook in Russia is decidedly favorable. Forty Terrorists stopped a railroad train near Ufa on Friday and seized \$1,300.

### HAPPENINGS FROM ALL OVER THE GLOBE.

#### Telegraphic Briefs From Our Own and Other Countries of Recent Occurrence.

##### CANADA.

Nearly one thousand students are registered at the University of Toronto.

According to the assessor Peterboro' has 14,962 population.

Building permits issued in Toronto to the end of September totalled \$9,566,328.

A Chinaman at London, Ont., was fined \$20 and costs for kissing a little white girl.

Woonsocket, R. I., died on Wednesday of hydrophobia. Two other persons who were bitten by the same animal twenty-one days ago, had taken no precaution up to the time of young Trudeau's death.

Mrs. Mary Guthrie, a dressmaker, of Norfolk, Neb., sold nearly everything she owned to search for her little girl and has found the child at Erie, Pa. Mrs. Guthrie procured a divorce, she was given custody of the child, but during an interview the father seized it.

Literally cooked alive in a boiler into which steam was turned on by mistake a boiler-maker, Gustave F. Friend, 3 years old, of Vinconnes, Ind., lived four hours. He remained conscious and arranged all his worldly affairs, bade his people good-bye and then prayed with his pastor till death came.

#### GENERAL.

roasting meat downward. Support it with skewers if necessary, and baste at least every ten minutes after it starts to roast. To make the skin an especially dainty lid-lift, rub it well all over with soft butter, sprinkle with salt and white pepper, and dust lightly with flour. The oven for roasting should be very hot at first to sear the juices, then gradually moderated. Melt half a cupful of butter in the same quantity of hot water and baste the turkey with this. An even more delectable flavor may be imparted by basting with oyster liquor and butter. The stuffings used for roast turkey are many and varied, the plain old-fashioned bread dressing still being a prime favorite, and deservedly so, as if properly made and delicately seasoned it is a most savory and delightful addition to any roast.

Rice stuffing is not so well known but is worth trying if something a little newer is desired. To make it boil two cupfuls of rice in three quarts of boiling water until the grains are tender, but not broken. Drain, pour cold water over, drain again, and toss it before the fire on a napkin until dry. This treatment will make the grains remain separate. Mix with it one cupful of chopped oysters or sausage, and season with salt and white pepper to taste. Stir in half a cupful of melted butter, and bind the mixture together with two beaten eggs. Stuff it lightly into the turkey. If any is left, form it into little cakes, spread with soft butter, dust with fine crumbs, and brown delicately in the oven. Use as a garnish around the turkey.

Chestnut forcemeat makes another very delicious stuffing. The large Spanish chestnuts are usually used for this, but the small native variety may be used if more convenient. Cook one tablespoonful of minced onion in two tablespoonfuls of butter for five minutes, watching that it does not brown. Add six ounces of sausage meat, twelve finely chopped mushrooms and one pint of boiled, mashed chestnuts. Stir all well together and let cook a few minutes longer; remove the pan from the fire, season the mixture with one teaspoonful of salt, half a teaspoon of white pepper, one cup of whole, peeled, boiled chestnuts, and three tablespoonfuls of dry breadcrumbs. Mix all well together, and stuff lightly into the turkey. Any left over will make dainty little cakes prepared as directed for the rice stuffing.

Fried hominy cakes make another pleasing addition. Hollow the cakes in the centre, before frying, to form little nests, place them as a garnish around the turkey and put a spoonful of cranberry jelly in each. Another garnish even more dainty is made with little cups of transparent cranberry jelly with finely chopped celery.

Brown gravy is usually served with the Thanksgiving turkey, but the spiced gravy is not so well known; it is very pleasing and no more trouble to prepare than the ordinary variety. Boil the giblets in three pints of water for an hour with a few cloves and allspice, one tablespoon of grated lemon peel, and onion chopped small, two red peppers, three blades of mace and one-half teaspoon of salt. When the giblets are perfectly tender take them out, mince, and season with a saltspoon of salt and six dashes of pepper. Put in the gravy boats, keeping them hot over hot water. Add one tablespoon of butter and two of hot browned flour to the gravy, stir and cook until smooth and thickened, then strain. Let simmer a few minutes; if too thick add a little hot water. Pour into the gravy boats over the giblets.

#### 2,000 BABIES SUFFOCATED.

#### Yearly Fatalities in England Through Sleeping With Parents.

A despatch from London says: At an inquest in the case of an infant who had been suffocated in its parents' bed the coroner said that 2,000 infants were so suffocated annually in England. There were 600 cases in London alone. He pointed out that in Germany the law made it illegal to have a baby under a year old in the same bed with its parents.

The object of meeting so early in the month is to get in five weeks' useful work and to dispose of the tariff if possible before the Christmas holidays. Sir Wilfrid Laurier and some of his colleagues are of necessity to be in England by the 26th of April to attend the Imperial Conference, and, therefore, it will be necessary to put forth every effort to conclude the business of Parliament before they leave. Under the circumstances, the Christmas recess will be short, certainly not exceeding two weeks.

#### ROBT. SIMPSON DROWNED.

#### Stepped Backwards Off a Yacht at Owen Sound.

A despatch from Owen Sound says: Mr. Robert Simpson, assistant foreman in the Canadian Pacific through freight sheds, was drowned here at an early hour on Thursday morning. He was one of a party composed largely of members of the C.P.R. office staff which left by the cruiser yacht Venetia for a run to White Cloud Island and Wiarton. On the return trip Mr. Simpson, who was sleeping on the deck, was aroused, and on getting to his feet stepped backward and fell into the water, which at the point is over twenty feet deep. The body was found the same afternoon. His wife left three weeks ago on a visit to her sister in Vancouver. His mother and three sisters reside in Toronto. He was thirty-five years of age, and a member of the Order of Independent Foresters.

#### JAPAN WARNS RUSSIA.

#### Action of the Government in the Manchurian Expulsion Case.

A despatch from Tokio says: With regard to the expulsion of a party of Japanese from North Manchuria on Sunday by the Russian authorities, which was in violation of the convention signed Sept. 28, abrogating the Szingchih treaty, which excluded Japanese and Russians from North and South Manchuria respectively, the Government announces that it is willing to regard the incident as due to the carelessness of the Russian officials. Nevertheless the Government has instructed Dr. Montono, the Japanese Minister at St. Petersburg, to warn the Russian Government and to demand that immediate telegraphic instructions be sent to the authorities at Harbin and Vladivostok.

#### DREADNOUGHT TRIAL TRIPS.

#### Admiralty Reports the Results Satisfactory in Every Respect.

A despatch from London says: The Admiralty has issued a report on the preliminary trials of the Dreadnought, the largest warship in the world, which commenced Monday and were finished the next day. The results were most satisfactory. Her manoeuvring power proved to be exceptionally good. The ease with which she steered and handled, even at low speed, was very noticeable. She proved herself a good sea boat, although the water was not sufficiently severe to make a thorough test of her qualities in this direction. There was a complete absence of vibration of the structure at all speeds. After the preliminary trials, the Dreadnought proceeded Wednesday on her first official 30-hour trial, at one-sixth her full power, in the English Channel. This was finished successfully. The next series of trials at various powers with her cruising turbines were then completed satisfactorily.

Stratford's population, according to the assessment returns, is 13,209. The assessment is \$6,023.700.

John Macdonald, mate on the schooner Pilot, was run over by a railway train at Kingston and killed on Saturday.

According to the assessor Peterson has 14,962 population.

Building permits issued in Toronto to the end of September totalled \$9,566,328.

A Chinaman at London, Ont., was fined \$20 and costs for kissing a little white girl.

Kent county fruit-growers asked the Government's assistance in fighting the San Jose Scale.

Mr. James S. Beek, Auditor-General of New Brunswick, has resigned after 39 years' service.

The financial statement of the Dominion for the last three months shows a surplus of over \$8,000,000.

Fire almost wiped out Heap's sawmill at Cedar Cove, B.C., on Saturday, causing a loss of \$200,000.

Lieut.-Col. White is authority for the statement that the Mounted Police force in the Yukon will be reduced from 300 to 150.

The trustees of the Durham Natural Gas & Oil Co. have disposed of the assets of the company, and will pay three cents on the dollar.

A log famine is reported by British Columbia saw mills. The price is now \$8 to \$10 per thousand feet, and a sharp advance is looked for.

Barrie Council has passed the bylaw to abolish the Public and Collegiate Institute Boards, and for the formation of a Board of Education.

Mr. Cecil B. Smith has resigned the Chairmanship of the Temiskaming Railway Commission, but will be retained in an advisory capacity.

Edmonton's September building operations aggregated \$143,515, making the total for the year to date \$1,369,105, which is \$666,381 better than the whole of 1905.

Peter Wilson was ordered detained for three years with the Children's Aid Society at Guelph by Justice Magee for the manslaughter of the little Swackhammer girl.

The new G. T. R. freight sheds at Wingham are not large enough to meet the demand for storing freight and an addition of 60 feet to the present shed is in the course of erection.

Kingston's population has remained stationary during the past year, one reason being that the railways check trade and enable country storekeepers to compete successfully with the city store.

As a result of the brisk demand for lumber on the upper British Columbia coast dismantled mills are being re-equipped and sites for new ones are being sought after by both local and foreign companies.

#### GREAT BRITAIN.

Clyde shipyard strikers have received offers of help from Canada, Germany and United States.

Dr. Forbes Winslow predicts that before long there will be more insane than sane people in the world.

The extraordinary story that Mr. Carnegie would give \$25,000,000 to humanity is denied from Skibo Castle.

This year 955 Barnardo children have been sent to Canada, and since the work began, 18,429. Ninety-eight per cent. are doing well.

#### UNITED STATES.

President Roosevelt dedicated the new State Capitol at Harrisburg, Pa., on Thursday.

The number of dead in the Virginia mine disaster is estimated at sixty.

President Roosevelt will withdraw all coal lands in the United States not already taken up for entry.

T. P. O'Connor predicted self-government for Ireland at an early date in his speech at Philadelphia.

Two negroes were lynched at Mobile Ala., one in Argenta, Ark., and one in the State of Michigan, on Saturday.

The trouble in Cuba may cause the postponement of President Roosevelt's trip to Panama until March, after the adjournment of Congress.

The United States Steel Corporation has leased in perpetuity the Hill iron ore properties at \$1.65 per ton delivered at the northern lake docks.

William Trudeau, aged nine years of

hours. He remained conscious and arranged all his worldly affairs, bade his people good-bye and then prayed with his pastor till death came.

#### GENERAL.

United States forces are being distributed in Cuba as a precautionary measure.

The South Manchurian Railway will be as thoroughly Japanese as it was formerly Russian.

#### NO WIRELESS TO THE YUKON.

#### Government Not Likely to Adopt System—First Offer Modified.

A despatch from Ottawa says: There does not seem to be any great likelihood of the Government adopting wireless telegraphy to Dawson. The Marconi people have modified their original offer to the Public Works Department to put in their system, and will only do so now under a Government guarantee. It is hardly likely, therefore, that the Government will make any change in existing conditions except to improve the telegraph line where it is needed.

#### URGE RECRUITS TO DESERT.

#### Inflammatory Posters Appear on Rouen Walls.

A despatch from Rouen, France, says: A large number of posters were placarded on the walls here during Wednesday night, signed by the anti-military association, summoning the new recruits to desert from the army if they believed they were "unable to endure the insults, punishments and vexations of barrack life," and concluding with an invitation to the women of Rouen to form an "international society of mothers to resist the despots of the Government, which is still thirsting for human blood." The police tore down the proclamations.

#### CHARGED WITH ARSON.

#### Arrest of Lieut. Durand, an Emerson, Man., Hotelkeeper.

A despatch from Emerson, Man., says: Lieut. George Durand, lessee of the Stratheona Hotel here, which was burned recently, has been arrested charged with arson. He appeared on Thursday morning for preliminary hearing, and the case was adjourned until tomorrow. Durand is an officer in the 90th Regiment, Winnipeg, and has always been very highly thought of.

#### CAVALRY IN BAD WRECK.

#### Five Killed in a Rear-End Collision Near Troy.

A despatch from Troy, N.Y., says: in a rear-end collision between a regular passenger train and a heavy train of Pullman cars containing the fifteenth United States Cavalry from Fort Ethan Allen, five passengers were killed and a score or more injured on the Boston & Maine Railroad, just outside Troy late on Thursday. The cavalry were on the way to Cuba.

#### PERFORMANCE BEFORE KING.

#### Dutto, Anarchist, Posed as Entertainer—Was Generously Rewarded.

A despatch from Milan, Italy, says: Posing as a professional entertainer, Dutto, a notorious anarchist, was given permission to give a biograph show in the palace. After the performance King Victor Emanuel shook hands with Dutto, who was generously rewarded. It was not till some time afterwards that the police found out that the entertainer was Dutto, the anarchist. Great excitement prevailed when it was known that the King was placed at the mercy of this man. The police are supposed to be taking statements.

## THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafeo's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

TOWN COUNCIL.

Council Chamber

Oct. 5th, 1906.

Council met in adjourned session on Thursday evening.

The reading of the report of the Provincial Auditor on the finances of the town was continued.

On motion the matter of the approach to the swing bridge was left in the hands of the Street committee with power to act.

On motion the council agreed to go down to the covered bridge and see what repairs are necessary and that the street committee be authorized to complete repairs decided on.

Mr. A. P. Bell, of Salem, applied to the Street committee for material to build a walk four feet wide and fifty feet long. Request granted.

On motion the clerk was instructed to notify Mr. Bell that his rent \$5.00 was due.

On motion the Street committee were instructed to obtain the advice of the town solicitor re the continuance of the Canningfactory sewer and act on his advice.

A by-law to amend the by-law appointing a collector of taxes was read a first time, appointing Wm. Rankin, collector of taxes, at a salary of \$200 and postage, and stipulating that the collector pay all moneys collected by him into the Merchants' Bank to the credit of the corporation. The by-law was put through its various stages and finally passed.

On motion the clerk was instructed to prepare a by-law for the appointing of a treasurer of the Town of Napanee.

Petition of J. T. Grange and others for a light was referred to the Fire, Water and Light committee to report.

On motion no action was taken on the petition of C. W. Guess and others for a cement walk on Bridge street.

On motion the clerk was instructed to forward all accounts to the chairmen of the various committees as soon as they are presented to him.

On motion the matter of registering the Electric Light Plant was left in the hands of the Fire, Water and Light committee.

King Sol's Departure.

For the winter means a greater amount of indoor life, and naturally an increased amount of reading, sewing &c. by artificial light. Under such circumstances there is a tremendous strain on the eyes. We want to preserve your eyesight. Impaired vision scientifically corrected at The Medical Hall—FRED L. HOOPER.

A TUG OF WAR

One of those delightful and interesting pictures that brings sunshine to one's home is entitled "A Tug of War," and has been selected by the Family Herald and Weekly Star of Montreal as their annual gift to subscribers this season. It is a beautiful gravure, 22 x 29 inches, on the best plate paper. It certainly is a gem "worthy of the best place on the walls of any home. When one sees the picture and learns that it is given absolutely free to all who subscribe to that great family weekly there is no longer cause to wonder why the Family Herald and Weekly Star has five times the number of readers of any other weekly in the country. Any person remitting one dollar for a year's subscription to the Family Herald and Weekly Star of Montreal will get the picture free, and from the demand we learn you cannot get your dollar in too quickly. "The Tug of War" is a high class production and would command a high price if sold in the stores, but it is reserved for Family Herald subscribers.

E. J. POLLARD, Agent.

The hilarious musical farce comedy, "A Bell Boy," was presented at the opera house Wednesday evening. The show is all that is claimed for it, and is full of funny situations from beginning to end. Johnny Galvin, as Patey, and Ella Galvin, as Kitty, took their parts to perfection, while Ned Nelson, as Denis Dugan, and Jas Grady, as MacCowan, kept the audience in roars of laughter. The songs were all good and the scenery, with electrical

Frontenac is rejoicing over free roads, as inaugurated on the Kingston and Napanee road but if the end be like that of the Lennox on this thoroughfare, it will be an evil change for the traveller. The Kingstonians who drove to Odessa fair had an object lesson. The same profuse rain had fallen on the Frontenac end, to Westbrooke, as on the Lennox end westward. To Westbrooke, they drove along an almost dry roadbed, smooth and well-dressed. Beyond that was a continuation of mud, ruts, and attempts at that. This was the climax of thirty years of free roads in Lennox. And it is not a poor county in any way.—Whig.

teed.

**MADOLE & WILSON.**

Nationals defeated Americans in the second baseball game at Chicago in the world's championship series by 7 to 1.

The inquest inquiring into the cause of the death of Engineer Blain of the G. T. R., met on Wednesday evening and again adjourned until this evening.

Jas. Wilson, the remanded pick-pocket, appeared before Judge Price at the Court House, on Tuesday, and was remanded to come up for sentence on Oct. 30th.

Miss Laura Mitchell, lately of the Bell Telephone company, Napanee, was married on September 21st, at Hillyard, Wash., to R. E. Thompson, a former resident of Camden East.

all that is claimed for it, and is full of funny situations from beginning to end. Johnny Galvin, as Patey, and Ella Galvin, as Kitty, took their parts to perfection, while Ned Nelson, as Denis Dugan, and Jas Grady, as MacCowan, kept the audience in roars of laughter. The songs were all good and the scenes, with electrical effects, were very pretty indeed.

The Executive of Lennox and Addington S. S. Association will meet in the Western Methodist church, Napanee, on Saturday, Oct. 13th, at 2.00 p. m. sharp. Object of meeting to arrange for County and Township Conventions, elect delegates to Provincial Convention to be held in Kingston on Oct. 23, 24, 25, 1903, also to transact general business. All S. S. Superintendents and Pastors in the county, with the following officers of the county association compose the executive. President, Mr. M. S. Madole; Vice-pres. Mrs. T. Symington; Mrs. D. E. Rose, Mr. G. A. Dunwoody and S. Gilmore; Treasurer, Mr. C. H. Neville, Newburgh; Sec. Rev. W. Down, Napanee. All of the above are most urgently requested to attend this very important meeting. All S. Schools in the united counties are requested to send collections to Provincial Fund at once.

M. S. MADOLE, Pres.

W. DOWN, Sec.

The Twelfth Annual Convention of the Woman's Missionary Society for the Napanee District was held at Napanee Oct. 4th. Mrs. Rose, organizer for the Tamworth District presided, in the absence of Mrs. Gibson, who was detained at home because of illness in her family. A large number of visitors and delegates were present, nearly every auxiliary in the District was represented. Morning session was opened by Mrs. Downs, of Hay Bay auxiliary. Reports were most encouraging, showing a large membership both Annual and Life, as well as finances. A paper on "Best Methods of promoting systematic and proportionate giving" brought out many points worthy of notice. An impressive memorial service was conducted by Mrs. Grange and loving tributes were paid to departed members. A study of W. M. S. Constitution and By-laws was both stimulating and instructive. Another paper "The relation of Auxiliaries to Mission Bands" was much appreciated for its practical worth and a talk on the study of the Christus Books was also very helpful. The spirit of the Convention was Missionary throughout, and the outlook for the future bright and prosperous.

# Studio Manners Bad.

"Why do you dip your own spoon into the general sugar bowl?" asked the particular woman of the bachelor girl.

"I don't know," replied the bachelor girl plaintively, "unless it is because my studio life is corrupting my good manners. When you eat your breakfast all by yourself and there's nobody else to dip a spoon into the sugar bowl and it's all your own spoon and all your own sugar bowl and there's nobody to see or to care, why, you are almost bound to get careless and forget and dip it into other sugar bowls, aren't you?"

# Sculptors' Potboilers.

They were walking past a beautiful pink and white house in New York whose door cap was most exquisitely carved. The sculptor pointed to it. "My work," he said. "That's the pot-bolling I do while I work on my masterpiece. It is nothing unusual with sculptors to do such work. Two of the finest pieces that were sold to the Metropolitan museum last winter were done by a man whose regular business it is to make door caps."

BOYLE & SON

A meeting of the Napanee Yacht Club is called for Monday evening, October 15th, at 8 o'clock, at J. N. Osborne's barber shop for the purpose of presenting the prizes to the winners, and other general business.

By Order of Commodore.

On Saturday morning while Messrs. Will Hicks, Johnston Wagar and some others were crossing the canal on their way to town the bridge gave way precipitating Messrs. Hicks and Wagar into the water and mud in the canal. They got very wet and the cold water and thick mud did not add any to the pleasantness of the experience.

Chief of Police Gonyou, of Deseronto after a lengthy residence in that town left last Thursday to take the position of Chief of Police at Sudbury. On Tuesday 2nd inst. a large number of his friends in Deseronto assembled in the town hall to bid him farewell and incidentally to present him with a weighty purse of gold. There is much regret at his departure.

Watertown, N. Y., Oct. 11—About three years ago a gold watch was lost on the streets in Napanee, Ont., by Miss Richardson. It was found by a young girl who turned it over to her mother. Efforts to restore it to the owner were unavailing. While Mrs. Eggleston, of Watertown, N. Y., was visiting last summer at Napanee, the watch found came into her possession through an exchange. In some manner the Napanee police learned of the trade, Chief of Police Gaylord L. Baxter recently received a letter from the chief of police at Napanee. Mrs. Eggleston turned the watch over and it was sent back. Yesterday a letter came saying that it would be restored to the owner and that Mrs. Eggleston's watch would be forwarded to her.

brother, Henry Bush.

Almond Brown and family were or  
Sunday calling on friends here.

Mr. and Mrs. Horatio Bell, Desmont  
attended the funeral of Miss Carrie  
Brown.

Mrs. S. Vandewater has returned to  
Parham after spending some time here  
with her mother, Mrs. R. D. Brown.

Mrs. W. Gibens, Mrs. S. Bush, Mrs. C.  
Joyner, and Miss Florence Joyner  
were on Wednesday afternoon guests  
of Mrs. F. E. Brown.

Walter Bush has returned from  
Thompsonville.

Messrs. C. H. Corbett, G. E. and E.  
Ashley, Kingston, recently passed  
through here on a hunting expedition.

Mrs. David Sauls and Mrs. William  
Lemon, Camden East, were on Thurs-  
day guests of Mrs. James Huff.

Mr. and Mrs. Leri Snider, Maple  
Avenue, with Mr. and Mrs. B. Rose on  
Monday.

Mrs. F. E. Brown and Miss Florence  
Joyner were recent callers on Mrs.  
Cyrus Bush, Thompsonville.

**Why He Came.**  
A man rushed into the barber shop  
and jumped into the first waiting chair,  
explaining, "Shave in a hurry." The  
barber was about to apply the lather  
when he noticed the customer's face.  
It had been shaved in spots and looked  
like a wornout hair rug. "I beg your  
pardon," said the barber, "but who-  
ever shaved you did not understand  
his business or must have been near-  
sighted." "That's all right," replied  
the customer rather sharply. "Every-  
man to his trade—you are a barber—  
well, I am not—that's why I came  
here."

**TO YOU**  
we wish to express our  
thanks, at this season, for  
your past support.

SEE OUR WINDOWS.

### TOWN COUNCIL.

Council Chamber  
October 15th.

Council met in regular session Monday evening. Mayor Lowry, presiding. Councillors present—Simpson Meng, Williams, Graham, Kimmerly, and Normile.

The minutes of the last regular session were read and confirmed.

Mr. Wallace appeared before the council and asked for a small electric light placed in front of his property.

Communications were read from J. Frank Chalmers and Geo. A. Caton, asking that their applications be considered when a new town treasurer was appointed. Laid on table until later in the evening.

The Street Committee reported the account of Madole & Wilson, \$381.61, correct, and recommended payment. They also presented the opinion of the town solicitor in reference to the proposed extension of the Canning factory sewer. In the opinion of the solicitor if the proposed extension was regarded as a necessary street improvement, it could be built and paid for out of this year's street appropriation.

The Fire Water and Light Committee reported in reference to extra electric lights to be placed around the town. They reported that in their opinion lights should be placed in the following places: at the gate of the old saw mill on Water street west, near Howard's, an incandescent lamp; at the corner of Wm Greer's on Water street, an arc lamp; at Wallace's corner near the park, an incandescent lamp; on Belleville road, some place between Presbyterian church and road leading to park, an arc lamp; at Selby crossing, an arc lamp, that an arc lamp, instead of an incandescent lamp, be placed near water tank; that two incandescent lamps be placed at covered bridge, one inside bridge and the other just through the bridge; that several incandescent lights be placed in Clarks-ville; that several incandescent lights be placed at approach to and across suspension bridge. They also asked for further time to report in reference to accounts of Madole & Wilson and R. J. Wales. Report adopted.

Mayor Lowry reported that Mr. R. S. Kelsch was here on Saturday and did not find the electric light plant as satisfactory as it should be when the said plant was taken over by the town and therefore it would be some little time before it was brought up to the proper standard and taken over by the town. In the meantime an endeavor will be made to give an all night service.

M. S. Madole and several other gentlemen addressed the council in reference to a grant towards defraying expenses in connection with the Hay Bay ferry. The amount asked for was \$150.

Moved by Coun. Meng, seconded by Coun. Graham, that the matter be referred to the Finance Committee to consult solicitor and ascertain whether the town could legally grant the amount asked for, and report. Carried.

A By-Law appointing Mr. E. S. Lapum, town treasurer, at a salary of \$100 per annum, was passed. The treasurer will have to furnish bonds to the amount of \$8,000.

On motion the council decided to purchase six more arc lamps from the R. T. Pringle Co., Montreal.

Moved by Coun. Simpson, seconded by Coun. Graham that the motion passed 18th June authorizing the

the sizes are limited in number, we advise you to commence at 9.30 a. m. Special price 59c. pair.

## SEE OUR WINDOWS.

# THE READY-TO-WEAR DEPARTMENT.

The ready-to-wear Coats, Skirt and Waist Novelties that give that dressy distinction are being particularly displayed here. High class garments that are absolutely exclusive, being made and styled by some of the leading New York manufacturers. This week we draw your attention to the new arrivals in Ladies Dress Skirts, colors of black, navy, green, and tweeds, all the new circular effects, and a complete range of prices.

Shawls (knitted) in white, black and grey, from 50c up.

Clouds, Toques, 'Tams, misses and ladies golfers in a range of colors and prices.

Silk Waists, a beautiful and tasteful collection, including white, black, cream, navy, cardinal and sky, made with fine pleats and tucks, and lace insertion, short, 3/4, and long sleeves—prices from \$2.25 up.

For reliable good wearing and washing Staple necessities try Madill's. Such as Shirting, Gingham, Wrapperettes, Flannelettes, Cottonades, Moles, Denims, Lawns, Sheetings, Cottons and Linens. See the range of new Oxford Shirtings, we will be pleased to give you close quotations.

## DRAPERIES

## CARPETS

## LINOLEUMS

We fail to give you an adequate idea of the extent of this Carpet and Floor Covering Department. It would be foolish to take up your valuable time in reading. We prefer your coming and seeing for yourself what we wish to convey. We assure you that time spent here will be valuable time found, as we can show in this ground floor carpet section the most extensive collection of Floor Coverings, Draperies, Curtains, Linoleums, and Oil Cloths in this section.

Seeing is Believing.

Come as our Guest.

Whether you buy or not.

# MADILL BROS.

## Gettin' Wisdom

is a comparatively easy task if you start it while you are young. Don't allow your children's eyes to be ruined for all time because "they look too 'ded' with glasses on."

We'll tell you the truth as to whether they need glasses or not, and charge you nothing for the telling.

Headaches in children are suspicious. We are also the best people to guarantee the quality of our frames, it being part of our Jewelry business to acquire that ability and knowledge.

**ALBERT COLLEGE,**  
Belleville, Ont.

Business School Founded 1877. Practical and thorough. Five complete courses. Many graduates occupying important places as book-keepers and shorthand reporters. \$38.00 pays board, room, tuition, electric light, use of gymnasium and baths, all but books and laundry, etc. for ten weeks, longer period at same rate. Special reduction to students on two or more entering at same time from the same family or from the same place. A specialist in Book-keeping, who is also an expert penman, and a specialist in shorthand in constant attendance. The teachers in the literary department also assist in the work. The high character of the college is a guarantee of thoroughness. Catalogue with specimen of penmanship free. Address **PRINCIPAL DYER, D. D.,** Belleville, Ontario.

On motion the council decided to purchase six more are lamps from the R. T. Pringle Co., Montreal.

Moved by Coun. Simpson, seconded by Coun. Graham that the motion passed 18th June authorizing the building of the sewer from the R. C. Church corner to Bridge street be reconsidered. Carried on the following division:

Yeas—Graham, Kimmerly, Simpson William.

Nays—Lowry, Meng, Normile.

On motion, the motion of June 18th was rescinded.

Moved by Coun. Meng, seconded by Coun. Graham that the Finance Committee be empowered to take all necessary steps in reference to installing the new treasurer in his office. Carried.

Moved by Coun. Kimmerly, seconded by Coun. Simpson, that Mr. J. F. Chalmers be engaged to open up a set of books for the electric light plant, and keep the same for the balance of the year, at a salary of \$75.

Moved by Coun. Kimmerly, seconded by Coun. Simpson, that J. F. Chalmers be engaged as secretary to the electric light plant until Jan. 1st, 1907, at a salary of \$75. Carried.

Moved by Coun. Williams, seconded by Coun. Simpson, that the electric light plant be known as "Corporation of Napanee Light, Heat and Power Co." Carried.

The clerk was instructed to write Mr. Johnston, Belleville, and have him come to Napanee and inspect the electric light meters.

The following accounts were ordered paid: J. J. Graham, hack fare for insane person \$1.50; Chas. Pollard, poundage \$1.00; S. Kelly, cartage 60c; E. Kelly, cartage 30c; I. Vanalstine, freight \$11.90; P. Bergin, stone \$2.40; R. Mill postage, etc., \$2.97; A. T. Harshaw, insurance, \$17.50; Madill Bros. 75c; F. S. Wartman, pump, \$4.00; T. Pybus, work, \$3.00; Canada Express Co., 65c; Dr. Ward, medical attendance, \$6.00.

Council adjourned.

## McINTYRE'S CORNERS.

Mr. Thomas Prest is improving his residence by painting it. Mr. D. A. Dennis is doing the work.

Miss Bata Bell, Walnut Grove, entertained a few of her friends on Wednesday last, it being her birthday. Among the guests were Miss Grace and Egbert Sharp.

Mr. and Mrs. Damon Snider were guests of David Boyce on Sunday.

Mr. and Mrs. J. W. Boyce were at Odessa on Friday last.

Mr. Whan and family of Portsmouth at his sister's Mrs. John Howie.

Mr. and Mrs. Will Weese, of Switzerville; Mr. Reid and Miss May Thompson spent a few days at W. P. Sharpe's.

Mrs. Storie is the guest of her brother D. Thompson, Walnut Grove.

Mr. and Mrs. Edward Smith are the guests of Miles Martin, Florida.

Miss Margaret Calcutt, of Chicago, is the guest of Miss Lizzie Thomas.

## Rapid Travelling

One of the rays of light emitted from Radium is said to travel 40,000 times faster than a bullet. You get the greatest amount of light and the least smoke from our special grade of American Coal Oil. Try one gallon. The Medical Hall, FRED L. HOOPER,

## Too Busy to Whistle.

It is said the art of whistling will soon be counted among the lost unless there is a revival of the cheery spirit that seems to be forsaking men. Nobody whistles as he works in these strenuous days. He has too much on his mind to pucker his lips in a whistle. Nor does he hum or sing to himself for that matter. Life is, if not downright sad, too busy for that joyous and unconscious expression of contentment.

# THE EXPRESS.

LAWRASON & CO.

\$1 per Year in advance: \$1.50 if not so paid.

DA—FRIDAY, OCTOBER 19th, 1906

## THE VERDICT.

The Coroner's Jury inquiring into the death of Engineer Frank Blaine, rendered their verdict on Friday evening. Following is the verdict:

**AN INQUISITION**, taken for our Sovereign Lord the King at the Town Hall situated in the Town of Napanee in the County of Lennox and Addington on the 21st, 24th and 28th days of September and the 3rd, 10th, and 12th days of October, A. D. 1906 in the Sixth year of the Reign of our Sovereign Lord, King Edward VII.

Before me George Hoyle Cowan Esquire, one of the Coroners of one said Lord the King for the said County on view of the body of Frank Blaine then and there lying dead, upon the oath of Edwin Smith Lapum, Dudley Leicester Hill, Franklin Wellington Van-Dusen, Ezra Pringle, John Patrick Ellison, Frank Henry Carson, Ernest John Pollard, Patrick Gleeson, Henry W. Kelly, Samuel Casey Dennison, John William Hambly, James John Minchinton and Martin Ten Eyck Vanslyck, good and lawful, men of the said County, duly chosen and who, being then and there duly sworn and charged to inquire for our said Lord the King, when, where, how, and by what means the said Frank Blaine came to his death, do upon their oaths say,—

"That the said Frank Blaine came to his death on "September the Twenty-first, 1906, by being crushed between the "Engine and tender of No. 2 Express at the Belleville Road "crossing on the G. T. Railway near Napanee.

"That the accident was caused by the lack of facilities afforded by the Grand Trunk Railway Company in not furnishing "sufficient siding accommodation in the Napanee yards for the extremely long trains which they run.

"Also That the Conductor and Engineer of Freight "Train No. "781" should have used better judgment in the handling "of their train."

In witness whereof, as well the said Coroner as the said Jurors aforesaid have here unto set and subscribed their hands and seals the day and year first above written.

(Sgd) G. H. Cowan,  
Coroner.

At Wallace's Red Cross Drug Store—Bayer's Own Soap 25c Box; 3 packages Dye or any other dye 25c; 3 tins Gillette's Razor 25c; 3 lbs Washing Soda 5c; 12 lbs. Ordinary Sulphur 25c; 8 lbs. All Medicines advertised in the Express fresh and good at Wallace's.

## A Tree of Many Powers.

The ash tree is rich with superstition. The old charlatans of the middle ages used it in their love potions, and the damsels of ancient times believed that it would enable them to make their sweethearts true and help them to discover their future husbands. The inhabitants of Iceland still look with dread upon the use of mountain ash as fuel. Their belief that it will make enemies of all who gather round a hearthstone on which it burns is deep seated and was once almost universal in Europe.

their better than it will make enemies of all who gather round a hearthstone on which it burns is deep seated and was once almost universal in Europe.

Superstitious seekers after good luck may still be found invoking the spirit of the even leaved ash, after the manner of the ancient tree worshippers, with the verses:

Even ash, I do pluck thee,  
Hoping thus to meet good luck;  
If no luck I get from thee  
I shall wish thee on a tree.

#### The Philosopher's Sport.

A balloon trip gives one a sense of utter and complete stillness and also a beautifully serene feeling of aloofness from men and tiresome matters, a contempt for the puniness of earth and an unbounded sense of sociability and camaraderie with those with whom one is basketed aloft in those few square feet of wicker. It is a philosopher's joy, ballooning, the sport of the scientific, and the idea that it provides a new thrill or curdles the blood of jaded and sinful butterflies may be good enough for the halfpenny press, but not for the wisecracks of the Aero club.—Bystander.

#### Lucky Horseshoes.

There is a right way and a wrong in the picking up of a horseshoe. I was walking with a country bred boy along a Somerset lane and saw one lying in the crumbling summer rut. "There is a horseshoe," said I. The lad sprang forward, but stopped suddenly before his fingers touched the iron. "But I won't pick it up," said he, "or I shall spoil your luck." It may perhaps have been only a point of etiquette, but he assured me that a horseshoe of my finding could bring luck neither to him nor to me if he touched it before me.—London Standard.

#### Which Was It?

The governor was puzzled. "Look here," he said, turning to his private secretary. "Can you tell me whether this note comes from my tailor or my legal adviser? They're both named Brown."

The note was as follows:

I have begun your suit. Ready to be tried on Thursday. Come in. BROWN.

#### Flowers for Napanee.

The famous Dale Estate florists, the largest on the American continent, will continue their agency at The Medical Hall. Hyacinth bulbs of the choicest variety, field grown Carnations, Roses, Floral designs &c. delivered on shortest notice.

F. L. HOOPER.

#### Sixty Weeks for \$1.75.

Don't put off until to-morrow the matter of subscribing for THE YOUTH'S COMPANION. The publishers offer to send to every new subscriber for 1907, who at once remits the subscription price, \$1.75, all the issues for the remaining weeks of 1906 free.

These issues will contain nearly 50 complete stories, besides the opening chapters of Hamlin Garland's serial, "The Long Trail"—all in addition to the 52 issues of 1907.

Whatever your age, six, sixteen or sixty, you will find THE COMPANION to be your paper. It touches every worthy interest in life—every interest that promotes cheerfulness, develops character, enlarges the understanding and instils ideas of true patriotism.

Full illustrated Announcement of THE COMPANION for 1907 will be sent to any address free with sample copies of the paper.

New subscribers will receive a gift of THE COMPANION'S Four-Leaf Hanging Calendar for 1907, lithographed in twelve colors and gold.

Subscribers who get new subscriptions will receive \$10, 200.00 in cash and many other special awards. Send for information.

THE YOUTH'S COMPANION

141 Berkeley Street Boston, Mass.

to send by post prepaid or to deliver to Herrington, Warner & Grange, solicitors for the Executrix of the said Charlie Wright Snider, their names and addresses and a full statement and particulars of their claims and nature of the securities, if any, held by them.

And further take notice that after the said 1st Day of December, A. D., 1906, the said Executrix will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which she shall then have notice, and that the said executrix will not be liable for the said assets or any part thereof to any person or persons of whose claims notice shall not have been received at the time of said distribution.

HERRINGTON, WARNER & GRANGE,

# THE HOLY RUSSIAN CAUSE

## "Go Ahead, Brothers; Death to the Rebels and Hebrews."

A despatch from St. Petersburg says: M. Dubrovin, President of the Union of Russian People, made a remarkable address at Odessa on Wednesday. He spoke to a band of 300 armed members of the union who had carried him on their shoulders to the railroad station on his departure for Kiev, and said:

"In the name of our beloved Emperor I bless you. The holy Russian cause is the extermination of rebels. You know who they are and where to find them. Clear the Russian soil of them. The Russian people want neither constitutions nor Parliaments, but orthodoxy and autocracy. Go ahead, brothers; death to the rebels and Hebrews."

After M. Dubrovin's train had left the band of 300 rushed down the principal streets of the city, shouting "Death to the rebels!" "Death to the Hebrews!" All shops were at once closed and the Hebrew population was in a condition of panic and terror throughout the night. The tactful measures taken by the prefect, however, prevented further disturbances.

It was announced on Wednesday afternoon that Captain Koreneff, commander of Fort Constantine, on the mainland near Cronstadt, whom the mutineers during the uprising of August 1 succeeded in wounding while attempting to capture the bridge connecting the fort with the island, will be tried by a court-martial, charged with inactivity in the performance of his duties. Nine more officers of the fortress artillery have resigned.

### DISCIPLINE WAS LAX.

An idea of the lax discipline prevailing at Sveaborg fortress may be formed from the fact that the officers allowed the agitators who organized the mutiny to live in the barracks with the soldiers and distribute revolutionary proclamations. The sedition which permeates the whole fortress artillery, as well as the engineers and other special branches of the service is considered to be mainly due to the license allowed the agitators. The military authorities consider that these branches of the army are wholly unreliable, but they think that the cavalry and light artillery can be depended upon, and that the revolutionary propaganda has made comparatively slight progress among the infantry regiments.

Continued naval mutinies are regarded

by the commissions as being unavoidable under the present conditions. Even wearers of the St. George's Cross, which is conferred, like the British Victoria Cross, for acts of extreme bravery and devotion to duty, are affected. One of these was condemned to death recently at St. Petersburg for disobedience of orders and striking an officer.

After a long investigation Colonel Semanovski of the Rostoff Grenadiers, which mutinied in December last, has been relieved of duty and will be tried by court-martial on the charge of laxity in maintaining discipline in the regiment.

### DEATH FOR TERRORISTS.

A despatch from Lodz, Russian Poland, says: Five terrorists, sentenced to death by drum-head court-martial, were hanged here on Wednesday.

The employees of the street railroads, the school teachers and the newspaper employees have joined the men in all the factories who went on strike on Tuesday against trials by drum-head court-martial.

At Bendzin on Tuesday five socialists were tried by drum-head court-martial and shot for armed resistance to arrest.

### BANDITS' BULLETS FATAL.

A despatch from Warsaw, Russian Poland, says: John Gadomski, editor of The Gazeta Polska, and the most prominent of the Polish newspapermen, who was shot by bandits on Tuesday evening, died on Wednesday.

### MILITARY CONSCRIPTION.

A despatch from St. Petersburg says: The Social Democrats have assumed the direction of the organized movement for the refusal to perform military service, which the Constitutional Democrats at their convention at Helsingfors decided to avoid. At a secret and largely attended meeting of the Central Committee of the Social Democrats at St. Petersburg on Thursday it was decided to begin the work immediately among conscripts of 1906, who were notified to appear for enrollment, and endeavor to induce them to refuse to join the colors. The presses of the Revolutionists are printing thousands of the Social Democrats' proclamation, and an organized effort will be made to reach every man on this year's list of conscripts.

Minneapolis, Oct. 16. — Wheat—Dec., 73½c to 73¾c; May, 75¾c; No. 1 Northern, 75¾c; No. 2 Northern, 73¾c; No. 3 spring, 71c.

### CATTLE MARKET.

Toronto, Oct. 16.—Trade was brisk at the City Cattle Market this morning. The run was heavy and the demand for all kinds of cattle good, with prices steady to firm.

Export Cattle.—Choice, \$4.60 to \$4.75; medium, \$4 to \$4.15; bulls, \$3.75 to \$4; light bulls, \$3 to \$3.50; cows, \$3.50 to \$4.

Butcher Cattle.—Choice, \$4.25 to \$4.50; medium, \$3.75 to \$4; common, \$3 to \$3.25; cows, \$2.50 to \$3; bulls, \$2.25 to \$2.75.

Stockers and Feeders.—Choice stockers, \$3.25 to \$3.50; common, \$2.50 to \$2.75; bulls, \$2 to \$2.25; heavy feeders, \$3.60 to \$3.75; short-keep, \$3.75 to \$3.85.

Milch Cows.—Quotations are unchanged at \$40 to \$50 for choice and \$25 to \$35 for common; springers, \$25 to \$40.

A bar room was raided near Glace Bay, N. S., and the proprietors arrested.

# Fashion Hints.

## WHITE SAILOR SUITS FOR WINTER.

Tailor suits of white broadcloth and serge are made with a touch of black. One long redingote in broadcloth had a black silk collar, with a little white embroidery. White cloth princess costumes are trimmed with black velvet in the shape of revers; straps, pockets, cuffs, and collar. Sometimes all of these appear in one gown. Another white serge street costume was in Eton shape, and had vest and cuffs of black silk laid over with white lace and white cord. It was finished with white silk buttons, with loops of corresponding cords, and was worn over a white lace blouse. Both white serges and cloths made for spring wear are reduced now because soiled, and as they clean beautifully and promise to be more worn this winter than even last they are a specially good investment. An all white cloth, with long redingote, which had been marked well over \$100, was bought the other day for \$30 by a woman who intended it for winter wear with black lynx furs. Another gray spring cloth, cut in the same shape, was brightened with red cloth laid over with black and white braids in narrow rows, and will be worn this winter with black furs. It is predicted that the redingote will be as popular as ever because of the tight lines upon which skirts are fitted. Most of them show a seam down the back and a few new ones are shown with a flounce set on just below the knees.

A new autumn model was made in brown faced cloth, with braid of the same shade all down the front, with just a thread of gold interwoven. It was cut with a seam below the waist, having hip pockets outlined with braid and gold, and was finished with a military collar of gold braid. The skirt was quite plain, and braided to hide the front seam, fitting beautifully on the hips and just touching the ground all around, where it was slightly full.

## THE MANNISH MODEL.

Even in the dressier types of tailormade there is a struggle between the very fussy styles, that suggest feminine frivolities, and the plain and severe style, that strongly hints at the mannish ideas that are the foundation of the plain and severe type of tailored costumes.

One of the best applications of the military mode is seen to advantage in a design of Perduoux of Paris, one of those French tailors who are capable of the cleverest sort of compromises in conflicting modes. The coat is in a deep shade of sapphire-blue broadcloth—the satin-faced kind—while the skirt shows the same shade, plaided with green, brown, and a black satin overstripe. The coat follows the form known as "Continental military." The collar is of the stock variety, close and tight around the throat, the vest, of braided white broadcloth, being built up to meet and to match this collar. The fronts are relieved back, the better to display the fancy waistcoat. A broad silk braid trims the coat, and the buttons are embroidered with an Empire laurel wreath to add to their beauty. The skirt is rather a novel cut, the front and back showing a bias seam at the centre and unbroken from belt to hem. The sides are circular in cut, the fullness increased by the addition of a circular flounce, applied with a piping of black satin. The sleeve accords with the severe military style, being of an easy fullness at the top, and finished with a braid and velvet trimmed cuff at the wrist.

## THE PONY JACKET.

That fetching little pony jacket which,

# THE WORLD'S MARKETS

## REPORTS FROM THE LEADING TRADE CENTRES.

### Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home and Abroad.

Toronto, Oct. 16. — Flour — Ontario wheat 90 per cent. patents are quoted at \$2.70 to \$2.75 in buyers' sacks outside for export. Manitoba first patents, \$4.60; second patents, \$4.10, and strong bakers', \$3.90, Toronto.

Bran—The market is firm at \$15.50 to \$16 in bulk outside. Shorts are quoted at \$18 to \$18.50 outside.

Corn—No. 2 American is quoted at 55½c to 56c on track, Toronto.

Wheat — No. 2 white wanted at 71c east. and No. 2 red at 71c east on

—The market is firm at \$1.15 to \$1.18 in bulk outside. Shorts are quoted at \$18 to \$18.50 outside.

Corn—No. 2 American is quoted at 55½ to 56c on track, Toronto.

Wheat—No. 2 white wanted at 71c east, and No. 2 red at 71c east on G.T.R., without offerings. No. 2 mixed, 69c bid on G.T.R., without sellers. No. 1 Manitoba hard offered at 82c track, Port Huron; No. 1 Northern at 80½c track, Port Huron, and No. 2 Northern at 78½c, without bids.

Barley—No. 2 wanted at 49c on a 5c rate to Toronto, without sellers, and No. 3 extra 47½c bid at 78 per cent. points, with sellers at 48½c.

Peas—No. 2 offered at 78½c east, and 71c outside, without bids.

#### COUNTRY PRODUCE.

Beans—\$1.75 to \$1.80, and primes at \$1.60 to \$1.70.

Honey—Strained quoted at 19 to 11c per lb., and combs at 82 per dozen.

Hops—New quoted at 18 to 23c.

Hay—Car lots of No. 1 timothy are quoted at \$9.50 to \$10 on track, Toronto; and No. 2 at \$8.

Straw—\$5.50 to \$6 per ton.

Potatoes—Quoted at 70 to 80c per bag in quantities.

Poultry—Turkeys, fresh killed, 14 to 18c. Chickens, dressed, 10 to 12c; alive, 8 to 10c per lb. Fowl, alive, 7 to 8c. Ducks, dressed, 10 to 11c; do, alive, 9 to 10c per lb.

#### THE DAIRY MARKETS.

Butter—Pound rolls are quoted at 22 to 23c; tubs, 18 to 20c; large rolls, 18 to 20c. Creamery prints sell at 24 to 25c, and solids at 22½ to 26c.

Eggs—Good stock bring 19 to 20c per dozen.

Cheese—Prices rule at 13½ to 14c, the latter for twins.

#### HOG PRODUCTS.

Dressed hogs in car lots nominal. Bacon, long clear, 12½c per lb; in case lots; mess pork, \$21.50 to \$22; sifort cut, 82½.

Hams—Light to medium, 15½c; do, heavy, 16c; rolls, 12½c; shoulders, 11½ to 12c; backs, 17½ to 18c; breakfast bacon, 15 to 16c.

Lard—Ticces, 11½c; tubs, 11½c; pads, 12c.

#### BUSINESS AT MONTREAL.

Montreal, Oct. 10. Special.—Grain.—Business on local Grain Market continues quiet. The market for oats is strong, making an advance of 1c a bushel; No. 2 are quoted at 40½ to 41c; No. 3 at 39½ to 40c, and No. 4 at 38½ to 39c. Flour—Manitoba spring wheat, \$1.60; strong bakers', \$1.10; winter wheat patents, \$1.10 to \$1.25; straight rollers, \$3.75 to \$3.80; do, in bags, \$1.65 to \$1.75; extras, \$1.50 to \$1.60. Feed.—There was no change in condition of market for millfeed, prices being firm under a steady demand and small offerings. Manitoba bran, in bags, 82c; shorts, 82½ per ton; Ontario bran, in bags, \$19.50 to \$20; shorts, \$22.50 to \$23; milled middling, 82½ to 82½ per ton; straight rollers, 82½ to 82½. Provisions.—Barrels short cut mess, 1.2 to 82½; half-barrels do, \$11.75 to \$12.50; clear fat backs \$23.50; long cut heavy mess, \$20.50; half-barrels do, \$10.75; dry salt long clear bacon, 12½ to 12½c; barrels plate beef, 82 to 83c; half-barrels do, \$6.50 to 87c; barrels heavy mess beef, \$11; half-barrels do, 86c; compound lard, 8 to 9½c; pure lard, 11½ to 12c; kettle-rendered, 12½ to 13c; hams, 14 to 15½c; breakfast bacon, 15 to 16c; Windsor bacon, 15 to 15½c; fresh killed abattoir dressed hogs, \$9.50; alive, \$6.75 to \$6.90 per 100 lbs. Eggs—Selects, 22c; No. 1 candled, 18 to 19c. Butter—Choicest creamery, salted and unsalted, 23½ to 23½c; medium grades, 23 to 23½c. Cheese—Ontario, 13 to 13½c; Quebec, 12½ to 12½c.

#### UNITED STATES MARKETS.

Toledo, Oct. 16.—Wheat—Cash, 75½c; Oct., 75½c; May, 77½c; Jan., 81½c. Corn—Cash, 49c; Oct., 49c; Dec., 48½c; May, 42½c; Jan., 43½c. Oats—Oct., 36c; May, 36½c; Jan., 37½c.

St. Louis, Oct. 16.—Wheat—Oct., 75c; May, 72½c; Jan., 77c.

\$2.75; bulls, \$2 to \$2.25; heavy feeders, \$3.60 to \$3.75; short-keep, \$3.75 to \$3.85.

Milch Cows.—Quotations are unchanged at \$40 to \$50 for choice and \$25 to \$35 for common; springers, \$25 to \$40.

Calves.—Unchanged at 3½c to 6½c per lb.

Sheep and Lambs.—Export ewes, \$3.25 to \$3.60; bucks and culls, \$3 to \$3.50; lambs, \$5.50 to \$6.25.

Hogs.—Unchanged at \$6.50 per cwt. for choice selects and \$6.40 for light weights and fats, fed and watered.

#### CEREALS IN POTTED MEATS.

Inland Revenue Department Publishes Its Analysis.

A despatch from Ottawa says: The Department of Inland Revenue issued a bulletin on Thursday on the subject of potted meat and bologna sausage. It mentions that the canned meats examined some time ago were further subjected to microscopic examination, and also to the test for foreign coloring matter. Only in one instance was any of the latter detected, the sample being made in Montreal. All the other potted meats referred to were free from dyes. As regards the presence of corn starch and of meal from cereals of some description, it was detected in 23 samples purchased in the Province of Quebec and 23 secured in the Maritime Provinces. In the Province of Ontario 37 samples had been so manipulated, the majority of these being of Chicago manufacture, but some were from Toronto and Montreal. Eight samples purchased in Vancouver were found to be similarly affected.

Chief Analyst McFarlane remarks that many of the samples of canned meats described in the previous bulletin contained additions of meal or flour, which cannot, of course, be regarded as adulteration if the fact is indicated by the name of the article. It may be that this is done by the use of the word "loaf" in a great many instances. But the words "potted," "dressed," etc., do not justify the addition of flour or cornmeal, and articles with such names cannot be regarded as otherwise than adulterated if they have received additions of cereal products. Two of the samples examined under the microscope consisted of maize flour and two almost exclusively of potato starch.

Of 32 samples of bologna and other sausages examined 11 contained dyes and five preservatives.

#### THE WHEAT MOVEMENT.

C. P. R. Receipts Nearly Nineteen Million Bushels.

A despatch from Winnipeg says: The total wheat receipts on the C. P. R. up to date this season amount to 18,863,000 bushels, and 1,123,000 bushels of other grains have been marketed. Thursday's receipts were—Wheat, 495,000 bushels; other grains, 37,000 bushels. On the corresponding day last year 650,000 bushels of wheat and 48,000 bushels of other grains were marketed.

The total amount of grain received up to this time last year was 12,608,000 bushels of wheat and 623,000 bushels of other grains.

#### NEED BETTER MILK LAWS.

Medical Health Officers Advise Provincial Board.

A despatch from Toronto says: A few months ago the Provincial Board of Health sent out letters to the local health officers regarding the difficulties they meet in connection with the milk supply. Since then there has been received a number of replies, in which it is claimed that the various clauses of the Act are inefficient. They also indicate that a better inspection should be made of the milk and dairies, and that the law should be clearer regarding the dilution of the milk, and the uses of the preservatives. These complaints will be placed before the Board of Health by the secretary, Dr. Hodgetts.

will cost \$175,000, and will enlarge the works to provide for an additional force of 500 men. The capacity will then be five locomotives per week.

A bar room was raided near Glace Bay, N. S., and the proprietors arrested and two wagon loads of liquor seized. Within a radius of twenty miles from this spot there must be at least one hundred hotels, bars and resorts where liquor is sold openly although the Scott Act has been in force for many years.

#### GREAT BRITAIN.

Two hundred Barnado children have left Paddington for Canada.

New deposits of coal have been discovered near Dover, England.

The Bank of England has advanced the official money rate to 5 per cent.

#### UNITED STATES.

Clark and McKee collided in a baseball game at Holla, Mo., on Wednesday. McKee was killed instantly.

The steamer Slackwater blew up near Pittsburg, on Saturday, killing three and injuring fifteen men.

Miss Nellie Scott and Mr. Fairbanks, son of the Vice-President of the United States, eloped on Wednesday, and were married.

An American exporter will take advantage of the shortage in the Canadian apple crop to attempt to capture the British market.

A daughter was born to Mr. and Mrs. Edward Deshon Brandegee at their magnificent Brooklyn estate, "Faulkner Farm," near Boston, Mass., on Wednesday morning. Mrs. Brandegee's private fortune is estimated to be \$15,000,000 and her husband is also reputed to be a millionaire.

Warrants were sworn out on Wednesday by Dairy and Food Commissioner Warren for the arrest of the Philadelphia managers of Armour & Company, one of the members of the so-called Beef Trust, charging the firm with the illegal use of boric acid in hams.

As Joseph Siegfried, of Akron, Ohio, was leaving home on Wednesday to go to work his bride of a few months kissed him. A few minutes later neighbors heard the report of a pistol. They found her dead. She was nineteen years of age and despondent because of ill-health.

For the first time since New Orleans was founded, 188 years ago, a modern sanitary and underground sewage system was put in operation Thursday night. The pipes connected are part of a \$24,000,000 sewage, drainage and water system building, which began eight years ago.

#### GENERAL.

Floods in Mexico caused the loss of 123 lives.

Eight thousand rebels have been disbanded in Cuba.

The boycott against American goods has been raised at Hong Kong.

Germany is said to be striving for an alliance with Italy on a new basis.

The French Budget Committee objects to proceeding with the construction of warships under the last appropriation. The civil law wedding of Bertha Krupp took place near Essen, Germany, on Saturday.

Peter Veregin, the Doukhobor leader, is going back to Russia to see Count Tolstol, and intends returning in the spring with a large party of immigrants.

#### PAYS NO TAXES.

Great Increase in Exempted Property in Montreal.

A despatch from Montreal says: That exempted properties are rapidly increasing in Montreal was shown on Wednesday by a report completed at the City Hall. It shows that for the current year the assessed values of property which will pay no taxes to the city amount to no less than \$50,250,000. The exemptions have increased to the extent of ten millions during the past three years.

the top, and finished with a braid and velvet trimmed cuff at the wrist.

#### THE PONY JACKET.

That fetching little pony jacket which, in its original presentations was intended solely for informal costumes, has reached such a pinnacle of favor that one sees it in all classes of material and elaborated to a degree that the original designer scarce even dreamed of. Perhaps its most effective appearance is in the guise of a tailormade, the skirt sharing largely in the extent of elaboration that is lavished upon the coat. The material is one of those in determinate cloth mixtures that presents lines of brown, green, and a deep mokeskin gray, the latter color predominating. The little pony jacket is so cleverly cut that, while as loose as well may be the fetching lines of the waist are clearly defined. This is managed in a series of panels of irregular outlines that meet, with self-covered buttons at the waist, and so emphasize that line. The sleeve is a loose top, tapering prettily below the elbow into a full-length cuff at the wrist. The skirt is likewise paneled, and each alternate panel is strapped in either perpendicular or horizontal lines, so that there is no effect of monotony in the design. The correct length for the coming season's skirts is displayed, and the necessity for the old-time velvet binding as a finish is once more present.

#### BANK'S CAPITAL WIPED OUT.

The Ontario Bank Wrecker May be Apprehended.

A despatch from Toronto says: The losses sustained by the Ontario Bank owing to the speculations of General Manager McGill may total the paid-up capital of \$1,500,000. Mr. McGill admits a shortage of one and a quarter millions. An expert is now conducting an investigation of the books. The general manager, so it is announced, has been submitting false returns to the directors for several years to cover up his speculation. He will in all probability be apprehended. A director of the Ontario Bank states that matters were in such a chaotic state it was really hard to say whether the shareholders would realize 25 per cent. on their stock or would be called upon to pay 25 per cent. or more. He had every reason to believe that the statement presented at the last annual meeting on June 19th had been so prepared as to deceive not only the directors, but the auditors. While there was not the slightest doubt of the culpability of the general manager, it was just a question as to what extent the directors could be held responsible for the acts of Mr. McGill. The director in question said it was a matter of the deepest regret that such a solid and promising institution should be wrecked by the speculative mania of its most trusted official. It was idle to speak of the general manager's operations as investments. They ran the gamut of some of the most speculative stocks on the New York market, and were even carried into the wheat pit at Chicago. Buying speculative issues on margin with a reckless if not criminal disregard for the funds entrusted to his care was a procedure which could not be condoned, and of which the Government authorities must take cognizance.

#### JACK WHITTIER SHOT.

Toronto Man Found Dead Near Sprague, Manitoba.

A despatch from Sprague, Man., says: Jack Whittier, a sectionman, employed by the Canadian Northern Railway at the gravel pit spur, left the camp house last Sunday morning with a rifle, apparently going to hunt. When he did not return on Sunday evening search was made in the woods and on Wednesday evening he was found dead in an old lumber camp about nine miles east of Sprague, apparently shot through the head. Whittier came from Toronto.

## BRITAIN'S NEW BATTLESHIPS.

Will be the Most Wonderful Ever Built for Any Fleet.

A despatch from London says: The Daily Telegraph says it learns that the three so-called armored cruisers, the Invincible, the Inflexible, and the Indomitable, which are now being built on the Clyde and Tyne, are in reality a new type of battleship, having a broadside fire equal to that of the Dreadnought, and a much higher speed. The paper says they will be the most wonderful ships ever built for any fleet, having greater offensive power than any two battleships now in commission, combined with extraordinary speed.

There has been some more or less mysterious secrecy regarding the vessels since they were authorized in the Spring of 1905, as was the case with the Dreadnought, and the present revelations come as a surprise.

The new ships will be 17,250 tons, compared with the Dreadnought's 17,000 but they will be 40 feet longer. Their breadth will be 3½ feet less than the Dreadnought's. Each will carry eight 12-inch guns against the Dreadnought's ten, but their broadside fire will be identical, as the Dreadnought is only able to fire eight of her guns in broadside, while the new vessels can fire all of theirs. They will be equipped with turbine engines designed to develop a speed of 25 knots, but it is likely that on their trials they will develop 27. To provide for this high speed something in the weight of armor has been sacrificed, but otherwise the hulls will be constructed on the same principles as the Dreadnought's.

The object seems to be to enable them to overtake any foreign cruiser and sink it by their tremendous concentrated gun fire. It is expected that they will be shortly launched. When completed they will probably have cost £1,750,000 each.

## WRONG INSURANCE PAID.

Mistake of a Workhouse Clerk Causes Complications.

An error made by the authorities of the Birmingham (England) Workhouse in mistaking the identity of one of the inmates who died a few days ago, has led to extraordinary results.

The name of the dead patient was Harry Brooks. In the workhouse was another man of the same name, and by some mistake on the part of one of the clerks, notification of the death was sent to Mrs. Butt, the sister of the man who is still alive. She replied that the funeral would be undertaken from her house, and immediately arranged with an undertaker to supply the coffin.

The relatives had insured the old man's life, and drew several sums of money for funeral expenses, the societies offering no objection after the official notice of death.

The body, encased in a coffin, was removed to Mrs. Butt's house, and the funeral was about to take place when the undertaker suggested that someone who had known the dead man should identify his body. Mrs. Butt at once offered to do so and the coffin was opened.

Then it was discovered that an extraordinary mistake had been made, the body being that of a much younger man than the brother of Mrs. Butt. The body was at once taken back to the workhouse.

Difficulties have since arisen regarding the money paid over by the insurance companies, who are now asking for its return. The guardians, it is understood, are likely to assist the relatives in the matter, as most of the money was spent in connection with the funeral arrangements.

## GAVE BOUQUETS OF CHLOROFORM.

A Bogus Prince Who Robbed Women in Paris.

## HORSE INDUSTRY OF ONTARIO.

Ontario Department of Agriculture Will Obtain Information.

At the last session of the Legislature the Minister of Agriculture secured an appropriation for the purpose of making an investigation into the condition of the horse industry in the Province of Ontario. This work is now being undertaken by the Department of Agriculture of Ontario and will be commenced early in October. The object of this investigation is to obtain information to be used in deciding as to the best policy to adopt to encourage more extensive breeding of a better class of horses.

Following are the principal points which will be considered in the course of the investigation:

(1) The number, type, quality and breeding of stallions and brood mares in the Province.

(2) What conditions have affected or are affecting the quality and number of stallions and brood mares in the various sections of the Province, and if the effect is for good whether or not the same conditions could be applied in other sections, and if the conditions have not a good effect what could be done to improve them.

(3) What class of horses can most profitably be raised in different sections of the Province under the natural conditions found in these sections.

(4) The system of owning horses by a syndicate and any other plan at present adopted in Ontario other than private ownership.

(5) The views of horsemen generally as to the advisability of a Stallion Inspection Act.

(6) Suggestions from those interested in the horse business as to what can be done to improve conditions of the horse business generally.

In order to procure this information the Province will be divided into eight districts. Two competent and expert horsemen have been selected and allotted to each district. From five to six weeks will be spent in each district by the Committee appointed for that district. The districts will be composed of a number of counties grouped together, the number making up each district being decided by the length of time required to go through a county. Each county will require from four to nine days. The information regarding stallions will be as detailed as possible, each stallion in the Province being inspected. The information regarding mares cannot be got so accurately, but a great deal of information can be procured from the stallion owners in each district as to the number, type and quality of the brood mares, the Committee having an opportunity of confirming this by noting the appearance of the mares seen while travelling through the district. Regarding the other matters of a more general nature, information will be procured by close observation and by conversation with those met by the Committee who may have any knowledge of the local conditions.

In addition to the work as above outlined, it is being arranged to have one public meeting in each county at some point centrally located, and where a special interest is taken in the horse industry. The object of the meeting is to give any person who so desires an opportunity of expressing his views to the Committee. The meeting in each county will be held immediately after the Committee has completed the work in that county.

In each Farmers' Institute district the Secretary has been asked to assist in the work of procuring the names and addresses of the stallion owners and laying out the most convenient route for the Committee to follow while in his district. He has also been asked to accompany the Committee, and to arrange for the public meeting in the county. In cases where the Secretary was unable to do the work, the President of the Farmers' Institute has been asked to make the necessary arrangements. The dates and points at which the public meetings will be held have been selected. Arrangements have also been completed for the dates allowed for each Institute division, and the points

# 1,500 PERISH BY FLAMES

## Awful Scenes Enacted at Wharf at Hong-Kong.

A despatch from Hong Kong says: The steamship Hankow burned at her wharf here early on Sunday morning and 1,500 souls that were penned in the steerage lost their lives. Most of the crew leaped overboard and thus escaped death. The steerage passengers, most of whom were women and small children, were unable to reach the upper deck, as the flames spread to the companionways before the alarm was sounded.

The Hankow carried 2,000 Chinese passengers, men, women and children and seven Europeans, and a cargo, including 300 bales of matting, 500 bales of raw silk, and 400 bales of waste silk. The vessel arrived from Canton at 3 o'clock on Sunday morning, and was shortly afterwards moored at the wharf.

The chief officer reported to Capt. Branch that the ship was afire. The captain then directed the chief engineer to turn on the water through the fire hose. This was impossible, for the reason that within five minutes after the alarm was given the Hankow was ablaze fore and aft. Capt. Branch then awakened the European passengers, who were rushed down the gangway, the ladies in their night clothes.

The crew was compelled to leave the ship, which by this time was a veritable furnace. The Chinese steerage passengers were thrown into a frightful panic. Horrifying shrieks and cries to save their lives were heard, but it was impossible, owing to the inflammable nature of the cargo.

Hundreds were burned to death and many others jumped into the harbor and were drowned.

Responding to signals, the British

cruiser Flora and the naval dockyard despatched contingents of engines and assistance. The land and floating brigades of firemen made herculean efforts to extinguish the flames, which leaped to a height of over 60 feet.

### ONLY A SHELL LEFT.

The British steamer Pow An, which was berthed at the same wharf, was towed out to save her from destruction. A neighboring pier 100 yards distant was burned to the water's edge. Governor Nathan, accompanied by his aide-de-camp, arrived at the scene at 1.15 a.m. Governor Nathan suggested scuttling the ship, but the suggestion was found impracticable.

The fire was brought under control at 6 a.m., at which time only the shell and hull of the Hankow remained. The gruesome work of recovering the dead was then begun. The fire fighters have already recovered 75 corpses. Many of them were huddled together and only singed, while others were incinerated beyond recognition. Of the cargo 200 bales of raw silk were saved, but badly damaged by water. The remainder was totally destroyed.

There are many theories as to the cause of the fire. The first is that the fire was caused by the overturning of the lantern of a Chinese boarding-house runner who came aboard seeking customers. The second was that an opium smoker accidentally set fire to the matting; the third is that it was caused by the crossing of an electric wire. A fourth theory, and one that is considered the most probable, is that the fire was incendiary, and was an outgrowth of a boycott against British river boats.

## TYPHOID STILL INCREASING.

Doctors and Householders Fail to Report Cases.

A despatch from Toronto says: Further reports have been received by the Provincial Board of Health from local health officers, which go to show that typhoid fever has been more prevalent throughout the older parts of the province than was anticipated. In 11 cities and towns outside of Toronto, comprising a population of 50,000, reports indicate that there have been 103 cases of typhoid and six deaths. The cause of such a large proportion is contended by the board to be neglect on the part of the physicians and householders to report the cases to the local health officers. Instances where an undesirable condition of affairs existed are known of in connection with boarding houses where the landlady had nursed the patient and at the same time cooked the food. According to law there is a fine imposed on those householders and physicians who neglect to report.

## FEAR FREIGHT BLOCKADE.

Too Much Wheat to Handle and Now Coal is Wanted.

A despatch from Chicago says: The congestion of freight traffic has increased so fast within the last few days that railway officials fear they are soon to face a blockade. Conditions on the eastern roads, which have not only to handle the business which they originate but have the crops of the west pouring upon them for export, are naturally the worst, but those on the western lines also are rapidly becoming extremely

## BEAR NEARLY GOT HIM.

The Hunter Killed it at a Very Close Range.

A despatch from St. John, N.B., says: Emil Patrel, of Shediac, had a thrilling experience in the woods a day or two ago. He saw a large black bear and fired, wounding it. The bear charged the hunter, who, just as he was about to shoot, fell, and when he got up the bear was only a few feet away. He just had time to thrust the rifle against it and fire, killing the animal as it sprang to grasp him. The bear was a black one, over seven feet high. Patrel and his companion each shot a moose and a bear.

## LICENSED TO CUT TIMBER.

Government Will Receive About \$230,000 From Rainy River District.

A despatch from Toronto says: A number of parties have secured the right to cut timber on a number of berths advertised by the Department of Lands and Mines. The tenderers will pay about \$230,000 in bonuses alone—more or less, according to the timber cut. Most of the timber will be cut for ties, and on this a bonus of five cents additional to bonuses will be paid by the contractors. For other purposes, the dues will be \$2 per thousand feet, board measure. The extra-bonus scheme is a new one, the former method having been to pay a lump bonus. The berths are all situated in the Rainy River District, north of the C.P.R. A number of berths are not yet sold. In Barr township an expert ranger is making an estimate of the proportion of red and

## GAVE BOUQUETS OF CHLOROFORM.

### A Bogus Prince Who Robbed Women in Paris.

An hotel thief who has been systematically robbing English and American women, after presenting chloroformed bouquets to them, was arrested recently at the Grand Hotel, Paris, France.

He called himself "Prince Tschilindro, of Montenegro," and stayed at the best hotels, engaging expensive suits of rooms, and living in luxurious fashion.

His manners were exceedingly polished, and he rarely failed to become acquainted with the most richly-dressed women staying at the hotels. When the acquaintance was sufficiently developed he ventured to offer a beautiful bouquet.

His victim, charmed with the "Prince's" courtesy, smilingly accepted, and gratefully smelt the flowers. She soon after became faint, and had to be led to her room.

The "Prince" then busied himself in rendering her assistance, and in doing so he generally managed to relieve her of a valuable necklace or bracelet.

He was captured in the act of pocketing a costly diamond bracelet which belonged to an American woman who had accepted one of his bouquets. He proves to be a Russian Jew named Ramskeiff.

## BIG BLAZE AT BRANTFORD.

### Starch Works Badly Damaged by the Flames.

A despatch from Brantford says: The Brantford Starch Works, situated about a mile from the city, were the scene of a big blaze on Friday night. The outbreak, which first occurred at about 9 o'clock, was due to combustion, caused it is supposed, through a piece of metal passing through the grinders. The main building, a three-story brick structure, in which is the drying kilns machinery, was entirely destroyed. The damage to the store room was also completely destroyed. The damage to the main building is estimated at \$25,000, and that in the vat department at about \$16,000, a total of about \$40,000. About fifty hands are thrown out of employment. In 1902 the factory was burned down under similar circumstances.

## PATIENT JUMPS TO DEATH.

### Tragic Affair at the Toronto General Hospital.

A despatch from Toronto says: Charles Gould, a typhoid fever patient at the General Hospital, jumped from a window of the ward in which he was confined early on Sunday morning and was killed. When taken in on Friday he was in a very weak and despondent condition. He underwent treatment, and was progressing as well as could be expected. While the attendant was out of his room for a few minutes on Sunday morning, however, he got out of bed, and climbing up eight feet to a window he jumped out, falling thirty feet to the ground. He died in a short time.

Gould was a teamster and had occupied a room at 44 Mercer Street previous to his leaving for the hospital. He was an Englishman new to the country, and the authorities at the hospital have as yet been unable to locate any of his friends.

## MANGLED BY STREET CAR.

### Five-year-old Son of Laborer Killed at Hull.

A despatch from Ottawa says: A shocking accident took place in Hull on Thursday morning on the street opposite Fortin and Gracelle's mica factory, when Horace Boulet, the little five-year-old son of Mr. Joseph Boulet, laborer, living at 20 St. Joseph Street, was struck and instantly killed by car No. 14 on the Hull Electric Railway.

President of the Farmers' Institute has been asked to make the necessary arrangements. The dates and points at which the public meetings will be held have been selected. Arrangements have also been completed for the dates allowed for each Institute division, and the points at which committees will transfer from one Institute district to the one following.

The work should have the sympathy and co-operation of all owners of stations and of all who are interested in the horse industry. It is hoped that the Committees will be given every facility for procuring the information required, and that every person interested will take advantage of the opportunity being given to express his views as to how the horse industry of this Province can best be improved.

## HANDLING THE APPLE CROP.

### Prof. L. H. Hutt Tells How It May Be Done to the Best Advantage.

In commercial orcharding, the business end of the enterprise, that of marketing the crop to the best advantage, is second only in importance to that of producing fruit of the best quality.

It is in this particular that there is the greatest need for improvement at the present time. There are hundreds of apple growers who can grow first-class fruit to every one who can place it on the market when and where it will bring the best price. The growers who make the most out of their apples are those who keep in touch with the best markets at home and abroad. During the shipping season these men watch the market reports daily, and unless prices are satisfactory, they hold their fruit until good prices prevail. The great majority, however, of those who have only apples to sell, wait for some buyer to come along, and sell for whatever he chooses to offer, usually from fifty cents to a dollar a barrel, or a lump sum for the crop on the trees. The latter plan is nothing less than gambling in apples, and, in either case, the grower seldom gets one-half what his fruit is really worth, if it were properly handled.

The remedy for this state of affairs, and what is going to put the apple trade on a better business basis, is for the growers in each apple-growing section to unite and form a co-operative association, through which the grading, packing, and marketing of the fruit may be accomplished. During the past year a number of these associations have been formed in various parts of the Province and the prices obtained by some of them for last year's apples have made the growers enthusiastic over this method of handling the crop.

An effective co-operative association for this purpose involving the selection of an honest, wide-awake business manager, and the erection of a central packing and storage house at the most convenient point for shipment. Through such an organization, boxes and barrels can be purchased wholesale to better advantage than they can be obtained by single individuals; the grower can devote his whole attention to gathering the crop at the proper season and delivering it in good condition at the central packing house, the association relieves him of all care and responsibility in grading, packing, and marketing; and with this work in the hands of expert packers, the grade of fruit can be made uniform, and the packing can be done properly, which, in time, inspires confidence in the purchasing public. In short, the co-operative system of handling the apple crop, under proper management, assures the consumer of a better product, and realizes to the grower a greater profit.

Count Witte declares emphatically that he would never undertake the direction of Russian finances.

The Lebaudy airship has been sent from Paris to Chalais, Department of Charent, where it will be employed as a school balloon to train crews for France's aerial war flotilla.

to face a blockade, Conditions on the eastern roads, which have not only to handle the business which they originate but have the crops of the west pouring upon them for export, are naturally the worst, but those on the western lines also are rapidly becoming extremely serious.

With the approach of winter the movement of coal has grown heavier, aggregating the congested conditions which already existed, and traffic men say that they do not know what they will do for cars when the year's enormous crop of corn is ready for market, as it will be now in a short time. A line belonging to one of the big eastern systems on Tuesday had orders for 4,235 cars which it could not fill.

## SHOVED FOOT INTO PRESS.

### A Doukhobor Terribly Injured at Rosethorn, Sask.

A despatch from Rosethorn, Sask., says: With his left leg broken and the flesh from the back of the leg between the knee and ankle literally torn to shreds, Henry Podanilnikoff, a Doukhobor, was rescued from a hay pressing machine on Thursday morning west of the town. Instead of taking a fork he used his foot, pushing the limb in too far and it was caught in the machine.

## EARTHQUAKES CONTINUE.

### Sicily Still Suffers From Severe Shocks.

A despatch from Palermo says: The earthquake shocks in Sicily continue, and are causing serious damage to dwellings and churches, some of which have fallen. Caccamo sustained particularly heavy damages, and the condition of the people of that town, Termini and Trabia is extremely distressing. They have been camped in the open air for weeks past. In the last five days more than one hundred shocks have been felt at Trabia.

## STICK PIERCED HIS BRAIN.

### Boy Victim of Peculiar Accident at Fort William.

A despatch from Fort William, Ont., says: Wilbur Williamson, 12 years of age, residing near Murillo, is dead here, the victim of a peculiar accident. He was holding the belt on a wood saw in place with a short stick, when the stick caught in a wheel and was thrown against the boy's head with such force that it pierced his brain, he died six hours later without regaining consciousness.

## OTTAWA'S POPULATION.

### Assessment Returns Show an Increase of 2,452 Over Last Year.

A despatch from Ottawa says: The Assessment Commissioner on Friday handed out the figures of next year's assessment of the city. The present population of Ottawa is placed at 67,572, an increase of 2,452 over last year. The total assessment for 1907 is \$41,390,000, an increase of \$3,416,825.

## DREADNOUGHT IS FAST.

### Makes Twenty-two Knots on Her Trial Trip.

A despatch from Spithead, England, says: The battleship Dreadnought anchored here on Tuesday evening, after a full steam trial lasting eight hours, in which she reached a speed of twenty-two and one-quarter knots, the mean average being twenty-one and a half. Her horsepower which is nominally 23,000, went as high as 28,000. These results were achieved in the face of increased load resulting from preparations for a seagoing trip, which added two feet to her draught. The engines ran smoothly and with good reserve power, no forced draught being used. Complete absence of vibration was again recorded.

## ATTACKED CONSTABLE.

### A Desperate Fight in a C. N. R. Bunk House.

A despatch from Port Arthur says: In a desperate fight at the C. N. R. bunk house at Port Arthur on Tuesday evening Robert Newcombe, C. N. R. constable, suffered severe injuries. A man named John Donovan, slightly intoxicated, started the disturbance in a house, and was called to order by the constable. Together with several companions, they set upon him, knocking him to the ground, where they kicked and pounded him. His arm was also broken at the elbow. Donovan and his colleagues have been arrested.

## CATTLE HAD LUMP JAW.

### Winnipeg Confiscated and Cremated Twelve.

A despatch from Winnipeg says, The City Veterinary visited the C. P. R. stock yards on Wednesday, and after inspecting the cattle intended for the local abattoirs condemned and confiscated twelve animals suffering from lump jaw. He had them killed and cremated. Large numbers of these animals are coming in at present in shipments from the ranges, and the authorities have to be very vigilant.

## REVENUE INCREASING.

### That for Nine Months Equals Collections for Last Year.

A despatch from Toronto says: The revenue of the Provincial Secretary's department this year is expected to reach \$1,000,000. Last year it totalled \$670,000. The increased revenue finds its cause in the number of things, principally in the high liquor license and the forcing of delinquents to pay for the maintenance of relatives in asylums. About \$125,000 will be added to the provincial money pile as a result in the advance in license fees.

## PRAIRIE LINES READY.

### Expect to Have Track Laid in Time to Move Next Year's Crop.

A despatch from Winnipeg says: Over 50 per cent. of the grading between Portage la Prairie and Saskatoon, on the Grand Trunk Pacific, has been completed, and 30 per cent. is finished between Saskatoon and Edmonton, 600 miles. It is expected that the grading on all the lines west of Winnipeg will be finished this month. The work of laying the steel will be proceeded with in the spring, and the officials who have charge of the construction work hope to have all the prairie lines ready for operation in time to help with the transportation of next year's wheat crop. Survey parties are now at work locating a number of branchlines out of Yorkton, one of which it is said will run to Regina, and the other to Hudson's Bay.

## CHOLERA IN HOLLAND.

### Two Fatal Cases Reported Near Rotterdam.

A despatch to the Paris Eclair from Rotterdam on Wednesday announces that two fatal cases of cholera have occurred at Bloetebudel and Oranjewoud, near there.

# IS THERE A BLACK PERIL

## THE BLACK MAN MAY EXTERMINATE THE WHITE.

### The Natives of South Africa Are Coming to Realize Their Strength.

Most people in this country believe that the natives of South Africa have been subjugated once for all, and that henceforth we will peacefully colonize the country, until it becomes a great and prosperous white man's continent, like America, says London Answers. British blood has been freely shed and British money spent in hundreds of millions to accomplish this object, and the idea seems grotesque that the end of it all should be the subjugation of the whites by the blacks.

But there are many men, well qualified to judge, who prophesy that the time will surely come when the white man will have to quit—unless the black man gives him leave to stay.

The recent trouble in Natal showed that many of the natives believe they can already resist the rule of the whites. No one can say at the moment how far this feeling extends. If it were to spread throughout the land, and produce a general uprising of the native races, it is extremely doubtful whether the white colonists could hold their own in the contest. Britain would have a war on her hands equal to, or greater than, the Boer War.

### FIVE BLACKS TO ONE WHITE.

Of course Britain would carry it to a successful issue. But the question is, if the rebellion is delayed for a generation or two, would even the power of Great Britain be equal to the task? We cannot see so far into the future, since much will depend on whether we shall have jealous enemies to guard against nearer home, or whether we have the help of other white nations. But it is most interesting to see how things stand.

At present the natives exceed the white population in the proportion of nearly five to one in South Africa. In other parts of the continent white men are a mere handful against many millions. It is in South Africa, however, the battle of the races will be fought, if ever it is fought. And if the war were to commence now a population of 5,000,000 blacks would be pitted against a population of 1,200,000 whites. But the relative numbers vary in the different sections of the country.

Orange River Colony would be practically safe, for in that district there are 593 whites to 1,000 blacks.

### THE DANGER OF CIVILIZING.

Cape Colony and the Transvaal would give a good account of themselves, since in each colony there are 318 whites to 1,000 natives.

In the other divisions it is difficult to see how the whites could escape extermination if left to their own resources.

Natal has only 87 white people to 1,000 natives.

Rhodesia has 23 whites to 1,000 blacks. Bechuanaland has only 8% and Basutoland 2½ (2.6) whites to each 1,000 natives.

If all South African whites joined forces, they could oppose 224 to each 1,000 natives, or a little more, since white male adults are relatively more numerous. But a foe so much more powerful than the whites, and so recklessly brave, might possibly fight a winning battle, even in their present uncivilized state. The Saturday Review goes so far as to say that an alliance of the Zulus and Basutos alone might threaten the existence of the whites.

Fortunately, the possibility of such an alliance may be put out of account just at present. We have a choice between keeping the natives always ignorant,

South Africa, says: "All the power of who spent a quarter of a century in all the whites in South Africa will be insufficient to put down the natives once they are armed with modern weapons and their leaders and some fraction of the rank and file have acquired education." This is the opinion of Dr. Carl Pearson, Mr. Selous, and many others who have reasoned out the question.

### CARPENTER OF THE ORIENT.

#### His Skill in Using Bolo—How the Filipino Has Adopted Foreign Tools.

Throughout the Oriental countries generally the superiority of the carpenter in the skilled labor class is marked and the rule has held good in the Philippines, certainly until very recently. The untutored Filipino carpenter knows but one tool, the bolo. It is simply a knife with a blade about 15 inches long, 3 inches wide and one-eighth of an inch thick, single edged. It serves as a plane, hatchet, chisel and hammer, and with it the native carpenter, left to himself, will build an entire house, not of the native variety merely, but in accordance with the design characteristic of foreign houses in the Philippines, which are frequently quite elaborate in construction and finish.

The Filipino carpenter has now been compelled to adopt the nail first among modern auxiliaries of the trade, and, unless otherwise provided, the blunt back of his bolo, one-eighth of an inch wide, is made to serve as a hammer face with much better success than would be supposed. In his original cult the nail plays no part and all attachments between members of a structure are made with bamboo strips or rattan. Nearly all the native houses, and many foreign, are even now built in this way, and apparently the only serious defect as compared with nailing is the time consumed in the construction. The native carpenter has much difficulty in mastering the operation of foreign tools at first, and it is necessary always to guard against a return to his loved bolo.

It is rarely more difficult, and is generally less so, to teach an absolute novice, if he be of the same natural intelligence, the use of modern tools of carpentry than an artisan wedded to the use of the bolo. This probably accounts for the rapidity with which other craftsmen, such as machinists, masons, etc., have overcome the early lead of the carpenters. They were unhandicapped by predilection of any binding sort unless we except earth and rock excavation.

The native method of rock excavation is to build a fire to heat the rock. Then cold water is thrown on and the cracked stone removed when the process is repeated. This process, as it does not imply practice in the use of a certain tool, is readily discarded by the native for the drilling and blasting method. They quickly learn the use of mining hammer and bar drill and the best of the natives will get out as much as the average white workman. On earth excavation there is reluctance in adopting one of the white man's tools, his shovel, chiefly because of injurious effects on the soles of bare brown feet.

As a machinist the native shows decided aptitude, but fails in steadiness as a general rule. Otherwise he displays, as do also the carpenter and the mason, the deep rooted fault of wastefulness of materials. So great is this fault now that the saving to the employer in cheap wages as compared with those paid to white workmen is oftentimes swallowed up in waste of materials. This is but another manifestation of immaturity which may perhaps be rectified wholly or in large part by suitable manual training at an early age.

# DREAM OF THE KAISER

## GREAT BRITAIN INSPIRED HIS NAVAL AMBITION.

### The Kaiser Is Determined to Have a Great Fleet of War Ships.

The Kaiser's dreams of Sea Power—a fair reality now—are the subject of an extremely interesting article by Mr. Archibald Hurd in the Nineteenth Century. In these days, when there is so much talk of the naval rivalry of Germany and Great Britain, it "gives one to think," that the Emperor's naval inspiration came from England, and that he is a British admiral. Mr. Hurd says: "Old residents of Portsmouth still remember a boy whom they occasionally saw walking about the dockyard looking at the ships with admiration and rapt attention. His greatest delight seemed to be to watch the great ironclads moving in and out of Spithead. Sometimes he would find his way on board vessels of the royal navy. This lad was none other than the German Emperor. . . . At this time the newly-created German empire had practically no fleet. During the Franco-Prussian war the few ships which flew the flag of the North German confederation, a striking design of black and white and red which is to-day the emblem of the Kaiser's growing navy, were so weak that they could take little part in the conflict, and France was able to blockade the North Sea coast with impunity. The memory of these recent events was still fresh in the mind of the future emperor when he visited England and watched the activities of the British navy, with

### ITS FAR-FLUNG SQUADRONS,

in all the seven seas, protecting day by day, not only the motherland, from fear of invasion, but safeguarding all her over-seas possessions. He determined that he, too, would have a great fleet when he succeeded to the throne of the German empire. This is no imaginary picture of the ideas which were taking root in the mind of the ruler of the German empire of to-day. He once confessed that from his earliest youth upward—from the day when I ran about as a boy in Portsmouth dockyard—he had been greatly interested in British ships. . . . The German fleet as it will exist less than ten years hence as a war force, probably second only in power to that of Great Britain, will be recognized as the most amazing achievement in statecraft ever accomplished by a single man, for the fleet will be literally the Emperor's personal creation. . . . A few years ago he referred with some pride to the persistency with which he had pursued his aims in spite of popular disfavor. At the launch of the 'Kaiser Karl der Grosse' he said, 'If the increase in the navy which I demanded with urgent prayers had not been consistently refused me during the first eight years of my reign—I did not even escape derision and mocking at the time—in how different a manner should we now be able to promote our prosperous commerce and our interests overseas.' He had to wait for many years before he saw his dreams reaching fruition.

"As the British Parliament is the mother of all popular representative institutions, so the British navy is

### THE MOTHER OF NAVIES.

If the records of most of the great fleets of the world are searched it will be found that in greater or less degree they owe their birth to the more or less direct assistance of British naval officers, oft-times acting with the direct authority of the British admiralty—while in every fleet in the world even to-day may be found ships designed by British brains and constructed of British ma-

# KING EDWARD'S SWORDS

## HIS MAJESTY HAS A SPLENDID COLLECTION.

### Has An Army of Historic Blades—Many Are of Priceless Value.

Few of the treasures of Buckingham Palace possess one-half the romantic interest of the little armory of swords and daggers—gifts to King Edward from one hundred of the princes and nobles of India.

It is difficult to separate truth from legend, but of the great antiquity of most there can be no manner of doubt. Here is a little story which will illustrate this fact:

### MADE IN ENGLAND.

A sword in the collection of the Maharajah of Jaipur was sold to an English nobleman, together with the scroll setting forth its history:—"This blade was a talisman in the family of Sadat Chandra Khan, descending from father to son for eighteen generations, until the coming of Nadir Shah, who slew Sadat Chandra Khan and gave this sword to his vizier, who sold it at Benares."

The Englishman on his return was one day showing his prize to a visitor, who, after scrutinizing the blade under a powerful magnifying glass, began to laugh.

"I think someone has been drawing a long bow as well as handling a sharp blade," he said. "There is the maker's name here—'Johan Smith, York.'"

It seemed an awkward revelation, but there was a good deal more to be revealed. "Johan Smith" was indeed the maker, but he lived and flourished in the thirteenth century, and made this particular sword—and perhaps one or two others in the present collection—for some crusading knight who, falling in the Holy Land, left his weapon to be handed on to the infidels in the Far East.

### ZULFICAR'S SWORD. . . . .

One blade is a superb example of Damascus watering, damasked with esutcheons and inscriptions in Persian. At the back is inscribed the maker's name—Mohammed Ibrahim. The hilt is damasked in gold with the Shah inscription, "La fatta Ma Aly, la Shia Ma Zulficar" (There is no saint but Ali, no sword but Zulficar).

The history of this blade goes back five hundred years, and to recount all the notable and blood-curdling deeds of Zulficar would require a ponderous volume.

Histories of swords exist in many parts of the East. In the Royal Library at Teheran there is a manuscript of two hundred pages recounting the exploits of a Damascus blade, probably far inferior in prowess to the one just mentioned.

Everywhere we come across fine European sabres fixed in Indian handles. After a time the deep grooves were made deeper and utilized in strange fashion, being filled with loose pearls which ran to and fro when waved. These were called "the tears of the enemy."

### BLADES FROM INDIA.

A curious sabre worn by successive Rajahs of Mandi is of Indian make, and in the middle of the blade are circular apertures containing small leaden shot, visible through six narrow slits on either side of the blade. This shot is said to have been extracted from the heart of a foe, and Ramchander Ghose relates many instances of swords manufactured especially to contain such fatal leaden pellets.

Perhaps the most fascinating of all in the collection is the sword of the renowned Sivaji, founder of the Mahratta dominion in India. Several native pens have attempted to write the history of this wonderful blade, but it is doubtful

goes so far as to say that an alliance of the Zulus and Basutos alone might threaten the existence of the whites.

Fortunately, the possibility of such an alliance may be put out of account just at present. We have a choice between keeping the natives always ignorant, dooming them to a perpetual condition of barbarism, on the one hand, and, on the other, educating and civilizing them. We have chosen the latter course. That is the British way of doing things. But education, if it makes the natives more law-abiding, also gives them a sense of their rights as men. The natives are no sooner educated than they demand equality with white men. In Cape Colony large numbers of them have been given the privilege of voting at elections.

Now, the South African native is very intelligent. In the primary schools black boys are the equals of whites. In some parts of the country they are most eager to learn. The time must come when the South African black men will be as educated as the American negroes. We cannot then refuse their demand then for the franchise. But if we give it to them, after the example of the United States, they will out-vote the whites and rule the country. And if we refuse it, they will inevitably fight for it. Then, according to the belief of Englishmen who have given thought to the matter, will come the doom of the white colonists.

#### WHAT OUR BLACK BROTHER WANTS.

It is difficult to realize such a catastrophe, but the proof of its inevitable occurrence is perfectly logical. The black men are not like the Red Indians of America, or the Australian natives, who have withered under the influence of these white invaders. It was the weakest of the African natives who were captured and sold as slaves to the American planters. These weaklings have grown to be a great power in their new home. The stronger African natives, living in the climate they are used to, will develop into a still more powerful community. They are courageous, capable, virile, and intelligent. They are increasing in numbers faster than the whites. They make splendid soldiers when capably led. "With knowledge of the facts," says M. R. Jones, in the Nineteenth Century, "nobody in his senses imagines it possible to stem the rising flood of native aspiration in South Africa."

But what is the black man's aspiration? There is no mistake about it. For some years past a number of negro missionaries from America have been stumping the country, and telling the natives what they must fight for. They go as representatives of the African Methodist Episcopal Church, and are the authors of the Ethiopian movement.

#### AFRICA FOR THE NATIVE.

This Ethiopianism has, on the surface, for its object the freeing of the native Christian churches from European control. But wherever the missionaries go—Natal, the Cape, the Transvaal—they carry political unrest, and have been condemned by the authorities. The Natal Government discussed the question of expelling these American negro missionaries. After the war they were forbidden to enter the Transvaal or Orange River Colonies. But trouble arose with the United States Government, and they have lately had a free hand.

What they are teaching the natives is that "South Africa is a black man's land, and that they must stand up for their rights." The official organ of the Society, published in the United States, says "the Kaffirs will eventually boss the white man, and whipl the British back to the Thames."

We have to add to the effect of this teaching that the native respect for both British and Boer was considerably lowered during the war.

#### WHEN EDUCATION COMES.

The result of it all is that the natives are coming to realize their great strength, and this feeling will continue to increase. Lieutenant-Colonel Elsdale,

#### HELPING THE OUTCAST.

##### How They Were Helped to a Better Life in a New York Mission.

The Water Street Mission, of New York was well-known to the "crooks" of the country, and many of them, when they did not know where else to go, went there. Some of them, says a contributor to the New York Tribune, were converted to a better way of life. It was the habit of the manager to assist these men in every possible way, to secure work for them, and now and then to entertain several of them at dinner in his room over the chapel.

On one occasion a woman from a distant city was visiting the mission, and took dinner with the superintendent, Mr. Hadley, and a number of the converts.

"Why, Mr. Hadley," she said, "I am astonished that these people are such nice-looking people."

"Don't talk so loud," replied Mr. Hadley. "Every one here has a record except my wife and you and our missionary. The longest one is twenty years in the penitentiary."

The woman was so astonished that she nearly forgot to eat her dinner.

It was Mr. Hadley's custom to go to Sing Sing prison every year to speak to the prisoners. One year he spoke to them in this wise:

"You men are going to leave here soon. They'll give you a suit of clothes and ten dollars, and you'll drift down to New York and you'll get drunk. When your money is all gone, you'll pawn your clothes. Then you'll probably stand round and ask hard-working people to give you a nickel to buy food. When you can't get it you come down to Water Street, and I'll give you a passport. You say to me, 'April 13, 316.'"

The passport was the date of his visit to Sing Sing and the street number of the mission. Three hundred came to him that year and gave the passport. Many of these men became honest, and helped their companions to follow their example.

#### CONUNDRUMS.

What three letters turn a girl into a woman?—Age.

Why is a defeated army like wool?—Because it is worsted.

When is a soldier not half a soldier?—When he is in quarters.

Why is life like this riddle?—Because you must give it up.

What do we often catch but never see?—A passing remark.

Where can happiness always be found?—In the dictionary.

What is the largest room in the world?—The room for improvement.

Why is a kiss like rumor?—Because it goes from mouth to mouth.

What is the way to make a coat last?—Make the vest and trousers first.

When is money damp?—When it is due in the morning and missed at night.

Why did Adam bite the apple Eve gave him?—Because he had no knife.

When is a lawyer like a beast of burden?—When drawing a conveyance.

Who may marry many a wife, and yet live single all his life?—A clergyman.

What is the oldest piece of furniture in the world?—The multiplication table.

Why is sympathy like blind man's buff?—Because it's a fellow feeling for a fellow mortal.

Why is a kiss like a properly-divided sermon?—It requires introduction, two heads, and an application.

What is the difference between forms and ceremonies?—You sit upon one and stand on the other.

Domestic: "Please, ma'am, can you give me my character?" Mistress:

"Certainly, Bridget; but what do you want it for? You are surely not going to leave without giving me notice first?"

Domestic: "Oh, never fear, ma'am. I'm not thinking of leaving you; but my sister's going to service, and wants the loan of it."

owe their birth to the more or less direct assistance of British naval officers, oft-times acting with the direct authority of the British admiralty—while in every fleet in the world even to-day may be found ships designed by British brains and constructed of British material by the skilled craftsmen of these islands. It was to England that Peter the Great came to watch the shipbuilding on the Thames, and it was with a large body of British mechanics that he returned to Russia to create a fleet with which to defend his empire and extend its borders at the point of the gun. The prestige of the Russian navy in the seventeenth century was due entirely to the skill and daring of Scotsmen. The Griegs of four generations, Admiral Elphinstone, Lord Duffus Gordon and a number of other Scotsmen entered the service of the czar and did splendid service, and some of the descendants of these pioneers of the Russian navy may still be traced in the fleet, while at Barrow-in-Furness even to-day a mighty cruiser for the Czar's new fleet is under construction. The American navy was, of course, of distinctly British origin; so were the fleets of many of the South American republics; while, as everyone knows, the seeds of the sea power of Japan were sown by British naval officers, including, first and foremost, Admiral Sir Archibald Douglas, and the excellence to which the Chinese navy once attained was also due to British instruction under a Scotsman, Admiral Lang.

"In the case of the modern German fleet the British admiralty had little part in its upbuilding, but British naval power fired the imagination of the Kaiser, and it was a kindly present made years ago by

#### KING WILLIAM THE FOURTH

to the then King of Prussia, which first directed the Kaiser's thoughts toward the sea. When the present Emperor was a boy one of his favorite recreations was to sail a beautiful model of a British frigate on the lake at Potsdam. This little ship, of excellent workmanship, was sent as a present to the then ruler of Prussia early in the last century by our sailor King and was a never-failing source of pleasure to the present German Emperor as a youth. From his earliest years at home and in England the future ruler's aspirations were always towards the sea, and we can now see that his dreams of later years, which have taken such tangible shape, were largely due to those vivid impressions of sea power which he obtained during his visits to England, and which reached their climax in 1889 when Queen Victoria, on the occasion of his visit to the Cowes' Regatta, conferred on him the unique rank of admiral of the fleet. Though other foreign princes and monarchs have since been made honorary officers of the British navy, the German Emperor remains to-day the only officer holding supreme rank. The commission conferred upon the Kaiser was purely honorary, but His Majesty has never concealed the pride with which he dons the British uniform with its deep gold cuffs and cocked hat, and he can boast that he is the only ruler of a foreign state who has ever commanded the British navy in modern times."

There is much else in Mr. Hurd's excellent article which shows how closely he has followed the Kaiser's career as a British admiral, and the creator of the navy, which in ten years' time it is expected will be second only to the British.

"What do you mean, sir," said an infuriated man in the crowd, "by sticking your umbrella in my eye?" "Oh, no," replied the cheerful offender, "you're mistaken. I assure you." "Mistaken!" he roared. "Do you mean to say that I don't know when my eye is hurt? Why hang it, sir, I saw you do it. How the dickens can I be mistaken?" "I assure you that you are, nevertheless," was the easy rejoinder. "You may know when your eye is hurt, but you don't know my umbrella. This is one I borrowed."

especially to combat such human pellets.

Perhaps the most fascinating of all in the collection is the sword of the renowned Sivaji, founder of the Marhatta dominion in India. Several native pens have attempted to write the history of this wonderful blade, but it is doubtful if any could relate a tithe of its adventures.

It, like many others, was borne in the Crusades by an English knight, and may, perhaps, be of English make. It is a straight, one-edged blade, with two grooves on either side, in one of which the holy letters "I.H.S." are stamped thrice. It is said that Sivaji claimed it to have been the sword of Godfrey de Bouillon himself.

#### THOUGHT HIM HONEST.

##### Deceived Australian Girl Rescued from Criminal Husband.

An Australian girl named Bessie Smith, who had married a Frenchman and afterwards found him to be an Apache, or thief, has been rescued by the police under dramatic circumstances.

The police were searching for stolen property at a house frequented by "Apaches" when they heard a woman shriek. They burst open a door and found a young woman lying on the floor with a severe wound in her shoulder. The window was open, and on looking out they saw an "Apache" named Pellier, escaping by the water pipe. He was "wanted" for several crimes, but got clear away over the roofs.

When the police returned to the woman they were astonished to find that she spoke nothing but English. She said that she first met Pellier when she was employed at a shop in Melbourne. He was always smartly dressed and apparently respectable, and he won her affections.

Some time after their marriage Pellier decided to come to Paris, using his wife's savings for the passage money. When they arrived here she found out that her husband was a criminal and her life has been a misery to her ever since.

When she heard the police in the lodging-house she thought she saw a way out of her tortures. She shrieked for help and her husband stabbed her before he decamped through the window. She is being befriended by an English Protestant family named Stone, who live at Passy.

#### A PRISON MYSTERY.

##### Puzzles Police and Excites Public in Tyrolean Town.

Two heavily veiled women, whose identity has not been established, are wanted on a charge of having poisoned a wealthy old woman at Schwarzach, a small town near the Swiss-Austrian frontier.

The old woman, who kept a large number of servants, had lived in the house for two years, and a few days ago was found dead in bed. A post-mortem examination of the body was made and arsenic was found in the stomach. As there was at the time no evidence to arouse suspicion of foul play, the jury returned a verdict of suicide.

The other day, when the funeral was to have taken place, the police gave orders that the body was not to be removed, and it appears that they had received information that on the night of the old woman's death, two unknown, heavily-veiled women were seen leaving the house.

An inspection of the house showed that a window had been forced open from the outside. The police now believe that the old woman was poisoned and are looking for her mysterious visitors.

Keeper: "Hi, boy! You can't catch fish here without a permit." Boy: "Well, I'm getting on well enough with a worm!"

## VANCOUVER'S LOST MINE

### MYSTERIOUS STORE OF THE PRECIOUS METAL.

Many Attempts Made to Find Waterfall, Where Fortune Lies Waiting.

A despatch from Leech River, B. C., announcing a rich gold discovery brings up for speculation once more the subject of whether the really rich pockets of gold on Vancouver Island have yet been discovered. In the Leech River excitement, about 1869, a gold excitement in which several Nanaimos were living figured, more than a million and three-quarter dollars' worth of gold was taken out.

From time to time one runs across old traditions of the fabulous deposits of gold that exist on the island. It's an old story, that of the days when the Nanaimo Indians hunted with bullets made of pure gold, but it is perhaps new to some of the younger generation. Chief Louis Good, of the Nanaimo tribe of Indians, tells the following story:—

"There is a story handed down from generation to generation in my tribe," said he, "that somewhere on Vancouver Island and about its centre, and reached from Englishman's River, there is a little stream of water and near its end a small falls. Over this falls the gold literally falls all the time, and one has only to hold a basin under it to catch some of the golden grains that turns the white man's head. At the base of the falls is almost a solid mass of gold, and many an Indian has been known to cut away in solid chunks, the precious metal.

"Out of the gold the Indians used to collect here they made golden bullets, little realizing the value of the precious stuff, with which they had hunted their daily bread. Indeed, when a small boy, I knew of a deer that was killed by an Albern man, and when it was cut up a solid gold bullet was found under the hide, showing that the deer had been shot once before."

Chief Good says there are dozens of Indians who can confirm this.

It is a matter of common history that in 1862 two Frenchmen left Victoria to hunt for this stream of gold. They returned some months later with well filled pockets, but no money or persuasion could induce them to undertake the trip again, and their faces blanched with terror whenever they spoke of the wonderful Eldorado stream.

This bears out the superstition of the Indians that this stream is supernatural—something to be dreaded—and on that account very seldom have any of them ever been induced to join the various parties that have set out to investigate the wonderful workings.

"Jack" Mahoney, of Big Qualicum, forty miles north of Nanaimo, left years ago to guide an expedition to the place, but it was a failure. About eighteen years ago a party of Nanaimo men consisting of Messrs. Harry Austin, Sam Fox, George and "Joe" Sage and Robert Freethy, left to see if there was any gold in the vicinity, but found the roads leading to the creek almost impassable and were compelled to retire.

Chief Good is an excellent believer in the tale, and many times has tried to locate Midas stream. He first heard the story when a small boy, about forty-five years ago. When quite young, and old Indian who professed a knowledge of the location of the stream offered to show some of the more daring of the Indians who were brave enough to forget the superstition regarding the ill-luck that would attend any one attempting to find it just where the stream was. Louis Good was in the party, but the night after they left Parksville, twenty-three miles from Nanaimo, it snowed heavily, and the old Indian guide, taking this as an omen of bad luck, turned back, and not until the following year could he be persuaded to guide the party

## The Pastor's Thanksgiving

Something had to be done! Such was the verdict of the good people of Elmville on a certain October Sunday. The treasurer, a young man who had recently come to the village, had made a financial statement that morning, upon which certain persons felt very much scandalized. Such a thing had never been done before—not even thought of; then it revealed the fact that the Rev. Wesley Norwood had received but \$51.75 for six months of faithful service.

"I don't believe in bringing up such matters in the religious services of the church," growled Brother Cook, who always protested that it was a waste of money to pay the minister so much salary.

"I quite agree with you," responded Mr. Barnes. He was not a member of the church, but attended because it was a respectable thing to do—gave you standing. "If these things must come up every Sunday, I shall attend church elsewhere."

Notwithstanding this, it was generally agreed that it was a shame, and something must be done. But when things had gone in a haphazard way so long it was no easy matter to face right about. After several weeks of deliberation, the necessary something seemed as far from accomplishment as ever.

"It is too bad that they do not collect the pastor's salary," remarked Mrs. Hunter at the Ladies' Aid meeting. Who she meant by "they" was not entirely clear, inasmuch as she was one of the officers.

"If no one else will do anything, we must," rejoined Mrs. Allen: the various members nodded approval.

It was soon planned. The pastor had received \$51.75; they would pay him \$95.25—make it even \$150—and have enough left in the treasury for incidental matters. On Thursday evening of next week, which was Thanksgiving, they would invite themselves to the parsonage and have a good time while making the pastor happy. It would be easy to prepare something extra while getting ready for Thanksgiving. It was to be a grand secret; not a soul but members of the society should know a word of it.

"May I not tell John?" stammered timid Mrs. Addie Day. She was but recently married and disliked to have ever so little a secret from her husband. Scornful glances from the more mature matrons warned her that she was about to lose caste in the society, and she quickly subsided.

At the close of the business meeting of the Young People's league, the president made a close scrutiny to assure himself that all present were members; he then proposed that, as "they would not do anything," the league take up the matter.

"I understand that we have nearly \$60 in the treasury; we could pay the pastor \$48.50—bring the salary up to 100—and have enough left to pay all bills and begin the new year out of debt. If we do this, I suggest that we observe the utmost secrecy and make it a complete surprise." All readily agreed to the plan and pledged the proper reticence in the matter.

Four of the most faithful met after prayer meeting to discuss the situation, and decided that they must at once collect \$248.25, the balance necessary to pay the six months salary due. This they proceeded to do so quietly that no one surmised a general canvass was being made. Before Sunday the entire amount was secured.

Friday, after school, the Junior leaguers met and decided that inasmuch as the grown-up folks would not help in

When they were seated at the dinner table, it was almost with a rebellious heart that thanks were offered for the scanty meal before them. They had never thought to keep the day with such a meager fare as this. Under the plea of pressing work, Mr. Norwood presently left the table and repaired to his study, where he worked all the afternoon on a funeral sermon he was to preach the next day. He had quit his own dinner that the children might not go hungry. Between him and his sermon fabled visions of hungry mouths, and eyes pleading stronger than in words for food. The sermon would not be made.

The wife succeeded no better with her own work. Some one kept running in all afternoon until she declared positively that she would not go to the door for another caller, which resolution she broke almost immediately. At last when the day's tasks were ended and the children, tired and hungry, had been early sent to bed, she came and laid her hands in her husband's and looking into his eyes said fearfully:

"Oh, Wesley, I am so tired! Everything has gone wrong to-day. The children never were so naughty before. What will people say about Robble fighting? The flour-barrel is empty, the potatoes are all gone, and we have not a thing in the house for breakfast, only bread and butter; and the grocer sent us word yesterday that we could not have another thing until we paid him. What shall we do?" After which lengthy and somewhat incoherent speech, she laid her head on his shoulder and found refuge in tears.

"Never mind, dear; the Lord will provide;" then he slowly added, as if in an afterthought, "somehow."

A few minutes later, Pastor Norwood was bowing to the organist, who slipped a check into his hand and said properly: "With the compliments of the choir." Just as they were seated, the door-bell rang again, and this time the Junior league marched en masse and the astonished minister stood speechless with check in either hand. Then the older league came, and presently the Ladies' Aid, and last of all the trustees, all adding their offerings and crowding the small rooms. Each party looked stiffly askance at the others, wondering by what trickery their secret had become known. Mrs. Hunter glanced sharply at Addie Day as if to accuse that young matron of treachery; but that timid soul shook her head so violently that it seemed she would dismember it, in asseveration that she did not tell her John. Suddenly a Junior audaciously shouted:

"I say! why can't we go to the church and have a good time." It was the suggestion that averted impending war. A fire soon removed the chill from the room and the lights shone brightly on a reconciled and happy gathering. By the time the younger Norwoods had been routed from their beds and brought to the occasion, tables were spread in the Sunday school room, where all for the second time that day enjoyed a Thanksgiving feast. After an hour of social discourse and song, the treasurer arose and said:

"A few days since, our pastor had received but a mere pittance for many months of faithful labor. While he had wrought earnestly for the church and its societies, so that, for the first time in years, all were in a prosperous condition, he unselfishly forgot his own needs. No, no! Brother Norwood, you must permit me to finish. Then one society and another, by some strange coincidence, conceived the thought of giving the pastor a pleasant Thanksgiving surprise. It is needless to say we have surprised each other quite as well. But best of all, I find that in the few days of unconscious co-operation, we have increased the amount paid on salary to just \$500. This shows what we can do if we all work together. I move you, as a congregation, that we increase our pastor's salary from \$600 to \$800 a year."

It was carried with a rush, even Brother Cook assenting. Pastor Norwood arose, and, with tears of joy trickling down his cheeks, thanked them simply. Some said they sung the doxology as

## LONDON EAST END IDYLL

### LOVE IN LOW LIFE OF THE WORLD'S METROPOLIS.

Dolly Had a Temper and Refused to Part with the "Goods"—Amusing Courtship.

How they make love and unmake it in the mysterious East End was explained before Judge Smyly in the Shoreditch County Court, says London Daily Mirror.

William Harry Strong, who had served his country in South Africa, succumbed to the bright eyes of Miss Dolly Manning, whose mission in life is to make ostrich feathers lustrous and curly.

The course of true love runs no more smoothly in the East than in the West. There was a lover's quarrel, and the match was broken off.

Now Strong sued for £12, which he alleged that he had paid for articles for the home which was fated not to be.

According to the solicitor's statement, the courtship—or, as they prefer to say in the East End, the "keeping company"—lasted three and a half years. All the arrangements for the wedding were made when

#### STRONG BROKE OFF THE MATCH

He had purchased from time to time articles for the future household, and deposited them with his future mother-in-law. Miss Manning now refused to give them up.

Strong was called, and told how he used to work from morn till dewy eve in order to save money.

Strong's counsel: All with the idea of marriage?—I thought I should be happier married, as I was leading a lonely life.

Asked about the two small brackets, 2s. 6d., Strong said he bought them in Petticoat lane one Sunday morning.

Mr. O'Connor (for defendant): Did you buy the rest of the home there?—No, but you might do worse. There are lots of useful things to be picked up there. I never took particular notice of what things cost.

Continuing, plaintiff said that he gave all his money to the defendant to bank for him as she was a nice girl, and he trusted her. She only earned 15s a week, so he disputed that she could have saved £10. He earned as much as 2s a week. He gave her a gold watch and other presents, but did not ask for those back.

#### DOLLY NO DAY-DREAMER.

But why, if she was such a nice lovable girl, did you refuse to marry her?—Because of her temper. I said to her: "Look here, Dolly, we shall have to part, as if we marry we shall be rowing and fighting every night."

For the defence Miss Dolly Manning, who smiled broadly to her lady friends in the court, said that all she had from the plaintiff was £3 or £4, the other money she saved by working overtime.

She was quite willing to marry plaintiff, but he never mentioned marriage when he gave her the keeper ring. She supposed it was intended as an engagement ring. "That is the way we generally take these things," she added in parenthesis.

"Isn't it really your mother who is the cause of this quarrel?" asked the solicitor, "and that no furniture was given up?"

"No," was the reply; "my mother only said, as any right-minded mother would that she would crush him if she could." (laughter.) "The plaintiff had threatened to hit me," she added.

"Well," remarked the Judge, "it looks as though it is all for the best that these two loving hearts have been parted. If one was going to be crushed and the other hit, besides rowing and fighting, it does not look like being much of a happy home." The case was adjourned.

## WHAT OTHER PAPERS SAY

Wharton Echo.

It will be interesting to see if Premier Whitney probes the Corruption to the bottom in London. While a certain number of Liberal workers are not showing up very well, it would be edifying to know just how the workers on the other side would shine under similar limelight. The Liberals want this investigation to go on.

Campbellford Despatch.

Denominations are making provisions for hundreds of thousands to carry on missionary work. We trust that a proportion may be used in the neighborhood of London, and also in the effort to convert some of our members of Parliament. Christianity and its teachings have been sadly neglected in the early training of many of them. Notwithstanding this they seem to get there all the same, and when it is a question of money, honesty and morality don't count.

Gravenhurst Herald.

Help your local merchants to live here and enjoy the privileges of this glorious climate and scenery, by buying your goods at home. Why send your money to Toronto houses when you can get the same bargains at home. Help your home newspaper. Buy your stationery in town. If you have a job of printing don't give it to the Toronto traveller, who is here every day or so. They don't help pay the taxes here.

Hamilton Times.

It is said that Sir Mackenzie Bowell is vastly interested in the revelations of "Fostered Finance," and that so intense is his sympathy with Hon. Geo. E. Foster that every tear he sheds over him would poison a toad.

## NEWBURGH.

Dr. A. Nesbit, B. A., and Miss Beaman, of the high school staff, and P. D. Shorey and Miss Baker, of the public school staff, and Mrs. T. D. Sciver, took in the teachers' excursion to Toronto. As a result the high and public schools closed until Monday.

Rev. Mr. McCamus, of Odessa, preached the missionary sermon, in the Methodist church on Sunday evening. The Epworth League convention met in the Methodist church on Wednesday.

A union Thanksgiving service was held in the Methodist church on Thursday morning. Rev. J. Gandier, of the Presbyterian church, preached.

Mrs. Rose, Tamworth, spent last week at Rev. J. H. Chant's.

M. Ryan's family moved from Sydenham.

J. W. Yeomans spent Sunday in Kingston.

Henry Paul and wife have moved to Kingston.

Mrs. James Thomson has returned from a two months' visit to her son, C. W. Thomson, in Toronto.

W. E. Moore is painting C. H. Finkle's carriage works.

Z. Milligan has moved into the house lately occupied by Henry Paul.

Miss Lorena Patterson, is nursing in Napanee.

Mrs. Hope and W. Hope left Saturday for a visit to Brockville, and Oxford Mills.

## Dr. Pierce's Favorite Prescription,

Is not a secret or patent medicine, against which the most intelligent people are quite naturally averse because of the uncertainty as to their harmless character, but is a medicine of KNOWN COMPOSITION, a full list of all its ingredients being printed, in plain English, on every bottle wrapper. An examination of this list of ingredients will disclose the fact that it is non-alcoholic in its composition, chemically pure glycerine taking the place of the commonly used alcohol, in its make-up. The "Favorite Prescription" of Dr. Pierce is in fact the only medicine put up for the cure of woman's peculiar weaknesses and ailments, sold through druggists, that does not contain alcohol and that too in large quantities. Furthermore, it is the only medicine for woman's special diseases, the ingredients of which have the unanimous endorsement of all the leading medical writers and teachers of all the several schools of practice, and that too as remedies for the ailments for which "Favorite Prescription" is recommended.

A little book of some of these endorsements will be sent to any address, post-paid, and absolutely free if you request same by postal card or letter, of Dr. R. V. Pierce, Buffalo, N. Y.

Don't forget that Dr. Pierce's Favorite Prescription, for woman's weaknesses and delicate ailments, is not a patent or secret medicine, being the "Favorite Prescription" of a regularly educated and graduated physician, engaged in the practice of his chosen specialty—that of diseases of women—that its ingredients are printed in plain English on every bottle wrapper; that it is the only medicine especially designed for the cure of woman's diseases that contains no alcohol, and the only one that has a professional endorsement worth more than all the so-called "testimonials" ever published for other medicines. Send for these endorsements as above. They are free for the asking.

If you suffer from periodical headache, backache, dizziness, pain or dragging down sensation low down in the abdomen,

## A PLANET OF GREAT PEAKS.

Peculiarity of the Ring Mountains of the Moon.

The moon is really and truly a great planet of mountains, its whole visible surface being dotted with elevations of curious shapes and of extraordinary height. We say "its whole visible surface" and hasten to explain that we make this statement simply because the eye of man has never seen but one side of the surface of the moon. What we see convinces us that the little planet is extremely mountainous, for on the "end" exposed to our view there are no less than 30,000 peaks, varying in height from 2,000 feet to four miles. When we consider the fact that this lunar world is only one thirty-second part as large as the earth we can easily see why it deserves the title of the "planet of great mountains." There is a peculiar thing about these 30,000 moon peaks. Each and every one of them has a ringlike form, the open end of the conical point being of greater or lesser diameter, according to the height of the mountain. In a low grade telescope these peaks resemble true volcanoes, but when viewed through a high grade glass it is seen that the depression in the center of the queer "ring mountain" is often so great as to be below the general level of the surrounding country. The depth of these depressions is calculated in a curious manner, by figuring on the relative shadows they cast when the sun is shining full upon them. The diameter of these "ring

#### DENBIGH.

Mr. Anson Thompson, tax collector, has again started on his, in most cases unwelcome visits.

The exceptionally long vacations of the pupils of our Village schools are now ended, as the new School House is finished, and Miss Jane Lane, who has been engaged as Teacher for the balance of the year, opened school on the 1st inst.

Harvest Thangsgiving Services and Missionary Services combined were held last Sunday in the forenoon and afternoon, in the Lutheran church. Appropriate sermons were preached at both services by the local minister Rev. G. Dachsels, and Rev. H. Tweit-mayer, of Hanover, who has not for a week or so past been a guest at the parsonage.

In spite of the very bad roads and the disagreeable rainy weather on the previous Saturday, quite a number of members of the Lutheran congregation of Raglan, Renfrew County, attended the services, and improved the occasion to visit their friends here.

Rev. G. Dachsels intends to start tomorrow for Ottawa, to assist Rev. C. Lucas, to conduct a serious Missionary meetings at the Capital.

Wm. Caul M. C. C., and Mr. W. Pringle, Government Road Inspector, are favoring Denbigh with a visit, and held a meeting yesterday evening at the Denbigh House, to find out it was alleged, the needs and wants of this part of the Constituency.

Some more of our young men, and a few older ones, left again for different parts to seek employment during the winter, and several more of our farmer's daughters are going to try City life. Miss Louisa Stein went to Ottawa, and Misses Clara Cetzold and Dora Chatson to Toronto, where they have secured situations.

### For Your Protection

We place this label on every package of Scott's Emulsion. The man with a fish on his back is our trade-mark, and it is a guarantee that Scott's Emulsion will do all that is claimed for it. Nothing better for lung, throat or bronchial troubles in infant or adult. Scott's Emulsion is one of the greatest flesh-builders known to the medical world.

monias" ever published for other medicines. Send for these endorsements as above. They are free for the asking.

If you suffer from periodical headache, backache, dizziness, pain or dragging down sensation low down in the abdomen, weak back, have disagreeable and weak- ing, catarrhal, pelvic drain, or are in distress from being long on your feet, then you may be sure of benefit from taking Dr. Pierce's Favorite Prescription.  
 Dr. Pierce's Pleasant Pellets the best laxative and regulator of the bowels. They invigorate stomach, liver and bowels. One a laxative; two or three a cathartic.

### ON OCEAN'S BED.

**What Becomes of Ships Which Sink to the Bottom of the Sea.**

What becomes of the ship that sinks in mid-ocean? If it is of wood it takes, in the first place, considerable time for it to reach the bottom. In a hundred or more fathoms of water a quarter of an hour will elapse before the ship reaches bottom. It sinks slowly, and when the bottom is reached it falls gently into the soft, oozy bed, with no crash or breaking.

Of course if it is laden with pig iron or corresponding substances or if it is an iron ship it sinks rapidly and sometimes strikes the bottom with such force as to smash in pieces. Once sunken a ship becomes the prey of the countless inhabitants of the ocean.

They swarm over and through the great boat and make it their home. Besides this they cover every inch of the boat with a thick layer of lime. This takes time, of course, and when one generation dies another continues the work until finally the ship is so laden with heavy incrustations, corals, sponges and barnacles that if wood the creaking timbers fall apart and slowly but surely are absorbed in the waste at the sea bottom.

Iron vessels are demolished more quickly than those of wood, which may last for centuries. The only metals that withstand the chemical action of the waves are gold and platinum, and glass also seems unaffected. No matter how long gold may be hidden in the ocean, it will always be gold when recovered, and this fact explains the many romantic and adventurous searches after hidden submarine treasures lost in shipwrecks.

### The Transformation of This Once Barren Volcanic Waste.

St. Helena was a barren volcanic waste at the time Napoleon was sent there. The Englishmen were there, however, to stay and for duty, and, though they had a hard scramble for every drop of water they used, they set about a beginning of making something grow toward sustaining life, or at least modifying its conditions. Gradually, by slow degrees, but surely, their efforts were successful. Kindly nature requires but little encouragement, and the dews fell and crystalized, and the herbage and shrubbery spread, and little trees took root and shed their seed, and the mountain in the long course of years became largely covered, until at last this one time waterless heap of waste products of a lifeless volcano became able to provide millions upon millions of gallons of water, which is stored in its caverns, for the ships that pass to and from the Cape of Good Hope and to Australia, and beneath the shades of umbrageous terraces, high up in the cool air, the invalid soldier from tropical Africa and India and the orient finds a restoring sanitarium which has brought back to health and life many a weary soul and stricken body. Truly there is magic in the rain and healing in the forests!

### MARKING TRUNKS.

**Odd Devices Used by Which to Easily Identify Baggage.**

A curious fashion of marking trunks by some individual and odd device has come into practice. It is a trick that helps to identify one's baggage instantly, even at a distance, in a crowded railway station, and thus facilitates travel, especially abroad, where so much red tape entangles baggage transportation.

Some of the devices used are queer, to say the least. A lover of dogs had big brindle's heads in brown and white painted at intervals on all her trunks and suit cases before sailing for Germany. She felt sure, she said, that she would be able to identify her baggage anywhere by these signs.

Another curious design is that of skull and crossbones, done in black, white and red, on top, sides and ends of trunk and on the bottom of every bag of one traveler.

Dumbbell designs in red, white and blue identify another lot of baggage.

One society woman has her trunks all marked with a design of a pair of gloves, painted red, black and gold, and appearing as if just taken off the hand and carelessly tossed in the trunk.

Family crests in gold and colors are used, and college girls going abroad have curious Chinese dragons, birds, etc., done in oriental color combinations on their baggage.

## OBESITY A DISEASE.

It Is Not, as a Rule, the Result of Laziness or Gluttony.

It is a mistake and an injustice to many abstemious folk to assume that all fat persons are gluttons or large eaters. Very many excessively corpulent people, especially women, are small eaters, while some of the most doughty trenchermen are gaunt and thin.

It is not the quantity so much as the quality of the food one eats which determines the putting on of flesh. Yet it is not always the kind of food that makes the obese, for some stout people eat very sparingly of sugars and starches, while there are large consumers of sweets who never put on flesh. In such cases it is a question of constitution, often of heredity and not at all, or very little, one of diet.

Another prevalent error in regard to fat people is that they are inert or lazy and never exercise. Of course exercise does increase the processes of nutrition and so leads to the burning up of superfluous fat, but at the same time it causes an increase in the appetite and thus tempts to the consumption of a greater quantity of food. So one thing balances the other, and want of exercise alone is not a very potent cause of obesity. Many very fat persons are, it is true, sluggish, but they have become so since putting on their flesh, for it makes a great difference whether one carries 150 pounds about when one walks or whether it is necessary to propel half as much again or even double the weight. It is a tremendous handicap, and there is small wonder that the lightweights do the most exercising.

Obesity, indeed, is usually a disease and not merely the result of laziness or gluttony. Its cause lies deep down in the animal economy, in among those mysterious chemical changes by which the food we take into the mouth is converted into blood and bones and muscles, skin, hair and brain cells. It can often be warded off by a proper diet and mode of living, especially if taken in hand from the very first and not allowed to get the upper hand, but the tendency to stoutness will generally persist through life and can only be modified, but never removed.

Any treatment for the radical removal of flesh should be carried out under the advice of a physician, as violent measures directed to this end may be productive of terrible harm to the constitution.

### Hadrian's Wall.

Hadrian in A. D. 120 built a stone wall from Bowness, near Carlisle, on Solway frith, to the river Tyne, near Newcastle. It was eighty miles long and garrisoned by 10,000 troops. It was twelve to twenty feet high at various points, eight feet thick at the top and provided with a gallery in the rear which enabled its defenders to take their stand with only head and shoulders visible to the enemy. At every quarter of a mile there was a castle with a garrison of troops. Beacon lights and signals were used, and on an attack, whether by day or by night, the news was at once flashed up and down the wall from sea to sea.—London Sphere.

### Constipation and its Results

### WHY BILEANS ARE SO HIGHLY BENEFICIAL

About eight women out of every ten suffer from constipation. Certain portions of the food we eat are useless as

## INDIAN MYTHS.

One Accounts For the Custom of Scalping an Enemy.

Among the many myths of the North American Indian the disposition of the soul after its separation from the body and its close connection with the scalp varies according to the religion of the tribe. With some the journey to the "happy hunting grounds" begins immediately; with others the spirit remains near the grave. Again, if an Indian dies away from the lodges of his people the spirit returns at once to them, where it hovers as if reluctant to leave. Among the upper Missouri river tribes it is believed that before the spirit finally departs from those who have died from wounds received in battle it floats toward a great cliff overhanging the Missouri and carves upon the wall of rock a picture showing the manner of death.

It is believed by most of the plains tribes that the soul attaches itself to the scalp; that the soul of a person scalped does not suffer from the wounds inflicted on the body, but that the opposite is the case where the scalp is not torn off.

An Indian who kills himself in battle, accidentally or purposely, has positively no hereafter. He is irrevocably lost. Those who are struck by lightning or die by any other apparently direct operation of the Great Spirit are hurriedly buried where they fell without ceremony, and no mound or mark is erected over them. If after a battle there are found corpses not scalped or mutilated it is positive evidence that such persons came to their death by their own hand, for it is a tenet of the Indian religion not to scalp or mutilate the body of an enemy who commits suicide.

### LEPROSY.

Peculiarities of This Loathsome and Deadly Disease.

The fact that many persons come into intimate contact with lepers for years without becoming affected is not strange when one reflects that the same applies to the closely allied disease—tuberculosis. Men have voluntarily submitted themselves to direct inoculation with material from the sores, discharges, etc., of lepers, yet in only one case (that of a Hawaiian convict who, when condemned to death, submitted to the alternative of inoculation) was the actual disease produced in this artificial manner.

There is no cure for leprosy. All the remedies proposed after the disease becomes well seated have been of little use. The utmost attained is a prolongation of life and a mitigation of suffering.

There is a tradition which has of late obtained some scientific support that fish diet is one of the necessary causes of leprosy, either through tainted fish containing some substance which stirs the bacilli into activity or through the bacilli growing in the fish and thus being taken into the stomach. This lunacy may have originated in the belief that the scales of the leper and the scales of the fish are analogous. Leprosy exists among inland peoples who never eat fish and does not seem specially prevalent among those of the coasts who eat most fish. A curious thing about leprosy is that only one woman is affected to every four men.

### African Blood Brotherhood.

The method of making blood brotherhood among the Galla and Somali has its peculiarities. It is described by William Astor Chandler in "Through

The average family in Canada uses about 25 pounds of tea per year. If Red Rose Tea were used entirely, not more than 20 pounds would be required. You save real money when you use Red Rose Tea.

## BLOOD POISON

On account of its terrible effects, blood disease is called the king of all diseases. It may be either hereditary or contracted; so while it may not be a crime to have the disease, it is a crime to permit it to remain in the system. It may manifest itself in the form of Scrofula, Eczema, rheumatic pains, stiff or swollen joints, itches of the skin, eruptions or blotches, ulcers in the mouth or on the tongue, sore throat, falling out of hair, disordered stomach, and a general depression of the system. If you have any of these symptoms don't neglect yourself. You have no time to lose. Beware of "old fog" treatment—beware of mineral poisons—beware of Quacks and Fakirs. **OUR NEW METHOD TREATMENT** is guaranteed to cure this disease, never to return. Bank Bonds will protect you. Our treatment is not injurious in any way, but reaches the very root of the disease and eliminates all poison from the system. The symptoms of disease gradually disappear. The blood becomes pure and enriched, the whole system is cleansed and purified, and the patient feels prepared anew for the duties and the pleasures of life. **CURES GUARANTEED OR NO PAY. 25 Years in Detroit. 250,000 Cured.**

# THROUGH THE HEART!

WHEN THE NERVES BECOME A WRECK AND VITALITY RUNS LOW BECAUSE THE HEART FAILS TO DO ITS WORK—THROUGH THE SELFSAME HEART—IF CURE COMES—MUST IT COME

## Dr. Agnew's Cure for the Heart

Cures the nerves through the heart. Experience of the highest medical authorities has conclusively proven that the quickest way to cure diseases of the nerves is to fortify the heart with "food" that is natural to it, and that enriches the blood; and it has been proven also, beyond the shadow of a doubt, by this same high medical authority, that Dr. Agnew's Cure for the Heart is the most potent nerve nourisher and heart strengthener that has been "gathered in" from nature's lap to assuage sufferings, stop pain and heal the heartsick; and when you know that with the heart, the main spring, the balance wheel of life, out of order, the future looks out on nothing but darkness and suffering, why postpone applying the remedy? Why delay taking hold of the healing hand that will lift you back to health? Dr. Agnew's Cure for the Heart will relieve any and every form of heart disease in 30 minutes.

Margaret Smith, of Brussels, Ontario, says: "Many a time my suffering was so great that I would have hailed death with a welcome, but four bottles of Dr. Agnew's Cure for the heart wrought a wonderful cure in me."

SOLD BY ALL DRUGGISTS AND MEDICINE DEALERS.

DR. AGNEW'S LITTLE LIVER PILLS cure Sick Headache, Biliousness, Indigestion and Constipation—they never gripe—40 for 10c.

DR. AGNEW'S CATARRHAL POWDER relieves in 10 minutes.

Sold by Fred L. Hooper.

suffer from constipation. Certain portions of the food we eat are useless as food and the work of the bowels is to expel those portions. Their work is aided by a secretion of the liver—the bile. When this secretion fails, or is secreted in insufficient quantity, the bowels become inactive and constipation results. Impurities which should be expelled gather, and then note what happens! The blood comes in contact with this foul accumulation, is filled with poison, and the circulation carries these poisons all over the body. That is why constipated persons have so much headache that dull, heavy feeling, bad breath, foul taste in the mouth, etc.

From this it is seen that if the liver be corrected, the bile flow will be set right, that in turn will correct the intestines, and the constipation will be ended. That is exactly what Bileans do, and why they are so superior to ordinary medicine or purgatives. These flush the bowels, but do not get to the cause of the evil (liver). Bileans do.

Mrs. Frances Greene of Earl street, Kingston (Ont), says:—My liver was sluggish and out of order, and I had great trouble from constipation. Every movement of the bowels had to be forced. I doctored and tried all manner of remedies, but nothing brought a permanent cure until I tried Bileans. They cured the constipation, ended the sluggish, tired-out "livery" feeling, and made me feel bright and buoyant."

Similar evidence is forthcoming from all quarters of the Globe. Bileans cure constipation, piles, headache, female ailments and irregularities, debility, indigestion, liver chill, wind spasms, anaemia, and all disorders arising from liver and stomach derangement. All dealers and stores at 50c a box, or post free from the Bilean Co., Toronto, on receipt of price. Six boxes for \$2.50.

has its peculiarities. It is described by William Astor Chandler in "Through Jungle and Desert." Lokomagal on behalf of his people and I on behalf of my own each seized in our right hands a round stone. Upon the stones we liberally expectorated. Each then passed his stone to his following, who did likewise. We then exchanged stones, and each, holding the stone in his right hand, with his left dug a hole in the soil, meanwhile uttering words of supposed magic import. In these holes we finally placed the stones and covered them with sand. We then grasped hands and assured each other that we were the best friends possible.

#### The Editor and the Tramp.

Bret Harte's first stories appeared in the San Francisco Overland Monthly. Then he was appointed editor of this magazine. That was in 1869. About this same period two or three weekly newspapers were struggling for existence.

One day the office boy went to the editor of the Soaring Eagle and said:

"There is a tramp at the door, and he says he has had nothing to eat for six days."

"Fetch him in," said the editor. "If we can find out how he does it we can run this blamed paper for another week!"

#### The Prisoner.

An inspector arrived unexpectedly at a Scottish jail. He asked the solitary warder for the governor. "He's away fushin'," was the answer.

"Well, I'll see the prisoners," said the inspector.

"Him! He's out, sir."

"Out? The prisoner out? Why, has he escaped?"

"Ach, no, sir; he's just awa' wi' the governor at the fushin', carryin' the bag."

#### Her Proudest Moment.

Suffragette—The proudest moment of my life was when I was a passenger on an American liner and fell over the side. Friend—The proudest moment! But how do you mean? Suffragette—A sailor called out, "Man overboard!"

He travels safe and not unpleasantly who is guarded by poverty and guided by love.—Sir Philip Sidney.

#### Following Directions.

Jones had been quite ill. One day the doctor called and found him in a bathtub.

"Why, man, are you crazy? You must be anxious to die."

"No, I ain't," protested poor Jones, "but didn't you say that your last medicine was to be taken in water?"—London Answers.

#### By Special Permit.

"Here! What does this mean?" shouted Whooply as he found his youngest riding a broomstick over the top of the piano.

"This is all right. Mamma said if I'd stay in I could play on the piano."

One lie reaches its hand to another.  
 —From the German.

#### The Usual Way.

"Papa," said Jacky, "would you like to have me give you a birthday present?"

"Yes, indeed."

"Then now is the time to double my weekly pocket money, so's I'll have the money to buy it when your birthday comes."

Builders Hardware of every conceivable kind. Rathbun's Star Brand of Portland Cement, it pays to buy the best.

MADOLE & WILSON

# Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

## Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

## Best Kidney Remedy Known To Science

For pain in the back—scanty urine—highly colored urine—irritated bladder—irregular bowels—bad stomach—there is nothing that will bring such quick relief and so certain a cure as **FRUIT-A-TIVES**.

These marvelous tablets are nature's natural remedy for irritated or weakened kidneys. They act directly on the kidneys—soothe the irritated membranes—clean, heal and strengthen the organs—and help them to new vigor with their work.

Often kidney trouble is not due to any organic defect in the kidneys. If the bowels are constipated—if the skin does not throw off the tissue waste of the body—then these impurities are carried to the kidneys. In a vain endeavor to rid the system of impurities, the kidneys are overworked—the blood vessels are dilated—the nerves inflamed. That causes a host of kidney troubles.

## Fruit-a-tives

OR "FRUIT LIVER TABLETS"

not only heal and strengthen the kidneys but they also increase the action of the skin, and act directly on the liver, thus curing the constipation.

FRUIT-A-TIVES are the natural and logical cure for all kidney troubles. They are made of fruit and tonics—are pleasant to take—and a guaranteed cure when faithfully used. 50c a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED - OTTAWA.

## ROBBING A BANK SAFE

THE EXPERIENCE OF AN OLD TIME EXPERT CRACKSMAN.

He Was Hired to Do the Job, and He Did It Well, but the Reward Was Not What Had Been Promised by His Unscrupulous Employer.

"One day in the fall of 1874," said an old retired detective, "one of the most finished and successful bank burglars that ever used a drill in this country was walking across Sixth avenue, New York, enjoying his parole and the mellow sunshine. There were a whole lot of indictments hanging over him, of course, but they didn't worry him any, for he happened to be on pretty fair terms with some of the men attached to the municipal administration at that time. As he strolled along he was accosted by a prosperous looking man whom he did not know, although the prosperous looking citizen addressed the burglar by his right name. The crook, finding after some stalling that the man who knew his name wasn't a detective, took him into a cafe and asked him some things.

"In the first place, how did you know me?" he inquired of the stranger. "Well, it appeared that the burglar had been pointed out to the stranger by a detective who was so shady that he afterward did time for surreptitiously extending aid and comfort to the enemy, one of the old time bands of New York crooks.

"All right," said the cracksmen then. "Now, I don't suppose you are seeking my acquaintanceship for the sake of being introduced into society or for the enjoyment of my winning ways."

bank will have to be robbed by professional cracksmen. That will let me out, and in addition I'll expect to get my rakeoff from the robbery. I want you to rob the bank. You'll find \$35,000 in cash in it on the night you arrange the job. I'll attend to that. Of course I want my bit out of that, \$10,000 at least. I've always heard that you're square in these divisions of plunder, and therefore I'll trust you to hand me my share after you've done the job for putting you on to it."

"This sounds good enough to eat," replied the cracksmen. "Fact is, it's so sweet that it's almost cloying. Now, I've heard your proposition. You give me a couple of days to investigate you, and then we'll talk business."

"They arranged another meeting at the same place a couple of days later, and in the meantime the cracksmen, whose facilities were the best, looked into the job. He found that his man really was the cashier of an up state bank in a town not more than an hour's run from New York. So when the cashier called at the appointed time the burglar was ready to talk business.

"You'll have a hard night's work," said the cashier, "for in order to avert suspicion I'll have to leave the vaults and safes locked tighter'n a drum, as usual. You'll need several assistants."

"That's my end of it," replied the cracksmen. "You just let me handle those little details. Every man to his trade. They don't make 'em so strong that I can't get into 'em."

"Then all of the details were arranged, and the robbery was fixed for a certain night in the following week. The cashier was especially solicitous that he should get his share of the proceeds of the crib cracking. The cracksmen assured him that if there was \$35,000 in the job \$25,000 would be enough for himself and his associates and the cashier would get the rest. On the night fixed the cracksmen and three of his best men went up to the town and pulled off the job. It was a matter of four hours before the gang after overpowering and gagging the watchman got into the main safe. They found it empty. Then they tackled the smaller safes. These, too, were empty. The top notch cracksmen was pretty mad, naturally.

"He had been played for a good thing, and he knew it. The cashier had simply looted the bank himself, and the robbery which he had arranged was to cover up his own trail. There have been Napoleons of finance without number developed from among bank cashiers, but I never heard of a neater job than that.

"Of course the cracksmen and his pals had nothing for it but to pack their kits and drill back to New York. They weren't, of course, in a position to say anything about how they'd been done. The top notch cracksmen had to read in the afternoon papers the lurid accounts of how the bank had been robbed of cash and securities 'approximating \$100,000 in amount' and grind his teeth and cuss. The bank's failure was announced a few days later.

"The cashier? Oh, within a dozen years he died a beggar on the streets of New York."

# FITS CURED

How your friends or relatives suffer with

## Cure For The Blues

ONE MEDICINE THAT HAS NEVER FAILED

Health Fully Restored and the Joy of Life Regained.

When a cheerful, brave, light-hearted woman is suddenly plunged into that perfection of misery, the **BLUES**, it is a sad picture. It is usually this way:

She has been feeling "out of sorts"

for some time; head has ached and back also; has slept poorly, been quite nervous, and nearly fainted once or twice; head dizzy, and heart-beats very fast; then that bearing-down feeling, and during her periods she is exceedingly despondent. Nothing pleases her. Her doctor says: "Cheer up; you have dyspepsia; you will be all right soon."

But she doesn't get "all right," and hope vanishes; then come the brooding, morbid, melancholy, everlasting **BLUES**.

Don't wait until your sufferings have driven you to despair, with your nerves all shattered and your courage gone, but take Lydia E. Pinkham's Vegetable Compound. See what it did for Madame Josephine Rivville, Mastai, Que. She writes:

Dear Mrs. Pinkham: "I suffered for four years with female troubles—inflammation of the stomach and fallopian tubes which caused me violent pain and often fainting, so much so that I could not walk at times and attend to my daily duties. Life was misery to me. I was so blue and despondent I did not know which way to turn for relief. I had tried the doctors but they did not help me. I was advised to try Lydia E. Pinkham's Vegetable Compound, so I bought a bottle. I am glad that I did so, for I am well and strong to-day and the world looks bright, for I have perfect health, thanks to your medicine."

If you have some derangement of the female organism write Mrs. Pinkham, Lynn, Mass., for advice.

## RUSSIAN SAYINGS.

He who fears a sparrow will never sow millet.

An untied friend is like an uncracked nut.

When you die even your tomb shall be comfortable.

The absentminded man looks for the horse he rides on.

Better to beg than steal, but better to work than beg.

A mother's love will draw up from the depths of the sea.

When the ass bears too light a load he wants to lie down.

He who is on horseback no longer knows his own father.

Man carries his superiority inside, animals theirs outside.

The nobleman is always in the right when the peasant sues.

If the thunder is not loud the peasant forgets to cross himself.

One whip is enough for a good horse, for a bad one not a thousand.

All For Naught.

## THE LOVE OF SAND.

Man's Unconscious Harking Back to Primitive Times.

The love of sand is universal, felt by all and at all ages. The child finds in a ready and a plentiful material for giving something of definiteness to the world of his childish imagination, and when experience shall have proved the real world to be less pleasant and not expressible in sand he nevertheless as a grown man tacitly admits the attraction of the old time medium and spends his holidays upon it. No watering place need trouble as to its prosperity if it has a broad forefront of sand.

Probably so general and ingrained a love is only to be accounted for as the result of a sympathetic and unconscious "harking back" to the feel of the life on the dry sandy soils of the east, upon which man first wandered and in which he first delved. He can sit or lie with greater comfort and ease—as he originally sat, without a chair, or lay, without a couch—upon sand than upon any other kind of earth, and upon sand he reverts readily and without fear of convention to primeval barefootedness. Possibly even the charm of the "sanded floor"—in the concrete to our forefathers, the comfort and coziness of cherry inn parlors and kitchens, warm with the ruddy heat of glowing logs, on snowy nights—may also be due to vaguely assertive instinct.

In proof it may be readily concluded that far distant man would not have been long in finding out the advantages of a dry cave as a dwelling place. It would be found most readily in soft, friable rocks. The natural and further easy expansion of the cave to meet growing demands for house room by scraping down of roof and sides would result in a sanded floor. Litter of rude cave living and housekeeping could be more easily swept out with the leafy bough or bunch of sedges acting as the original broom when mixed with sand than without its aid. The savage family which swept its cave out oftenest and most thoroughly would certainly be the healthiest and strongest.—London Spectator.

## ST. ANTHONY.

The Temptations of the Father of Monasticism.

What were the temptations of St. Anthony? St. Anthony was one of the earliest names placed on the calendar. He is called the father of monasticism because his life and teachings were really the foundation of the many monkish orders of a mediaeval times. He was born in a city of Egypt in 251 A. D. of parents who were both wealthy and pious, and he early decided to give his life up to religious contemplation. He went into the wilderness, taking up his solitary abode in an old ruin on a high hill, where he disciplined himself in austerity. But his devotions were interrupted by a protracted series of sadly irrelevant hallucinations, believed to be sent by the devil to tempt him aside from a holy life. He was visited successively by visions of all the idolatries of the early world, by the princes and potentates of history and their wives and daughters, by Solomon and the queen of Sheba, by the gods and goddesses of Greece and Rome, especially by Diana and Venus, and other interesting characters. According to the legend, his devoutness at last breaks the power of the visions, and they leave him forever. He remained twenty years in his lonely ruin, then, yielding to the wishes of other anchorites, went to Memphis and there founded the first monastery which was little more than

"All right," said the crackman then. "Now, I don't suppose you are seeking my acquaintanceship for the sake of being introduced into society or for the enjoyment of my winning ways. What's your hay?"

"Then the stranger up and told the burglar what his graft was."

"I'm the cashier of a bank a bit up the state," said he to the burglar. "The directors don't know anything about it, but I'm short in my accounts. There's only one way out of it. The

## BLINDED BATS.

**They Proved Themselves Independent of the Sense of Sight.**

Bats are remarkably independent of the sense of sight. A naturalist describes some experiments demonstrating this fact. Covering the eyes of a bat with wax, he released the creature in a room. It first of all made its way to the door, but instead of striking this hovered a few inches off, slowly making its way along the top edge and down the side, apparently guided by the incoming draft of air. Next a thorough exploration of the room was made, and throughout the examination it never once struck either chairs or table and swerved aside when a stick was placed in its path. As a result of this experiment naturalists believe that bats have an acute perception of atmospheric currents and vibrations resident in the nerves of the wing membranes.

This matter was thoroughly investigated so long ago as 1793, when, by the cruel experiment of blinding the animals, it was shown that they could cross a room across which silken threads were stretched in such a way as to leave just sufficient space for them to pass between with outstretched wings. They not only succeeded in passing the threads without touching them, but they avoided with equal ease the walls and ceiling. Even when the threads were placed still nearer together they managed, by contracting the wings, to pass without contact. Branches of trees were similarly avoided, and when tired they suspended themselves on the walls of the room as easily as if they enjoyed the use of sight.

From this it was inferred that these creatures possess a marvelously delicate sense of touch in the wing membranes. But it is also regarded as probable that this is increased by the expansion of the skin of the external ear and by the development of folds of skin on the nose and muzzle. In some bats, indeed, a perfect rosette of such skin is developed in the latter region, as in the "leaf nosed" bats, and it is supposed that the additional lobe of the ear, known as the "tragus," performs a similar function.

## VITALITY THE MAIN THING.

**He Who Has It Pulls Through, but the Other Fellow Dies.**

Two men undergo operations of the same character in a hospital. The same surgeon does the work. The conditions are identical. Equal care is exercised in each operation, and each is successfully performed. Yet one man recov-

ers; the other dies. Or there is a tremendous business pressure which does not let up for months. It puts the men under a terrible strain. One man goes to pieces, and his business is wrecked. He cannot keep the pace; he loses control of himself. His rival has no better brains than he, perhaps not so good, yet he pulls through successfully. We say that there is a difference in vitality; that one man has more of it than the other.

I once saw a man in a hospital who was suffering from five fatal diseases, and yet he would not die. He had kept on living year after year in spite of everything. He refused to succumb. We find the same thing illustrated every day. In a shipwreck there are men who seem to give up their lives without a struggle, without any power to resist; others cling to an open raft for days without food, almost frozen, constantly whipped by the waves, but for some reason or other they survive. The vitality in them is strong.

Notice how rapidly and surely one man recovers himself after a nervous breakdown while another drags along through years of semi-invalidism. Notice the results upon two men of a long cold drench of rain. One of them comes down with pneumonia; the other suffers no ill effects. How is it to be explained?

He has a reserve somewhere—an inner power of resistance, an aggressive something that will not be downed. We call it vitality. A man can't have a more valuable asset than that. It means joy instead of dumps, success instead of failure, life perhaps instead of death.—Luther H. Gulick, M. D., in World's Work.

## The Modern Dinner.

A medical journal complains that the modern dinner has become an extremely depressing affair and that, so far from being a feast of reason and a flow of soul, the conversation is a mere interchange of symptoms, details of operations or the advantages of this or that cure. Such topics evidently are not provocative of remarks that set the table in a roar, nor do they tend to promote the good digestion which should wait on appetite. Indeed, there is little appetite for digestion to wait upon. The daintiest of menus is disregarded when the diners are under a regime, and courses pass untouched, while powders are openly stirred into wineglasses.

The Kind You Have Always Bought

## STRAWBERRY PLANT SWINDLE.

At the sittings of the Division Court held at Owen Sound on the 2nd inst., his Honor Judge Widdifield presiding, three cases of more than ordinary interest were tried. The facts briefly are that a man named S. Almon Gordanier, of Camden East, a village below Napanee, canvassed a number of market gardeners and farmers in and about Owen Sound and Brooke and in the Townships of Sydenham and Derby in the summer of last year, for orders for strawberry plants and succeeded in getting about fifty orders representing about \$2000 in value. The plants were delivered last spring at Owen Sound. A number of purchasers were tempted with an offer of 15 per cent discount and paid cash on delivery. Others gave notes in terms of credit of fourteen months. Some few gave neither notes nor money. These latter, as it turned out were the wise ones of the purchasers. In every case so far as heard from, the plants proved to be complete failures. At the trials on Tuesday the following facts were sworn to by a number of witnesses on behalf of the plaintiffs, namely that Gordanier represented himself as being the proprietor of his own nurseries at Napanee and that he represented the fifth generation of his family that had them in succession, that he grew all his own plants, that the plants he was offering for sale were something away ahead of any other strawberry plants to be had in Canada, that they were an American improved Lovett, that they grew so large and strong that they have to be planted three feet by five feet, that plants would stand well up and keep the berries out of the dirt, that they would pay for themselves the first year and his price was \$20.00 per thousand. In giving his evidence on cross examination, Gordanier admitted that he had not a nursery for strawberry plants, that he did not grow his own but that he bought them from other people.

A man named Milton Joyce was brought up from Napanee by the plaintiffs to prove the same fact. It turned out that in bringing him as a witness the plaintiffs had brought a particular friend of Gordanier as was said by counsel that Joyce and his brother, who appeared as a witness for the defence, were mixed up in the transaction with Gordanier and had no nurseries as represented. It came out in their evidence that they were the parties who supplied the plants to Gordanier, that they grew Lovetts and other varieties, that when gathering the plants they were all mixed indiscriminately and were put up by girls and boys in their employment. The case of Watson, being the first was tried before a jury who awarded the plaintiffs \$50.00 damages. In the McLean and Ormiston cases the jury was dispensed with and they were tried by the Judge who gave McLean \$54.00 damages and Ormiston \$65.00. As matters now stand all the other parties affected will proceed at once by action against Gordanier unless he is willing to accept the three judgments mentioned as sufficient tests, and "I'll make proper settlements with the different parties." The contract which Gordanier had parties sign gave him an option of supplying new plants for any that were not satisfactory, at \$10 per thousand, but very properly not one of the parties would avail themselves of that provision. Gordanier discounted as many of the notes as he could get purchasers for

Louis Byrens, auctioneer, commission merchant and business broker, 436½ Richmond street, London, Ont., writes: "I suffered with chronic catarrh. After spending money for medicines and doctor bills, Peruna was recommended. After using it I found relief. I wish to convince others of the merits of your remedy."

## LONG WALK IN OFFICE.

**Average Business Man Covers Vast Territory in a Year.**

"If I had a cent for every mile walk during office hours every day I soon be able to retire," is a remark frequently heard from men and women who are kept on their feet while at business. The general impression is that the distance traveled daily is very great. And so it may be. But the simple experiment of carrying a pedometer for a few weeks will probably show that one's income at a cent a mile would not be worth collecting until the end of a year.

A downtown office man has just finished an experiment of this nature. He carried a pedometer six weeks, registering its total each night. At the end of that time it was found that the distance traveled, though varying greatly from day to day, came to a fairly even average at the end of each week.

How many miles do you suppose he walked on the day of his highest record? Twenty? Thirty? Fifty? No, only nine miles. The lowest record came the very next day and was only half as much. But the average

End of day in ordinary fatiguing shoes

# WON'T TIRE YOU

IMPROVEMENT NUMBER FIFTEEN

You can't stand in one position five minutes without tiring. You can't lie long in a plaster jacket without tiring. You can't ride many hours in a train without tiring. And you can't walk any distance or stand any time in hard, stiff, rigid, shapeless, ordinary shoes without tiring. Why? Because anything that confines the muscles and hinders or impedes freedom of muscular action produces fatigue. Want to know how tiring your ordinary shoes are? Well, just pull them off after a strenuous day and note the soothing, relieving, refreshing sensation that creeps over the body.

Foot-rites are built with six ingenious devices to give the feet absolute liberty of muscle action, viz:

With Plumb-Line Level Heel and Sole to keep heel and ball on the precise level Nature intended, which gives foot bottom freedom. With Unwarpable Soles to insure the feet lying free and flat instead of pinched and curled up.

With Toe-Freedom, Uncollapsible Box Toes to allow the toes barefoot freedom.

With Hurtless Instep Seams and "Won't Blister" Hooks and Eyes to promote freedom in the uppers.

With "Normal-Calf," almost as soft and supple as the calf's live skin, to provide a pliant, yielding, freedom-feeling canopy over the feet. And with Easy Insides, formed exactly the same size and shape as the feet which inhabit them, to eliminate pinching, squeezing and binding and give the foot muscles free, unconfined, natural action. These insides are produced by Foot-rite Foot-Sculptured Lasts.

The Foot-rite retailer in your town will prove the free muscle action feature and consequent "Won't Tire You" improvement of Foot-rites, if you'll call on him. You'll find his name below and his door swinging inward but never outward to find a more welcome store.

Anywhere in America, Canada or Great Britain—\$4.00 and \$5.00. Every pair Goodyear Welted.

MADOLE & WILSON

### HUES OF WOOD.

**Mahogany When It Is New Is of a Light Color.**

Not all the mahogany which we see in use today exhibited as an heirloom is the real antique it is said to be, for heirlooms may be made to order, and even a furniture connoisseur will have difficulty in detecting the difference. Most people think of mahogany as a deep red, while, in fact, when new it is a light color without stain, and when treated with colorless liquids it becomes a golden shade. This darkens with age, and at present all the genuine mahogany which we see must have attained its dark hue through centuries of use. It is about the most expensive of the woods in general use, but Circassian walnut is valued even higher. Birdseye maple is next, a costly material on account of the great difficulty in treating it. Its grain is perhaps the most eccentric of all the various styles, and consequently its working up and its lasting qualities are rather uncertain. The differences in grain make differences in its density and hence its disposition to crack and split. Vernis Martin is a style which was a favorite in the reign of Louis XV., and its popularity has not waned with the years. It takes its name from a famous family named Martin who were noted cabinetmakers in Louis XV.'s reign. This beautiful spattered gold dust decoration, with its paintings by Watteau, is the real Vernis Martin style, unchanged today.

Oak is at the head of the lists of woods which have varied finishes. Bog oak is a brown green shade, caused by long immersion in peat or marsh bogs. Old English oak has a rich brown shade, supposed to be acquired by age and the smoke from fireplaces. Both these styles are, however, successfully imitated by the manufacturers of today. Weathered oak and Flemish oak are both popular finishes, the former representing the color which rain and sun and wind would cause on the oak, and the latter is black, representing the effect caused by centuries of smoke on overheated rafters. Antwerp oak is one of the dark finishes like the others mentioned, but varnish and shellac are used, so that a high polish is the result.

Birch, natural or curly; maple and sycamore are the original wood shellacked and varnished without artificial stain.

### Stole a Ride.

"How on earth did you get into this awful state?"

"Don't tell the railroad authorities, ma'am, but I came on a freight train."

rooming in any city, come in a fairly even average at the end of each week.

How many miles do you suppose he walked on the day of his highest record? Twenty? Thirty? Fifty? No, only nine miles. The lowest record came the very next day and was a mile and a half. But the average for each week was thirty-three and one-third miles, or an average of six and a half miles for each working day. The six weeks showed totals as follows: 205, 275, 37, 31, 32, 30, or an aggregate of 200 miles and a half mile over. At the end of six weeks, therefore, he would have collected \$2 at a cent a mile.

In the course of a year this office traveling represents an impressive walking tour, with its total of 1,733 miles. If made as a continuous trip across country it would take him from New York to Bismarck, N. D., or to Galveston, Tex.

### Bad Knee Cured by Zam-Buk

### A FOOTBALLER'S VALUABLE EXPERIENCE

As an example of the value of Zam-Buk in cases of abrasions and injuries to muscles and tendons, as well as to the skin, the recent experience of Mr. E. Leslie, of Harriette-street, Winnipeg, may be mentioned. He says: "While playing football I received a kick on the knee. I had had previous trouble with that knee and expected that I would be laid off, unable to walk next day. I rubbed on some Zam-Buk however, and to my surprise and pleasure, it prevented all serious consequences. Before I had used the second box the knee was quite cured! Now I always carry a box when travelling, for I think Zam-Buk a blessing to humanity."

Such it has proved on many occasions. Made entirely from herbal essences, it is a purely natural balm. Eczema, ulcers, abscesses, sores on the back or loins, piles, scaling sores, itching or chafed surfaces, sore feet, blistered or chapped hands, sore nipples—for all these, as well as for cuts, burns, bruises, scalds, and everyday skin injuries, it is a veritable boon. For household use, nurses, doctors and mothers everywhere give it a good word. Of its value to athletes the above case is but one example. Sherring, the winner of the Marathon race, used Zam-Buk while training, and used it for bruises, sore feet, and as an embrocation. The leading athletes of the world have expressed their appreciation of its value. All druggists, at 50c per box, or post free from the Zam-Buk Co., Toronto, upon receipt of price 6 boxes for \$2.50. Send one cent stamp and full name and address and free sample box will be mailed you.

**Vapo-Cresolene**

Established 1879

Whooping Cough, Croup, Bronchitis, Cough, Grip, Asthma, Diphtheria

Cresolene is a boon to Asthmatics

Does it not seem more effective to breathe in a remedy to cure disease of the breathing organs than to take the remedy into the stomach?

It cures because the air rendered strongly antiseptic is carried over the diseased surface with every breath, giving prolonged and constant treatment. It is invaluable to mothers with small children.

Those of a consumptive tendency find immediate relief from coughs or inflamed conditions of the throat.

Sold by druggists.

Send postal for booklet.

### TOQUES AND TURBANS.

Toques and turbans and well-fitting small hats that, with all their smallness, are a far cry from the tiny, tip-titled things that took us so long to get used to, are all in high favor for morning wear. And certain adaptations of the sailor—chiefly when trimmed with the sailor plaids that have taken the world of fashion by storm—make mighty trifles to a smart walking suit.

Mushroom shapes are in, but will probably last only a short while, although the drooping brim they introduced has found its way to many nother radically different "creation."

Instead of the trimming at the back of the hat, forcing it up at an absurd angle, there is very little tilt permitted at all, the trimming, which still remains well massed at the back under the rim, being brought down over the hair in a way as becoming to the average woman as that tilt was trying.

Felt trimmed with velvet, is an old combination, but velvet with felt is a new one. Nine out of ten hats show the combination, often the two materials matching exactly; but some wonderfully interesting effects are got by almost daring contrasts.

Plumes are as good as ever they were and better even than that, if that be possible—but they are almost invariably less uncured kind.

Buckles share in the trimming honors of every sort of hat, from the smartest of large hats—almost picture-types, which seem so much more dressy in that very accordance of size from walking hats. One stunning little hat was a simple black felt sailor, simply "made," by the way, wide plaid ribbon was drawn through a great jet buckle, rushed round the crown, and tied in a neat, swishing bow low on the hair.

The wonderful dahlia and wine shades, which have come back into favor in dress stuffs, find their prettiest expression in hats, trimmed with plumes and roses—perhaps kept to a simple one, or to a succession of shades that deepens from the coolest imaginable shade to rich, warm tones. They are not only worn to match a costume of like color, but as often in the strongest sort of contrast.

And fruits trim some of the prettiest hats, one bunch matching the felt,

quaint little shape is anything but interfered with.

A rather severe little toque, entirely of braid, slightly raised at one side, has a soft crown and stiff rim. The only trimmings are flat folds of silk, with two long ears of silk beneath two broad black wings held in place by an oval, dull jet buckle.

### A FINANCIAL QUESTION.

A well-known member of Parliament was approached by a reputable-looking man, who said with a deferential but not servile manner:

"Excuse me, sir, but are you not Mr. Blank, M.P.?"

"I am," said the member, with affable dignity.

"I believe you are well-informed upon all financial questions?"

"My friends in the House, and the Press, are kind enough to say so."

"You have given much attention to the subject, I think?"

"More than to anything else."

"And no doubt you could give a satisfactory answer to almost any question I might ask?"

The member thought that he was being "interviewed," and wished to say something that would look well in print.

"Perhaps I could," he answered.

"Well, I have a question in finance that I should be greatly pleased if you would answer to my satisfaction."

"Very good. What is it?"

"Will you lend me five dollars for a day or two. I'm stony broke."

The member produced the dollars. "He could have had four times the amount," he said, when telling the story. "I was so completely taken aback."

### SAVED BABY'S LIFE.

There are thousands of mothers throughout Canada who have no hesitation in saying that the good health enjoyed by their little ones is entirely due to the judicious use of Baby's Own Tablets. And there are many mothers who do not hesitate to say that at critical periods the Tablets have saved a baby's life. Mrs. Wm. Fortin, St. Genevieve, Que., says: "I feel sure that Baby's Own Tablets saved my baby's life. When I first began giving them to him he was so badly constipated that the bowels could only be moved by injection, and he suffered terribly. After the first day I saw a marked change, and in less than a week the trouble was entirely removed, and he has since enjoyed the best of health." You can get Baby's Own Tablets from your druggist or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

# DARE HE?

## OR, A SAD LIFE STORY

### CHAPTER I.

"If you will allow me, I shall have the pleasure of reading aloud to you some passages from 'Mrs. Lirriper's Lodgings,' by Charles Dickens. I do not know much about the book myself, as I have never read it. I daresay that you know more about it than I do; but I am given to understand" (with a glance at the page before him) "that Mrs. Lirriper was a lodging-house keeper, that she kept lodgings in London. She was a very good sort of woman, I believe" (another hasty glance), "but she sometimes had trouble with her servants. I am told that servants are troublesome sometimes" (a slight nervous laugh, the more nervous because it does not seem to be followed by any echo from the audience). "If you will allow me; then, as I say, and if you think it will amuse you, I will read you a little of what she says about these troubles."

The foregoing remarks are uttered in a loud, shy, dogged voice by James Burgoyne, to the "Oxford Women's Provident Association." His voice is loud because, being quite unused to public reading, he does not know how to modulate it; it is shy, from the same cause of unaccustomedness; it is dogged because he is very much displeased with his present occupation, and has not been successful in concealing that displeasure. When a man runs down to Oxford for a couple of nights, to see how the six years that have passed since he turned his undergraduate back upon the old place have treated her—runs down to a college chum unseen for the same six years—this is certainly not the way in which he expects to spend one of his two evenings.

"I hope you will not mind, Jim"—ominous phrase—the college friend has said; "but I am afraid we shall have to turn out for half an hour after dinner. It is rather a nuisance, particularly as it is such a wet night; but the fact is, I have promised to read to the 'Oxford Women's Provident Association.' Ah, by-the-bye, that is new since you were here—we had no Provident Women in your day!"

"On the other hand, we had a great many improvident men," returns Jim dryly.

"Well, the fact is, my wife is on the committee, and a good deal interested in it, and we give them a sort of entertainment once a month through the winter terms—tea and buns, that kind of thing, sixpence a head; they enjoy it far more than if we gave it them for nothing; and after tea we get people to recite and read and sing to them. I am sure I wish them joy of my reading to-night, for I do not see how I am to make myself audible; I am as hoarse as a crow."

"I know those Oxford colds of old," returns Burgoyne with that temperate compassion in his voice which we accord to our neighbor's minor diseases. He is sorry that his friend has a cold; but he little knows how much sorer he will be in the course of the next hour, as he adds, "Do not distress yourself about me. I shall be quite happy in your den with a book and a cigarette. Mrs. Brown does not object, does she? And I daresay you will not be very long away."

As he speaks he realizes, with a sort of pang, the pang we pay sometimes to

sic and the books in their hands. His look passes over them indifferently—he has no acquaintance among them. He had never known many of the Oxford householders, and there is no place where a man becomes superannuated after so short a lapse of years.

Here are new arrivals. He turns his head mechanically as the opening door reveals the advent of more umbrellaed and mackintoshed waterfalls. Two men and a lady. As his eye alights on the woman, he does not start—we Anglo-Saxons are not apt to make our slow grave bodies the indexes of our emotions—but he is conscious of an odd and puzzling sensation. Where has he seen that face before?

"Bilboa's Bay" has come to an end without his perceiving it. He is putting his memory through her paces, trying to find some niche in his three happy Oxford years in which to place that strangely known yet unknown figure. There is no such niche. It is not an Oxford memory at all. What is it then? An earlier or a later one? His eyebrows are drawn together in the effort of recollection, making him look, if possible, crosser than before, when he is made aware of the return of Brown by finding his arm seized, and his friend's voice—a good deal hoarser even than when they left home—in his ear, "Jim, do you feel inclined to do a very good-natured thing?"

"Not in the least," replies Burgoyne promptly; "if any one wishes to borrow £5 from me, I should advise him to choose a moment when I am drier about the legs."

Burgoyne has very often stood up to and over his knees in water for hours, watching for ducks among whistling reeds on winter mornings, and never thought himself at all to be pitied; but he is thoroughly vexed now at his moist trousers. Brown, however, is not so easily rebuffed.

"I should be awfully obliged to you," he says croakily; "you would be laying me under a very real obligation if you would—" He stops to cough.

"If I would what?" returns the other curtly, and looking apprehensively at a book which Brown is expanding before his eyes.

"If you would read instead of me."

"I?"

"Why, the fact is"—coughing noisily again as if to show that there is no imposition—"I suppose the fog must have got down my throat; but I find I cannot speak above a whisper. I should not be heard beyond the front row; come, old man, do a good-natured thing for once in your life."

There is a pause; Burgoyne is not very fond of being asked to do a good-natured thing. He can do a big one every now and then, but he is not particularly fond of being asked to do a small one.

"Surely there must be many people here much better suited for it than I am," he says presently, looking uncomfortably around in search of the little group of booked and musicked persons whom he had seen but now standing near him, but it had melted.

"That is just what there are not," rejoins Brown, pressing his point with the more eagerness, as he thinks he sees signs of yielding; "we are very short of hands to-night, and my wife has just heard that the girl upon whom she was

shade to rich, warm tones. They are not only worn to match a costume of like color, but as often in the strongest sort of contrast.

And fruits trim some of the prettiest hats, one bunch matching the felt, another the velvet, softening and harmonizing the contrast without ridding it of its definiteness.

As a rule, mourning hats are small, close-fitting toques, resting well down on the hair and without the startling tips and tilts to which we have grown accustomed. Mushroom-shaped many of them are—but the modified sailor is also seen.

The large picture hat for mourning is reserved for the rather young girl.

An extremely stylish little black silk turban, to be worn over the face, had a soft crown of jetted braid and a shapely rolling brim of silk, higher on one side, faced half way down with the braid. The sole trimming was folds of soft crepe brought round the crown and tied in a loose loop at the back, the folds being held in flat plaits like a closed fan and falling, one about ten inches, the other eight, down the back.

A larger hat, flat, round and low-crowned, is reminiscent of a sun hat of the early '00s. It is trimmed with frills of crepe at the back, held flat toward the front with two round jet buttons.

A large Alsatian bow, edged with half-inch folds of crepe, was the only trimming of a silk turban whose rolling brim was faced with narrow bands of crepe.

Somewhat fancier is a mushroom-shape hat, its high brim made of silk braid folded to simulate flower petals, with centres of dull jet. A flat, looped bow of silk ran back on each side.

Another turban had a silk Tam-shaped crown, higher at the back, the front held flat by a straight band about an inch wide of stitched silk with bias ends. This ran directly across the top of the crown, held down by two dull jet buckles like two large round buttons. The brim, made of the braid, was fairly broad in front, rolling gradually on each side until it reached about six inches in the back. It was sharply divided in the middle of the back, each side folding outward in a triple cascade. Down the opening of the braid fell numerous loops of heavy gross-grain ribbon and two long ends reaching to the shoulders.

Another dressy little hat had a crown covered with plain black silk and a rim made of many jabots of soutache braid. The trimming was a large choux of ribbon at one side and a wide wing held by a long jet buckle.

For the older woman who is "dressy" in her tastes a tiny peaked bonnet made of black chain links of silk through which narrow ribbon is run, should prove very popular.

Hats will continue to be of a contrasting shade. Big black hats are much in vogue, often trimmed with a magnificent paradise feather. These are to be especially fashionable with the gray and striped gray and black costumes that promise to be among the season's favorites.

As for colors, so far nothing more quiet than those for street wear could be imagined. Dark blue is the one employed in the most "chic" of the models that have been exhibited. And generally that is trimmed with black braid or with black fur. With it is worn a hat of the new dahlia shade—that rich, beautiful color half way between Bordeaux and purple that is becoming to almost everybody, and especially so to brunettes.

Wings and quills hold their own for young girls' hats, principally because there is nothing else which at once gives service and style at a minimum of cost.

A modified form of the Peter Pan hat is having a small furore all by itself. It is not the extremely narrow hat, which, strange to say, is enjoying undeserved popularity among the first fads, but a hat as wide as is the usual toque, with the trimming made to add just a little more to its width. Yet, in spite of these changes, the idea of the

and in less than a week the trouble was entirely removed, and he has since enjoyed the best of health." You can get Baby's Own Tablets from your druggist or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

#### WEATHER FORECASTS BY POST.

Mexico's postal department has a novel method of informing the public of the weather bulletins given out by the weather bureau. Every letter which passes through the office is now stamped with the indications for the next twenty-four hours. This stamping is done at the same time as the postage-stamps on the letter are cancelled and the receiving stamp fixed.

#### BUYING A CROWN.

Not once or twice, but many times, a crown has been lost, stolen, or pawned. At the close of the Abyssinian War the crown of King Theodore was bought from a common soldier by a Prussian officer, and presented by him to his Sovereign. It is now at South Kensington, having been sent to the museum by the Prussian Monarch.

Doddy sentimentously—"It isn't good for a man to be alone." Peggy (thoroughly bored)—"Then hadn't you better go home to your mother?"

The Spinster—"Do you think men and women ever get too old to marry?" The Bachelor—"Not necessarily. Age doesn't always bring wisdom."

Parents buy Mother Graves' Worm Exterminator because they know it is a safe medicine for their children and an effectual expeller of worms.

"Look here!" exclaimed the old lady. "I want you to take back that parrot you sold me. I find that it swears very badly." "Well, madam," replied the dealer, "it's a very young bird; it'll learn to swear better when it's a bit older."

Cholera morbus, cramps and kindred complaints annually make their appearance at the same time as the hot weather, green fruit, cucumbers, melons, etc., and many persons are debarrd from eating these tempting things, but they need not abstain if they have Dr. J. D. Kellogg's Dysentery Cordial and take a few drops in water. It cures the cramps and cholera in a remarkable manner and is sure to check every disturbance of the bowels.

"I'm goin' to stop bein' kind and helpful to people," said little Johnny. "How is that?" asked his mother. "Well, it's this way; at school to-day I saw Tommy Jones putting a pin in the master's chair, so, just as the master was about to sit down, I pulled away the chair. The master sat down on the floor, and when he got up he licked me for pulling away the chair, and then Tommy Jones licked me for interfering. Yes, I'm goin' to stop helpin' people now."

me, I shall be quite happy in your den with a book and a cigarette. Mrs. Brown does not object, does she? And I daresay you will not be very long away."

As he speaks he realizes, with a sort of pang—the pang we pay sometimes to our dead pasts—that, though it is only three hours since he was reunited to his once inseparable Brown, he is already looking forward with relief to the prospect of an hour's freedom from his society—so terribly far apart is it possible to grow in six years. But, before his half-fledged thought has had time to do more than traverse his brain, Brown has broken into it with the eager remonstrances of a mistaken species of hospitality.

"Leave you behind? Could not hear of such a thing! Of course you must come too! It will be a new experience for you, a wholesome change. Ha! ha! and we can talk all the way there and back; we have had no talk worth speaking of yet."

Again it flashes across the other's mind, with the same pensive regret as before, that talk worth speaking of is forever over between them; but, seeing that further attempts at evasion will seriously hurt the good-natured Brown, he acquiesces, with as fair a grace as he may.

While putting on his own mackintosh, he watches, with a subdued wonder, his friend winding himself into a huge white woollen comforter, and stepping into a pair of goloshes (he had been rather a smart undergraduate in his day), while outside the opened hall door the rain is heard to swish, and the wind to howl.

"Had not we better have a hansom?" suggests Burgoyne, blinking, as the slant gusts send two or three stinging drops into his eyes.

"A hansom! nonsense!" returns the other, laughing, and with difficulty unfurling an umbrella in the teeth of the blast. "It is all very well for a bloated bachelor like you; but a man whose family is increasing at the rate mine is cannot afford himself such luxuries; come along, you are not sugar or salt."

Burgoyne feels that at this moment he can at all events conscientiously disclaim affinity with the first of the two.

It is indeed a wet night, wet as the one immortalized by Browning in "Christmas Eve and Easter Day," and who ever brought a wet night and wet umbrellas "wry and flapping" so piercingly home to us as he? The talk so cheerfully promised by Burgoyne's sanguine friend is rendered absolutely impossible by the riot of the elements. It is a good step from the suburban villa, which is the scene of Brown's married joys, to the room in the heart of the town where the Provident Matrons hold their sabbat; and by the time that the two men have reached that room there is, despite his mackintosh, little of Burgoyne left dry except his speech. They are under shelter at last, however, have entered the building, added their umbrellas to many other streaming wrecks of whalebone huddled in a corner, and exchanged the dark blustering drench for a flare of gas, a reek of tea, and a sultry stream of wet clothes and humanity. The tea indeed is a thing of the past—all its apparatus has been removed. The rows of chairs are all set to face the platform, and on those chairs the Provident Women sit, smiling if damp, with here and there a little boy, evidently too wicked to be left at home, comfortably wedged between a couple of matronly figures.

The entertainment has already begun, and an undergraduate—damp, like every one else—is singing, in a booming bass voice, something of a vaguely boastful nature about what he once did "In Bilboa's Bay." Burgoyne has for a moment lost sight of his chaperon, and remains standing near the door, looking upon the scene around him with an eye from which philanthropy is all too criminally absent. About him are grouped a few ladies and gentlemen—more of the former than the latter—who are obviously about to give their services, judging by their rolls of mu-

standing near him, but it niao meined. "That is just what there are not," rejoins Brown, pressing his point with the more eagerness, as he thinks he sees signs of yielding; "we are very short of hands to-night, and my wife has just heard that the girl upon whom she was counting for a couple of songs is in bed with influenza."

"Happy girl! I wish I too was in bed with influenza," says Jim sardonically, for he sees his fate about to overtake him.

And so it comes to pass that, five minutes later, as described at the opening of this chapter, he is seated on the platform with "Mrs. Lirriper's Lodgings" before him, rows of Provident Matrons' eyes fastened expectantly upon him, and horrid qualms of strange shyness racing over him.

Brown has indicated by a dog's ear the page at which he is to begin; so he is spared indecision on this head. But has Brown indicated the page at which he is to stop? He is gnawed by a keen anxiety as to this point all through his performance. It is hot upon the platform, the smell of tea potent, and the naked gas-jets close above his head throw an ugly yellow glare upon his book.

Having offered his prefatory observations in the manner I have indicated, he rushes in medias res. "Girls, as I was beginning to remark, are one of your first and your lasting troubles, being like your teeth, which begin with convulsions, and never cease tormenting you from the time you cut them till they cut you, and then you do not want to part with them, which seems hard, but we must all succumb, or buy artificial." (Do his ears deceive him? Is there already a slight titter? Have the smile of the convulsions and the necessity for a ratelier already struck a chord in the matrons' breasts?) "And, even where you get a will, nine times out of ten you get a dirty face with it, and naturally lodgers do not like good society to be shown in with a smear of black across the nose, or a smudgy eyebrow!" (Is he managing his voice right? Is he mumbling or is he bellowing? He rather inclines to be suspicious of the latter. Why did not they laugh at the "smudgy eyebrow?" They ought to have done so, and he had paused to give them the opportunity. Perhaps it is among them too familiar a phenomenon to provoke mirth.) "Where they pick the black up is a mystery I cannot

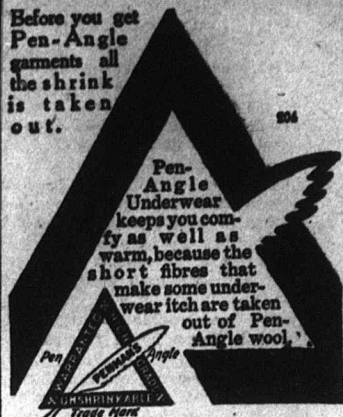

## FIFTY CENTS

IN some conditions the gain from the use of Scott's Emulsion is very rapid. For this reason we put up a fifty-cent size, which is enough for an ordinary cough or cold or useful as a trial for babies and children. In other conditions the gain is slower—health cannot be built up in a day. In such cases Scott's Emulsion must be taken as nourishment; a food rather than a medicine. It's a food for tired and weak digestions.

solve, as in the case of the willingest girl that ever came into a house. Half-starved, poor thing; a girl so willing that I called her 'Willing Sophy'; down upon her knees scrubbing early and late, and ever cheerful, but always with a black face. And I says to Sophy, 'Now, Sophy, my good girl, have a regular day for your stoves, and do not brush your hair with the bottoms of the saucepans, and do not meddle with the snuffs of the candles, and it stands to reason that it cannot be.' (Ah! what welcome sound is this? 'Willing Sophy' has produced an undoubted giggle, which Burgoyne hears spreading and widening through the room. Heartened by this indication, he goes on in a more emphatic and hilarious voice.) 'Yet there it was, and always on her nose, which, turning up, and being broad on the end, seemed to boast of it, and caused warning from a steady gentleman, an excellent lodger, with breakfast by the week.'

There can be no mistake about it now; the giggle has changed into a universal, resonant laugh, which goes on swelling and rising, until, in the final roar of approbation which greets the concluding paragraph, the reader's voice is drowned. The matrons have all along been ready to be amused; it is only that

## IN MERRY OLD ENGLAND

NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

Occurrences in the Land That Reigns Supreme in the Commercial World.

When completed Crewe's new railway station will have five miles of platforms, and nearly 100 miles of sidings. In 1893 mining rents and royalties were estimated by a Royal Commission at £25,000,000, and must now be worth £27,000,000.

A Mr. Joseph Henry, speaking in Leeds, said he could not claim that he was a Hebrew, but he was next to it—he was an Irishman.

A bequest of £30,000 has been left to the National Liberal Club by the late Mr. John Prince, of Sydenham, London, whose gross estate is valued at £42,000.

To commemorate his release from Parkhurst Prison, Jabez Balfour has sent to the governor of that establishment a handsome brass prayer-book rest, to be placed on the altar of the chapel, where, during his term of imprisonment, he acted as chorister.

The output of coal in Wales last year was 35,219,212 tons—a decrease of 294,876 tons as compared with the previous year.

At Tingley, near Morley, Yorks, Thos. Lovewell, aged 40, a carter, drowned himself while pursued by the police on a charge of attempted murder.

Pearl buttons are becoming more fashionable among ladies, and the Birmingham pearl button trade, which has declined of late years, promises to revive.

A Kowley tradesman was fined for obstruction. When served with a police summons he exhibited it in the shop window for four days, causing increased obstruction.

The Windsor Guardians have decided to dispense with the services of professional rat-catchers, engaged to rid the workhouse of a plague of rats, and to make use of some of the inmates.

In recognition of Sir Donald Currie's gift of £20,000 to the Queen's College, Belfast Corporation have agreed to present him with the freedom of the city.

It is estimated that the savings of 20,000 Irish laborers, who went over to work in England and Scotland during last year's harvest, amounted to nearly £275,000.

Upwards of a hundred members of Parliament in favor of practical temperance reform were entertained to dinner in London on the 29th ult., upon the invitation of the Temperance Reform League.

Mr. Samuel Bradbeer, who has died at Pitminster, Taunton, aged 82, was a member of the choir of the parish church for 70 years. In accordance with his own wish his body was borne to the grave by choirmen and singers.

According to a statement in Parliament recently, the Post-Office dealt with 4,700,000,000 letters and packets, and 100,000,000 telegrams and telegraph messages last year. The Post-Office employs 150,000 persons directly and 50,000 indirectly.

### PITY THE POOR DOCTOR.

"Don't look so bored," said a young doctor to a friend who had just made a wry face after listening to a neighbor's tale of what "my youngest boy said the other evening." "If you want funny experiences with young fathers and mothers you ought to be a doctor for a while. I had just fallen into a fine sleep the other evening—it was the first night for weeks I had gone to bed at a respectable time—when the telephone bell rang.

Artist Was Appointed Police Chief in German Africa.

The German Newspapers publish details of still another colonial scandal.

It is stated that Herr Puttkamer, who was dismissed from the Governorship of the German Cameroons for perpetrating various abuses of official power, at once appointed Herr Leuschner, a personal friend, to be chief of police of the district of Buea. In this position Herr Leuschner not only commanded the native police force of negroes from Liberia, but was also supreme judge and administrator of his district. His sole claim to this appointment was the fact that he was a talented artist, whose water-color pictures strongly appealed to Herr Puttkamer's artistic tastes.

One day Herr Leuschner, whose brain became affected by the tropical heat, suddenly imagined that the negroes

445 Main St., WINNIPEG

resonant laugh, which goes on swelling and rising, until, in the final roar of approbation which greets the concluding paragraph, the reader's voice is drowned. The matrons have all along been ready to be amused; it is only that, owing to the gravity of his face and solemnity of his manner, it was some time before they recognized that his intention was comic. As soon as they do so, they rewarded that intention with more than adequate mirth. Burgoyne has reached the second dog's ear, that dog's ear which his eye has been earnestly searching for throughout. His task then is ended. He heaves a deep sigh of relief, and, with a reflection that, after all, he is glad he was obliging, is preparing to shut the volume, when he feels the inevitable Brown's hand on his shoulder, and his husky voice in his ear.

"Capital! you got on capitally! I could not be better; but you will not mind going on a little longer, will you? You have only read for ten minutes. I want you to try something different this time—a little pathos, for a change. I have marked the page. Here!"

What is there to do but acquiesce? Burgoyne, complying, finds himself at once in the middle of a melancholy tale of a poor young woman left ruined and deserted in Mrs. Lirriper's Lodgings, and only rescued from suicide by the efforts of that good lady, who, however, is unable to save her from a tragic and premature death. The reader has reached the point at which Mrs. Lirriper has met the poor creature on her way to the river.

"Mrs. Edson, I say, my dear, take care! However did you lose your way, and stumble in a dangerous place like this? No wonder you're lost, I'm sure." What is this sound? Is it possible that the giggle is rising again? The giggle which he was so glad to welcome a while ago, but which is so disastrously out of place here. He redoubles his efforts to put an unmistakably serious and pathetic tone into his voice. "She was all in a shiver, and she so continued till I laid her on her own bed, and up to the early morning she held me by the hand and moaned, and moaned, 'Oh, wicked, wicked, wicked!'"

What can the Provident Matrons be made of? They are laughing unrestrainedly. Too late Burgoyne realizes that he had not made it sufficiently clear that his intention is no longer comic. The idea of his being a funny man has so firmly rooted itself in his hearer's minds, that nothing can now dislodge it. Such being the case he feels that the best thing he can do is to reach the end as quickly as possible. He begins to read very fast, which is taken for a new stroke of facetiousness, the result of which is that the last sigh of the poor young would-be suicide is drowned in a storm of hilarity even heartier and more prolonged than that which greeted "Willing Sophy's" smugged nose. In much confusion, greatly abashed by the honors so mistakenly heaped upon him, Burgoyne hastily leaves the platform. Twenty thousand Browns shall not keep him there!

(To be continued).

#### VALUE OF DEAD LEAVES.

According to tests recently made in France dead leaves possess a higher value as fertilizers for the land than ordinary manure. They are extensively used by the market gardeners about the city of Nantes. Pear leaves rank the highest in nitrogenous matter, oak leaves come next, and the leaves of vines stand lowest in value. Experiments have shown that 44lb. of pear leaves, 80lb. of poplar leaves, 51lb. of peach leaves, 82lb. of elm leaves, and 38lb. of locust leaves are respectively equivalent in nitrogenous matter to 100lb. of ordinary manure. Vine leaves alone are less valuable than manure.

Tourist—"Have you ever seen a sea serpent in the course of your travels?" Sailor—"Well, never since I signed the pledge, mister."

mothers you ought to be a doctor for a while. I had just fallen into a fine sleep the other evening—it was the first night for weeks I had gone to bed at a respectable time—when the telephone bell rang.

"Halloo, doctor!" said the voice of one of my young matron friends. "Is that you?"

"I assured her that it was. "Well, do you know, I can't think what is the matter with the baby. I'm quite frightened. She just cries and cries, and I'm fearfully afraid she's seriously ill."

"I didn't suppose there was anything the matter with the youngster, but I proceeded to ask a number of questions.

"Why, there doesn't seem to be any symptoms of sickness," I exclaimed. "Perhaps she's hungry."

"Well," said the mother, "I never thought of that."

"Then she rang off. I crept back into bed, and had just dropped into another fine doze when again went the telephone bell.

"Halloo!" I called.

"O, halloo, doctor!" went on the same voice. "Doctor, you were right; she was hungry. Good-bye."

Where can I get some of Holloway's Corn Cure? I was entirely cured of my corns by this remedy and I wish some more of it for my friends. So writes Mr. J. W. Brown, Chicago.

Men make money that their wives may leave it at home when they go shopping.

She—"Lady Buncumb is fond of doing good on the Sly." He—"Yes; but she's terribly cut up if other people don't find out about it."

A Merry Heart Goes all the Day. — But one cannot have a merry heart if he has a pain in the back or a cold with a racking cough. To be merry one must be well and free from aches and pains. Dr. Thomas' Electric Oil will relieve all pains, muscular or otherwise, and for the speedy treatment of colds and coughs it is a splendid medicine.

If anything the quack doctor was more than usually eloquent. "Ladies and gentlemen," he cried, at the end of his telling oration. "I have visited this place for the last ten years. I have sold thousands of bottles of this miraculous specific, and I have never received a complaint from a purchaser. Now, what does this prove?" He paused for dramatic effect, and there was no doubt that his words had impressed his audience, till a man at the back of the crowd spoke. "Don't prove nothing," he said. "Everyone knows dead men tell no tales."

#### MARTYROOM DESCRIBED.

Kingston Man Tells How He Suffered and How He was Released.

Chas. H. Powell.

"For years a martyr," is how Chas. H. Powell, of 105 Raglan Street, Kingston, begins his story. "A martyr to chronic constipation, but now I am free from it and all through the use of Dr. Leonhardt's Anti-Pill."

"I was induced to try Anti-Pill by reading the testimony of some one who had been cured of constipation by it. I had suffered for eighteen years and had taken tons of stuff recommended as cures but which made me worse rather than better. Doctors told me there was no cure for me. Dr. Leonhardt's Anti-Pill cured me."

All Dealers or The Wilson-Fyle Co., Limited, Niagara Falls, Ont.

that he was a talented artist, whose water-color pictures strongly appealed to Herr Puttkamer's artistic tastes.

One day Herr Leuschner, whose brain became affected by the tropical heat, suddenly imagined that the negroes forming his police corps were meditating a massacre of all Europeans in the district. He thereupon summoned all Europeans and gave them rifles and ammunition of the latest pattern. Then he drew up the native levies and ordered them harshly to lay down their arms. The negroes, not understanding what was required of them, hesitated for a moment in astonishment. Herr Leuschner, regarding this hesitation as a proof of mutiny, ordered the Europeans to fire on the natives. Several were killed, many were wounded, and the remainder fled to the police station of the adjoining district, where they sought protection.

Privy Councillor Seitz, who was already appointed Herr Puttkamer's successor as Governor, conducted an official investigation into the affair, and two soldiers of the native troops were condemned to long terms of imprisonment. Herr Leuschner escaped scot-free. The Governor impressed on the witnesses the absolute necessity of maintaining secrecy, and the truth would probably never have become known if the German Consul at Monrovia, in Liberia, had not reported that it was extremely difficult to recruit Liberian natives for the Cameroon police force since Herr Leuschner had his innocent subordinates shot down at Buea. The Consular report led to the discovery of the details now published.

Sleeplessness.—When the nerves are unstrung and the whole body given up to wretchedness, when the mind is filled with gloom and dismal forebodings, the result of derangement of the digestive organs, sleeplessness comes to add to the distress. If only the subject could sleep, there would be oblivion for a while and temporary relief. Parmelee's Vegetable Pills will not only induce sleep, but will act so beneficially that the subject will wake refreshed and restored to happiness.

A clergyman who was a widower had three grown-up daughters. Having occasion to go away on a visit for a few weeks, he wrote home from time to time. In one of his letters he informed them that he had "married a strapping widow with six children." You may imagine what a stir this created in the household. When the vicar returned home, one of his daughters, her eyes red with weeping, said:—"Where's the widow you married, father?" "Oh, I married her to another man."

The Flagging Energies Revived.—Constant application to business is a tax upon the energies, and if there be not relaxation, lassitude and depression are sure to intervene. These come from stomachic troubles. The want of exercise brings on nervous irregularities, and the stomach ceases to assimilate food properly. In this condition Parmelee's Vegetable Pills will be found a recuperative of rare power, restoring the organs to healthful action, dispelling depression, and reviving the flagging energies.

#### DESERVED TO SUCCEED.

A late matrimonial engagement is said to be the outcome of a daring little piece of repartee on the part of a young woman who has enjoyed the reputation of being not only a wit, but a beauty and belle as well. Although quite young, she was known to have declined the honor of matrimonial alliance with several so-called "catches," and it began at last to be rumored that her mind and heart were set on one of her admirers who had not as yet the temerity to come to the point.

However that may be, the young man in question was her partner in an assembly, and during the intermission for supper was seated with her in a sequestered nook, "far from the madding crowd." Apropos of something

12 Merchants Bank Building,  
Winnipeg, Man.

that had been said, he asked her laughingly if the report was true that she had refused all the eligible men in her set. She blushed vividly for a moment, then suddenly raised her head, looked him full in the face, and said, pointedly:—"Yes, it is true—present company excepted."

It is, perhaps, needless to state that they remained in the "sequestered nook" some time. Humor also has it that the above conversation was overheard by one of the discarded suitors, who forthwith "gave it away."

#### EXTRACTING AN ELEPHANT'S TOOTH.

The greatest dental operation on record was performed upon an elephant in the city of Mexico. The aching tooth was 12in. long and 14in. in diameter at the root. After the animal had been securely fastened with chains, his mouth was pried open and a quantity of cocaine applied to deaden the pain. When this was done a hole was bored through the tooth and an iron bar inserted. Then a rope was twisted around the bar and four horses attached to drag it out.

## Dear Mother

Your little ones are a constant care in Fall and Winter weather. They will catch cold. Do you know about Shiloh's Consumption Cure, the Lung Tonic, and what it has done for so many? It is said to be the only reliable remedy for all diseases of the air passages in children. It is absolutely harmless and pleasant to take. It is guaranteed to cure or your money is returned. The price is 25c. per bottle, and all dealers in medicine sell

# SHILOH

This remedy should be in every household.

# THE COST OF CHARACTER

It Is One of the Greatest Assets a Man Can Have in This World.

"If thou wilt be perfect, go sell that thou hast and give to the poor, and thou shalt have treasure in heaven; and come and follow me."—Matt. xix., 21.

Gold may depreciate, stocks rise or fall, and business values change so as to leave the market in panic, but every man on the street or in the store knows that one value forever remains permanent, unvarying, and that is character. Every other asset may be swept away and success still achieved if this remain; every other aid may be at its best and allure only await him who lacks the wealth of character.

Character is that of which reputation is but the echo, often mistaken and misleading. Character is the last, the ultimate, value of life. It is the trend of the whole being towards the best. It is the passion and power that holds one true despite all persuasion.

It is the one thing worth having, because upon it all other values depend. The wealth of the whole world still leaves poor him from whom the soul, the power to appreciate, the purity of heart which sees God and the good, the peace and quietness of a good conscience, have fled.

The wise ever have set this treasure above all others. Happy the people that owe righteousness more than revenue, the way of virtue, the clear eye, the upward look, and the approval of

## A GOOD CONSCIENCE

Above all other prosperity, or advantage. The days of national greatness ever have been those when the things that make manhood bulked far above all other considerations. Alike to people and individuals, the imperishable value ever has been that of character.

This asset comes not to a man by accident. He who is rich in character, whose success in many ways is built upon his resources in this way, does not just simply happen to be good, true, and square. There is a price to character; it costs more than any other thing, or it is worth more than all other things. Essentially it never is inherited, but always acquired by processes often slow and toilsome and at great price.

If you would be perfect you must pay

the price of perfection. Unless the passion of life is this perfection it never will be your possession. Dreams of ideal goodness only waste the hours in which it might have been achieved. No man ever finds character in his sleep. The education of the heart is a thing even more definite than the education of the head. The school of character has an infinite variety of courses and an unending curriculum.

Folk who are sighing for goodness usually go away sorrowful when they learn what it costs. But life ever is putting to us just such tests as the wise teacher put to the rich young man. You say you desire character, the perfection of manhood or womanhood

## ABOVE ALL OTHER THINGS;

do you desire this enough to pay for it your ease, your coveted fame, your cherished gold, perhaps your present good name and peace of mind? Is the search for character a passion or only a pastime?

This does not mean that this prize of eternity falls only to those who devote themselves wholly to self-culture, to the salvation of their own souls. The best lives have thought little of themselves, but they have lived for the ends of the soul, to help men to better living, to save them from the things that blight and damn the soul. Like the Leader of men they have found the life unending by laying down their lives, paying the full price, selling all in order that right and truth and honor and purity, love and kindness and justice might remain to man.

The world's wealth depends not on what we have in our hands, nor even on what we can carry in our heads. It depends on the things that we have and the beings we are in our hearts. Fools we are who live only to make a living, houses, shelter, food, rags, and toys, who might live to make a life, and to mould lives, to earn the riches and honor enduring; who have not learned the gain of all loss that leads the heart to look up, the joy of all sorrow that sweetens the soul, and the profit from every sacrifice that is a paying of the price of perfection.

HENRY F. COPE.

# THE S. S. LESSON

INTERNATIONAL LESSON,  
OCT. 21.

Lesson III. The Parable of the Talents.  
Golden Text: Prov. 28. 20.

## THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

To Watchfulness and Endeavor.—The lesson of the Parable of the Talents contains an important addition to the teaching of the Parable of the Ten Virgins which precedes it, and with which it is closely connected both in thought and in point of time. The lesson of the parable is still partly that of watchfulness; but to the exhortation to vigilance is added the thought that there is work to be done in the time of waiting, and that the time of watching is to be one, not of idleness but of earnest endeavor. Still another lesson of the parable

he felt with his own small allotment of capital. He had not considered the one talent worth investing.

26, 27. Thou wicked and slothful servant—Wicked because slothful, dissatisfied, and envious.

Thou knewest that I reap where I sowed not — The accusation, though false, is admitted by the master in order that he may the more forcibly bring home the charge of indolence and unfairness. His argument is, Granted that I am an exacting and unfair man in my dealings with others, thou, who art thus accusing me, hast thyself failed to do the least which in fairness thou couldst have done for me, namely put my money to the bankers that at my coming I should have received back mine own with interest.

28. Take ye away, therefore, the talent from him—Even the smallest portion of the lord's money must be productive and must be placed where it will bring returns.

29. Unto every one that hath capacity, ability, and industry, shall be given opportunity and increase.

From him that hath not, even that which he hath shall be taken away—Implying that the decrease of capital,

## PERSONAL POINTERS.

Notes of Interest About Some of the Prominent People.

The Austrian Emperor has more titles than any other monarch. He is a king nine times over and a duke eighteen times.

Queen Wilhelmina of Holland is an excellent linguist, for, besides her knowledge of Malay, she speaks French, German, and English as fluently as her native Dutch, and she knows something besides of Italian and Russian.

Lord Alverstone has the distinction of having made the longest speech of any living lawyer. This was when he appeared as counsel for his country before the Venezuela Arbitration Commission, and his address occupied sixteen consecutive days.

General Sir Frederick Stephenson, G.C.B., is one of the most distinguished veterans in the British Army. Fifty years ago he was fighting in the Crimea and directly afterwards saw service in China. He won the thanks of Parliament for his services in the Sudan in 1884-5. Sir Frederick Stephenson is today Constable of the Tower of London and colonel of the Coldstream Guards.

It is but seldom that more than one sister in a family marries a present or prospective Sovereign; but this happened in the case of our own Queen Alexandra and the Dowager Czarina of Russia (daughters of the late King of Denmark). It is also noteworthy that two of his sons are now respectively Kings of Denmark and Greece, and a Grandson King of Norway. That four children of one ruler should have attained Sovereign or Consort rank is truly remarkable in the annals of Royalty.

Sir Robert Finlay might very easily have been making contributions to our medical knowledge instead of devoting himself to the law. Before he thought of eating a Temple dinner he was busy graduating M.D. at Edinburgh University, which he did quite successfully. After two years however, he came to the conclusion that he was more suited to the law. It was a medical jurisprudence course at Edinburgh, under Sir H. W. Littlejohn, which first aroused his love for matters legal, and led eventually to the translation of his activities.

One point in the Queen of Spain's future life seems to have escaped general notice. She will have to live under the same roof as her mother-in-law, her sister-in-law, her aunt-in-law, her husband's brother-in-law, and the three children of the King's dead sister, the eldest of them being heir to the throne. Of course, the Spanish palaces being designed for such emergencies, they are very roomy, and each member of the family has a separate establishment, except where meals are concerned. These are all prepared in one kitchen, and most of the Royal inhabitants of the palace dine together.

Mme. Emma Calve is one of the kindest-hearted women living, and passionately fond of children. Last year, when touring in the States, she was busy writing in her apartment in a New York hotel when a timid knock came to the outer door. On being opened by the maid two small children were revealed—both girls. In French they inquired if Mme. Calve were at home. The maid, leaving them at the door, informed her mistress, and the fascinating prima donna immediately ran out, welcomed the children, and returned with them to her room. Mme. Calve kissed them both and then inquired what she could do for them. They wanted to hear her sing. The famous "Carmen," without in any way questioning their right to a free concert, instantly went to the piano and sang for them some of those Provencal songs she so much loves. Then she ordered tea and cakes, loaded the children with bon-bons, and sent them on their way rejoicing.

Nikola Tesla, the well-known inventor, whose electrical apparatus is used in the transmission of power from Niagara Falls, is a strikingly handsome man of forty-nine—tall, dark, and typically

# HOME.

## PUMPKIN DELICACIES.

**Pumpkin Chips.**—Pare and cut the pumpkin into thin strips and take equal weight of sugar, saturating the sugar with lemon juice. When thoroughly wetted place this on the sliced pumpkin and let stand 34 hours. Allow for each pound of sugar 12 peach pits or bitter almonds. After draining pumpkin from the syrup heat syrup in separate vessel and add the pits with, for each 2 lbs. sugar and pumpkin combined, 8 cloves,  $\frac{1}{2}$  nutmeg grated, dessertspoon powdered cinnamon and teaspoon vanilla flavoring. Place the pumpkin in this hot, spiced syrup, in a double vessel, letting simmer till well flavored and tender. Remove pumpkin to heated jars and keep hot until the syrup is cooked down to a thread-like consistency, when it should be strained from all but the pits and poured over the chips; seal carefully. The pumpkin may also be dried and candied, after this preparation, as for any candied fruit. Also ginger or lemon flavoring may be used.

**Pumpkin Marmalade.**—Wash, cut up and pare yellow, ripe pumpkins, removing seeds and the fibre. To each pound allow 1 lb. sugar and a small orange or lemon. Grate coarse the pumpkin and place with sugar in preserving kettle. Add grated rind of lemon and strained juice. Let all boil up slowly, stirring often, skimming well, till smooth and thick. Place in small glass jars with double round of tissue paper or paraffin. Cover with waxed paper or bladder.

**Pumpkin Biscuit.**—To 1 pint of dry, mashed pumpkin add 1 teacup sugar, 1 tablespoon butter and  $\frac{1}{2}$  cup yeast. Beat well before adding yeast, then mix well with flour till batter is quite stiff. Let rise over night. In the morning beat again and drop into hot gem pans or roll out into biscuits. Let rise and bake. Eat hot.

**Hurry-up Pumpkin Pie.**—When you wish to make a pumpkin pie in a hurry and have not time to stew the pumpkin, just peel a part and grate it, then season the same as if stewed. One egg is sufficient for two pies. Add tablespoon of cornstarch. Not everyone knows that a little nutmeg improves a pumpkin pie.

**"Oscar's" Pumpkin Pie.**—Boil and strain the pumpkin, taking to each 3 pints pumpkin 4 eggs, 2 tablespoons flour, 1 lb. sugar, 1 tablespoon ground ginger, 1 teaspoon salt and 2 quarts milk. Mix while pumpkin is hot. Bake a little less than an hour in moderate oven.

**The Alden Pie.**—To 1 pint pumpkin take 1 egg, 1 gill molasses,  $\frac{1}{2}$  lb. unrefined or raw sugar, butter size of an egg, gill milk, salt to taste, and a little each of cinnamon, cloves, nutmeg, allspice and ginger. Bake 40 minutes.

**Pumpkin Indian Pudding.**—To 1  $\frac{1}{2}$  pints cold, mashed pumpkin take same quantity Indian meal and tablespoon ground ginger. Meantime heat to boiling point 1 quart milk; take from fire and stir into it  $\frac{1}{2}$  pint Orleans molasses. Add gradually the pumpkin and meal (mixed) and grated rind of one lemon or orange. Dredge a pudding-cloth and place in it this mixture, leaving ample room to swell. Plunge into boiling water and keep fast boiling for 4 hours. Turn several times and replenish water, boiling temperature. Serve at once when done, first dipping bag into cold water, then turning out and serving hot with butter and syrup.

## MISCELLANEOUS RECIPES.

**Peanut Cookies.**—Cream together 1 cup brown sugar and 2 tablespoons butter, add 3 beaten eggs and two tablespoons sweet milk, 1 teaspoon baking powder in sufficient flour to make a

and in point of time. The reason the parable is still partly that of watchfulness; but to the exhortation to vigilance is added the thought that there is work to be done in the time of waiting, and that the time of watching is to be one, not of idleness but of earnest endeavor. Still another lesson of the parable is that even the least talented person in the kingdom of God will be held responsible for the right use of such gifts and abilities as may have been intrusted to him. A partial parallel to the parable of the talents is found in the Parable of the Pounds (Luke 19: 12-27). There are, however, important points of distinction which separate the two parables from each other. These are, (1) the different occasions on which each was spoken, and (2) the different special incidents and details of each. A careful comparison of the two parables in connection with the study of our lesson will be found profitable.

Verse 14. It is as when—That is, the general situation in the kingdom of heaven.

Going into another country—Lit. going on a journey, as the same verb is translated in the next verse: "He went on his journey."

Servants—Lit. bondservants, that is, slaves.

Delivered unto them his goods—The barbarous customs of antiquity which made slaves of all prisoners of war without distinction brought about the peculiar situation at times in which bondservants manifested greater ability and intellectual capacity than their masters to whom they were bound in servitude. A great deal of commerce and antiquity was managed by slaves, and these were often entrusted with important and responsible functions. In this case the master entrusted to each of several slaves a large sum of money to be invested during his absence as each may deem fit and profitable.

15. Five talents—A talent of silver was equal to about two thousand dollars in our money. In the interpretation of the parable the talents are to be thought of as capacities and opportunities for service. It is from the use of the word in this parable that the present day meaning of the term as a natural gift or endowment has come.

16. Straightway—A word occurring very seldom in Matthew but a favorite connective with Mark.

Traded with them—Invested them, industriously seeking to increase the capital.

18. Dugged in the earth, and hid his lord's money—For purposes of safe keeping, apparently. The man was at least not dishonest; he was simply indolent and envious of those to whom larger sums had been given.

19. Maketh a reckoning with them—Asks them to render an account of the business transactions in which they have engaged during his absence in order that he may ascertain what has been the increase of his substance under their care.

20. Other five talents—Like the seed sown on good soil the investments of the first and second servants had yielded a hundredfold return.

21. Thou hast been faithful over a few things—The sum given to the servants had been, after all, but a small fraction of the total wealth of the master.

Enter thou into the joy of thy lord—Either (1) become a partaker of the happiness which thy lord himself enjoys, and which thou shalt be permitted to share because of thy faithfulness; or (2) share in some specially prepared joyous occasion or feast (as in the last parable) planned by the master as a reward for thy faithfulness.

22. Other two talents—The same percentage of increase as has been achieved by the first servant.

24. A hard man—Unfair and exacting in business transactions.

Reaping where thou didst not sow, and gathering where thou didst not scatter—Demanding increase where practically no capital has been invested. The charge made by the slothful servant reflects the dissatisfaction which

returns.

29. Unto every one that hath capacity, ability, and industry, shall be given opportunity and increase.

From him that hath not, even that which he hath shall be taken away—Implying that the decrease of capital, the diminution of capacity and power, is the fault of the indolent man himself.

## NOISE AND HEALTH.

### Eminent Physician Attacks One of Britain's Cherished Institutions.

"Big Ben" is nothing but a relic of barbarism.

Such was the attack made upon one of Britain's most cherished institutions by Dr. Theo. B. Hyslop, senior physician to the Royal Hospital of Bridewell and Bethlehem at the Congress of Sanitary Inspectors at Blackpool recently.

Dr. Hyslop, however, only touched on Big Ben in passing. He classed it merely as one of the many noises which torture the town-dweller, and the subject of his speech was the effect of noises on health. The effect, it seems, is a very bad one indeed.

"The fact that town life under existing circumstances makes it impossible to obtain adequate brain rest goes far to cause the prevalence of insanity about which municipalities are so solicitous, and which, in my opinion, they could do so much to prevent," said Dr. Hyslop.

The influence of noise upon infant mortality, he continued was much more serious than was at present dreamed of. He had seen the growth of infants who lived in or near noisy streets greatly arrested, and their removal to quieter localities had enabled them to recover.

"The noises of clocks, bells, and chimes, such as Big Ben, are nothing but relics of barbarism—the baneful accompaniments of the night."

After Dr. Hyslop's speech the conference passed a resolution asking the Central Council of the association to bring the subject of noise before the County Councils.

Sir James Crichton Browne then said that he had lately been the victim of a lutanian cock of amazingly indefatigable and exasperating habits.

"But," asked Dr. Hyslop, "have you ever heard a really good, healthy fount—not a melancholic cat, but one really and properly in love? It can give points to any cock that ever crew."

## MATERIAL AND IMMATERIAL.

It was a particular habit of John McNab to have a glass of Scotch whisky every night, and his good wife put the bottle and glass on the table at ten punctually. For fifteen years John had never exceeded his one glass, but one Monday night he helped himself a second time.

"Did you drink two fu' glesses?" asked the wife.

"I did," replied John, solemnly. "An' what's the meaning o' such extravagance ava?"

"Weel, it's like this. The meenister said in his sermon yesterday that every man is really twa—that is, a material man and an immaterial one, an outer and an inner man, so tae speak, and it seems to me ane gless aween twa is hardly enough."

Mrs. McNab said no more, but next night at ten, instead of a bottle and a glass, she placed two glasses—one full and one empty—on the table.

"What's the empty gless for?" asked McNab.

"They're baith fu'," replied the wife. "Gae' awa wi' you, woman; you're haverin'."

"Oh, no, I'm no," was the canny reply; "ane's fu' o' material whusky. That's for the material man. Theither's fu' o' immaterial whusky. That's for the immaterial man. Noo dae you understand?"

And John was reluctantly compelled to admit that he did.

loaded the children with bon-bons, and sent them on their way rejoicing.

Nikola Tesla, the well-known inventor, whose electrical apparatus is used in the transmission of power from Niagara Falls, is a strikingly handsome man of forty-nine—tall, dark, and typically Greek in features. He possesses strength of will to a remarkable degree, and in proof of the forcefulness of his nature the following story is told: When a lad of between nine and ten his father, a priest of the Greek Church, one day entertained Nikola and his sister with the story of how the martyred Cranmer held his right hand in the fire and unflinchingly watched it until it was consumed. The priest was full of admiration for the bishop's courageous act, but his son appeared quite unable to see anything particularly wonderful in such a performance. His father laughed good-humoredly, whereupon the boy ran out of the room and returned with a small lamp. This he lighted, and then holding his index finger in the flame kept it there until the flesh began to burn. His audience begged him to desist, but it was not until the finger was almost charred that he withdrew it and blew out the light.

Mr. Edison, the inventor, is a staunch admirer of King Edward, and to an interviewer recently he stated that one of the greatest pleasures he looked forward to when he visits England in 1908 will be his possible meeting with the British Sovereign. Mr. Edison well recollects the visit of King Edward to the States, now nearly half a century ago. "And no wonder," he humorously remarked, "for on that day I managed to get the biggest black eye I ever had in my life. It happened in this way. I was at school at the time in Detroit, and there was bitter rivalry between our establishment and another school in the neighborhood. Well, the Prince of Wales was to pay Detroit a visit, and all the Schools were to take part in the general welcome. We were therefore lined up, commanded to 'Quick march,' and were nearing the scene of festivities when our rivals loomed in sight. We met, and an instant later the fight was on. I felt that things were coming my way, and I was not wrong, for suddenly I received a terrific blow in my right optic which put it entirely out of business. When I recovered myself our assailants had vanished, order was restored, and we proceeded on our way. Yes, I saw the Prince all right, though it was out of one eye only."

## FAITH AND FINANCE.

In these days of persistent appeal the record of the Muller Orphanages at Ashley Down, Bristol, England, stands out somewhat prominently. It is well known that the late Mr. Muller himself never begged for help in his orphanage work, and it now appears that since his death a total sum of £236,619 has been raised without any public appeal save that contained in the annual report. The present director, Mr. G. F. Bergin, states that at the beginning of the year the "faith" policy was severely tried, but came out triumphant. Without appeals, without bazaars, and solely in answer to prayer, £27,180 has been received and all has gone well, except that the resident helpers had at one time to wait for their salaries. Nearly 2,000 orphan children were taken care of in the homes during the year.

"Why do girls wear engagement rings?" "On the same principle that a person ties a string around his finger—so they won't forget they're engaged."

Scene: A Court of Justice. Tedious K. C. is addressing the jury in an accident case, a bag having fallen from a window on to the head of the plaintiff. Tedious K. C.: "I know not, gentlemen, for my instructions do not tell me, what were the contents of the bag. Conceivably it may have been a bag of coals; possibly it may have been a bag of malt; perchance it may have been a mail-bag—" The Judge: "Perhaps it was a wind-bag."

## MISCELLANEOUS RECIPES.

Peanut Cookies.—Cream together 1 cup brown sugar and 2 tablespoons butter, add 3 beaten eggs and two tablespoons sweet milk, 1 teaspoon baking powder in sufficient flour to make a stiff dough. From 1 pint roasted peanuts rub off the brown skin and put through the meat chopper. Stir the peanut meal into the dough, roll out, cut into round cakes, put a peanut meal in the centre of each and bake in a moderate oven.

Scalloped Potatoes.—Two cups of raw, finely sliced potatoes, one chopped onion, a tablespoonful of chopped parsley, and a tablespoonful of butter. Butter a deep dish and put in a layer of potatoes sprinkled with salt, pepper, butter, onion and parsley, and so continue to the top. Bring a pint of milk to the boiling point, add a large teaspoonful of flour stirred until smooth in a little cold milk, pour over the potatoes and bake in a hot oven until tender.

Charlotte Russe.—Soak three-quarters level tablespoon of granulated gelatine in one-quarter cup of cold water for half an hour, then set the dish in another of hot water and stir until the gelatine is entirely dissolved. Beat one cup of thick cream, add powdered sugar and vanilla to suit the taste and then the lukewarm gelatine. Pour the gelatine in slowly and bring the mixture up from the bottom of the bowl while stirring. Line five small moulds with lady fingers or sponge cake sliced thin and fill with cream. Set away to harden.

Poached Eggs.—To keep the eggs in shape the water must simmer, not boil hard. Salt the water and put in several muffin rings. Drop an egg into each ring and dash the hot water over the top of the egg until the white is set. Lift out with a flat skimmer on to slices of buttered toast, dust with salt and pepper and add a bit of butter. Lay a sprig of green parsley beside the egg.

## CUES FOR THE COOK.

To make wine or lemon jelly attractive to serve mold it in cups or glasses the size of a macaroon. Cut angelica in the shape of a star and put in first so that it will come in the top of the mold, and through the centre put colored fruits, say, red, white, and maraschino cherries. Put a macaroon on top so that when turned out of the molds it will hold the jelly.

Cucumbers are prettily arranged for service from the side by cutting them in thin slices, but not quite through. Insert between the slices at a place corresponding to every third cucumber a slice of radish cut with the peel left and sliced to the exact size of the cucumber, or do the same with lemon, tomato, or apple. Serve on lettuce leaves with French dressing.

Bananas are coated with finely chopped peanuts by cutting them into halves and dipping them into mayonnaise. Let this drain off, roll them in the peanut crumbs, and serve on lettuce leaves.

A pretty imitation of bar le duc can be made with ordinary preserved currants or gooseberries. Whip a little cream and add it gradually to cream cheese, continuing the beating until the cheese becomes frothed. Heap it on a small dish and place the preserve on the top. Any ordinary jam and even cranberry marmalade in small quantity makes a good combination with the whipped cheese.

## STAINS AND RUST SPOTS.

We should remember that soap is an alkali and sets vegetable stains. Therefore all stains should be removed before the articles are put in a wash tub. The sooner a stain is treated the more readily it will yield to the treatment. Pour boiling water through fruit stains. Where obstinate soak in a solution of oxalic acid. Wash vaseline stains in alcohol; paint, in turpentine, kerosene, or alcohol; varnish, in alcohol; grass or other green vegetable stains, in alcohol, kerosene or molasses. For stains from blood, meat juice, and white

of egg use cold water. In the case of milk, cream, sugar, or syrup stains soak in cold water and wash with soap and cold water. Tar, wheel grease, or machine oil stains should be rubbed with lard and allowed to stand a few minutes. Then they should be washed with soap and cold water. Tea, coffee, or cocoa stains should be removed with boiling water; if obstinate, with a weak solution of oxalic acid. Use oxalic acid for iron rust spots, and for ink stains use lemon juice and salt; then hang in the sun. If the ink does not disappear at first repeat the operation until it does. When oxalic acid is used care must be taken that the article is thoroughly rinsed to remove every particle of the acid. When boiling water is used stretch the stained part over the bowl and pour absolutely boiling water from a height until the stain disappears. Be careful that the boiling water does not touch any silk embroidery or other delicate colors.

## SHIP SURGERY MARVELS

### FORTUNES PICKED UP BY SHIPS GOING DOWN.

#### Badly Wrecked Vessels Have Been Safely Taken Off Dangerous Rocks.

The most celebrated case of salvage is that of the great steamer Milwaukee. She was a brand-new vessel of 7,300 tons when, upon her first voyage, she ran hard and fast upon the granite crags of the Scottish coast near Aberdeen. There she lay, jammed hard and fast, and exposed to the send of a heavy swell which within the first twenty-four hours twisted her bows to pieces.

Captain Bachelor, who was entrusted with the task of salvaging her, saw at first glance that the fore-part of the ship was beyond hope, and resolved upon a desperate expedient. He hung a belt of small dynamite cartridges around the hull, just forward of the engine-room bulkhead, and by firing these, actually cut the vessel completely in two.

#### BIG DREDGER BROKEN IN TWO.

The broken bows were left upon the rocks, but all the after-part of the ship, containing the valuable engines, was floated safely off. The saved portion was then towed back to the Tyne, where Messrs. Swan and Hunter, her original builders, constructed a new fore-part, and splicing this onto the stern section, made her as good as new. An immense dredger called the Walter Bibby, which sank in Leith Harbor, was rescued in a similar fashion to the Milwaukee. Settling on a large rock, she broke her back. The salvors fastened around her heavy rubber bands containing dynamite cartridges, and firing these electrically, broke her clean in two. The open ends were then closed in with bulkheads, the water pumped out, and at once the fore-part rose like a cork. But the stern end, being full of heavy machinery, refused to rise. When it did rise, it was no sooner up than it capsized and sank again. But the salvage men stuck to the work, and though it sank five more times, yet eventually they got it up and towed it to shore. The cost of this kind of salvage is naturally pretty heavy. The bill for raising the Walter Bibby was about \$20,000.

#### FAST ON THE DREADED MANACLES.

Many a vessel which once lay an apparently hopeless wreck upon an iron-bound coast is to-day carrying great cargoes across the ocean at many knots an hour. The Philadelphia, for instance, which once, as the steamship Paris, held the speed record of the Atlantic. All will remember how one dark night she ran upon the Manacles, and lay there in an apparently hopeless position, with great rocks piercing her steel bottom.

## ON THE FARM.

### FARM POULTRY RAISING.

In dealing with poultry and the farmer the exigencies of the latter, as to situation and circumstances, must be thoroughly understood. To the farmer his poultry is only one of many different branches of farm work, it would be simply misleading to induce him to keep more fowls, or hatch out more chickens than he can successfully manage and rear. It is ever to be borne in mind that the great bulk of the egg and poultry supply must come from the farmers of the country at all seasons of the year. It is also to be remembered that it is not for a few farmers with a great many hens each that the largest proportion of this supply will come, but rather from the many farmers with a few hens each, and who are, therefore, more likely to manage them successfully. There is no reason, however, why a farmer should not make a specialty of poultry raising if inclination and circumstance lead him to do so. From 100 to 150 hens should not be too many for the ordinary farmer to profitably handle, and it should not be difficult for him to hatch out, and rear to marketable age 150 chickens. If he has help from wife or family a large number might be reared.

There are two great markets open to producers, viz.:—The Home and British Markets. Both offer remunerative prices for the reliable product in the shape of eggs, and the superior quality of poultry at almost all seasons of the year.

The Home Market calls for fresh eggs and good poultry at all periods of the year. The better the quality of the poultry and the fresher the eggs the better are the prices obtained. The prices paid for new laid eggs in winter in the leading cities of the Dominion range from 35 to 50 cents per dozen; for poultry from 20 cents per pound for early birds, to 15, 10 and 8 cents as the season advances. The aim of the producer, in this case, should be to reach the higher price markets of Toronto and Montreal. For both poultry and eggs there is an increasing demand. The aim of the farmer should be the year when they are worth most money. A striking feature of the summer egg trade of the past two years has been the high price paid by leading purveyors for the strictly new-laid article. As high as 20, and in some cases, 25 cents per dozen, were paid last summer. The cause of these high prices is, perhaps, given in the words of a leading city grocer—with a choice trade—who remarked to the writer: "Our customers will not have any other kind than the strictly new-laid eggs with the peculiar flavor to them," and we must try and meet this demand. Whether these unusual summer prices are only temporary or are likely to be permanent remains to be seen, but the trend of the markets in recent years, is to increase rather than decrease the value of the choice product.

The British Market and its requirements are:—Large eggs, 7 or 8 of which should weigh one pound, and preferably of brown shell. They should be of good flavor and as fresh as possible; clean and carefully packed, so as to present an inviting appearance on arrival; poultry, only of the best market types, and should be shipped in order to secure the best possible prices. As in the case of eggs appearance and quality are great factors in determining values.

The careful packing of poultry and eggs may be attended to by the shipper, but it is only the farmers who can place the fresh eggs and poultry of the desired type and quality in the hands of the storekeeper or shipper. Cold-storage facilities are such that the products are kept in excellent condition en route.

1st Boy—Is that pie good?

2nd Boy—Naw!

"Den why yer eating it?"

"Ter aggravate de other kids! Dey imagine dat it's delicious!"—Life.

finger and end of the thumb are far quicker and will not scratch. When pulling the short, or pin feathers, the nails will have to come into the play, but great care should be used that only a careful clean pluck is made—not a scratch or scrape.

By the time the body is finished the bird will be so nearly dead that flapping will be almost impossible so that the wings can be unlocked and picked clean.

It is not necessary to remove the point feathers. Nearly every housewife values the turkey's for brushes, and do not mind paying for the slight additional weight, while the chicken's may be cut off at the outer joint and not affect the sale of the bird in the least,—thus saving considerable time and disagreeable work.

### GENERAL INFORMATION.

#### Little Bits of Knowledge About 'Most Everything.

A Russian does not become of age until he is twenty-six.

Some of the railway lines in Russia have smoking cars for ladies.

In the Indian Ocean only 370 out of 16,200 islands are inhabited.

Every square mile of the ocean is believed to have a population of 120,000, 000 fish.

Kangaroos readily leap from 60 feet to 70 feet. The greatest recorded leap of a horse is 37 feet.

Licenses issued to certain French ladies to wear male attire cost 50 fr. (\$10) yearly. Six have been issued.

In 1875 the number of cigarettes smoked per head of the population in Austria was two. In 1905 it was 140. In Bohemia courtships are abnormally long. In that country engagements frequently last from fifteen to twenty years.

Conscience-money received yearly by the Chancellor of the Exchequer in default of unpaid taxes averages \$30,000.

The Republic of Panama boasts of only one railway, forty-seven miles in length, though the area of the country is 31,500 square miles.

Probably the owner of the largest number of dogs in the world is a Russian cattle king, who has 35,000 shepherd dogs to look after 1,500,000 sheep.

The new harness which the Khedive of Egypt ordered in England some months ago is the most costly ever made for four horses. It is valued at \$100,000.

New South Wales is just two and a half times the size of the British Isles. Queensland is equal to three times the German Empire and Belgium put together.

The reindeer has greater power of endurance than any other draught ani-

## MAKING OF A DETECTIVE

### HOW HE IS TRAINED IN LONDON AND HOW PAID.

#### Takes Years to Graduate, and is a Case of the Survival of the Fittest.

No, said a New Scotland Yard official to the writer, I know that it is a by no means uncommon impression; but I assure you that a man can no more start his career as a detective in England than a lawyer can commence his professional life by wearing a silk gown or sitting on the Bench. To graduate as a detective even of the lowest grade is the work of years and a case of the survival of the fittest.

Suppose, for instance, you have an ambition to shine as a discoverer of crime, and you have all the natural equipment for the work, it would not be the least good going to New Scotland Yard and applying for a place on the detective staff there. You would have to begin much less ambitiously by seeking the post of an ordinary constable in uniform. You would have to produce satisfactory testimonials, pass all the physical tests from the tape measure to a thorough medical overhauling, as well as a simple but searching educational examination.

Then would follow a period of drill, another of attendance at a police-court to learn how to give evidence, and instruction in your duties generally; and only after you had come successfully through all these tests and periods of training could you be considered as having taken the first step towards realizing your ambition to become, at some remote future,

#### A FULL BLOWN DETECTIVE.

And I would advise you not to be too sanguine of ever accomplishing this; for there are hundreds of other men, many of them smart fellows, who are equally "in the running," and it may well be that unless your gifts are exceptional, you will never emancipate yourself from uniform. However, after you have won your spurs as an "ordinary" policeman and are regarded as a promising man, you may in a few years' time have an opportunity of showing what you can do in the way of crime detection. During the winter months a few men are chosen from each division for "patrol" work, and you may be one of the lucky elect. You will then discard your uniform for a time and return to plain clothes, and in your new character will have plenty of scope to prove your mettle as a discoverer and hunter of criminals out of the beaten tracks of police

cargoes across the ocean at many knots an hour. The Philadelphia, for instance, which once, as the steamship Paris, held the speed record of the Atlantic. All will remember how one dark night she ran upon the Manacles, and lay there in an apparently hopeless position, with great rocks piercing her steel bottom. A German firm undertook the task of salvaging her on the "no cure no pay" principle. If floated they were, we believe, to have half the value of the vessel. It was a most successful gamble for the salvaging firm, but great credit must be given to them for the skill which they displayed.

In a few weeks divers had blown away the rocks and patched every hole, and the water was pumped out, big tugs laid hold of her, and presently she was hauled out of her rocky bed and towed safely into Falmouth Harbor. It is said that the cost of the salvaging operations was less than \$22,500. As the value of the liner was certainly not less than \$750,000, the profits from the operation are easily reckoned.

In 1892 H.M.S. Howe, a great 10,000-ton ironclad, ran upon the Pereiro Reef off the Spanish coast, and, heeling over, lay there with her bows clean under water and numbers of sharp points of rock sticking

#### RIGHT THROUGH HER BOTTOM.

A Swedish salvage company undertook to save her. Divers went down, and, using very small charges of dynamite, blasted away the rocks that protruded through her sides. In all, 300 cubic feet of rocks were thus removed.

Next, a huge shield of metal was cast and fitted over the broken part of the hull and tightly bolted on. At ebb tide immense pumps were set to work, and presently the great ship was seen to be slowly lifting out of the rocky cradle in which she had lain for so many weeks. As the tide turned the Howe rose, and at full flood was towed safely out. To-day, fourteen years later, she still figures upon the active Navy list.

The rescue of H.M.S. Victorious was not, strictly speaking, a work of ship surgery, for the vessel's hull was never injured; but it is worth recording for the ingenuity displayed by the salvage people. On February 14th, 1890, the Victorious, a vessel of 15,000 tons, went aground off Port Said in a heavy gale. She ran on to a bank of sticky mud and sand, and every effort to get her off with her own engines and by powerful tugs proved unavailing.

#### RAISED OUT OF 57 FEET OF WATER.

It was the engineer-in-chief of the Suez Canal who solved the problem. He suggested placing a dredger on each side of the vessel to dig the sand away from under her keel, at the same time employing two tank-boats to force heavy jets of water under the bottom of the stranded ship and so keep the sand from settling back. This device proved completely successful, and within forty-eight hours the Victorious was safe in 35 feet of water.

How dangerous her position was may be judged from the fact that another vessel which ran upon the same sand-bed a few years previously, sank in up to the masthead, and lies there buried till the end of the world.

What is said to have been the most wonderful feat of salvage engineering of its kind was the raising of the emigrant ship Utopia, in the Bay of Gibraltar. She ran on the ram of H.M.S. Anson, and sank in 57 feet of water. The depth was great, and the currents fierce; yet divers succeeded in erecting upon her a huge coffer-dam, which raised her sides above water. Her hull was then patched, the water pumped out, and she was floated. Taken back to Scotland, she was reputed to be haunted; and after laying by for years was, we believe, eventually broken up.

#### TAKES TIME OFF.

"Is he a professing Christian?"  
"Yes; but he takes a good many vacations from his profession."

eggs may be attended to by the shippers, but it is only the farmers who can place the fresh eggs and poultry of the desired type and quality in the hands of the storekeeper or shipper. Cold-storage facilities are such that the products are kept in excellent condition en route.

Farmers and other producers should at once realize that success in meeting the requirements of the markets enumerated can best be brought about by compliance with the following conditions, viz.:—

1. Their fowls should be of a variety that are as nearly all the year round money makers as it is possible to have them.
2. They should come from constitutionally strong and good egg-laying strains.
3. They should be good winter layers; moult in midsummer, and be of the best market types, so that their progeny will be the same.
4. To have the winter layer and flesh producer combined will necessitate a choice of one of the dual purpose or utility varieties.
5. Should eggs only be required for selling at all seasons, except the moulting period, one of the non-setting varieties will answer the purpose.
6. In producing eggs for stock the purchaser should carefully ascertain that they come from the best egg-laying strains and market types.

#### HOW TO DRESS POULTRY.

We will assume that you have a plump chicken or turkey ready for the knife, and, as it will be better to make it a little more explicit, we will say chicken, for all are handled in much the same manner.

Killing.—Attach a stout cord, with the noose at the loose end, to a beam in such a position that the bird, in struggling, will not be able to strike itself against any obstacle—then hold its feet together—thrust them through the loop—see that they are held securely and that the head of the bird is about opposite the waist line, or a little below.

Now take hold of the wings and lock them—this is done by bringing one over the other and catching the tip of the other wing under that of the lower. This will make it possible for the bird to extricate itself and will allow the dresser free use of both hands.

Then in the last hand grasp the head firmly and force the bill open by the use of the thumb and middle finger. After you have a secure hold, thrust the blade down the throat just behind the head and draw it across, with the point slipping across the neck—or backbone. This will sever the jugular vein and insure a good "stick." Now withdraw the knife and allow the bird to bleed for a few moments, then place the point of the knife against the roof of the mouth with the cutting edge towards the left hand and force it through the membrane into the brain cavity—turn it three-quarters of the way round, twisting the wrist in the natural way, and then draw the blade directly across the base of the brain, thus severing the spinal cord and thereby destroying the control which, in life, the bird has over its feathers.

With a few trials this method will become quite easy and you will find the feathers almost ready to drop off.

As soon as the brain has been pierced the dresser should turn the knife into the skin of the lower bill and make a hole through which a hook suspending a weight of some kind should be hung (a horse-shoe attached to a piece of strong wire is excellent), this keeps the neck extended and assures of a thorough bleeding, which is all important.

Plucking.—After this operation quickly rub the hand down the neck, removing the feathers therefrom, then pull the tail and wing feathers by a quick, firm twist and begin to remove those from the tenderest parts of the body, which on the chickens are the breast and back near the base of the tail, and on the turkey the breast and thigh.

Never use the finger nails to pick promiscuously—the side of the fore-

months ago is the most costly ever made for four horses. It is valued at \$10,000.

New South Wales is just two and a half times the size of the British Isles. Queensland is equal to three times the German Empire and Belgium put together.

The reindeer has greater power of endurance than any other draught animal except a camel. A reindeer has been known to pull 200 pounds at ten miles an hour for twelve hours on end.

When a fortnight old the oyster is not much larger than the head of a pin. At the end of four years' growth it is fit for the market. Oysters live to the age of from twelve to fifteen years.

On the premises of a brick-making firm situate on the Surrey Canal, North Camberwell, the kiln fire has never been permitted to go out since it was first set alight, a hundred years ago.

The elementary school authorities at Crediton, England, have ordered that the girls must have their hair plaited and tied behind their heads. The parents will appeal to the Board of Education in the matter.

A wonderful large double-bass viol has been made, and is intended for use in a Chicago orchestra. It is 14 feet high, and its body about 7 feet. The top part of the body is 3 feet 4 inches across, the lower part 5 feet.

The Emperor of China has a household consisting of 500 persons, including thirty bearers of State umbrellas, an equal number of fan-bearers, thirty physicians and surgeons, seventy-five astrologers, seventy-six cooks, and sixty priests.

Compared with the citizens of other French cities, Parisians are remarkably sober people. Each Parisian drinks 310 pints of wine annually, and only thirteen pints of spirits. Nice drinks 543 pints of wine a year, St. Etienne 350, and Boulogne 335.

Mrs. Betty Brookes has just celebrated her ninety-third birthday in the house in which she was born and has lived all her life, at Edgeland, Walkden, Manchester. She was taken down the local coal-mines to work by her father at eight years of age.

King John of Abyssinia has decreed that the nose of any one of his subjects found taking snuff shall be cut off, while smoking and chewing tobacco forfeits life. In Morocco, persons disobeying the Sultan's decree of prohibition of smoking are imprisoned and flogged through the streets.

Berlin University is the most numerously attended seat of learning in the world. It contains 7,774 matriculated and 1,330 non-matriculated students. All the States of Germany and every country in Europe, from Norway to Sicily, from Ireland to Russia, are represented in its class-rooms.

The remains of all the Czars of Russia since Peter the Great are interred in a Memorial Chapel built on one of the islands of the Neva. All the cenotaphs are exactly alike, each being a block of white marble, without any decoration whatever, bearing only the name of the deceased Emperor.

In Australia several kinds of snakes are eaten roasted. They are said to be equal in delicacy and flavor to the finest stewed eels. A traveler declares the steam from the roasting reptiles is by no means savory.

Turkey is the only country which has not adopted the red cross as an emblem of military medical and hospital corps. A red crescent is used instead, in deference to the religious opinions of the Turkish soldiers.

"What are you so gloomy about?"  
"I am unable to keep out of debt." "My boy, you don't know what trouble is. I can't get anybody to trust me."

There was once a professor who never lost an opportunity to rebuke any bumpiness on the part of his students. On one occasion, when he was taking leave of a certain graduate, he is reported to have said:—"Sir, your fellow-students think highly of you; I think highly of you; but sir, no one thinks more highly of you than you do yourself!"

ing the winter months a few men are chosen from each division for "patrol" work, and you may be one of the lucky elect. You will then discard your uniform for a time and return to plain clothes, and in your new character will have plenty of scope to prove your mettle as a discoverer and hunter of criminals out of the beaten tracks of police work.

There is, of course, an element of luck in work of this kind, and if you are both fortunate and astute you may win such laurels during your period of probation that you will be recommended to the Criminal Investigation Department for promotion to the rank of detective. Here again you will have to undergo further tests and probation; and only when you have proved yourself to be

#### JUST THE MAN FOR THE WORK

will your goal at last be reached. After this stage has been passed, as before it, your success will depend on your ability and industry. You may rise to the rank of superintendent, with a salary of \$2,000 or \$2,500 a year, or you may—well, you may stay where you start.

As a detective full-blown, your work will be both lively—very lively at times—and interesting; and among other things it will make a great demand on your vitality and stamina. For days you may have nothing more exacting to do than to smoke your pipe in peace. But at any time you may be called from your home in the middle of the night and may not see it again for many days, during which you will have had adventures enough to satisfy any reasonable man for a year.

It will be one of your duties to know every criminal in your district almost as well as you know your own brother, and to keep a constant and watchful eye on him. Indeed, few things are more remarkable than the intimate and familiar terms on which detectives are with the criminal classes. You might think they were the best of "pals" instead of hunter and quarry.

But it would take too long to describe in detail

#### THE WORK OF A DETECTIVE.

It does not require much knowledge or a particularly vivid imagination to picture most of it, and to understand the qualities of cunning, courage, stealth, bound pertinacity and infinite resourcefulness that it demands. If you are born for the work you would love it, and sooner or later would do well at it; but if not—well, if not, you would certainly never have a chance of trying it, at any rate in London.

As for the pay it is by no means bad; and infinitely better than in France. A French inspector of the Surete begins at \$320 a year and counts himself a lucky man if his ultimate salary reaches \$600. In London a detective begins better than his French rival leaves off, and he may reasonably hope to receive \$2,000 a year before he retires from the pursuit of the criminal into private life.

#### WONDERFUL WOMEN.

The ways of man are passing strange, but what shall be said of those of woman?

The scene was a police-court, and the woman in the witness-box was displaying that curious quality which is known as loyalty to the human brute whom she had had the bad taste to marry.

Her face was swathed in bandages, but she accounted for each of her hurts by laying them to the account of various imaginary "accidents," and insisted that the lout in the dock was a model of all the matrimonial virtues. At last the patience of the Court was worn out. "Now, look here, ma'am," said the magistrate. "I must remind you that this is a court of law, and that perjury is a criminal offence. Be careful what you say. Who was it that bit your ear in such a shocking manner?"

The poor creature hesitated a moment—it seemed that wifely loyalty was about to succumb—and then she smiled reassuringly at the man in the dock.

"Please, sir," she faltered, "I did it myself."

## THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market. When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

A concert will be given in the Town Hall, Bath, on Oct. 30th, under the auspices of the Ladies' Aid of the Methodist church. A programme consisting of solos, choruses, recitations, dialogues, instrumental music, etc. will be rendered. The best of foreign and local talent have been secured. Admission 25c, reserved seats, 35c.

A run-off occurred on the Grand Trunk Railway Sunday morning last, about three miles east of Napanee. Two cars of a freight train going west jumped the track, the cause being the pulling out of a drawbar. The auxiliary from Belleville soon had the line clear. Little or no damage resulted; a pair of trucks under one of the box cars had to be replaced and the roadbed torn up somewhat.

Absolutely one of the best attractions which will appear at the Brisco Opera House this season will be the "Bonnie Brier Bush" which will be seen here in November 2nd. The theatre going people will make no mistake in seeing this production. Mr. I. Brisco the popular manager of the opera house has gone to considerable trouble to secure this attraction directly from Mr. A. J. Small, Toronto.

**Paints Oil and Glass.**

Our import order of glass is now here and we are ready for the fall trade. Do not overlook the fact that we are the largest dealers in these lines and are gratified to know that the quality of the goods we have been enabled to furnish the public within the past has brought to us this large and growing trade. Elephant Brand of white Lead and ready mixed paints are guaranteed for quality.

**MADOLE & WILSON**

**Opera House Notes.**

A feature of "Hello Bill," the musical comedy in which George F. Hall will appear at the Brisco Opera House on Tuesday evening, Oct. 23rd, is the pony ballet of eight young girls who make no less than twelve complete changes of costume during the action of the play. Mr. Hall has several new and up-to-date songs prominent among which are "General Delivery," with which he seldom takes less than nine encores, and his famous "Chef" song in which he gives his original recipes for cooking. Don't forget the day and date Tuesday evening.

The next attraction "The College Girls" Friday Oct. 26th.

E. LOYST has large stock of flour, Royal Household and all other grades, all kinds of feed, large quantities at the lowest prices. He wishes to sell out in the next month. Salt, Coal Oil Groceries' Highest price for eggs cash or trade. A call solicited,

This early notice is given with the hope that housekeepers will hold in reserve any second hand clothing or furniture that they may be disposed to donate. A committee of ladies will shortly canvass the town for such contributions. Proceeds of sale in aid of Deaconess work.

**Window Displays of Unusual Importance**

The windows of Messrs. Madill Bros, for Thanksgiving are worthy of special comment. The designer which is a member of the National Window Trimmers' associations has certainly done himself credit by a production of what may be called highest Art. The public generally, may feel proud in having such an artist in their midst, for something out of the ordinary in window trimmings. A glimpse at Madill's windows will convince you that he is just right.

**Obituary.**

Mrs. Wm. Edgar, an old and much respected resident of Camden, passed away on Wednesday, October 10th, at the residence of her son, Thos. Edgar, Selby. For over thirteen months she had been confined to her bed suffering a great deal, but bearing it with extraordinary patience and christian fortitude. The funeral service was held in St. John's church, Selby, and at her request was conducted by the Rev. T. F. Dowdell who ministered to her during her illness. Mrs. Edgar was born in Scotland seventy-eight years ago, coming to this country when quite young. Her maiden name was Jessie French. She leaves four daughters and one son to mourn her loss, but with the knowledge that a good mother had had her greatest wish granted, which was "to depart and be with Christ." The remains were buried at Hinch cemetery on Friday morning, October 12th.

**CASTORIA.**

The Kind You Have Always Bought

**Killed near Fredericksburg.**

About noon Sunday last a section man named Sweet was run down by the International Limited near Fredericksburg station and instantly killed. He was walking on the track and was carrying a pail of water when struck by the train. He was thrown into the air and nearly every bone in his body broken. Dr. Cowan, coronor, was notified but after making inquiries decided an inquest was unnecessary. The theatrical company of Marks Bros, who played in Kingston last week, were aboard, and as soon as the circumstances of Sweet's death were known, Mr. Machan of the company, and a commercial traveller went through the train collecting funds for the man's family. Twenty dollars and eighty cents was gathered, which was turned over to Mr. Coppin, G. T. R. station agent at Belleville, to forward to the family.

**Died at Enterprise**

Nathaniel James Leonard, one of the oldest and most respected residents of Camden, passed away on Monday at the home of his daughter, Mrs. W. J. Mellow, Enterprise. Deceased was born in Grenville County near Prescott on the first of August, 1823, one of a family of eight children of which he was the last surviving member and the one who attained the greatest age. Though old in years the late Mr. Leonard was young in appearance and actions, and was always fond of society of young people and preserved his health and strength until about a month previous to his demise when he gradually faded away. The funeral took place on Tuesday from the residence of Mr. W. J. Mellow to Cataraqui cemetery, Kingston. Deceased's wife predeceased him some years ago and of his family five children remain: Mr. D. W. Leonard, Alexandria Bay, Mrs. Gardiner, Kingston, Mrs. W. J. Mellow, Enterprise, Mrs. Bovard, Spencerville, Ont. and Dr. R. A. Leonard, Napanee.

was renewing acquaintances in Napanee on Thursday.

Mr. Will Fretts, Owen Sound, spent Thanksgiving renewing acquaintances in town.

Messrs R. A. Leonard, M. D., W. C. Smith, J. W. Robinson, D. L. Hill, C. M. Warner, Rev. F. T. Dibb, W. A. Bellhouse, of the Napanee Golf Club, were in Port Hope on Thursday, playing a match with the Port Hope Club.

Mrs. Jas. Cole and daughter Jennie, of Deseronto, spent Monday in town the guest of Mrs. Robt. Brown, Mill street.

Mrs. W. A. Carson is spending a few days in Belleville.

Mr. Will Madill, Kingston, spent Thanksgiving the guest of his cousin, Mr. Clarence Madill.

Mr. and Mrs. Williams, of Belleville, spent a few days this week guests of Mr. and Mrs. Stephen Gibson.

Mr. Arthur Gibson left this week for New York.

Mr. E. R. Checkley, Yarker, spent Thursday in Napanee.

Mr. W. A. Grange was in Belleville on Thursday.

Mr. Jas. Walters spent Thursday in Belleville.

Miss Nora Lake and Mr. F. H. Carson were in Kingston on Thursday.

**BIRTHS.**

MCDONALD—At Deseronto, on Oct. 10th, to Mr. and Mrs. Richard McDonald, a son.

SHARPE—At Deseronto, on Oct. 8th, to Mr. and Mrs. William Sharpe, a daughter.

GEROW—At Dunville, on Tuesday, October 16th, 1906, to Mr. and Mrs. Allan Gerow, a son.

**DEATHS.**

WRIGHT—At Napanee, on Thursday October 18th, 1906, Richard James Wright, aged 76 years, 3 months, 21 days.

LEONARD—At Enterprise on Monday, October 15th, 1906, Nathaniel James Leonard, aged 73 years, 2 months, 15 days.

EDGAR—At Selby, on Wednesday, October 10th, 1906, Jessie French, beloved wife of the late Wm. Edgar.

**Elected Officers.**

At the meeting of the Napanee Poultry, Pidgeon and Pet Stock Association held on Wednesday evening the following officers were elected:—

Hon. Pres., H. Warner Esq.

Pres., Herman Meng.

Hon. Vice Pres., U. M. Wilson, M.P.

T. G. Carscallen, M. P. P.

Vice Pres., Geo. Degroff, M. H. Fralick.

Secy-treas., Geo. Walters.

Directors.—Capt Cartwright, D. L. Boice, P. D. Shorey, S. Snider, F. Vandebogart, F. Marsh, W. Medcalf.

Executive Committee.—H. Meng, W. A. Steacy, E. J. Pollard, G. Degroff, M. H. Fralick, Geo Walters.

**Died Suddenly.**

Richard James Wright, one of Napanee's well known citizens died on Thursday morning, at the ripe age of seventy-six years. Deceased had been in failing health for some time past but his death was not at all expected. He complained of feeling unwell early Thursday morning and in a few hours had passed peacefully away. The funeral will take place from his late residence on Saturday afternoon at 2.30. Services will be held at the house after which the remains will be taken to Morven and placed in the vault there.

Merchant Tailor, Napanee.

## Tickling Human Vanity.

Few people realize how profitable the trade of tickling human vanity is and how many different forms it employs. There are obscure newspapers and nominal magazines that live by it and provide good incomes for their editors. It is quite common to find upon center tables luxuriously bound and printed volumes whose contents consist entirely of fulsome puffs. Each profession, trade, avocation and association has its library of memorabilia of persons of the kind who, in Lowell's phrase, were created to fill up the world. The writer remembers seeing in the "best room" of a remote farmhouse a morocco bound, gild edged volume upon the notabilities of the country, which contained a biography and engraved portrait of rusticus horribilis himself. The original volunteered the information that his niche in the local pantheon had cost him a sum, which, on later conversation, was disclosed to be larger than a year's interest on the mortgage encumbering the farm.—Wilbur Larremore in Atlantic.

## The Dramatic Flavor of Wall Street.

It is the speculative side of Wall street that most appeals to the imagination. If we were dealing with that side of Wall street we should not lack for authenticated cases of high dramatic flavor, as, for example, that of a youth of eighteen who ran \$2 into a fortune of \$200,000 in a few months and was last heard of trying to pawn his wife's engagement ring for \$25; or that of the farmer who made several millions of dollars from a very modest beginning, slipped a check for \$300,000 under the breakfast plate of each member of his family one morning, tore the checks up because within an hour the riches had become a matter of domestic strife and was last heard of when one day he brought a load of hay across the ferry from Staten Island to New York and begged his brokers to take it in lieu of margins for one more "trade."—Success Magazine.

## How Trees Are Balanced.

A tree grows in perfect balance on every side. When a large branch shoots out on one side, one of equal size or two smaller appear on the other. The roots are balanced in the same way, a large branch on one side being

# Custom Made Clothes

Are you satisfied with your Tailor ?

Stick to him, if you are, for it's a peace of mind that comes to but few men. For good tailors are hard to find. If you're not satisfied we would like to have an opportunity of showing what we can do. We are now displaying our new stuffs and styles for Fall and Winter, and would like you to see them. If you feel like leaving your measure we'll do the rest, and guarantee you a perfect fit. We carry the largest stock of woollens in Napanee.

# We're Knee Deep in Fall Orders

It's plain to be seen that good dressers are pinning their faith to our kind of Tailoring.

Suits \$15; \$17 \$19 to \$24. Overcoats \$15 to \$27. Trousers \$3.50 to \$7.

We assume all risk of a perfect fit—as we will not ask you to accept a garment that is not right in every detail.

# NEW FALL HATS ! THE FALL HATS ARE NOW READY

We've not missed a style that's correct. Most men buy Hats in an off-hand way. As if it were a matter of little account. It's a bad idea. For nothing so makes or mars a man's appearance as his Hat. Don't accept an indifferent hat—Our Fall Hats are extra Value it matters not what price you buy.

Our \$1 Christie Wool Hhats are sold at \$1.25 and \$1.50 in many City stores.

\$2 Buys our Fur felt Christie and Tiger Brand English Hats—They are correct in shape and unequalled in quality—Christies \$2.50 Derby is a beauty.

New York \$3 Knickerbockers are perfect in every detail and are worn by nearly all good dressers—We have the exclusive agency for the above Hats, and will replace any hat purchased at \$2 or over that does not give perfect satisfaction.

# J. L. BOYES.

# The Surprise OF THE SEASON.

The prices at which we are selling some of our goods surprise ourselves, but we must reduce our stock.

NOW IS THE TIME TO BUY.

## SPORT IN AMERICA.

The Change That Has Come Since the War Between the States.

Before the civil war we Americans had few outdoor pastimes. There was some fox hunting in the south, some shooting in the north. There was considerable fishing, very little angling. Tennis and golf were unknown to us. Croquet was decorously played. Since

### How Trees Are Balanced.

A tree grows in perfect balance on every side. When a large branch shoots out on one side, one of equal size or two smaller appear on the other. The roots are balanced in the same way, a large branch on one side being matched by a large root. The center of gravity is thus always perfectly maintained.

### Plague of Inventions.

Human ingenuity is a plague to modern life, and there is some excuse for the view of a great man who regarded the inventor of railways as a curse to his race. The truth probably is that no invention is at first perfect, and we have to suffer from its transitory imperfections—London *Lancet*.

### A Sensitive Canine.

Baxter—That dog of yours is not a full blooded Boston terrier, is he? Bixby—Hush, old chap; don't let him hear you. He thinks he is.

Every one sings as he has the gift and marries as he has the luck.—From the Portuguese.

FRED CURRY,

### the War Between the States.

Before the civil war we Americans had few outdoor pastimes. There was some fox hunting in the south, some shooting in the north. There was considerable fishing, very little angling. Tennis and golf were unknown to us. Croquet was decorously played. Driving and riding were restricted to the few who could afford the time and expense. One or two cricket elevens struggled for existence. There were no bicycles, no motors, of course, only an absurd velocipede or two. Extreme youth "flow kites," played marbles and whipped tops. Among their elders, however, there was a mingling, artificial attitude toward all outdoor sport which found its fullest expression in a quadrille, at croquet or a sentimental sailing expedition under the calmest of skies.

However, even then we had yachtsmen—naturally scollary of our superb commercial navy—and we had good horses and were breeding better ones, and we by inheritance were a nation of men who handled a rifle properly.

War came and left us with its immense accumulation of good and evil, and it seemed then that out of sheer weariness of sadness and trouble the germ of the old play spirit, so long dormant, awoke among us to save us from ourselves.

### Browning's French Grammar.

It is not generally known that Robert Browning was the author of a French grammar. It appears that even the late Dr. Garnett, whose knowledge of literature was encyclopedic, had not heard of this early venture of the poet's. His surprise was therefore great when a reference to the work in question by Browning himself was pointed out to him. It occurs on page 203 of the first volume of Browning's letters to his wife. "Thus in more than one of the reviews and magazines that laughed my 'Paracelsus' to scorn ten years ago—in the same column often of these reviews—would follow a most laudatory notice of an elementary French book, on a new plan, which I 'did' for my old French master and he published it—that was really a useful work."

### Wise Girl.

He wooed a young lady named Lamb  
Who hated pretension and shamb.  
"Still," she wisely thought, "it  
Will not do to permit  
Him to guess how impatient I am."

BOYLE & SON

### Could Tell It Another Way.

Many years ago an old and well to do farmer in western New York had something of a reputation as a litigant. He had a peculiar twist about his mouth when he talked, due to some muscular affection, which gave a striking effect to his utterances. His old neighbors tell of a trip that he made to see his lawyers on a certain occasion when he had made up his mind to have a lawsuit. He sat down with his lawyer and laid out his case before him at length. The lawyer said, "Well, on that statement you haven't any case." The old man hitched his trousers nervously, twitched his face and hastily replied, "Well, I can tell it another way."

### The Dominion of Canada.

The Dominion of Canada came into existence on July 1, 1867. The province of Canada was divided into upper and lower Canada, which divisions are known now as Ontario and Quebec respectively. It was subsequently augmented by the province of Manitoba and the Northwest Territories in 1870. by British Columbia in 1871 and Prince Edward Island in 1873 and now includes the whole of British North America.

### Wireless Whispers.

Mrs. Windfall—Just imagine, Hiram! One of the sailors just told me that this boat is now in communication with her sister ship. I wonder what the conversation is about. Mr. Windfall—Humph! Most likely each is asking the other if her cargo is on straight!

### His Order.

"Waiter, bring me some Iodoform soup, a germ proof steak and some sterilized potatoes."  
"Yes, sah. What'll you have to drink, sah?"  
"I guess I'll have a cup of antiseptic tea. And, by the way, tell the bar-keep to fix me a listerine cocktail for an appetizer."

### Bobby's Explanation.

Teacher (sternly)—What were you laughing at, Robert?  
Bobby—I wasn't laughin', ma'am. My complexion puckered, that's all.

### Doesn't Always Work.

"Money has wings and flies away, I've heard," said the man with a scar.  
"But I've put lots of dough in a flying machine,  
Yet it never has flown very far."

### One Enough.

"What is it, nurse?" asked the anxious father.  
"Triplets!" replied the nurse.  
"Oh, this is two too much!"

Hammocks a fine assortment.

### A Long Night's Melody.

"The day is short, the night is long; The oil in the lamps so soon is gone. The chimneys are smoked, what must be done,

Just bring to Hooper's your demijohn  
Note—Try one gallon of our special high grade American coal oil. The Medical Hall—FRED L. HOOPER.

### First Written Laws.

The first written statutes are comprised in the law of Moses, 1491 B. C. The first Greek laws were systematized by Draco 623 B. C. The laws of Lycurgus were made about 844 B. C. The Roman laws were first compiled by Servius Tullius and amended by the twelve tables in 449 B. C. The pandects of Justinian were compiled in 529. Blackstone's Commentaries were published at Oxford in 1765 and 1769.

Every human soul has the germ of some flowers within, and they would open if they could only find sunshine and free air to expand it.—Mrs. Child.

### A Loud Call.

William H. Crane, the actor, was once asked how it was that he never attempted serious Shakespearean roles. "But I did once," replied the comedian. "Years ago in the west I played 'Hamlet.'"  
"Did you, indeed?" said an admirer and friend. "Didn't you have a great success? Didn't the audience call you before the curtain?"  
"Call me!" roared Crane. "Why, man, they dared me!"—Argonaut.

### That Was Different.

Landlady—I will let this excellent room at reduced rates because there is a woman next door who plays the piano continually. Applicant—Oh, that won't make any difference! The room is for my nephew here, and he is deaf. Landlady—Ah, in that case I must charge the full price!

### Dangerous.

"Would you like to see my aquaria?" asked the naturalist.

"Well, if he's securely chained I might, but I'm so afraid of wild beasts," replied the visitor.

Neutrals are soused from above and singed from below.—German Proverb.

## KOOL WEATHER COMFORTS BLANKETS.

Your solid appreciation has been given in our Blanket and Comforter Section this season :—there must be a reason, perhaps there's more to see here than anywhere else, certain it is that we've better values, yet we're watchful enough of your interests to take all into consideration and we've taken good care that the qualities bought are of the first grade. You can see the result every day in the week, not only in our special values but in the firmness and fineness of quality. Equality is not to be found hereabouts.

### ALL WOOL BLANKETS (White)

## Success with Carpets.

Our Carpet Business this season is bigger than we had even hoped for, and the natural influence is that qualities and values are best here. People don't, as a rule buy Carpets haphazard. The patterns are exclusive and selected with rare taste and judgment. Such delightful originality needs to be looked at, and known before making up your mind where to spend your Carpet money. No need to magnify our facilities for showing you the New Carpets. There isn't a lighter, more adaptable Show Room in Central Ontario. Plenty of room and light helps one in a choice, and you get what you think you're getting every time.

Carpets, Rugs, Draperies, Curtains, Linoleums, and Oilcloths.

## Saturday Special, Lace Curtains

65 pairs only, of our own stock samples, including prices ranging at from 20c to \$7.00 per pair. Of course they are slightly soiled, otherwise not damaged. They are Brussels and Nottingham, various lengths, excellent and exclusive designs and patterns. A clean sweep sale Saturday morning at 9.30

## Ready to put on Garments

Here in Napanee's recognized Ready-to-Wear Department are the choicest and most select garments, direct from New York, considering thoroughly the wants of the dressy, we are this season in a better position to have you fitted properly and modernly than ever before, at a small cost. Visit this department to-day.

# MADILL BROS.

### Gettin' Wisdom

is a comparatively easy task if you start it while you are young. Don't allow your children's eyes to be ruined for all time because "they look too 'ded' with glasses on." We'll tell you the truth as to whether they need glasses or not, and charge you nothing for the telling. Headaches in children are suspicious. We are also the best people to guarantee the quality of our frames, it being part of our jewelry business to acquire that ability and knowledge.

HIGH-CLASS INSTITUTION.

## A FAMILY RE-UNION.

On Saturday afternoon at the Campbell House the Price family and their relatives held a very pleasant re-union. The invitations were issued by Dr. W. E. Price, of Oakland, California, who with his wife and son are spending some few months visiting his many relatives and friends in this county, after an absence in California of over thirty years. On the announcement by Mr. Taylor that the banquet was ready about fifty relatives of Dr. Price with a few friends, and the representatives of the local press sat down to splendid spread provided by the host Dr. Price, and full justice was done by all present to the numerous good things provided. At the conclusion of the banquet, a few short addresses were delivered by Messrs Uriah Wilson, M. P. Mr. A. V. Price, Newburgh, Mr. F. Vandebogart, Rev. C. E. S. Radcliffe, Camden East, and Mr. T. S. Price. The speeches were interspersed with several choruses heartily sung by all present, a song by Mr. Edwin G. Price and a recitation by Dr. Price. The banquet was brought to a close by all rising and singing "Auld Lang Sine". Before the banquet the assembled relatives had a group picture taken at Mr. F. S. Richardson's photograph gallery. Following is a list of the invited guests:

T. S. Price, E. G. Price, Mrs. E. G. Price, Miss Margaret Price, Miss Kathleen Price, Miss Gladys Price, Miss Inez Price, Miss Hazel Price, Mr. A. V. Price, Miss Ida Price, Judge C. V. Price and wife, Mr. and Mrs. Reginald Price, Dr. and Mrs. Frank Price, Miss J. S. Price, Miss A. Price, Dr. and Mrs. W. E. Price, Harold Howard Price, Mr. and Mrs. J. H. Wilson, Ethelbert Wilson, Miss Edna Wilson, Hon. Uriah Wilson and wife, Mr. and Mrs. Simon Cook, Mr. and Mrs. Will Ramsay, Mr. and Mrs. Samuel Brown, Mr. and Mrs. Delmage, Mr. and Mrs. Archibald Caton, Mrs. Robt. DeLong, Miss M. Fretz, Miss B. Fretz, Mrs. Ella Hawley, Miss Blanche Hawley, Mr. and Mrs. Frank Vandebogart, Mr. and Mrs. Will Vandebogart, Mr. Harry Vandebogart, Miss Della Vandebogart, Mr. Albert Clancy, Rev. C. E. S. Radcliffe, Mr. and Mrs. Arthur Folger, Mr. and Mrs. Thos. Woods, Miss Bernice Woods, Master Lyall Woods.

### Rapid Travelling

One of the rays of light emitted from Radium is said to travel 40,000 times faster than a bullet. You get the greatest amount of light and the least smoke from our special grade of American Coal Oil. Try one gallon. The Medical Hall, FRED L. HOOPER.

### MOSCOW.

The Ladies Aid gave a concert on Thanksgiving evening, which was a credit to them. A large and appreciative audience assembled and a programme of high class order was presented. Light refreshments were served.

Mrs. A. Garrison and Miss Nellie Sills, Napanee; Miss Pearl Sills and Harry Sills, Sydenham, and Lizzie Asseltine, Marlbank, were the guests of Ruth Lampkin for Thanksgiving holidays.

Mrs. T. Herrington and children, Napanee, are visiting her parents, Mr and Mrs. Levi Hoffman.

Dr. A. M. Bell Kingston, spent Thanksgiving day at home.

C. Anderson, I. P. S. visited our school this week.

Robert Asseltine has bought a fine team, and will work his farm this year. Miss Sills spent Sunday at her home near Napanee.

Hiram Hoffman has moved the farm lately vacated by J. S. Bradford.

Mr. and Mrs. Denyes, Odessa, spent a few days at F. P. Johnsen's last week.

A good offer—The Napanee Express from now until January 1908 for \$1.00. Send your order early.

Wm. E. Grange, solicitors for the Executrix of the said Charlie Wright Solder, their names and addresses and a full statement of particulars of their claims and nature of the securities, if any, held by them.

And further take notice that after the said 1st Day of December, A. D., 1906, the said Executrix will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which she shall then have notice, and that the said Executrix will not be liable for the said assets or any part thereof to any person or persons of whose claims notice shall not have been received at the time of said distribution.

HERINGTON, WARNER & GRANGE,  
Solicitors for the Executrix.

Dated at Napanee, this 27th Day of September  
A. D., 1906. 43c

### The Best Window Glass.

There is a great difference in window glass. Pilkington's English is free from flaws, uniform thickness and clear color. Sold at The Medical Hall—FRED L. HOOPER.

General Sir Redvers Buller has retired from the British army.

The net earnings of the Temiskaming Railway from January 1 to the end of August were \$132,000.

Thirty million bushels of wheat have been received by the C. P. R. and C. N. R. at western points during the present season.

The body of Miss Powers, who disappeared from a Fenelon Falls hotel two weeks ago, was found in the river at Fenelon Falls.

ITCH, Mange, Prairie Scratches and every form of contagious Itch on human or animals cured in 30 minutes by Welford's Sanitary Lotion. It never fails. Sold by F. L. HOOPER.

Hon. George E. Foster, at a Conservative meeting, says he will answer the evidence before the insurance investigation on the floor of Parliament if he is questioned there.

The trial of Newton Stonehouse, charged with attempted murder, is in progress at St. Thomas. It is alleged that on August 2 last he placed his wife's new-born babe in an outhouse for the purpose of killing it.

Butcher knives, table knives, carving knives, pocket knives, cook's knives, pen knives, hunting knives. Full line of Guaranteed Goods at

### BOYLE & SON

It has developed that Ontario Bank stock, purchased by the bank itself to protect its stock in the market were put in the name of the officers' guarantee fund.

It is reported that the Provincial Government will enter into a contract with the Ontario Power Company for a supply of electric power to municipalities requiring it.

### Only One Drug Store.

If you know or felt sure that you could go to a Drug Store and get the very best drugs, or the very best Tooth Brush, Hair Brush or Hot Water Bottle, etc., and that your prescription would be just as carefully compounded as it could possibly be by competent dispensers, and that you would be just as cheerfully served, and as courteously treated when making a two cent purchase as when making a two dollar one, would you not always deal at that store? Would there not be only one Drug Store as far as you would be concerned? "Wallace's" Red Cross Drug Store—"IS THAT STORE."

### A Stove Talk.

The stove season is nearly here again and you are beginning to plan for that new up-to-date Range and thinking of the comforts, which it will bring to you. We wish to announce to you that we find ourselves in a much better position than formerly to accommodate this growing trade. Increased floor space and light enables us to make a much larger exhibit of this class of goods. Imperial Oxford Ranges still lead, but we have several other good and up-to-date lines. Sizes and prices to suit everyone. Be sure and inspect our stock before you purchase. It will be a pleasure for us to show you the goods.

MADOLE & WILSON

## Business College and School of Finance

### HIGH-CLASS INSTITUTION.

17 ex-Public School Teachers and 22 Graduates of other Colleges, helped to compose our class.

### SALARIES

of graduates direct from College ranged this year very high.

\$1,200, \$980, \$900, \$800, \$730, etc.  
Scores of young ladies, \$600.

Price of board very moderate.

Bookkeeping, Shorthand and Type-writing. Telegraphy.

Every graduate in a position.

JNO. R. SAYERS, Picton, Ont.,  
Principal and Proprietor.

## FURS

Furs made and remodelled in First-Class Style. Prices Reasonable and Work Guaranteed

## Ladies' and Gents' Coats MADE TO ORDER.

All kinds of Furs, Pelts, Heads, Tails and Trimmings for sale.

MRS. GEO. F. ROBINSON,  
Corner of Richard and Mill Streets.  
414mp.

## APPLES WANTED!

Evaporating Apples  
Wanted at

COLLIER BROS.' EVAPORATOR  
(East of Gibbard's Furniture Factory.)

Owing to our premises being destroyed by fire we will continue the business in the building known as the Smith & Hawley evaporator.

## Highest Price Paid.

Apples may be delivered at any of the docks along the bay and will be called for by Str. Reindeer.

COLLIER BROS.

40

## THE CROWN BANK OF CANADA

Head Office, Toronto.

Authorized Capital \$2,000,000.

President, Edward Gurney; General Manager, G. de C. O'Grady.

To accommodate the people of Napanee and district, The Crown Bank of Canada will be open SATURDAY EVENINGS from 7 to 9.

INTEREST PAID ON DEPOSITS 4 TIMES A YEAR AND CALCULATED FROM DATE OF DEPOSIT.

Farmer's notes discounted—farmers' sales notes collected.

A general Banking business transacted.

Your Account is Solicited.

R. G. H. TRAVERS, Manager.  
Napanee Branch.

For terms and further information apply to M. C. BOGART, Real Estate Agent, Napanee, Ont. 42-3m

The highest medical knowledge in the world has produced

## COLTSFOOTE EXPECTORANT

Thousands of sufferers have been permanently cured by this wonderful remedy and thankfully write to tell us so. Keep it in the house and use it for Colds, Coughs, Croup, Whooping Cough, Asthma and all Throat and Lung troubles.

Your druggist not only keeps it but recommends it.

Price, 25 cents.

# COLTSFOOTE EXPECTORANT

## Engraved Calling Cards

¶ Your name engraved in graceful Ryrie Script on a Copper Plate will be furnished by our Stationery Department for \$1.00. The supplying and plate-printing of one hundred Calling Cards will be done for an additional \$1.00.

¶ The card stock used is made specially to our order and is of the thin "snappy" sort, that denotes quality-elegance.

¶ Our Catalogue contains specimens of engraved Wedding Invitations, Society Stationery, Etc.

Drop us a postal card and we will send you free of charge our large illustrated catalogue of Jewelry, Silverware, Leather Goods, etc.

Ryrie Bros Limited  
Toronto, Ont.

## FORTUNE IN THE CUP.

Who that is young and visionary or old and hopeful has not a secret weakness for fortune-telling? Many a woman long past youth's golden days still looks in her teacup for her fate. And the teacup is an oracle; say the wise-ones. Do you wish to know how many years will elapse before you will marry? Balance your spoon on the edge of your cup, first noting that it is perfectly dry. Fill another partly with tea, and, holding it above the balanced spoon, let the drops of tea gather to the tip of the spoon and gently fall into the bowl of the one below. Count the drops. Each drop means a long twelve month. Should a teastalk float in your cup, it means a sweetheart, and you must stir your tea rapidly round and round and then hold the spoon upright in the centre of the cup. If the "sweetheart" is attracted by the spoon and clings to it, you will shortly meet him; but if the teastalk goes to the side of the cup, you have lost him.

## A WOUND THAT MADE HISTORY.

There is a certain peppery old colonel who claims to have been wounded long years ago in the leg while serving his country in some petty little frontier fight. He is very proud of that wounded leg.

## CZARINA'S CHARM OF MANNER...

Beautiful, Graceful Woman, Whose Pictures Represent Her Poorly.

The general appearance of the Czarina may be fairly well known in this country, although fewer pictures have been published of her than of any other crowned head. But no picture that I had seen, writes Amalia Kussner Couderdt in the Century, gave any idea of how she really looks, seen thus face to face.

Perhaps this may be for the reason that much of her beauty comes from exquisite coloring and that there is about her a subtle charm impossible to picture and difficult to describe. She is very tall and very slender, yet most finely proportioned. Her features are almost Greek in their regularity, and the natural expression of her face struck me at once as a singularly wistful and sweet sadness that never went quite away even when she smiled.

Her hair is strikingly beautiful and luxuriant, long, heavy, glossy and brown gold in color. Her eyes are large soft, lustrous gray blue, with long lashes, and I painted them cast down, as they nearly always are; for she is shy and hardly ever looks up without a blush.

Yet, with all the Czarina's blushing shyness her bearing impressed me with a sense of something much deeper and graver than mere admiration for a beautiful, graceful woman. It is difficult to define just what this impression was, but it may be termed majesty, for lack of a subtler term; and the feeling of it increased during the entire time that I was privileged to enter her presence, although no one could have been kinder or more simple in all that she said and did.

## MAKES NEW BLOOD.

That is How Dr. Williams' Pink Pills Cure the Common Ailments of Life.

Making new blood. That is just what Dr. Williams' Pink Pills are always doing—actually making new blood. This new blood strengthens every organ in the body, and strikes straight at the root of anaemia, and the common ailments of life which have their origin in poor, weak, watery blood. Mrs. A. H. Seeley, of Shirling, Ont., tells what Dr. Williams' Pink Pills did for her fourteen year old sister, Miss Annie Sager, after other treatment had failed. She says: "For some years Annie had not been well. She would take spells of dizziness and headaches that would last for several days, and her whole body would become dry and hot as though she was burning up with fever. Her lips would swell until near the bursting point, and then when the fever would leave her the outer skin of the lips would peel off. She doctored with two different doctors, but they did not succeed in curing her, and the trouble seemed gradually to be growing worse. Then we began giving her Dr. Williams' Pink Pills. After a few days the swelling of the lips ceased, and the dizziness and headaches disappeared. After a few more days the skin of the lips began to grow again, and she was able to eat and sleep as usual. Now she is as healthy as I am, and she is a great deal more cheerful and contented than she was before. We are all very grateful to Dr. Williams' Pink Pills for what they have done for Annie."

# DARE HE?

OR, A SAD LIFE STORY

## CHAPTER II.

"There is no reason why we should not go home now; are you ready?" cries Brown, bustling up to his friend, who has not waited for this question to make straight, as the needle to the pole, for the corner where the collected umbrellas stand in their little area of lake.

Burgoyne would probably have laughed at the unconscious irony of this inquiry if he had heard it; but he has not, his attention being otherwise directed. On the same umbrella quest as himself, being helped on with her mackintosh by one of the two men who had accompanied her, a pepper-and-salt-haired, sturdy gentleman of an obviously unacademic cut, is the lady whose face had flashed upon him with that puzzling sense of unfamiliar familiarity. Since they are now in close proximity, and both employed alike in struggling into their wraps, there is nothing more natural than that she should turn her eyes full upon him. They are very fine eyes, though far from young ones. Is it a trick of his imagination, or does he see a look of half-recognition dawn in them, such as must have been born in his own when they first alighted on her? At all events, if there is such a look of half recognition in her eyes, she is determined that it shall not have a chance of becoming a whole one. Either he is mistaken, and she has not recognized him, or she is determined not to acknowledge the acquaintance, for she looks away again at once, nor does she throw another glance in his direction. Indeed, it seems to him that she hurries on her preparations with added speed, and walks out into the night accompanied by her double escort before him.

The weather has changed, and for the better. The rollicking wind has lulled, the pattering rain ceased. Between the ragged, black cloud-sheets star-points shine, and a shimmering moon shows her wet face reflected in the puddles. Talk, which had been impossible on their way to the meeting, is not only possible but easy now, and Brown is evidently greatly inclined for it. Burgoyne, on the other hand, had never felt more disinclined. It is not so much that he is out of humor with his tiresome friend, though he is that, too, as that his whole mind is centred on making his memory give up the secret of that face that has come back to him out of some vague cavern of his past.

Who is the woman whom he knows, and who knows him? For, on reflection, he is sure that that look of hers was one of half—of more than half—recognition, and yet whose place in his history, whose very name he seeks so vainly. She does not belong to his Oxford days, as he has already ascertained. He has learnt from Brown that she does not belong to the Oxford of today, being apparently a stranger, and, with her husband, a visitor to the Warden of — College, in whose company they had arrived. He explores the succeeding years of his life. In vain; she has no place there; in vain he dives and plunges into the sea of his memory; he cannot fish up the pearl he seeks. He must hark back to earlier days—his school time, the six months he spent in Devonshire with a coach before he came up to New. Ah! he has it—he has it at last! Just as they have reached Brown's door, while he is fumbling with his latch-key for the keyhole,

Then why is she snow-haired? Because Providence has so willed it is the obvious answer. But somehow Burgoyne cannot bring himself to believe that she has come fairly by that white head.

With the morning light the night of the Devonshire memories grows weaker; and, as the day advances, the Oxford ones resume their sway. How can it be otherwise, when all day long he strays among the unaltered buildings in the sweet sedate college gardens, down the familiar "High," where six years ago, he could not take two steps without being hailed by a jolly fresh voice, claiming his company for some new pleasure; but where now he walks ungreeted, where the smooth-faced boys he meets, and who strike him as so much more boyish than his own contemporaries had done, pass him by indifferently, unknown to the whole two thousand as he is. He feels a sort of irrational anger with them for not recognizing him, though they have never seen him before.

Yes, there is no place where a man is so quickly superannuated as in Oxford. He is saying this to himself all day, is saying it still as he strolls in the afternoon down Mesopotamia, to fill up the time before the hour for college chapel. Yes, there is no place where men so soon turn into ghosts. He has been knocking up against them all day at every street corner; they have looked out at him from every grey window in the Quad at New—jovial, athletic young ghosts so much painfuller to meet than rusty century-worn old ones. They are rather less plentiful in Mesopotamia than elsewhere; perhaps, because in his day, as now, Mesopotamia on Sundays was given over to the mechanic and the perambulator. Oh, that Heaven would put it into the head of some Chancellor of the Exchequer to lay a swinging tax upon that all-accursed vehicle! But not even mechanic and perambulator can hinder Mesopotamia from being fair on a fine February day, when the beautiful floods are out, the floods that the Thames Conservators and the Oxford authorities have combined to put down as they have most other beautiful things within their reach. But they have not yet quite succeeded. To-day, for instance, the floods are out in night.

Burgoyne is pacing along a brown walk, like a raised causeway, with a sheet of white water on either hand rolling strong ripples to the bank. Gnarled willows stand islanded in the coldly argent water. A blackbird is flying out of the bushes, with a surprised look at finding himself turned into a sea-bird. No sun; an even sweep of dull silver to right and left. No sun and yet as he looks, after days of rain the "grand decorateur," as some one happily called him, rides out in royalty on a cleared sky-field, turning the whole drenched country into mother-of-pearl—a sheet of opal stretched across the drowned meadows; the distance opalescent, a delicate, dainty, evanescent loveliness snatched from the ugly brow of winter.

Burgoyne is leaning over the wooden bridge beneath which, in its normal state, the water of the lusher rushes down impetuously; but is now raised to such a height that it lies level, almost flush with the planking. He is staring across the iridescent water plain to where, in the poetic atmosphere of sur-

# A WOUND THAT MADE HISTORY.

There is a certain peppery old colonel who claims to have been wounded long years ago in the leg while serving his country in some petty little frontier fight. He is very proud of that wounded leg.

One afternoon, when he sat at his club nursing the injured leg, a fellow chapman of recent acquaintance, sympathetically asked:

"Lame, Colonel?"

"Yes, sir," was the reply, after an inexpressible solemn pause, "I am lame."

"Been riding, sir?"

"No," this time with rebuking sternness, "I have not been riding."

"Ah, I trust it was not due to a fall, Colonel?"

"No," I came in tones of ferocity.

"Perhaps, then, you have sprained your ankle?"

With painful slowness the old fellow lifted his pet leg in both hands, set it carefully on the floor, rose deliberately from his chair, and, looking down upon the unfortunate questioner with mingled pity and wrath, burst forth in almost sublime rage:

"Go, sir, and read the history of your country, sir!"

Mother Graves' Worm Exterminator is pleasant to take; sure and effectual in destroying worms. Many have tried it with best results.

Minister mildly: "I've been wanting to see you, Mr. Kurd, in regard to the quality of the milk which you are serving me." Milkman (uneasily): "Yes, sir." Minister (very mildly): "I only wanted to say, Mr. Kurd, that I use the milk for dietary purposes exclusively, and not for christening."

**"FERROVIN" IS A GENTLE STIMULANT** to the stomach, thereby aiding digestion. As a tonic for patients recovering from fevers and all diseases lowering the vitality, it is without a rival. At all drug and general stores.

Wife: "Mrs. Neighbors threw a flat-iron at her husband last night because he accidentally sat down on her new hamper. Now, I couldn't do a thing like that." Hubby: "You couldn't?" Wife: "Of course not. I haven't any new hamper."

"By Medicine Life May be Prolonged."—So wrote Shakespeare nearly three hundred years ago. It is so to-day. Medicine will prolong life, but be sure of the qualities of the medicine. Life is prolonged by keeping the body free from disease. Dr. Thomas' Electric Oil used internally will cure coughs and colds, eradicate asthma, overcome croup and give strength to the respiratory organs. Give it a trial.

A doctor took it into his head to go rabbit shooting, and started out bright and early on a beautiful morning, fully armed for game. About four in the afternoon he returned, tired out and empty-handed, telling his wife he hadn't killed a thing, whereupon she remarked, triumphantly: "I told you so," adding, in the next breath: "If you had stayed at home and attended to your legitimate business, you might have been more successful."

her lips would swell and then bursting point, and then when the fever would leave her the outer skin of the lips would peel off. She doctored with two different doctors, but they did not succeed in curing her, and the trouble seemed gradually to be growing worse. Then we began giving her Dr. Williams' Pink Pills and under this treatment she has recovered her health. The headaches and dizziness have gone; her color is improved; her appetite better, and she has had no further attacks of the fever which baffled the doctors. We are greatly pleased with what Dr. Williams' Pink Pills have done for her, and recommend them to other sufferers."

It was the rich red blood Dr. Williams' Pink Pills actually make which cured Miss Sager. That is why these pills cure all common ailments like anaemia and debility, headaches and backaches, indigestion, rheumatism, neuralgia, St. Vitus dance and the special ailments that prey on the health and happiness of girls and women of all ages. Get the genuine Dr. Williams' Pink Pills for Pale People, with the full name on the wrapper around each box. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

## BABY LIFE AMONG THE INDIANS.

Given a reasonable chance for life, the Indian child is as happy, hopeful, ambitious, and playful as is the white child born under much happier circumstances. He is, too, quite as imitative, and, like his white cousin, he apes the ways and manners of his elders and mimics their occupations in his play. The infant Indian possesses rather more dignity than the ordinary white child. This is chiefly owing to the care he receives rather than to inherited sedateness. In his infancy he is strapped to a board or securely packed in an elongated basket woven for that purpose where he can neither kick nor squirm. He cries less than his white cousins, because he early learns that it is an unprofitable occupation. The Indian mother is very accommodating. If her infant wishes to cry she lets him do so. She does not, like the white mother, rush to the child when it begins to howl and try to pacify him. She lets him howl till he tires of it and ceases of his own accord. It is because crying brings them attention that most children cry. The young Indian does not get the attention, so he soon cuts out crying entirely. With crying, kicking, and squirming eliminated, there is really nothing left for him but to remain calm and look dignified. This is what he does as a rule.

## A VERY USEFUL TREE.

The most marvellous tree in the world is the Carnahuba palm, which grows in Brazil. It has recently been stated that in the great meat-packing factories in Chicago, every portion of a pig is used except the squeal. With respect to the Carnahuba palm one cannot even reserve the bark. Its roots produce the same medicinal effect as sarsaparilla. From parts of the tree wine and vinegar are made. Its fruit is used for feeding cattle. Of the straw, hats, baskets, brooms, and mats are made. It is also used for thatching houses. The pulp has an agreeable taste, and the nut, which is oleaginous and emulsive, is sometimes used as a substitution for coffee. Its stems afford strong, long fibres, which acquire a beautiful lustre and serve also for joists, rafters and other building materials. It yields also a saccharine substance, as well as a starch resembling sago. Of the wood of the stem, musical instruments, water-tubes, and pumps are made. From the stem a white liquid similar to the milk of the cocoa-nut, and a flour resembling maize may be extracted. Moreover salt is extracted from the tree, and likewise an alkali used in the manufacture of common soap.

He must hark back to earlier days—his school time, the six months he spent in Devonshire with a coach before he came up to New. Ah! he has it—he has it at last! Just as they have reached Brown's door, while he is fumbling with his latch-key for the keyhole, unprecipitated the moon for withdrawing her shining at the very instant he most needs her. Burgoyne has come up with the shy object of his chase. It is conjured back into his mind by the word Devonshire.

"I have it," he says to himself; "her hair has turned white, that was why I did not recognize her. It used to be raven-black. But it is she—of course it is she! To think of my not knowing her again! Of course it is Mrs. Le Marchant."

What a door into the distance that name has opened!—a door through which he passes into a Devonshire garden, and romps with rosy-faced Devonshire children. The very names of those children are coming back to him. Tom and Charles, those were the schoolboys; Rose and Miriam, and—Elizabeth. He recalls—absurd trick of freakish memory—those children's pets. Tom and Charles had guinea-pigs; Miriam had a white rat; Rose—what had Rose? Rose must have had something; and Elizabeth had a kangaroo. Elizabeth's kangaroo was short-lived, poor beast, and died about hay-time; the guinea-pigs and the white rat have been dead too for ages now of course. And are Tom and Charles, and Rose and Miriam, and bright Elizabeth dead also? Absurd! Why should they be? Nothing more unlikely! Why, it is only ten years ago, after all!

He is roused from his meditations by Brown's voice, to find himself in Brown's study, where its owner is filling himself a pipe, and festally offering him whisky and water. But it is only an abstracted attention that Burgoyne lends, either to the whisky or the whisky's master; and his answers are sometimes inattentively beside the mark, to talk, which indeed is not without some likeness to the boasted exploits in Clement's Inn, and the affectionate inquiries after Jane Nightwork, of a more famous fool than he.

It is a relief to the guest when, earlier than he had expected—a blessing he, no doubt, owes to Mrs. Brown—his host breaks up the seance, and he is free to retire to his own room. At once he is back in that Devonshire garden, he is there almost all night, between sleep and wake. It is strange that persons and circumstances banished from his memory for ten long years should rush back with such tyrannous insistence now.

Such silly recollected trifles crowd back upon his mind. The day on which Tom nearly choked himself by swallowing a barley beard; the day on which the lop-eared rabbit littered—ah, rabbits of course! Those were what Rose had!—the day on which Tom pushed Miriam into the moat, and Elizabeth fell in, too, in trying to fish her out. Elizabeth, the eldest, the almost grown-up one, embarrassed by her newly-lengthened petticoats, so harassing at cricket, in races, in climbing apple-trees. Elizabeth was sixteen; he remembers the fact, because her birthday had fallen two days before his own departure. He had given her a gold thimble set with turquoises upon the occasion; it was not a surprise, because he recalls measuring her finger for the size. He can see that small middle finger now. Elizabeth must now be twenty-six years of age. Where is she? What is she—maid, wife or widow?

And why has Mrs. Le Marchant's hair turned snow-white? Had it been merely grey he would not have complained, though he would have deplored the loss of the fine smooth inky sweep he remembers. She has a fair right to be grey; Mrs. Le Marchant must be about forty-six or forty-seven, bien s6nne. But white, snow-white—the hue that one connects with a venerable extremity of age. Can it be bleached? He has heard of women bleaching their hair; but not Mrs. Le Marchant, not the Mrs. Le Marchant he remembers. She would have been as incapable of bleach as of dye.

bridge beneath which, in its normal state, the water of the lasher rushes down impetuously; but is now raised to such a height that it lies level, almost flush with the planking. He is staring across the iridescent water plain to where, in the poetic atmosphere of sun and mist, dome, and schools, and soaring spires stand etherealized.

"Dear old place!" he says, under his breath, "everybody is dead; and I am dead; and Brown is dead; at least, are still alive!"

Are these more ghosts coming round the corner? A man and a woman ghost strolling along, and looking about them as strangers look. When they are within a pace or two of him the woman says something—something about the floods—to her companion, and at the sound Burgoyne starts.

"She did not speak last night; if she had spoken I should have known her at once. She always had such a sweet voice."

He raises his arms from the bridge-top, and turning, meets them face to face, eye to eye, and in an instant he has seen that both recognize him. At the same instant he is aware of a simultaneous inclination on the part of man and wife to avert their heads, and pass him without claiming his acquaintance. Perhaps, if he had had time to reflect, he would have allowed them to do so, but the impulse of the moment forbids it. Why should they wish to cut him? What has he done to deserve it? Ten years ago they were his very good friends, and he was the familiar comrade of their children, the daily guest at their table. What has the unavoidable lapse of those years done to make him less fit for their company at twenty-nine than he was at nineteen? There must be some misconception, which a moment will set right.

"I am afraid that you do not remember me, Mrs. Le Marchant," he says, lifting his hat.

This is not quite true, as he is perfectly convinced that they are as much aware of his identity as he is of theirs. But what formula has a man to employ in such a case? They both look back at him with a sort of irresolution. To his astonishment, in their eyes is a velvety of flight, but apparently she—women's minds moving more quickly than men's—is the first to realize that flight is out of the question.

## If a Cow gave Butter

mankind would have to invent milk. Milk is Nature's emulsion—butter put in shape for digestion. Cod liver oil is extremely nourishing, but it has to be emulsified before we can digest it.

## Scott's Emulsion

combines the best oil with the valuable hypophosphites so that it is easy to digest and does far more good than the oil alone could. That makes Scott's Emulsion the most strengthening, nourishing food-medicine in the world.

## UNDERWEAR

"I am sure that you have no intention of cutting me," Jim goes on, with a smile, seeing that she is apparently struggling with a difficulty in utterance; "at least, you must be very much changed from what you were ten years ago if you have. My name is—"

"I know—I know!" she interrupts, finding speech at last—speech low and hurried. "I remember perfectly. You are Mr. Burgoyne."

Her confusion—she always used to be such a placid, even-mannered woman—is so patent, born of whatever unaccountable feeling it may be, that he now heartily wishes he had let the poor woman pass unmolested. But such repentance is too late. He has arrested her; she is standing on the gravel path before him, and though he feels that her extraordinary shyness—mauveuse honte, whatever it may be—has infected himself, he must make some further remark to her. Nothing better occurs to him than the obvious one—

"It is a long time—it is ten years since we met."

"Yes, ten years; it must be quite ten years," she assents, evidently making a great effort to regain her composure.

She does not feign the slightest pleasure in the meeting, and Burgoyne feels that the one thought that occupies her mind is how she can soonest end it. But his roused curiosity, together with the difficulty of parting without further observation after having forced his presence upon them, combine to prevent her succeeding.

"And how is the Moat?" he asks, reflecting that this, at least, is a safe question; a brick and mortar house, at all events, cannot be dead. "How is Devonshire?"

Apparently it is not so harmless a question as he had imagined; at least Mrs. Le Marchant is obviously quite incapable of answering it. Her husband, for the first time, comes to her rescue. "The Moat is let," he says, in a dry voice; "we have left Devonshire a long while—nine, nine and a half years ago."

The Moat let! Judging by the light of that Windsor Castle had been turned into a Joint Stock Company Hotel. It is probably, then, some money trouble that has turned Mrs. Le Marchant's hair white—snow-white, as he now sees it to be. But no, he rejects the explanation as insufficient. She is not the woman to have taken a diminished income so much to heart.

Good manners forbid him to ask, "Why is the Moat let?" So all that he says is, "Nine and a half years ago?" Why, that must have been very soon after I left Devonshire."

He addresses his remark involuntarily rather to the wife than to the husband, but she does not answer it. Her eyes are fixed upon the bubbles sailing so fast upon the swollen river, which is distinguishable only by its current from the sameness of the surrounding water. A lark—there is always a lark in Mesopotamia—a tiny, strong-throated singer, that never seems to have to stop to take

there is no trace of mourning in her parents' dress. Elizabeth is dead—bright Elizabeth, the beauty and the pet!

Is it only fancy that he sees in the eye of Elizabeth's mother a dread lest he shall ask tidings of her, as she says, hastily, and with a smile, "Well, I am afraid we must be going; it has been very pleasant meeting you again, but I am afraid that the Warden will be expecting us?"

She adds to her parting hand-shake no wish for a repetition of that meeting, and he watches them down the Willow Walk with a sort of sadness in his heart.

"Elizabeth is dead! Elizabeth is undoubtedly dead!"

(To be continued).

## REBUILDING OF 'FRISCO

THREE YEARS MAY SEE THE CITY ITSELF AGAIN.

Over 300,000 Men Now Engaged—Two Thousand Houses in Twelve Weeks.

A city is made by its traffic, and the growth of a state is dependent upon its natural resources, says a San Francisco letter. Commerce is not an accident, and neither trade nor population is drawn continuously to a city or a country by brag, however persistent. A strategic position, such as San Francisco occupies, command of a great natural gateway, with a country behind it imperial in area and incalculably rich and varied in the products of its soil, will compel growth inevitably.

The San Francisco Real Estate Circular, showing the real estate market for six months ending on June 30, 1906, records transactions for this period to the amount of \$48,399,651, and that real estate in this city is not heavily in debt.

The real estate transfers during August were 1075, as against 974 for January.

### REAL ESTATE EXPERTS

now say that within three years the burned district between Market and Vanness avenue will be rebuilt. The movement is going on from Vanness eastwardly, and westward from the downtown section. This is not a long time in which to cover a large area with substantial buildings. And while this heart of the city is being made of steel and cement work will be going on south of Market-street, and most of that great section will be reconstructed. The delay in pushing up the big class A structures is growing shorter as business and the insurance situations adjust themselves.

Meantime, no lot or block of property within the lines of the area indicated will represent a decreasing valuation for any length of time. In fact, real estate values have gone up in some blocks of the burned district, and are holding their own in most of the others.

There were employed in building and reconstruction work in this city on June 9 20,000 men. Those figures were obtained from the rosters of the unions. The number of mechanics and laborers on the rosters of the building crafts, and unclassified and unaffiliated, or working on permits pending application, was on Aug. 1, in round numbers, 30,000 men.

### LABOR BENEFITS.

An eastern statistician, who has carefully surveyed the situation here, goes into elaborate calculations as to the sum that will be required to rebuild the city. He puts it at \$400,000,000. It seems a sort of rough guess, but perhaps it is not too much to expect that some such vast sum will be spent on building in San Francisco within the coming decade. Whatever the total, labor will receive something like 40 per cent of the

## JAPAN TEA DRINKERS

YOU REALLY MUST TRY

## 640 ACRES PRAIRIE WHEAT LAND..... FOR SALE

Near Neudorf, Saskatchewan. A great bargain. \$12 per acre. Close to two railroads. Branch line of Grand Trunk Pacific surveyed almost through the property.

BOX 21, 73 WEST ADELAIDE STREET, TORONTO.

### USEFUL HINTS.

Hang blankets in the sun constantly between the times of washing, for it whitens and purifies them besides raising the pile.

For duck stuffing take dry bread-crumbs, chopped sour apples, and boiled onions, seasoning the mixture with salt, pepper, sage and butter.

Removing Red Ink Stains.—Moisten the spots with strong alcohol acidulated with nitric acid. It is always desirable to make a blank experiment first, as all materials will not take the same treatment.

To brown flour put a thick layer of flour into a baking pan and place it in a hot oven. Watch this and stir with a spoon until the flour is nicely browned all through. When it becomes cold, put it into preserve jars and cover closely. This is splendid for thickening gravies and sauces.

## Fruit Growers, Attention

Having no commission to pay, and selling for cash, The Eastern Townships Nurseries are thus able to offer you Standard Apple Trees 4 to 6 feet high, grown here, hardy and thrifty stock for Fall and Spring delivery, for \$15.00 per hundred.

LOUIS GÉVAULT, Prop.,  
Laurensville, Que.

## YOUR OVERCOATS

and faded Suits would look better dyed. If no agent of ours in your town, write direct Montreal, Box 158

BRITISH AMERICAN DYEING CO.

## A SNAP IN A WHEAT FARM NEAR WINNIPEG.

1,066 acres of clean unbroken prairie, the finest wheat land on earth, on the banks of the Red River, 45 miles from

linguistic only by its current from the sameness of the surrounding water. A lark—there is always a lark in Mesopotamia—a tiny, strong-throated singer, that never seems to have to stop to take breath, fills up the silence, shouting somewhere out of sight among the black clouds, in and out of which the uncertain sun is plunging. Whether of a moneyed nature or not, there is evidently something very unpleasant connected with their leaving their native country and their immemorial home, so he had better get away from the subject as fast as possible.

"Anyhow," he says, with a rather nervous smile. "I hope that the world has been treating you kindly—that things have gone well with you since those dear old days when you were so good to me."

There is an instant's pause—perhaps he would not have noticed it had not his suspicions been already aroused—before the husband, again taking upon him the task of replying, answers, with a sort of labored carelessness—

"Oh, yes, thanks; we do not complain. It has not been a very rosy time for landlords lately, as you are aware." "And you?" cries the wife, striking in with a species of hurry in her voice—a hurry due, as his instinct tells him, to the fact of the fear of his entering into more detailed inquiries. "And you? We must not forget you. Have you been well, flourishing, all this long time? Do you still live with your—"

She stops abruptly. It is apparent that she has entirely forgotten what was the species of relation with whom he lived. There is a little tinge of bitterness in his heart, though not in his tone, as he supplies the missing word "aunt." And, after all, he had forgotten her name; why should not she forget his aunt?

"With my aunt? Well, I never exactly lived with her; I made, and make my headquarters there when I am in England, which is not very often. I have been a rolling stone; I have rolled pretty well round the world since we parted."

They do not care in the least where he has rolled, nor how much nor how little moss he has collected in the process. They are only thinking how they can best get rid of him. But the past is strong upon him; he cannot let them slide out of his life again for another ten—twenty years perhaps, without finding out from them something about his live merry playmates. His inquiry must needs be a vague one. Who dares ask specifically after this or that man, woman, or even child, when ten years have rolled their tides between?

"And you are all well?" he says, with a certain wistfulness lurking in the different banal phrase. "Dear me, what a jolly party we used to be! I suppose that—that they are all out in the world now?"

His eyes are fixed apprehensively upon the mother of those young comrades, to whom he thus cautiously alludes. Perhaps, carefully as he has worded his question, he may have touched some terrible raw. Her face is turned aside, presenting only its profile to him, but she answers almost at once—

"Yes; we are all scattered now. Charlie is planting oranges in Florida—he does not mind the heat; you know he always said no weather could be too hot for him; and Tom has an ostrich farm in Australia, and Rose has been married two years—she has a dear little baby; and Miriam is married, too; we have just come down from her wedding."

"Miriam married!" repeats Burgoyne in a tone of wonder. "Miriam with a husband instead of a white rat!"

The mother laughs. It is the first time that he has heard her laugh, and she used to laugh so often.

"I think she likes the exchange." There is another little pause, again filled by the lark's crowding notes. There are two words battering against the gate of Burgoyne's lips for egress—two words that he dares not utter.

"And Elizabeth?" She was the eldest. She would naturally have been mentioned first; but neither first nor last is there any speech of her. She must, then, be dead—dead long ago, too; for

appears a sort of rough guess, but perhaps it is not too much to expect that some such vast sum will be spent on building in San Francisco within the coming decade. Whatever the total, labor will receive something like 40 per cent. of the whole.

This money returns almost at once into circulation and is felt in the volume of retail and other trade in the city.

San Francisco has been credited with exceptional courage in undertaking her own rehabilitation, doing business at the old stand and on her own capital. But while sentiment is involved—a passionate attachment to the city, its site, its climate and its cosmopolitan spirit—business sense is behind sentiment, and necessity pushes business sense. One-third of the city's population must be housed.

#### CONTRACT FOR HOUSES.

The chairman of the building committee of the relief corporation has closed a contract for 2,000 houses, 800 of two rooms and 1,200 of three rooms, all to be ready within twelve weeks from Sept. 1. Negotiations are going on with another contractor for a like number of cottages, and the necessary appropriations have been made to cover both contracts. The California ruins will be anticipated in large measure.

It is not definitely decided that the cost of the new Palace Hotel will approximate \$3,000,000, with an additional allowance of \$600,000 for furnishing. The architects who are preparing the preliminary plans have been instructed to provide 700 rooms, to duplicate the famous old court and arrange grills for both men and women.

The Alaskan Commercial Company has signed a contract for a class A steel building on the corner of California and Sansome. The cost is to be \$500,000.

A concrete warehouse will be built by Timothy L. Hopkins at a cost of \$420,000. An immense brick warehouse will also be in the same locality, and work on both is to begin shortly. The plans are now drawn.

They Drive Pimples Away.—A face covered with pimples is unsightly. It tells of internal irregularities which should long since have been corrected. The liver and the kidneys are not performing their functions in the healthy way they should, and these pimples are to let you know that the blood protests. Parmelee's Vegetable Pills will drive them all away, and will leave the skin clear and clean. Try them, and there will be another witness to their excellence.

Mrs. Nagget—"You don't love me as much as you used to." Mr. Nagget—"Think so?" Mrs. Nagget—"No; you used to say I was worth my weight in gold, and—" Mr. Nagget—"Well, you're not so stout as you used to be, you know."

Howell: "Rowell is always borrowing trouble." Powell: "He's the kind of fellow who, if he thought he was going to get fat, would go out and walk off the weight before he got it!"

# FREE

**Dr. Leonhardt's Anti-Pill**

a sure cure for Indigestion, Biliousness, Dyspepsia, Constipation and all ailments arising therefrom. Mailed free, in a plain package, on receipt of name and address. Fill in your name and post office address on dotted lines and send to

**THE WILSON-PYLE CO., Limited,**  
Niagara Falls, Ont.

all through. When it becomes cold, put it into preserve jars and cover closely. This is splendid for mackerel gravies and sauces.

#### RETALIATION.

"I'll g-get even w-with you, m-mama," sobbed small Elsie, who had just been severely chastised.

"How?" queried her mother.

"When I g-grow up and h-have a little girl I'll beat the life out of h-her," answered Elsie.

Why go limping and whining about your corns when a 25 cent bottle of Holloway's Corn Cure will remove them? Give it a trial and you will not regret it.

"No beggar," says the philanthropist, "will go away empty-handed from a good man's door." Not if he can reach an overcoat from the good man's hall-rack.

One Fact Is Better than Ten Hearsays.—Ask Dr. Burgess, Supt. Hospital for Insane, Montreal, for his opinion of "The D & L" Menthof Plaster. Yard rolls \$1, also 25c. tins.

He (who has known her three days only)—"May I call you Edith?" She—"I don't see why; my parents thought Emily was quite good enough."

For Inflammation of the Eyes.—Among the many good qualities which Parmelee's Vegetable Pills possess, besides regulating the digestive organs, is their efficacy in reducing inflammation of the eyes. It has called forth many letters of recommendation from those who were afflicted with this complaint and found a cure in the pills. They affect the nerve centres and the blood in a surprisingly active way, and the result is almost immediately seen.

He—"So your husband has given up smoking? It requires a pretty strong will to accomplish that." She—"Well, I'd have you understand that I have a strong will."

PLEASE BEAR IN MIND that what is called a skin disease may be but a symptom of bad blood. In that case, Weaver's Cerate, externally applied, should be supplemented with Weaver's Syrup, taken daily.

#### ARE YOUR FEET GERMAN.

National characteristics are many and varied, and scientists are always discovering new things. The latest of these is feet. The French foot is narrow and long. The Spanish foot is small and elegantly curved—thanks to its Moorish blood. The Arab's foot is proverbial for its high arch. The Koran says that a stream of water can run under the true Arab's foot without touching it. The foot of the Scotch is high and thick; that of the Irish flat and square; the English short and fleshy. When Athens was in her zenith, the Grecian foot was the most perfectly formed and exactly proportioned of that of any of the human race. Swedes, Norwegians, and Germans have the largest feet, Americans the smallest. Russian toes are "webbed" to the first joint. Tartarian toes are all the same length.

#### ALL THE BEST CHANCES ARE—

With the worker who is thorough in small things as well as in large.

With the one who takes the thorns in his occupation with as good a grace as the roses.

With the man who never loses sight of his goal no matter what difficulties beset him.

With the employee who does not measure the quality and quantity of his work by the amount of his salary.

With the young man or young woman who is willing to do a little occasional extra work without pay and without grumbling.

With the courageous struggler who puts grit, determination, and will-power against his handicap, whatever it may be.

1,066 acres of clean unbroken prairie, the finest wheat land on earth, on the banks of the Red River, 45 miles from Winnipeg, four miles from two railway stations. \$15 an acre takes it. \$5,000 cash, balance easy. No better farm, no better investment.

**WAUGH & BEATTIE.**

12 Merchants Bank Building,  
Winnipeg, Man.

#### SPECIALISTS' SMALL HEADS.

Brains of great men vary very much. It is found that men of encyclopaedic mind have large and heavy brains—Gladstone had to wear a very big hat—with an enormous bed of grey matter and numerous convolutions; on the other hand, men whose genius is concentrated upon one line of thought are of small brain, and, consequently have small heads. Newton, Byron, and Cromwell were in this class.

#### UNIQUE.

"I married you, my dear, because you were different from other women."

"Flatterer! In what way was I different?"

"You said 'yes' when I proposed."

Cholera and all summer complaints are so quick in their action that the cold hand of death is upon the victims before they are aware that danger is near. If attacked do not delay in getting the proper medicine. Try a dose of Dr. J. D. Kellogg's Dysentery Cordial, and you will get immediate relief. It acts with wonderful rapidity and never fails to effect a cure.

Mrs. McDuff—"This paper says that mice are attracted by music; but I don't believe it." McDuff—"Why not?" Mrs. McDuff—"Because I never see any mice around when I play the piano." McDuff—"Well, that's no reason for doubting the paper's statement."

WE ARE ALL FAMILIAR with the deep, hoarse bark, grimly called "a grave-yard cough." Take Allen's Lung Balm, a remedy for pulmonary trouble, highly recommended even in the earlier stages of Consumption.

#### IN PORTIONS TRUE.

Wife: "I'm inclined to think, dear, that our milkman puts water in the milk."

Husband: "On the contrary, I think he puts milk in the water."

## Your Doctor

Can cure your Cough or Cold, no question about that, but—why go to all the trouble and inconvenience of looking him up, and then of having his prescription filled, when you can step into any drug store in Canada and obtain a bottle of **SHILOH'S CURE** for a quarter.

Why pay two to five dollars when a twenty-five cent bottle of **SHILOH** will cure you as quickly?

Why not do as hundreds of thousands of Canadians have done for the past thirty-four years: let **SHILOH** be your doctor whenever a Cough or Cold appears.

**SHILOH** will cure you, and all druggists back up this statement with a positive guarantee.

The next time you have a Cough or Cold cure it with

# SHILOH

# GREAT FIRE IN TORONTO

## The National Exhibition Grounds Devastated

A despatch from Toronto says, Apparently insignificant at the outset, a fire which broke out on the Canadian Exposition Grounds on Thursday night under the influence of a brisk breeze assumed gigantic proportions, and in a few hours had swept from the eastern to the western boundaries. Commencing at the large grand stand the flames reduced it to a heap of smouldering ruins, spread to the first tier of stables, of which it demolished seven, leaped to the Transportation Building, and destroyed it in a miraculously short space of time. The blaze broke out in the east end of the grand stand at about 10 o'clock, but apparently remained unobserved for some time, for it was 10.24 before the alarm was given at Queen and Lisgar Streets, by some one who had noticed the bright reflection which colored the sky. The force which responded proved inadequate and at 11 o'clock the whole city brigade was summoned.

At the outset the wind blew strongly from the south-east, and the huge grand stand, composed largely of wood, burned with great rapidity. Before it sank into a heap of embers and twisted girders, however, tongues of fire leaped across the road at the rear of the building and ignited the first of the tiers of stables to the north. These, also constructed of wood, burned fiercely and for a time it seemed probable that the whole block, with the large wooden Women's Building, Poultry House, Dog Building, etc., would be destroyed. Providence intervened, however. The wind shifted so that it blew directly from the east, not, however, before five of the stables had been totally consumed and several others stood in ruins. In some of the stables were stabled a number of horses belonging to Graham Bros., Claremont, and a number of the chargers of the members of the Royal Canadian Dragoons. These were all released and ran aimlessly about the grounds.

### FIRE SPREADS WEST.

With the change in the wind it seemed that the conflagration was under control, as a large open space seemed to check the advance of the flames. The firemen were gathered to the west of the still fiercely-glowing cauldron of

fire, and were endeavoring to extinguish it when a cry arose from the crowds, who were observing the scenes from every point of vantage, that the Transportation Building was alight. The old Crystal Palace was fairly alight, and was soon blazing merrily. It was 11.30 o'clock when the building was ignited. In three-quarters of an hour the old Main Building, once the pride of the Exhibition directors, was practically destroyed. All efforts to save it were fruitless, for the numerous panes of glass in the walls broke with resounding cracks and served as draughts to fan the flames.

The old building, which has witnessed many a scene of splendor, furnished to the drenched onlooker a much more striking picture in its destruction than ever before in its history. Every window, and they are legion, was outlined in black against a gorgeous background of fire. As the flames seized upon the roof they leaped high in the air, scattering embers in every direction, and making a fearsome pyrotechnic display. Finally dull crashes were heard, and the roof began to fall, the girders sank to the ground, and all that remained was a number of scattered black pillars of iron, like giant arms stretched imploringly to the scarlet sky. The wooden buildings to the north were apparently never in danger, but it seemed for a time the home of Park Commissioner Chambers, which stands at the western limit of the grounds, would go.

### LOSS AND INSURANCE.

The loss is approximately estimated at \$125,000. The insurance on the Transportation Building is \$40,000 and on the grand stand, kitchen, lunch-rooms, ticket-boxes, and entrance to grand stand and fences, \$54,000. In respect to the horse stables there is an insurance of \$1,670 on each on Nos. 1 to 12 and 14 to 18, and Nos. 22 to 25 \$4,000 each. On the cattle sheds there is an insurance of \$1,000 each.

The insurance is placed by the city, and there are 48 companies participating in the total amount, which is placed at \$1,773,913, the insurance being divided into 100 parts or shares.

For a while they conversed on various topics, exchanging experiences on the flooding of squirrels' hoards and birds' nests, and on the hatefulness of arithmetic. Presently the boy thrust his hands in his pockets. "Say! I'm hungry," he declared. "I'll help you down from that tree. Then let's build a fire over here for our fish, and we won't have to go home to dinner."

"Cause I just hate napkins and finger-bowls!" assented Una, gayly. So when the boy had helped the little princess down, he sent her to gather some brush for the fire, while he cleaned the fish. She gathered some timothy grass ends, too, because she said that would make nice asparagus; and she fetched a lot of sorrel, which the boy immediately began to nibble.

"No, no!" cried Una. "Not now, please! This is salad; it comes after the fish, you know."

The boy didn't know, but he let her have her way. And altogether they had a fine time, and ate up every vestige of the fish and the asparagus and the salad. In the afternoon Una's little friend emptied his pockets for her, and displayed such wonderful things as a jackknife, marbles, fishhooks, and a compass, while she sat looking on in silent admiration, twisting grasses around her fingers.

## SOME VALUABLE GEMS

### THE DUCHESS OF MARLBOROUGH'S COLLECTION.

#### The Queen's Three Favorite Jewels — Fortunes in Gems Showered on Patil.

Of her personal jewels, next to her wedding ring, the late Queen Victoria most valued an insignificant enamel ring, set with a single diamond, given to her by Prince Albert when she was yet a child, and his betrothal ring, a snake set with the finest emeralds.

These three rings were never removed from her hand and were buried with her. Much treasured, too, was the bracelet she always wore, composed of a numerous array of small golden hearts each with a minute miniature of one of her grandchildren or great-grandchildren.

Queen Alexandra, in addition to a safe of diamonds and pearls, owns some wonderful colored gems—rubies, sapphires and emeralds—which, however, she rarely wears. The only colored stones she really likes are amethysts, and these she has given, at Christmas and on their fete days, to her friends and relatives in such numbers, set in scarf pins, bangles, chains, hat pins and sunshade tops, that she has quite popularized the stone, hitherto little valued in England. With dresses of her favorite color, mauve, the Queen always wears amethysts.

The jewels she values above all are her engagement ring, set with a beryl, emerald, ruby, topaz, jacinth, emerald—the first letters of which spell out the name by which she has always called her husband, "Bertie"; the beautiful diamond cross given to her by the women of Denmark on her marriage, and the crown of brilliants, set in silver, bestowed by the women of England on

### HER SILVER WEDDING DAY

The most splendid jewels Queen Alexandra possesses are undoubtedly her pearls. She has ropes and ropes of them, high dog collars and pearls set in trimmings for the corsages of her ball dresses. These have been collected and given to her by the Czar and her sister, the Dowager Empress of Russia, as well as by members of the English, Danish and German royal families, many being heirlooms.

The Queen's pearls are surpassed only by the young Duchess of Marlborough's historic collection. This includes some of the most interesting pearls in existence—the pearls that belonged to the ill-fated Marie Antoinette, which were bought by Mr. Vanderbilt for his daughter as a marriage gift. Each pearl in the young Duchess's necklace—it is an immensely long one—is valued at £1,000, and she sometimes wears the ropes wound twice around her neck and twice around her waist.

I hope I am divulging no state secret says a writer in the Grand Magazine, if I state that before Queen Alexandra went last season to dine with the Duchess at Sutherland House, the beautiful home of the Marlboroughs in Curzon street, she asked her youthful Grace to "put on all her pearls," just for once, "for then I will wear mine," laughed the Queen. "After dinner we will count which has the larger number." And they did, like two schoolgirls. The Duchess was the winner by two!

Among the finest black pearls known are those worn by Lady Lichester of Holland House, which it took Napoleon III. ten years to collect in all parts of the world for

### THE EMPRESS EUGENIE.

What is said to be the most valuable single necklace of pearls is owned by Countess Henckel of Paris. She has also a triple necklet of pearls of especial interest.

The first string was the so-called "Necklace of the Virgin of Atokha;" the second was once the property of the

## ONTARIO HEALTH RETURNS.

### Typhoid the Only Contagious Disease Very Prevalent.

The returns regarding the province's health during September are satisfactory in every regard but that of typhoid fever. Dr. Hodgetta, secretary of the Provincial Board of Health, gave out the following statement on Thursday:

The health of the province, based on the returns for September of 750 division registrars, so far as deaths caused by contagious diseases are concerned, may be considered satisfactory, with the exception of typhoid fever, which generally becomes more prevalent during the fall months. In New Ontario this disease assumed an epidemic form in some localities, eight towns and villages having reported 277 cases and 25 deaths from a population of 22,264, a death-rate of 1.12 in 1,000. This is much higher than was reported from thirteen cities and towns in the older settled parts of Ontario, where 215 cases and 23 deaths were reported from a population of 384,476, the death-rate being only 0.05. While the returns from 750 divisions give 668 cases and 83 deaths, the mortality is much lower for September, 1905, the figures being respectively 12.4 and 16.1.

It will be observed that smallpox, scarlet fever and diphtheria have reached a low point.

The total deaths from all causes are 2,381 from a population of 2,070,613, which makes the death-rate 13.79 in 1,000.

## SERIOUS FRACAS IN TORONTO.

### Dominic Trivara Was Wounded in the Right Thigh.

A Toronto despatch says: Thursday afternoon Louis Gurofsky of the Elm Street branch postoffice was gashed on the left ear and cheek with a knife, and Dominic Trivara, an Italian, 25 years old, of 226 Teraulay Street, received a bullet wound in the right leg. Gurofsky's brother, Joseph W., is under arrest, charged with doing the shooting. The trouble was the outcome of the Gurofsky brothers' father David being jostled off the sidewalk in front of his home, 174 Chestnut Street, about 4 o'clock, by three Italians. Taking his whip he used it on one of the three, whereupon a knife was drawn. Mr. Gurofsky's coat bears marks of a knife, and his daughter says she was followed up on the steps of the cottage and brutally assaulted. A boy who saw the trouble rushed down to the postoffice on Agnes Street and summoned Louis Gurofsky, who returned with a revolver. The Italians gave him two knife wounds in the ear and face and took the weapon from him. Louis was running with the Italians at his heels when his brother came to his assistance with another revolver. By this time a great crowd of people had gathered and excitement ran high. There was a pitched battle at Edward and Chestnut Streets, and a riot call was sent into the Agnes Street station. Constable Robinson arrested Joseph Gurofsky. His 38-calibre revolver had five empty chambers. The weapon taken from Louis Gurofsky had not been fired off. Crown Attorney Corley refused an application for bail.

## COOKED AND ATE WIFE.

### Revolting Story of the Doings of King Than-Thai.

A despatch from Marseilles, France, says: The mail advices which reached here on Wednesday from Indo-China brought another and more revolting story of the doings of King Than-Thai of Annam, showing that he went to the extent of cannibalism. After killing one of his wives he caused the body to be cooked and served up for dinner, forcing his entourage to eat it, under pain of death. Some of the King's wives were bound and burned with boiling oil and subjected to other equally while

## YOUNG FOLKS

### I WISH.

Monday, I wish for eager feet,  
On errands of love to go;  
Tuesday, I wish for a gentle voice,  
With tone both soft and low;  
Wednesday, I wish for willing hands,  
Love's duties all to do;  
Thursday, I wish for open ears,  
Wise words to listen to;  
Friday, I wish for a smiling face,  
A brightener of home to be;  
Saturday, I look for quickened eyes,  
God's beauty all to see;  
Sunday, I wish for a tranquil heart,  
That may to others joy impart.

### PRINCESS UNA'S GLAD DAY.

Princess Una lived in a beautiful castle, with big palace grounds all around, but she wasn't like most little princesses, and she didn't enjoy either the castle or the palace grounds. She did not enjoy the court festivals and her heavy royal robes. She went hit-

around, but she wasn't like most little princesses, and she didn't enjoy either the castle or the palace grounds. She did not enjoy the court festivals and her heavy royal robes. She wept bitterly when she was obliged to ride in the royal carriage with the King and Queen on procession days. She didn't like having her small royal hand kissed by the courtiers.

In fact, Princess Una hated all the ceremonies of the court, and she had a fancy for slipping away by herself to the woods which were part of the palace ground. Here she could pluck flowers to her heart's content—violets in the spring, wild roses in the summer, blue gentians in the autumn.

Well, one day she was plucking blue gentians (it happened to be in the autumn, you see), and she was softly humming to herself, glad in the fact that one time more she had escaped the vigilance of the royal guard and had been able to slip away from their eyes unobserved.

In the woods the grass was still green and soft, like a carpet of lawn, and it was thickly set with gentians, the bluest Princess Una had ever seen. She did not know, nor would she have cared had she known, that her eyes were as blue as the flowers; her lashes were as heavy as the gentians' fringe; that where a shaft of sunlight filtered through the trees and touched her curly head each separate hair was burnished bronze and that something of the brook's golden shadow lingered in her smile. (You see, as yet she had not reached the fond-looking-glass age.)

When she had plucked as many gentians as her two hands could hold, she got up from the ground and straightened her little grass-stained knees. A tiny cloud flitted across her brow. "Dear me! Oh, dear me," she cried. "What's the use, anyway? Her majesty won't let me fetch them into the palace—she says they're just wild weeds." The little princess's eyes were dewy, like the circular cobwebs on the shadowed green-sward.

Ah, and just at this moment the sun, beginning to gild the green-sward set the cobwebs shining like jewels. He seemed to be leaning on his elbow—this beautiful September sun—over the highest eastern hill yonder, looking straight down at the little princess.

Suddenly it occurred to Una that there was an unknown world beyond the stone wall which shut in the palace wood. She knew the grounds in front of the palace that bordered on the highway, for that was the road the royal processions took. But what might lie in this mysterious region between the wood and the far hills?

The princess set herself to study out a means whereby she might look over the stone wall. By clambering aloft among the branches of that tall tree, mightn't she be able to see the hidden valley?

Oh! oh! oh!!! How beautiful it looked out there! And then the creek, dimpling demurely. But the most wonderful thing of all was a barefoot boy, who stood in the middle of the creek, dangling a line.

"Hurrah!" cried the boy, jerking his line up suddenly. A radiant little fish glistened there.

"You've got him!" exclaimed Una, in a transport of delight. At the sound of her voice the boy turned, but the turning cost him his fish. It perceived its opportunity, and with a quick effort freed itself of the hook and leaped into the stream.

The boy advanced up stream toward Una, wading in the whirlpools with beautiful recklessness. Up in the branches of the tree, with grass stained knees and elfin eyes, she didn't look one bit like a princess. She didn't have on her crown, you see, so the boy couldn't have told, any way.

"That was my fault, wasn't it?" said Una, nodding dismally toward the bubbly spot where the fish had disappeared. "Don't you care?" cried he, gallantly. "Got a whole pile of 'em up yonder." He jerked his head backward over his shoulder, indicating six or seven sunfish on the shore.

had his pockets for her, and displayed such wonderful things as a jackknife, marbles, fishhooks, and a compass, while she sat looking on in silent admiration, twisting grasses around her fingers.

By and by a dreadfully accusing sound fell on the ears of the little princess; it was a bugle, and she knew that it was the court chamberlain sending out search for her.

"I must go now; it's getting late," she said to the boy, jumping up and smoothing out her skirts. But she didn't explain. And when he had helped her over the wall by the way of the fir tree and saw nothing beyond but the woods, he thought she must be one of the lodge keeper's children.

Of course Princess Una was sorry to have frightened her royal parents, sorry that it had been necessary to send the chief chamberlain to find her, but she didn't mind the royal scoldings much. And that night, when she was being tucked in her little ivory bed with rose-colored silk sheets, she smiled softly to herself.

"It's been such a glad day," she whispered mysteriously. "It's been such a glad day."

### JAPAN FOMENTING TROUBLE.

#### An Anti-British Yarn Published by Russian Agency.

A despatch from St. Petersburg says: The St. Petersburg telegraph agency has received a despatch from Tokio saying that the anti-British movement in India is receiving much encouragement from Japan, where every effort is being made to foster a feeling of kinship between the two dark races, and to preach the lessons of the Russo-Japanese War. The Buddhists of the two countries are fraternizing and exchanging visits, and steps are being taken to encourage the coming of Hindoo students into Japan, where they will be surrounded with an atmosphere of disaffection.

The Hindoo students now in Tokio, the correspondent of the agency continues, have just published an address, in which they appeal to India to heed the call of "Asia for the Asiatics," and to rise and cast off the British yoke.

Taking advantage of this Anglophobe foment, certain merchants of Japan have sent a mission to India to endeavor to supplant the boycotted British merchandise with Japanese goods. The efforts are meeting with a warm welcome.

### IRREGULARITIES IN BANKS.

#### 115 Convicted in the United States During Past Year.

A despatch from St. Louis says: At Wednesday's session of the thirty-second annual convention of the American Bankers' Association the annual report of Secretary James R. Branch, of New York, showed that during the year there were 179 persons arrested for criminal irregularities in banking circles, of which 115 have been convicted, and 35 are awaiting trial. Three hundred and thirty-seven members were dropped from the association through failure, liquidation, consolidation, and withdrawal. The total paid membership on Aug. 31, 1906, was 8,383. The aggregate capital, surplus and deposits of the membership is \$12,514,846,572.

### CUBA STORM-SWEPT.

#### Fears Are Entertained for Numerous Vessels.

A despatch from Washington says: A tropical storm passed over Cuba on Thursday. All Cuba and the Southern Atlantic coast of the United States have been swept by one of the wildest hurricanes known to the tropics. It is believed great loss of life and damage resulted. Wires are wrecked along the Florida coast. It is known the devastation extends as far north as North Carolina. Great fears are entertained for the City of Havana and numerous vessels that were out when the storm broke.

nesses of Paris. She was also a triple necklet of pearls of especial interest.

The first string was the so-called "Necklace of the Virgin of Atokha;" the second was once the property of the ex-Queen of Naples; the third was worn by the Empress Eugenie on state occasions.

This last string contains the great pearl found in Paterson forty-eight years ago. This pearl, if it had not been somewhat injured by the mollusk being boiled before the shell was opened, would be the finest and largest gem of modern times.

Mrs. Mackay is said to have the largest number of pearls of any living woman. There are almost 4,000 of them. One pearl rope belonging to her measures 9 feet in length, each pearl being the size of a pea and perfectly matched.

Of turquoises Princess Henry of Pless and the Duchess of Roxburghe (formerly Miss May Goebel) have the finest collections with the exception of one or two Russian Grand Duchesses. Mrs. Mildard Hansaker, wife of the American millionaire, wears the largest specimen ever seen in a ring.

Some rubies, perfect in color and of enormous value, formerly the property of the late Dowager Duchess of Coburg, are now in possession of the young Grand Duke; those of Lady Wimborne, including the famous Hope ruby, are only a little less splendid. Mr. Haggin of San Francisco possessed some years ago a wonderful ruby, which had been sold by Lola Montez for a comparatively trifling sum, but which is now worth some £3,000.

Sapphires, said to feel the effects of atmospheric changes and to shrink perceptibly in cold weather, are supposed to be the coldest stones in existence and to have the power, consequently, of quenching the fires of unlawful love.

### THE CZAR AND THE KAISER

Both wear sapphire rings, given them by their wives as talismans.

Of sapphire sets none is so precious, either in Europe or America, as that belonging to the Grand Duchess Sergius of Russia; no single stone is so rich in the memories that circle around it as the dark sapphire sacred to the Hohenzollerns, which has been in their family since the time of the Crusaders.

Several ladies—among others the Dowager Countess of Dudley, the Duchess of Devonshire, and Princess Dhuleep Singh—have helped to popularize the emerald, so well does the stone become them. Lady Chesterfield wears some magnificent stones set in a girle, while Lady Westmorland and the beautiful Lady Helen Vincent have the best of theirs set as muff chains. Stones unequalled for color and size, at any rate in Europe, are worn by the Infanta Eulalie of Spain.

Many footlight favorites, Sarah Bernhardt, Duse, Melba, Christine Nilsson, Judic and others, are owners of fine jewels; but Patti possesses the finest diamonds, turquoises and rubies of them all. The gems she carried away as a girl from Russia constituted one small fortune, those the Rothschilds have given her another. Queen Isabella of Spain, a good singer herself, bestowed sapphires and an amethyst brooch surrounded with pearls; a comb set with thirty-three brilliants was the gift of the Empress Eugenie; the Empress of Germany, Austria and Russia all loaded her with diamonds; even Queen Victoria sent a ruby and diamond bangle—a very small one, 'tis true, but still Victorian, so Patti prizes it.

The treasures in her safe are innumerable—fans heavy with jewels; a golden canary set with yellow diamonds, and a little bracelet, the gift of the subscribers at the St. Petersburg opera house, a staff of music in gold, and on it, indicated in large rubies and diamonds, the notes la, do, re, "Adoree," which indeed she was of those passionate lovers of music.

The most valuable opal in the world is to be seen in the imperial cabinet at Vienna. Another, worn by the Empress Josephine, known as the Burning of Troy, which is only a little less magnificent, is in the possession of the Marchioness of Bute.

one of his wives he caused the body to be cooked and served up for dinner, forcing his entourage to eat it, under pain of death. Some of the King's wives were bound and burned with boiling oil, and subjected to other cruelty, while naked women were thrown into the cages of wild beasts, where they were devoured before the King. Finally the French authorities made him a prisoner. He has been adjudged insane by Dr. Dumas of the French colonial staff. The "Royal Guard" has been disbanded, the palace has been placed under the protection of 150 native soldiers, and the terror-stricken inmates of the palace have been rescued from sufferings. The majority of the latter were women, who bore the marks of revolting tortures. Some of them were terribly mutilated, their faces being slashed and tongues cut out, while others had been suspended by pincers attached to the fleshy parts of their legs, to increase their agonies.

### DREADNOUGHT TESTED.

#### The Great Battleship Put Through Her Paces.

A despatch from Portsmouth, England, says: The British battleship Dreadnought carried out her gun trials in the open sea on Thursday with the most satisfactory results. Officers of the highest rank and experienced in ordnance matters were present. After the tests of the lighter guns had been concluded the Dreadnought fired her 10 and 12 inch guns, first singly, then in pairs, and finally all eight of them, composing her broadside, simultaneously. Each gun was loaded to the full service charge of 265 pounds of cordite and 850 pound projectiles. The vessel stood the strain of the enormous broadside splendidly. There was not the slightest disturbance to her structure, and only slight damage to the lighter fittings of her superstructure. Admiralty officials are most pleased with the outcome of the trials.

### THREE MONTHS' COMMERCE.

#### Increase of \$22,468,173 for First Quarter of Fiscal Year.

A despatch from Ottawa says: Returns for the first three months of the current fiscal year show an increase of \$22,468,173 in the trade of the Dominion, as compared with the corresponding period of the fiscal year of 1905. The imports amounted to \$78,408,244, an increase of \$13,095,738. Exports of domestic produce totalled for the quarter \$61,938,024, being an increase of \$9,312,435 for the three months' period. The duty collected on imports was \$12,587,190, as compared with \$11,213,696 collected during the first quarter of the last fiscal year. The foregoing statement takes no count of exports of foreign goods or of coin and bullion imports.

### MORE CARNEGIE HEROES.

#### Sixteen New Awards of Funds and Medals.

A despatch from Pittsburg, Pa., says: Sixteen more awards of funds and medals were made on Wednesday by the Carnegie hero fund commission to individuals who have saved lives, and whose deeds of heroism have been brought to the attention of the commission. The awards include a bronze medal to Samuel M. Desherbining, twenty years of age, a jeweller of Langham, Province of Saskatchewan, Canada, who rescued from drowning on August 23, 1905, Alfred O. Burnham, carpenter.

### NEW GRAIN CARRIER.

#### The Steamer Dundee Launched on the Clyde.

A despatch from London says: The steamer Dundee, specially built for the Mackay interests of Hamilton for grain trade on the great lakes, was launched on the Clyde on Wednesday.

## THE WORLD'S MARKETS

REPORTS FROM THE LEADING  
TRADE CENTRES.

Prices of Cattle, Grain, Cheese and  
Other Dairy Produce at Home  
and Abroad.

Toronto, Oct. 23. — Flour — Ontario wheat 90 per cent. patents are quoted at \$2.72 to \$2.75 in buyers' sacks outside for export. Manitoba first patents, \$4.50; second patents, \$4, and strong bakers', \$3.90, Toronto.

Wheat—The market is steady at \$15.50 to \$16 in bulk, outside. Shorts are quoted at \$18 to \$18.50 outside.

Wheat—No. 2 white offered at 72c outside, with 70c bid, while 71½c was bid on a 9c rate to Portland. No. 2 red winter offered at 72c outside, with 70c bid, and N. 2 mixed at 71½c, with 69c bid outside, and 70c bid on C.P.R. No. 1 Manitoba hard offered at 83½c track Point Edward. No. 1 Northern at 82c, and No. 2 Northern at 79½c track Point Edward, without bids.

Barley—No. 3 extra offered at 48½c outside and No. 3 at 47c, with 45½c bid at 78 per cent points on C.P.R.

Peas—No. 2 offered at 80c outside, with 78½c bid outside.

Oats—No. 2 white offered at 36c outside and at 35½c on a 6c rate to Toronto, with 35½c bid. No. 2 mixed, 36½c bid, Toronto, without sellers.

Corn—No. 3 yellow, 54½c bid track, Toronto, and it offered at 55½c to arrive Toronto.

Buckwheat—No. 2 wanted at 52c at 78 per cent. points, without offerings.

### COUNTRY PRODUCE.

Beans—Hand-picked selling at \$1.75 to \$1.80, and primes at \$1.60 to \$1.70.

Honey—Strained quoted at 10 to 11c per lb. and combs at \$2 per dozen.

Hops—New quoted at 18 to 21c.

Hay — No. 1 timothy scarce and quoted at \$11.50 on track here; No. 2 quoted at \$8 to \$8.50.

Straw—\$5.50 to \$6 per ton.

Potatoes — They are quoted at 60 to 75c per bag in quantities.

Poultry — Turkeys, fresh killed, 16 to 17c. Chickens, dressed, 8 to 10c; alive, 7 to 8c per lb. Fowl, alive, 5 to 6c. Ducks, dressed, 10 to 11c; do, alive, 8 to 10c per lb.

### THE DAIRY MARKET.

Butter—Pound rolls are quoted at 22 to 23c; tubs, 19 to 20c; large rolls, 18 to 20c. Creamery prints sell at 25 to 26c, and solids at 24 to 24½c.

Eggs—Good stock bring 20 to 21c per dozen.

Cheese—Prices rule at 14 to 14½c, the latter for twins.

### HOG PRODUCTS.

Dressed hogs in ear lots nominal. Cured meats are unchanged. Bacon, long clear, 12½c per lb in case lots; mess pork, \$21.50 to \$22; short cut, \$24.

Hams—Light to medium, 15½c; do, heavy, 15c; rolls, 12½c; shoulders, 11½ to 12c; backs, 17½ to 18c; breakfast bacon, 15 to 16c.

Lard — Tierces, 11½c; tubs, 11½c; pails, 12c.

### BUSINESS AT MONTREAL.

Montreal, Oct. 23.—(Special).—Grain—The local market was quiet. Holders of oats on spot demand 30½c in store for No. 4, 40½c for No. 3, and 41½c for No. 2. Stocks may be bought to arrive at considerably less. Flour — Manitoba spring wheat, \$4.60; strong bakers', \$4.10; winter wheat patents, \$4.10 to \$4.25; straight rollers, \$3.75 to \$3.80 in bags, \$1.65 to \$1.75; extras, \$1.50 to \$1.60. Feed—Manitoba bran in bags,

## HEALTH

KING SOL, M.D.

The greatest physician in the world is the sun. Here are a few examples of his healing powers.

Consumption of the lungs has been successfully treated by means of a concave mirror overlaid with blue glass.

Disfiguring lupus yields to the chemical rays of the sun, although the electric light is found more convenient in practice.

Pneumonia, diphtheria croup, neuralgia, chronic rheumatism, rheumatic gout, asthma, anemia, and chlorosis have all been treated most successfully by concentrated sunlight.

Even diseases of the kidneys, stomach, brain, and spleen can be overcome by strong sunlight, although it cannot penetrate to these deep parts. It acts, in these cases, by stimulating the surface and drawing away the blood from the congested organs.

The sun can cure sleeplessness, tone the nervous system, improve the appetite and the nutrition of the body, make red blood, strengthen the heart, and brace the whole system.

Besides curing disease, the sun prevents it, for sunlight kills consumption microbes in dust, cholera, and typhoid microbes in drinking water, scarlet fever and measles microbes in infected rooms.

### HEALING PROPERTIES OF WATER.

There is no remedy so easily obtained as water, and yet nine persons out of ten will pass it by in the emergency to seek for something of less efficacy. There are but few cases of illness where water should not occupy the highest place as a remedial agent.

A strip of flannel or a napkin folded lengthwise and wrung out of hot water and applied around the neck of a child who has croup will usually bring relief in a few minutes. A towel folded several times, then quickly wrung out of hot water and immediately applied over the seat of the pain in toothache or neuralgia will afford prompt relief. This treatment in colic works like magic. Cases on record having resisted other treatment for hours have yielded to this treatment in ten minutes.

Pieces of cotton batting dipped in hot water, then applied to all sores and new cuts, bruises and sprains is the treatment now generally adopted in hospitals. Hot water taken freely half an hour before bedtime is an excellent cathartic in the case of constipation, while it has a soothing effect on the stomach and bowels. This treatment, continued for a few months, together with proper attention to diet, will alleviate mild cases of dyspepsia.

### HEALTH NOTES.

A Remedy for Indigestion.—Take the white of an egg beaten to a stiff froth and stirred into a wineglass of cold water. It should be taken after each meal.

Put a sprained ankle into hot water for ten minutes as soon as possible after the accident. If the pain is severe, apply a bran bag dipped into hot vinegar.

Never neglect a daily bath if you want a clear skin and fresh complexion, and remember that a pleasant face and cheerful smile will go a long way towards improving the appearance. No woman is really beautiful if her expression is not bright and cheerful.

Puffiness under the eyes can sometimes be helped by the following massage treatment. Use both hands, place the finger-tips directly beneath the eyes, press gently around the outer corners and upward, following the contour of the eye. Try this movement fifty times a day.

A ten minutes nap is a wonderful aid to health. The writer knows a delicate

Winnipeg's building permits for the year have exceeded \$11,000,000.

A scarcity of occasional teachers is reported in the Toronto Public Schools. Six new townships in northern Ontario are to be opened for settlement.

Another outbreak of hog cholera is reported in Kent, this time near Blenheim.

Mr. John Charlton has given \$50,000 to endow a chair of moral philosophy at Queen's University.

Typhoid fever has assumed an epidemic form in some localities of New Ontario.

Mr. Frederic Nickolls of Toronto is applying for a street railway franchise in Barrie.

The Hebrew congregation of Kingston will build a small synagogue at a cost of \$10,000.

The Montreal Street Railway Company will add \$2,000,000 to its capital stock.

The Royal Canadian Regiment, infantry, is short of its establishment by 200 at Halifax.

An agitation is being raised at Vancouver for the holding of an immense exposition in 1910.

Hon. Dr. Reaume has decided to allow commercial and sporting fishing in the Bay of Quinte for the balance of this year only.

Investigation by accountants proves that false statements to the Government by the Ontario Bank began five years ago.

James Ashdown, millionaire hardware merchant, has been asked by many Winnipeg organizations to run for mayor.

The Bank of Nova Scotia paid \$125,000 for the lot at the corner of Portage and Garry streets, Winnipeg, and will erect a \$200,000 office building.

Twenty-four sections of Indian lands south of the Qu'Appelle Valley were sold by auction by the Dominion Government at Regina. Big prices were realized, in some cases over \$20 per acre.

Miss Cora Putnam has resigned as teacher in the Mercer Street school, Windsor, because there were colored children in the class. Her resignation was accepted by the Board.

Station Agent King, of the C.P.R., at Carman, Man., had \$56 stolen from the till, but the thief became repentant and wrote a note telling where the cash would be found.

Mr. Abraham Pratt, Assessment Commissioner and Building Inspector of Ottawa, was dismissed from the city's employ for failure to have the ruins of the Gilmour Hotel levelled to the ground.

The Dominion Archives have been presented with some 4,000 manuscripts of important historical nature relative to the troublesome times of 1837. The present Lord Durham is the donor.

Mr. C. McGill, former manager of the Ontario Bank, was arrested on a charge of making false Government returns, and a summons was served on Mr. G. R. R. Cockburn on a charge of signing them. Mr. McGill was released on bail.

### GREAT BRITAIN.

The Bank of England has advanced its discount rate to 6 per cent.

Great Britain will remove twenty efficient ships from active duty in order to economize for an active fleet.

Lord Tweedmouth, First Lord of the Admiralty, says that the recent economies will not injure the British navy.

## Fashion Hints.

### FASHION'S VAGARIES.

Marquisette, one of the favorite materials of the season—a cross between grenadine and gauze—is frequently trimmed with hand-embroidered broadcloth bands or some of the fascinating new motifs in cloth, combining velvet and gold.

Many of the sheer materials—chiffon, gauze, mousseline and thin, semi-transparent silks—are combined with such heavy fabrics as cloth and closely braided taffeta by way of trimming.

A gown of the new shade of heliotrope with a strong tinge of pink, had its beauty much heightened by a banding of white velvet richly embroidered in scrolls of gold, interspersed with several shades of lavender buttons and finished with dangling lavender and gold embroidered discs.

Among the loveliest of the new trimmings for a white or colored evening gown is one of pompadour silk padded flowers, with fascinating touches of gold spangles and silver tinsel. Another has clusters of lilacs in two shades of heliotrope, with foliage heavily embroidered in silver thread and opalescent paillettes. Green spangles in the border give an indescribably beautiful effect.

A very airy trimming for a chiffon cloth ball gown is large colored flowers embroidered directly on the material, surrounded by scrolls of lace inserting and ruffles, through which narrow ribbon the same color as the flowers is woven.

Bugles, beads, scrolls and velvet flowers in several shades of brown and gilt form an applique that gives just the right bit of color to relieve the dullness which an entirely brown costume is apt to possess.

Bugles are very strong this year on most of the new trimmings. Especially is this noticeable in the jettied passermenteries.

By the way, these jettied trimmings are peculiarly lovely, being seen in bands, heavy motifs and in most graceful separate floral garlands and festoons that can be easily attached to a gown even by the home dressmaker.

Jettied lace in bands, yokes and all-over effects for blouses and whole costumes are much seen. The designs are less solid and much more graceful and delicate than last season.

Black embroidered robes will be worn again this year, but with a difference. Glittering paillettes in close curves and scrolls have made way for floral garlands and panel effects. Most of these jettied robes have flounces, which give much more flare at the foot.

White net robes and separate waists are unusually beautiful with opalescent spangles, gold beads and colored hand embroidery. One of especial beauty had large raised flowers in gold bullion, mingled with flat gold scrollwork and opal spangling.

Among the most fascinating of the season's buttons are the large plaid ones, with smaller ones to match, of chased gold rims and rich, lustrous colorings, crossed in red, green and gilt.

Other plaid buttons are surrounded by brown glass cut in jeweled effects and gilt scrolls. Especially fetching was a set in different colored enamel, plaided in gilt and black and half covered with a graceful thistle design.

Braiding is to be a marked feature of the winter suits. The pull braids, which are so easily worked into special designs, even by a novice, are seen in all the new shades, with black greatly in the lead. Some of these narrow galloons and braids have heavy cord edges; more a fancy edge. There is less gilt and silver in them than last season.

A novelty of an extreme sort in dress

2. Stocks may be bought to arrive at considerably less. Flour — Manitoba spring wheat, \$4.60; strong bakers, \$4.10; winter wheat patents, \$4.10 to \$4.25; straight rollers, \$3.75 to \$3.80 in bags, \$1.65 to \$1.75; extras, \$1.50 to \$1.60. Feed—Manitoba bran in bags, \$20; shorts, \$23 per ton; Ontario bran, in bags, \$20 to \$20.50; shorts, \$22.50 to \$23; milled mouillie, \$21 to \$25 per ton, and straight rollers, \$28 to \$29. Provisions — Barrels short cut mess pork, \$22 to \$24; half-barrels, \$11.75 to \$12.50; clean fat backs, \$23.50; long cut heavy mess, \$20.50; half-barrels do, \$10.75; dry salted long clear bacon, 12½ to 12¾; barrels plate beef, \$12 to \$13; half-barrels do, \$6.50 to \$7; barrels heavy mess beef, \$11; half-barrels do, \$6; compound lard, 8 to 9½; pure lard, 11½ to 12; kettle-rendered, 12½ to 13; hams, 14 to 15½; breakfast bacon, 15 to 16; Windsor bacon, 15 to 15½; fresh killed abattoir dressed hogs, \$8.25 to \$8.50; alive, \$6.60 to \$6.75 per 100 lbs. Eggs—Selects, 22 to 22½¢; No. 1 candled, 18 to 19¢. Butter — Choicest creamery, salted and unsalted, 23½ to 23¾¢; medium grades, 23 to 23½¢. Cheese—Ontario, 13 to 13½¢; Quebec, 12½ to 12¾¢.

#### UNITED STATES MARKETS.

Minneapolis, Oct. 23. — Wheat—December, 73½ to 74½¢; May, 77½ to 78¢; July, 79½ to 79¾¢; No. 1 hard, 79½¢; No. 1 Northern, 76½¢; No. 2 Northern, 74½¢; No. 3 Northern, 72 to 73¢. Flour—First patents, \$4.20 to \$4.30; second patents, \$4.05 to \$4.15; first clears, \$3.25 to \$3.35; second clears, \$2.40 to \$2.60. Bran—in bulk, \$15.25 to \$15.50. Milwaukee, Oct. 23. — Wheat—No. 1 Northern, 78 to 79½¢; No. 2 Northern, 76 to 78¢; December, 74 to 75½¢ asked. Rye—No. 1, 65 to 65½¢. Barley—No. 2, 55¢; sample, 39½ to 51¢. Corn—No. 3 cash, 45 to 45½¢; December, 42½¢. Duluth, Oct. 23. — Wheat—No. 1 Northern, 77½¢; No. 2 Northern, 75½¢; October, 77¢; December, 75½¢; May, 78¾¢; July, 79½¢.

#### REUNITED AFTER 46 YEARS.

##### Family Long Separated Meet Once More at the "Soo."

A despatch from South Ste. Marie, Ont., says: Forty-six years ago Moses, Fred, Joseph and Agnes Beauchamp, then aged five to eleven years, were separated, their parents having died in Comptacur, Quebec, in 1859. They did not meet again until they came here for a reunion last week. Fred, who went West, and became a wealthy ranchman at Davis, South Dakota, determined to find his brothers and sisters, and succeeded after spending several thousand dollars.

#### GETTING READY FOR OPENING.

##### Parliament Will Not Meet Before November 22nd.

A despatch from Ottawa says: Preparations for the opening of Parliament are proceeding quietly on the "Hill." They are chiefly confined to making ready the departmental estimates and blue books and revising the tariff. There was talk recently of Parliament being summoned for the second week of November, but the indications now are that the 22nd is the earliest date at which the Government can be ready to meet the House.

#### RUSSIA WANTS A DREADNOUGHT.

##### The Finance Minister Refused to Provide Funds.

A despatch from St. Petersburg says: The Admiralty intends to build a battleship of the Dreadnought type. In order to overcome Minister of Finance Kokovseff's refusal to supply him with funds Vice-Admiral Birleff, Minister of Marine, appealed direct to Emperor Nicholas, who brushed obstacles aside and ordered M. Kokovseff to transfer to Admiral Birleff \$9,000,000.

the finger-tips directly beneath the eyes, press gently around the outer corners and upward, following the contour of the eye. Try this movement fifty times a day.

A ten minutes nap is a wonderful aid to health. The writer knows a delicate woman, mother of a large family, who is enabled to do a great amount of work by slipping away once or twice daily for a ten minutes sleep. The habit may be induced and it becomes a veritable dip into the fountain of youth.

#### ISLAND ENGULFED.

##### 250 People Drowned at Elliott's Key, Florida.

A despatch from Miami, Fla., says: Elliott's Key, an island 25 miles south of here, was swept clean by the waves thrown up by the cyclone of Thursday, and 250 people drowned. The steamship St. Lucie was crushed against the island and 25 of its passengers killed. A barge, which was lying alongside a wharf of the key, was torn from its moorings and 50 of the 100 persons on board were drowned. A steamship reached here on Friday night with 60 wounded, among them Capt. Bravo, of the St. Lucie, who brings the information. He is badly injured. Capt. Bravo says that he anchored on the lee side of Elliott's Key on Thursday morning, and soon after the waves engulfed the island.

It is believed now that a portion of the Florida Fish and Produce Company's fleet were destroyed, and Manager Adams sent out one of their boats on Friday morning to look for the men and their boats. On their return they reported no sign of the fleet.

#### WINGED ESCAPING BURGLAR.

##### St. Thomas Man Shot Him as He Crawled Out of Cellar.

A despatch from St. Thomas says: Mr. Duroche, who lives east of this city, was awakened by a noise in his cellar on Thursday night, and discovered a burglar crawling out of a cellar window. Mr. Duroche fired a shot from his revolver. The man lay still and groaned and then jumped up and ran away. He was joined by a partner. They jumped into a rig and drove rapidly away.

#### MORE DREADNOUGHTS.

##### British Admiralty Ordering Three New Ships.

London, Oct. 19.—The success of the trials of the British battleship Dreadnought has led the Admiralty to give orders for the construction without delay of three other such vessels. One is to be built at Portsmouth, one at Devonport, and one in a private dockyard.

#### BIRMINGHAM PIGEONS.

Birmingham, like many other English and Continental cities, has its brood of pigeons. Chamberlain Square, with a row of nests in the Art Gallery porch, has been the haunt of Birmingham's feathered tribe. But the presence of the birds has become so offensive to the Art Gallery authorities that nests and young birds have been destroyed, and a wire netting screen will prevent the old birds returning. The birds make pathetic attempts now and then to return to their old quarters, but already they are settling down to find a new home. The town hall and the free library, on the other side of the open space, will in future be regarded as the home of the pigeons.

#### IGNORANCE.

"Well, Harry," said the hostess to her small guest, "did you rest well last night?" "I don't know," answered Harry. "You don't know?" echoed the lady. "No, ma'am," replied the little chap, "I was asleep all the time."

its discount rate to 6 per cent.

Great Britain will remove twenty efficient ships from active duty in order to economize for an active fleet.

Lord Tweedmouth, First Lord of the Admiralty, says that the recent economies will not injure the British navy.

#### UNITED STATES.

In the explosion of an automobile at Cleveland two persons were killed and two seriously injured.

Ten men were burned to death and two fatally injured in a fire in a boarding-house at Birmingham, Alabama, on Friday.

The \$50,000 church built largely with the money that Father Joseph Murgas of Wilkes-Barre, Penn., has made from his wireless telegraphy invention, was dedicated on Tuesday. It is for Slavish Catholics.

Charles Hawk of West Berwick, Penn., had a bullet taken on Monday from his head, where it had been imbedded two years. He accidentally shot himself. He will make a watch-charm of the bullet.

James Rasmussen, of Greeley, Colorado, became lonesome and unattracted for a wife. Among numerous answers he received one from Eliza Morris of New York city. Monday evening they were married. The bride will build a pretty home for herself and husband.

Adam Rausch, a game-warden of Rowley, Mass., was shot on Tuesday, and it is thought, fatally wounded while attempting to arrest Patrick Cahill for violation of the Sunday game laws. Cahill says he shot in self-defence and did not know Rausch was an officer.

Heinrich Oesfeld, a member of a German theatre company at Cincinnati, was fatally injured on Monday night, when he attempted to use a loaded shell as a hammer in driving a nail. The exploding shell blew off his right arm, destroying his left eye, knocked out several teeth and otherwise injured him.

#### GENERAL.

New South Wales and Victoria have passed severe laws against gambling.

The sentence of death imposed on four Russian officers for surrendering has been commuted.

The Legislative Assembly of Western Australia decided to withdraw from the Commonwealth.

#### DEATH AT SILVER WEDDING.

##### Two Dead, Many Seriously Ill, Near Caledonia.

A despatch from Caledonia says: Two people dead with 85 made more or less seriously ill, is the outcome of a feast held a short while ago near here at the home of Mr. and Mrs. Hector Foster, to celebrate their silver wedding. Chickens were served, dressed with gelatin and boiled in copper pots. Shortly afterwards, some within a day and others in lesser or greater periods, the guests were stricken down.

It was first thought to be an epidemic of typhoid fever, and Drs. Maw and Morrow were called. Some of them quickly recovered from the effects — others did not recover, two succumbing. One was Mrs. Ferguson, wife of Rev. Mr. Ferguson, and the other was Mrs. Foster, mother of Hector Foster.

Of those who are critically ill, Rev. Mr. Ferguson is considered to be the worst. His condition is extremely critical. Hector Foster, his wife, and two children were taken ill, and required medical attendance. Fred Foster, his brother, was also ill, and his family suffered. Mrs. Wm. Murray and children were stricken down.

John Sen, of York, was in a critical condition. Allan and Mrs. Anderson were ill, but recovered after a brief illness. Miss Laidman, Blackheath, was also stricken, but is not regarded in danger. A couple of hired men were laid low, but their recovery was quick. It is reported that ten people in one family were ill as the result of eating the chicken.

designs, even by a novice, are seen in all the new shades, with black greatly in the lead. Some of these narrow galloons and braids have heavy cord edges; more a fancy edge. There is less gilt and silver in them than last season.

A novelty of an extreme sort in dress trimmings consists of large diamond-shaped pieces of dull green broadcloth, with applied designs of old rose velvet outlined with black and gold, and caught here and there with tiny gilt buckles over copper-colored taffeta. These diamonds are connected by an irregular open lattice work in deeper tones, held together by tiny buttons. Dangling ornaments to match this trimming are usually sold with it.

Equally novel is a banding of oblong connected figures in lemon-yellow bengaline, embroidered heavily in three tones of deep blue braids.

#### SEQUINS FAD OF FASHION.

Sequinned net in all black or in black mixed with steel is a new and glittering form of the dinner coat. Pretty trimmings can be made by the home worker in which sequins form the trimming motive. Insertion an inch and a half wide or narrower is killed and formed into a ruche and along the centre is basted a little piece of ribbon velvet, which is formed into a ruche. The velvet is crossed each half inch by a row of sequins the width of the velvet, these bulges serving to sew on the velvet to the killed insertion so that one may save time in the making. This is a charming finish to the all black evening dress or it may be done on white insertion with black velvet and sequins for the black net mounted over white.

A two or three inch insertion may be elaborated into the prettiest galloon. It is lined at the back with chiffon, the lining showing as a piping at the edges. The surface of the lace is enriched with chiffon or ribbon work roses, or with little inlets of colored velvet, shading with the chiffon lining. To accommodate these the patterns in the lace are cut away; circles, for instance, or ovals.

Fancy braids can be quickly transposed into showy trimming by French knots, bead work and chenille threads drawn in. It is a new note of fashion which puts silk braid on to the lightest of fabrics; for instance, a charming waist of white crepe de chine is trimmed with two widths of white Russian braid.

#### SHOT THROUGH BREAST.

##### A Young Farm Hand Was Killed at Metcalfe.

A despatch from Ottawa says: A young farm hand from Englewood named Harry Cummings, aged 23, was shot and instantly killed at Metcalfe on Thursday. Cummings with two others was out shooting, when one of the party handed him a loaded rifle. In the act of taking the weapon it went off, and the charge entered Cummings' breast, killing him instantly. A sad feature about the case is that a brother is on his way out from the old country to join deceased.

#### TRADE IN BRITISH BOTTOMS.

##### Carried Two-Thirds of Canada's Goods Says Blue-book.

A despatch from London says: The annual Blue Book on shipping shows that British bottoms carried 60 per cent. of Canadian trade and 85 per cent. of the South African and Australian trade.

#### KITCHENER TO VISIT CANADA?

##### Report That He Will Reorganize the Land Forces.

A despatch from London says: It is rumored in India that Lord Kitchener on the expiration of his term in India will visit Australia and afterwards Canada with the object of putting the land forces on a satisfactory basis.

## Is Your Hair Sick?

That's too bad! We had noticed it was looking pretty thin and rough of late, but naturally did not like to speak of it. By the way, Ayer's Hair Vigor is a regular hair grower, a perfect hair tonic. The hair stops coming out, grows faster, keeps soft and smooth. Ayer's Hair Vigor cures sick hair, makes it strong and healthy.

### WHAT OTHER PAPERS SAY

Warton Echo.

Poor elector, poor sucker, ponder how unfortunate you are. If you had hundreds of thousands of dollars to speculate with, and if Mackenzie Mann and Shaughnessy would give you a tip, you could make a fortune unless you are a chump, and you are a chump if you support this gang of Messrs Foster, Pope, Lefurgey, and others any longer.

Campbellford Despatch.

That everybody does not see eye to eye with The Toronto Globe politically goes without saying, but the newspapers all over the country should endorse its outspoken denunciations of political rascalities and craft, no matter by whom perpetrated. Neither Grit or Tory papers can afford to screen the rascals common to both parties and retain their self-respect or the confidence of the seemingly few honest men left in the ranks of either. It is the duty of the press to expose criminals irrespective of their political leanings or position in society, and insist upon their receiving the most rigorous punishment provided by the law.

### \$100 Reward \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires constitutional treatment. Hall's Catarrh Cure is taken internally acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Sold by all Druggists, 75c.  
Take Hall's Family Pills for constipation.

### The Blind Historian.

William Hickling Prescott, who was born at Salem, Mass., on the 4th of May, 1796, was the son of a prosperous lawyer, entered Harvard college in 1811 and graduated in 1814. Early in his college career he had his left eye blinded by a piece of bread playfully thrown at him by a fellow student, and the other eye soon became sympathetically affected. He traveled in England, France and Italy and then devoted himself to severe study, but it was not till the beginning of 1826 that he found the work of his life within the range of Spanish history. Fortunately his means were ample, so that he was able to procure the services of assistants and to live amid conditions of comfort. By constant habit he gained the power of carrying a great deal in his memory, and after he had revolved the whole of a chapter in his mind he quickly transferred it to paper by means of his stylus and an ingenious writing case especially constructed for the blind. He published his "History of Ferdinand and Isabella" in 1838, which carried his name across the ocean to the old world. This was followed by his "History of the Conquest of Mexico" in 1843, and of "Peru" in 1847. These gave him a great reputation.

### A Fruitarian Diet.

A fruitarian diet consists of the fruits of trees (like apples, oranges, bananas and olives), the fruits of bushes (like currants and raspberries), the fruits of plants (like strawberries and melon, lentils and beans and cucumbers), the fruits of grasses (like wheat and barley and maize and oats), the fruits of nut trees (from filbert to coconut), together with some earth fruits (like potatoes), and a medium of

# CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

## What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS  
Bears the Signature of

*Chas. H. Fletcher.*

### Habit-forming Medicines.

Whatever may be the fact as to many of the so-called patent medicines containing injurious ingredients as broadly published in some journals of more or less influence, this publicity has certainly been of great benefit in arousing needed attention to this subject. It has, in a considerable measure, resulted in the most intelligent people avoiding such foods and medicines as may be fairly suspected of containing the injurious ingredients complained of. Recognizing this fact some time ago, Dr. Pierce, of Buffalo, N. Y., "took time by the forelock," as it were, and published broadcast all the ingredients of which his popular medicines are composed. Thus he has completely forestalled all harping critics and all opposition that might otherwise be urged against his medicines, because they are now of known composition. Furthermore, from the formula printed on every bottle wrapper, it will be seen that these medicines contain no alcohol or other habit-forming drugs. Neither do they contain any narcotics or injurious agents, their ingredients being purely vegetable, extracted from the roots of medicinal plants found growing in the depths of our American forests and of well recognized curative virtues.

Instead of alcohol, which even in small portions long continued, as in obstinate cases of diseases, becomes highly objectionable from its tendency to produce a craving for stimulants, Dr. Pierce employs chemically pure, triple-refined glycerine, which of itself is a valuable remedy in many cases of chronic diseases, being a superior demulcent, antiseptic, antiferment and supporting nutritive. It enhances the curative action of the Golden Seal root, Stone root, Black Cherrybark and Bloodroot, contained in "Golden Medical Discovery," in all bronchial, throat and lung affections attended with severe coughs. As will be seen from the writings of the eminent Drs. Grover Coe, of New York; Bartholow, of Jefferson Medical College, Phila.; Seudder, of

### Petroleum.

The first mention of petroleum in America was made by Father De la Roche d'Allen, a Franciscan, in 1629. It may be a surprise to many people to know that both the product itself and the names petrol and petroleum were familiar at least as far back as the middle of the fourteenth century. In the Sloane manuscript (fifteenth century) mention is made both of rock oil and of the correct derivation of the name, which is mediæval Latin and of course has nothing to do with Peter: "Petroleum, oleum est factum de petra. (Gallice, pétrole.)" ("Petroleum is an oil made from rock—in French, pétrole.") The property of drawing fire had struck the imagination long before the work quoted in "Nature" was published. In 1596 Lodge used it in a metaphor: "As the clay petrol draweth fire, so the looks do gather affection." The word petrol (or petrole) disappeared from English and did not return until the days of the motor car industry, when it was reintroduced from the French in the sense of refined petroleum.

### Duels With Pistols.

Discussing pistols as dueling weapons, the Paris Figaro sought the views of a man who had the reputation of an expert on the field of honor. He at once began to rail at duels with pistols. He could not bear even to speak of them. The fact was that he had once himself at an encounter of that kind received a ball in the shoulder.

"Then you disapprove of them simply

and barley and maize and oats), the fruits of nut trees (from filbert to coconut), together with some earth fruits (like potatoes), and a modicum of vegetables and salads. To these may be added butter, milk, honey and cheese, although their production is not so free from risk of contamination and animal infection as is the case with the products of the vegetable kingdom and the world of fruits. Grown under healthy conditions, with diseased specimens easy to detect and remove, it is far more possible to live healthily and well upon a fruitarian dietary than upon the products of the slaughter house.

#### Making It Plain.

In the lower Amazon country the temperature ranges about 87 degrees in the shade all the year round, says the author of "Ten Thousand Miles in a Yacht." At Manaus, 1,000 miles up the river, the temperature is six or eight degrees higher. Thermometers are little used in that country and little understood. So when a yachtsman returned down river and was asked by an official at Para, "How is the temperature at Manaus?" his reply, "Eight degrees hotter than here," elicited a stare of noncomprehension.

"At Manaus," said the yachtsman in explanation, "I used to wilt six collars a day; here in Para I only need three a day."

This was perfectly clear to the Brazilian, whose face lighted with understanding.

#### The Arab War Chant.

Captain Von Herbert describes how the sacred chant was sung by Osman Pasha's force in that last dreadful sortie from Plevna. He knows, for, as he says, "as a youngster of seventeen, being then in the Turkish service, I took part in the charge." It is a solemn four part chant for deep male voices, with intervals, the melody recurring again and again, of alternating harmonies hummed almost pianissimo, to the words "Alla Akbar," and then again rising "to a great outburst on the fifth note." There is more than a suggestion of plain song, that song which drifted westward from the east.—Pall Mall Gazette.

#### Soldiers In Battle.

"It is important to be cool and self possessed at the beginning of a fight," writes one who has commanded men in battle. "As soon as the first shot is fired men become serious and go into action with a calmness which is most impressive. High explosive shells, with their deafening noise, make the most impression on young and unseasoned soldiers, while shrapnel affects the old soldiers the most. Those who imagine that it is possible to see a heroic look on men's faces at a decisive moment are completely mistaken. Their faces are pale and have a hard look about them. The struggle which is going on within them betrays itself by the nervous haste of their firing."

chial, throat and lung affections attended with severe coughs. As will be seen from the writings of the eminent Drs. Grover Coe, of New York; Bartholow, of Jefferson Medical College, Phila.; Scudder, of Cincinnati; Ellingwood, of Chicago; Hale, of Chicago, and others, who stand as leaders in their several schools of practice, the foregoing agents are the very best ingredients that Dr. Pierce could have chosen to make up his famous "Discovery" for the cure of not only bronchial, throat and lung affections, but also of chronic catarrh in all its various forms wherever located.

#### A Horse and a Cow.

When in my teens, milking seven cows morning and evening and toiling on the farm all day, I made favorites of a bay mare and a Durham cow—Molly and Bess. Talk about your physical sympathy! Why, it was pathetic. Molly was my saddle horse, a single footer of rare excellence. I could ride her with one finger on the reins into the most forbidding places. Old Bess—oh, she used to kick a tooth out once in awhile and put her foot in the pail of milk, but the dear girl would follow me about with the affection of a child! Well, I was absent from the old home five years and returning found that of all the animals only Molly and Bess remained. Imagine my distress when Molly refused to notice me at all! While wondering at this loss of friendship I felt a warm, rasplike thing going over my hand, which was behind my back. Turning, I saw dear old Bess. Without notice she had come to lick me. If ever animal spoke with eyes and manner she did. Her happiness at seeing me again after so long a period was apparent to all observers, and during my brief stay at home it was all I could do to keep her from following me into the house.

#### No "Deadhead" Trip.

One of the most famous of American shipping lines in the palmy days of our marine was the Cope line, which ran between Philadelphia and Liverpool, says the author of "Memoirs of Charles H. Cramp." By this line John Randolph of Roanoke determined to go to Russia when he had been appointed minister to that country by President Jackson. Entering the office of the company in Philadelphia, he said to a clerk in his usual grandiloquent manner:

"Sir, I wish to see Thomas P. Cope."  
 He was shown to Mr. Cope's office.  
 "I am John Randolph of Roanoke," he said. "I wish to take passage to Liverpool in one of your ships."

If he expected to be tendered a pass he was grievously disappointed.

"I am Thomas Cope," replied the head of the line. "If thee goes aboard the ship and selects thy stateroom and will pay \$150 thee may go."

#### A Timely Shake.

Some years ago the Duke of Connaught visited Japan and was taken by Sir Edwin Arnold round the bazars of Tokyo, where he bought many curious toys and specimens of Japanese art. In the evening he remarked to Sir Edwin that he had seen most of the sights, but had not experienced any of the earthquakes which are so common in Japan.

"I suppose you cannot show me one?" said the duke jestingly.

Immediately the house shook, the chandelier swayed backward and forward, the china and glass on the table rattled, and the door burst open.

"Why, Sir Edwin, you are a magician!" remarked the duke as the shock, which had happened at so curious a moment, subsided.

**CASTORIA.**

Bears the Signature of *Chas. H. Fletcher* The Kind You Have Always Bought

them. The fact was that he had once himself at an encounter of that kind received a ball in the shoulder.

"Then you disapprove of them simply because you were defeated?"

"Why, I was not defeated."

"What?"

"No; I was a second. You may well believe that I promised myself never to mix again in affairs of that sort. However, one day I had to accompany a friend on the field. He had asked it of me as a personal favor. I could not refuse. But I insisted upon one condition."

"What was that?"

"That I should climb a tree during the firing."

"A good scheme."

"You think so? Well, I was wounded again. My friend fired in the air!"

#### A Remarkable Epitaph.

A remarkable epitaph is on a tombstone in Brighton churchyard in England. It reads: "In memory of Phoebe Hessel, who was born at Stepney in the year 1713. She served for many years as a private soldier in the Fifth regiment of foot in different parts of Europe, and in the year 1745 fought under the command of the Duke of Cumberland at the battle of Fontenoy, where she received a bayonet wound in her arm. Her long life, which commenced in the time of Queen Anne, extended to the reign of George IV., by whose munificence she received comfort and support in her latter years. She died at Brighton, where she had long resided, Dec. 12, 1821, aged 108 years."

#### Atlantic Billows.

The authorities of the United States hydrographic bureau have endeavored to ascertain the size of the Atlantic waves. From careful observations they learn that in height the waves usually average about thirty feet, but in rough weather they attain from forty to forty-eight feet. In storms they are often from 500 to 600 feet long and continue to move about ten or eleven seconds, while the longest yet known measured half a mile and did not exhaust itself for twenty-three seconds.

Only part of the wheat berry is fit for food. Yet much that isn't often gets into flour. You cannot see it or taste it, but it's there. It is simply a case of the miller getting more flour from his wheat and your getting less nourishment.

## Royal Household Flour

is so milled that nothing goes into it except the part of the wheat that is food. You get just what you pay for—the best and purest flour made. It goes farther because it is all flour. Your grocer can supply you.

### Anatomy of an Oyster.

To discover the heart of an oyster the fold of flesh which oystermen call the "mantle" must be removed. This is fatal to the oyster, of course, but in the interest of science and for the benefit of the "cur" us it is occasionally done. When the mantle has been removed the heart, shaped like a crescent or horned moon, is laid to the view. The oyster's heart is made up of two parts, just like that of a human being, one of which receives the blood from the gills, and the other drives it out through the arteries. The liver is found in the immediate vicinity of the heart and stomach and is a queer, shaped little organ, which is supposed to perform all the functions of a blood filter. Every oyster has a mouth, a heart, a liver, a stomach and other necessary internal organs, including a set of cunningly devised intestines. The mouth is at the small end of the oyster's body, near the hinge of the shell. It is oval in shape, and, though not readily discovered by an unpracticed eye, it may be easily located by gently pushing a blunt bodkin or similar instrument along the folds of the surface of the body at the place mentioned. Connected with the mouth is the canal which the oyster uses in conveying food to the stomach, from whence it passes into the curious little set of netted and twisted intestines referred to.—Santa Fe

### Has the Wasp Affection?

A colony of wasps made a nest in the dark room of a studio last summer. At first the party who used the room did not relish their company, but for certain reasons he did not molest them. He paid no attention to the little buzzers, and they came and went at their own sweet will. After a time he began to study them and soon came to the conclusion that they were gradually becoming acquainted with him, his ways and his dark room. One day a stranger was seated on the window sill. The first wasp entering the room paid no attention to him, but made for the old crack in the wall. Then out came a big fat fellow who darted through the open window like a bullet. Within five minutes half a dozen wasps came with a rush at the stranger and two of them located him. But the writer has never been touched by his wasp colony.

### Raters, Sailabouts and Larks.

What is a rater, a sailabout, a lark, is a question commonly heard among those not familiar with yachts and technical racing terms. A rater is thirty-eight feet long and carries the double sails—sloop rig and jib. The half rater is thirty-two feet long, carries the same style sails as the rater and usually gets a five minute handicap in rater races. The sailabout carries a single large sail and is built on graceful lines, with rounded sides and ends, while the lark has square sides and ends and carries the single sail. Few larks are built now. Most of the yachts recently built have the double centerboard. The centerboard prevents drifting sideways, and the single board is often entirely out of water during heavy wind; hence the use of the double board.

### Ceylon Sharks.

Sharks infest the waters of Ceylon, and the pearl divers of that region are in deadly fear of these wolves of the deep. The divers are mostly Tamils and Moormen and display marvelous endurance and pluck. To protect themselves against the ever present danger to which the presence of the sharks exposes them the divers carry charms given them by recognized witch black-

### Measured the Time.

An old sailor was being examined in an assault case by a cute young lawyer, who questioned his veracity regarding a matter of time.

"You had no watch, and yet you are positive that the defendant was only ten minutes absent. I doubt if you are able to estimate ten minutes of time correctly," he said.

"Try me," said the old tar.

The lawyer drew his watch from his pocket and said, "When I call out 'Now' you allow ten minutes to pass, and when it is up call out 'Time's up.'"

The old salt nodded, and the lawyer called out "Now." Slowly the time passed, and the lawyer, with watch in hand, tried to wheedle him into an admission that time was up. The sailor paid no heed and exactly at the end of the ten minutes shouted, "Time's up." The bewildered lawyer turned round confused at the court's loud laughter, and his eye lighted on the courtroom clock behind him, which had assisted the oil sinner in his task.

### Rossini's Laziness.

Rossini was one of the most indolent of men and in his younger days used to do most of his composing in bed. Once he had almost completed a trio, when the sheet fell out of his hand and went under the bed. He could not reach it, and, rather than get up, he wrote another. The lazy man, if he works at all, does so by spurts, and Rossini, working against time, wrote "The Barber of Seville" in thirteen days. When Donizetti was told of this he remarked, "It is very possible. He is so lazy." The overture to the "Gazza Ladra" was written under curious circumstances. On the very day of the first performance of the opera not a note of the overture was written, and the manager, getting hold of Rossini, confined him in the upper loft of La Scala, setting four scene shifters on guard over him. These took the sheets as they were filled and threw them out of the windows to copyists beneath.

### Subjective Drowning.

The dentist's chair was tipped so far back that escape for the village seamstress, a lady of remarkable conversational ability, was impossible. Wads of absorbent cotton were tucked beneath her tongue, some patent appliance held her jaws apart, and all the lower half of her countenance except one back tooth was concealed under a decidedly damp rubber dam. The patient's mouth was full of water, speech was impossible, and the poor, naturally talkative lady was suffering agonies of discomfort.

The engrossed dentist paid no heed to her squirmings or to the appeal in her eyes. Fortunately, however, the patient's hands were free. Groping in the reticule that hung from her belt, she brought forth paper and pencil and wrote:

"Help! Help! I'm drowning."—Youth's Companion.

### A Poet's Curious Compliment.

It was the habit of Richard Henry Stoddard, the poet, to always speak well of every one. No matter how bad the character of a person, the good gray poet invariably found some trait to praise. One day in his office on Park row some friend entered and asked him whether he knew so and so and, if so, what was the man's reputation. It happened that the man had a shady reputation and was well known as a "gold brick" operator. The aged poet lighted his pipe and answered:

"Yes, I know him. He is the most energetic, progressive, irrepressible, good natured, artistic kind of an unmitigated rascal that I ever met."—

Domovod the Growth

posers then the divers carry charms given them by recognized "dark blinders" who receive a small government fee and a dozen oysters a day from each boat. Owing to the constant noise and splashing, the sharks are generally kept at a distance, and accidents are rare.

#### Famous King Og.

Og, the famous King of Bashan, mentioned in Deuteronomy, had a bedstead nine cubits long, or about sixteen and a half feet. It is doubtful whether Og himself was of the full length of his bedstead. Many bones of reputed giants have been found in different countries of the world, and un-informed people hastily concluded that the men to whom these bones were supposed to have belonged must have been from fifteen to thirty feet in height. All such remains have been proved to be those of the gigantic animals existing in a former era of the world's history.

#### The Study of Poetry.

Never before was there so much study of poetry and the drama. This is due to the modern extension of education and to the spread of reading matter among the masses. Poetry is not the fashion of an hour; it is an eternal need of the soul—a need that increases with the increase of intellectual light.—Edward Markham in Success Magazine.

#### Judicial Wit.

"Her Christian name is Handel," explained a witness at West Ham, "but she didn't like it and took up Annie instead."

"Most people," observed the magistrate, "prefer a handle to their names." Which, considered judicially, would appear a brilliant sally.—London Tribune.

#### Facial.

"Don't you think her face rather too thin?"

"Well, I don't know. I can't see any place where it's worn through. Can you?"

The river Orinoco has more tributaries than any other river. The total number is put at 2,500, including 430 large streams.

#### Save the Life of Columbus

When Christopher Columbus was in Jamaica he would have died but for the herbal medicines the native brought him. There is no doubt that aboriginal tribes know more of the medicinal virtues of herbs and roots than is sometimes conceded. When Captain Cook discovered Australia he was amazed by the freedom from disease which the natives enjoyed in consequence of using certain roots and herbs as medicines. It was in this country that the herbal remedy Bileans was first produced. Their use spread as their value was made more known, till to-day all over the globe. Bileans are a household remedy.

Miss E. Reed, of Kingston, (Ont), says: "I suffered terribly with acute indigestion all last winter. Pain followed all food, with wind spasms, rifting, etc. My sleep at night was fitful and broken and my strength failed. Bileans were introduced to me, and I found relief from their use within a very short time. They have now cured me." Bileans cure constipation without causing griping, cure piles, biliousness, indigestion, sick headache, etc., and give strength and energy to run-down systems. All druggists sell at fifty cents a box, or post free from the Bilean Co., Toronto, on receipt of price.

good natured, artistic kind of an unmitigated rascal that I ever met."—Leslie's Weekly.

#### Cold Storage in Irish Bogs.

For long it puzzled me to know what the poachers did with the birds they shot in July. There is no cold storage in the north of Ireland, but they have discovered an excellent substitute. The birds are buried four or five feet deep in dry peat, and, I am told, come out perfectly fresh at the end of two or three weeks. When one remembers the bog butter dug out of the peat bogs in a comparatively fresh state after being buried for probably 200 or 300 years, it is not difficult to believe that grouse might keep, under the same circumstances, for two or three weeks.—Letter in Country Life.

#### The Tact Market.

Chancellor James R. Day was once advising a young undergraduate of Syracuse university to cultivate tact. "But, alas," he said, "I fear that advice on such a subject must always be wasted. On tact the last word was spoken by Barbey d'Aureville when he said:

"If tact could be bought, only those already possessed of it would want to buy it."

#### Making New Rubber Plants.

From a rubber plant which is growing in a living room, the best way to get plants is by scoring the bark of the limb where you want the roots to grow and covering the injury with sphagnum moss, which must always be kept damp. Roots will soon permeate the moss, when the limb should be cut off and potted.—Garden Magazine.

#### Kept Her Word.

"This," said the school friend who had not seen her for a year, "this is the girl who vowed to me that she never would belong to any man, eh?"

"I don't," said she who had been married the matter of some few months or so. "He belongs to me."

#### Women as Travelers.

As a matter of genuine fact women, in nine cases out of ten, are better travelers than men are. To begin with, if not so stodgily accurate, although that by no manner of means follows, they are more fluent in modern languages. They chatter in them, say the male things. Ergo, they are the more colloquial, the reader to circumvent the wiles and extortions of kellner or of garcon.—London Gentlewoman.

#### A Good Dog.

"What kind of a dog is that?" asked the inquisitive man.

"I dunno jes' what kind of a dog he is," answered Mr. Erastus Pinkley, "but he's got good stock in 'im. Dat dog is so many kinds of dog dat dar's got to be good dog somewhere."

#### The Truth.

A teacher in explaining the different kinds of sentences to her class, asked what it would be if she said, "I am looking for a man."

"I don't know," said the boy at the foot of the class, "but I think it would be the truth."

#### Looking Backward.

Do you ever look back over your ears and think how many times you have made a fool of yourself? We do.—Mancos Times-Tribune.

Builders Hardware of every conceivable kind. Rathbun's Star Brand of Portland Cement, it pays to buy the best.

MADOLE & WILSON

# Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

#### Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

WHAT

# Fruit-a-tives

OR "FRUIT LIVER TABLETS"

ARE

Fruit-a-tives are the marvels of modern medicine. They have accomplished more actual cures—done more good to more people—than any other medicine ever introduced in Canada for the time they have been on sale.

Fruit-a-tives are fruit juices. They are nature's cure for

- CONSTIPATION
- BILIOUSNESS
- BAD STOMACH
- DYSPEPSIA
- HEADACHES
- IMPURE BLOOD
- SKIN DISEASES
- KIDNEY TROUBLE
- RHEUMATISM
- IRRITATED HEART

Fruit-a-tives are the juices of apples, oranges, figs and prunes. These juices are concentrated—and by a secret process, the juices are combined in a peculiar manner. This new combination is much more active medicinally than fresh juices—yet so perfect is the union that Fruit-a-tives act on the system as if they were in truth a natural fruit, medicinally stronger than any other known fruit.

To this combination of fruit juices, tonics and internal antiseptics are added, and the whole made into tablets.

These are Fruit-a-tives—sold everywhere for 50c a box or 6 boxes for \$2.50.

FRUIT-A-TIVES LIMITED - OTTAWA.

## VIBRATION.

Designs in Sand Formed by the Production of Sounds.

Did you ever hear that you can make drawings by sound, or, rather, that the sound vibrations will cause designs to be made with the proper implements at hand? Here is the way to do it:

At a hardware store get a piece of sheet brass one-eighth of an inch thick and six inches square. The sheet should be perfectly flat, or if it is not it should be hammered so and the edges rounded off. In the center of the sheet cut a hole three-sixteenths of an inch in diameter. If the sheet has been hammered it must now be heated in a red-hot stove and cooled slowly.

Now cut a six inch piece from a broom handle and fix one end of it firmly in a block of wood. The other end you must nail off and screw the plate of brass on it.

If you draw a violin bow over the edge of the brass plate a tone will be sounded. Practice this until the tone is quite clear and strong. Now sprinkle some sand on the plate, and the grains will dance about while the note is sounded, showing that the plate is in vibration.

Now put your finger on the edge of the plate in the middle of one side. At the corner of the side at an angle of forty-five degrees draw the bow, and the sand will form in two lines at right angles, starting from your finger. This is because the plate now vibrates in parts, one part moving up, while the other moves down, and the lines between these parts have no motion. Therefore the sand settles in them.

By drawing the bow at regular distances from the finger or by touching the plate in more than one place at a time while some one else draws the

one of glass six or eight inches square, and its sharp edges you may smooth down with a file moistened with turpentine.

To prove to yourself that the plate is still or almost so at the sand lines make a cardboard cone about ten inches long, two and a half inches in diameter at its larger end and small enough at the other end to fit into a rubber tube, which should be about two feet long. Let one person cause the plate to vibrate, while another holds the large end of the cone over the plate, applying the rubber tube to the ear. When the middle of the cone is exactly over a sand line scarcely any tone at all will be heard, and the nearer the cone is to the sand line the weaker the sound will be, while it will be clear and strong at the farthest points from the sand lines, proving that the sand falls into lines, and as the parts of the plate move in opposite directions on each side of the sand lines their effect is equalized or destroyed, causing no sound in the air in the cone balance when directly over those lines.

## The Power of Intuition.

"The power of intuition usually spoken of as being so mysterious is really not so at all," said a woman recently. "It is merely the ordinary method of reasoning from observation intensified. The so called intuitional person differs from the one of more commonplace powers in possessing a keener sensitiveness to facts. She or he; for it is absurd to assert that this power is exclusively feminine, observes a thousand things that persons of duller sense fail to see and that are beyond the control of the most skillful actor."

## An Extraordinary Forest.

The most extraordinary forest in the world was discovered by Dr. Welwitsch and occupies a tableland some six miles in width near the west coast of Africa. The peculiarity of the trees is that, though their trunks are as much as four feet in diameter, they attain the height of only a foot. No tree bears more than two leaves, and these attain a length of six and a breadth of two feet.

## Not What He Seemed.

Romance has flung a deceptive halo over the old yeoman farmer. He was certainly not a good tiller of the soil, but lazy, old fashioned and unenterprising. No houses were so much in need of repair, no gardens so ill kept, no fields so overgrown with weeds, as those of the small proprietor of the eighteenth century.—London Country Life.

## Neighborly.

She—I have not seen you for an age, Herr Doctor, notwithstanding that we live only a few streets apart here in Berlin. I learned with much regret that you've been ill. Herr Doctor—Who told you that? She—My brother wrote me from India.

Speaking of the irony of fate, why is it that a man's friends sometimes forget him, but his enemies never?—Terrell (Tex.) Transcript.

# FITS CURED

# WHO SHE WAS

## SKETCH OF THE LIFE OF LYDIA E. PINKHAM

### And a True Story of How the Vegetable Compound Had Its Birth and How the "Panic of '73" Caused it to be Offered for Public Sale in Drug Stores.

This remarkable woman, whose maiden name was Estes, was born in Lynn, Mass., February 9th, 1819, coming from a good old Quaker family. For some years she taught school, and became known as a woman of an alert

their mother, combined forces to restore the family fortune. They argued that the medicine which was so good for their woman friends and neighbors was equally good for the women of the whole world.

The Pinkhams had no money, and little credit. Their first laboratory was the kitchen, where roots and herbs were steeped on the stove, gradually filling a gross of bottles. Then came the question of selling it, for always before they had given it away freely. They hired a job printer to run off some pamphlets setting forth the merits of the medicine, now called Lydia E. Pinkham's Vegetable Compound, and these were distributed by the Pinkham sons in Boston, New York, and Brooklyn.

The wonderful curative properties of the medicine were, to a great extent, self-advertising, for whoever used it recommended it to others, and the demand gradually increased.

In 1877, by combined efforts the family had saved enough money to commence newspaper advertising and from that time the growth and success of the enterprise were assured, until to-day Lydia E. Pinkham and her Vegetable Compound have become household words everywhere, and many tons of roots and herbs are used annually in its manufacture.

Lydia E. Pinkham herself did not live to see the great success of this work. She passed to her reward years ago, but not till she had provided means for continuing her work as effectively as she could have done it herself.

During her long and eventful experience she was ever methodical in her work and she was always careful to preserve a record of every case that came to her attention. The case of every sick woman who applied to her for advice—and there were thousands—received careful study and the details, including symptoms, treatment and results were recorded for future reference, and to-day these records, together with hundreds of thousands made since, are available to sick women the world over, and represent a vast collaboration of information regarding the treatment of woman's ills, which for authenticity and accuracy can hardly be equaled in any library in the world.

With Lydia E. Pinkham worked her daughter-in-law, the present Mrs. Pinkham. She was carefully instructed in all her hard-won knowledge, and for years she assisted her in her vast correspondence.

To her hands naturally fell the direction of the work when its originator passed away. For nearly twenty-five years she has continued it, and nothing in the work shows when the first Lydia E. Pinkham dropped her pen, and the present Mrs. Pinkham, now the mother of a large family, took it up. With woman assistants, some as capable as herself, the present Mrs. Pinkham continues this great work, and probably from the office of no other person have so many women been advised how to regain health. Sick women, this advice is "Yours for Health" freely given if you

and investigating mind, an earnest seeker after knowledge, and above all, possessed of a wonderfully sympathetic nature.

In 1843 she married Isaac Pinkham, a builder and real estate operator, and their early married life was marked by prosperity and happiness. They had four children, three sons and a daughter.

In those good old fashioned days it was common for mothers to make their own home medicines from roots and herbs, nature's own remedies—calling in a physician only in specially urgent cases. By tradition and experience many of them gained a wonderful knowledge of the curative properties of the various roots and herbs.

Mrs. Pinkham took a great interest in the study of roots and herbs, their characteristics and power over disease. She maintained that just as nature so bountifully provides in the harvest-fields and orchards vegetable foods of all kinds; so, if we but take the pains to find them, in the roots and herbs of the field there are remedies expressly designed to cure the various ills and weaknesses of the body, and it was her pleasure to search these out, and prepare simple and effective medicines for her own family and friends.

Chief of these was a rare combination of the choicest medicinal roots and herbs found best adapted for the cure of the ills and weaknesses peculiar to the female sex, and Lydia E. Pinkham's friends and neighbors learned that her compound relieved and cured and it became quite popular among them.

All this so far was done freely, without money and without price as a labor of love.

But in 1873 the financial crisis struck Lynn. Its length and severity were too much for the large real estate interests of the Pinkham family, as this class of business suffered most from fearful depression, so when the Centennial year dawned it found their property swept

the plate in more than one place at a time while some one else draws the bow a variety of sand figures will be made.

If you will mix a little lycopodium powder with the sand when the plate vibrates it will form curious little heaps and whirlpools, which add to the moving effect of the designs.

Instead of a brass plate you may use

Daily. All other trains run daily. Sundays excepted.

WALTER RATHBUN, President.  
H. B. SHERWOOD, Superintendent.  
D. A. VALLEAU, Asst. Superintendent.

of the Pinkham family, as this class of business suffered most from fearful depression, so when the Centennial year dawned it found their property swept away. Some other source of income had to be found.

At this point Lydia E. Pinkham's Vegetable Compound was made known to the world.

The three sons and the daughter, with

once or no other person have so many women been advised how to regain health. Sick women, this advice is "Yours for Health" freely given if you only write to ask for it.

Such is the history of Lydia E. Pinkham's Vegetable Compound: made from simple roots and herbs; the one great medicine for women's ailments, and the fitting monument to the noble woman whose name it bears.

**Ignorant of Legal Terms.**  
Tarantula Tom—Why did Bill plug the tenderfoot?  
Lava Bed Pete—It all come o' Bill's distressin' ignorance o' legal terms.  
T. T.—How 'uz that?  
L. B. P.—Well, Bill owed the short-horn some money an' was sorter slow about payin'. So the stranger writ him a letter sayin', "I will draw on you at sight." An' Bill thought that meant a gun play, so when he meets up with the stranger he draws first. It was a misunderstanding.

**How Sponges are Propagated.**  
There are a great many things which the scientists of today are not able to explain and a great many others over which they have frequent discussions owing to a difference of opinion. The method by which sponges are propagated when left to themselves is one of these mooted scientific questions. Some declare that they are reproduced from true eggs; others are equally positive that they are propagated from buds.

**Your Heart.**  
The heart of man resembles a secret chamber wherein stands, like the block of white unwhewn marble set in the studio of a sculptor, a veiled figure. Though the man may not so much as lift the corner of the veil, yet must he forever and in secret work to fashion and to form the figure that lies beneath.

Many a man who thinks he was born to command marries a woman who was born to countermand.

**HIS WIFE'S LUNGS BOTH AFFECTED**

**But the Great Consumptive Preventative brought Health and Happiness to his Home**

"Our doctor said there was no cure for my wife as both her lungs were affected," says Mr. L. H. Walter, of Pearl Street, Brockville, Ont. "It was a sad disappointment to us both, just starting out in life, only married a short time. But before she had finished the first bottle of Psychine the pain in her lungs quickly went away, and after taking six bottles Mrs. Walter was a new creature and perfectly well again."

That is just one of the many families into which Psychine has brought hope, health and happiness. It is a living proof that Psychine cures Consumption. But don't wait for Consumption. Cure your LaGrippe, your Cough, your Bronchitis, your Catarrh, or your Pneumonia with the remedy that never fails—

**PSYCHINE**  
(Pronounced Si-keen)

**50c. Per Bottle**

Larger sizes \$1 and \$2—all druggists.

**DR. T. A. SLOCUM, Limited, Toronto.**

**Bernhardt and Dumas.**  
Sarah Bernhardt had just been elected a life member of the Comedie Francaise. When she found that she had a paper to sign she became nervous and went to see the younger Dumas to tell him that she shrank from the binding terms of the engagement. Dumas' advice was unhesitating. "My dear child, don't sign; your hair is too curly. People with hair like that"—and he passed his fingers through his own crisp waves—"ought never to sign contracts for life. The temperament is too intractable."

Sarah Bernhardt, however, signed, and, meeting Dumas again next day, confessed she had done so. "That's all right," remarked Dumas cheerfully. "I have won 500 francs (\$1000). I bet Mme. Dumas that amount after you left yesterday that you would at once go and sign the agreement. Well, I shall buy you something with the money."

The next day Mme. Bernhardt received a magnificent wig of fair hair, absolutely flat, lank and straight. With it came the following sentence on a slip of paper: "Now that you are really one of the house wear this. You will need it."

**Elixir of Youth.**  
In former times elder flowers were treasured not only by lovers of helgarrow beauty but by those who desired to preserve their own beauty and youth. According to the seventeenth century prescription the elder flowers were to be gathered on midsummer day, powdered and put into borage water, which was to be drunk daily for a month, the first thing in the morning and the last thing at night. This was a much prized elixir of youth. By common consent there has always been something supernatural about the elder tree. In Denmark it is protected by the elder mother, without whose leave it is dangerous to pluck the flower. In Germany the hat should be taken off to it. And in England it has been variously considered the tree of the cross and the tree upon which Judas hanged himself, to be treated with reverence or fear accordingly.—London Chronicle.

**Written on a Slate.**  
General Lew Wallace wrote the first rough draft of "Ben-Hur" on a slate, giving as his reason that erasures could more readily be made. After satisfying himself with a sentence written in this way he would, with a soft pencil, transfer the writing to paper, and finally, when everything pleased him, he copied the entire manuscript in ink with the precision of an engrossing clerk. It is declared by those who were personally acquainted with General Wallace that "Ben-Hur" was written and rewritten at least thirty times, and that when the final copy was sent to the publishers there was neither a correction nor an erasure throughout the manuscript. The printer set up the copy exactly as it was written, and the author himself never corrected a proof before the book was sent to press.

**Refrigerators and Hammocks.**  
There is a lot of warm weather yet before us and it will pay you to improve this offer.

**MADOLE & WILSON**

#### Lizards' Tails.

Certain lizards are remarkable for the fragility of their tails, although this weakness is not always the drawback that may be imagined. The diamond tailed gecko, for instance, frequently owes its existence to the readiness with which its caudal appendage can be snapped off. This reptile, which will perch upon a rock head downward and fall in the air, is liable to be preyed upon by hawks. One of these formidable birds will swoop down upon a lizard and seize what it takes to be the head, but is really the tail. The brittle tail snaps off, and the gecko wriggles away, not much the worse, to grow another.

#### Precise, but Acid.

The women with thin lips and raspy voice stepped up before the languidly indifferent ticket seller in the railway station.

"Where do you want to go?" he asked as his jeweled fingers riffled a bunch of pasteboards.

"None of your business where I want to go!" she snapped. "Just you sell me a ticket to New York, but bear in mind that I'm going there because I've got to; not because I want to."

#### The Caloric Paradox.

Freezing is usually associated with cold, but water can be frozen on a red-hot plate. This pretty experiment has rightly been called the caloric paradox. If a drop of water is placed on a redhot or white hot metal plate it does not suddenly flash into steam under the influence of the great heat. It does not even boil. It simply evaporates quietly and slowly as it rolls about the plate. Now, suppose that the drop on the plate is a volatile liquid like sulphurous acid. It will evaporate, and this evaporation will produce cold. Let a drop of water fall in the sulphurous acid drop, and it will be frozen in spite of the heat. M. Bouigny thus froze water on a white hot platinum capsule. Faraday carried this remarkable experiment even further. Pouring some ether and solidified carbonic acid gas on a redhot platinum capsule, he formed a spheroidal mass which evaporated very slowly. He then brought some mercury into contact with it, and this was instantly frozen. Now, mercury requires a temperature of 40 degrees below zero to solidify it, and here it was frozen on redhot platinum.

#### A Restless Patch of Earth.

There is, near to the Thüringen summer resort, Traunsee, a curious and locally celebrated phenomenon—namely, the floating island which disports itself at will, now at this and now on that side of the Hautesee, a small and charmingly situated lake. The little island also has its own flora, varying from that on the immediately adjacent mainland, among which may be mentioned the "meat consuming" *Drosera rotundifolia*, whose flowers and edible berries grow here in rank profusion and slender birches cast their shade over those who care to land and investigate this restless little patch of earth. Birds are especially partial to this spot, wild ducks and other aquatic birds breeding here in great numbers. But the great event of the year is the "Volksfest" held upon the island every Ascension day, when dancing and "bratwurst eating," washed down by the obligatory beer, is the order of the day.—Fall Mail Gazette.

#### They Joined Hands.

Mr. Rhodes once told a circle of friends after dinner the story of his first meeting with Beit. "I called at Poges' late one evening," he said, "and

#### CENTREVILLE.

We are having a little too much rain at present.

Threshing is about completed for this season.

The Potato crop was an excellent one in this part.

Apple picking and corn husking is now the order of the day.

F. C. Gerow has purchased the Vandewater property.

The G. N. R. Surveyors are expected here again this week.

O'Connor and McGill are about to have a Telephone placed in their office here.

John Milsap suffering from an attack of Bronchitis is recovering, but slowly.

Geo. McFarlane is now finishing his work-shop

E. F. Hinch has gone to Toronto to attend College there.

Mr. A. McMullen is erecting a new dwelling.

Visitors: Mrs. M. Donovan, Forest Mills; Mr. John Kidd and Mrs. O. Ingoldsby, Erinville, Mr. W. Asseltine and Miss Asseltine, Napanee.

A great offer—The Napanee Express from now until January 1908 for \$1.00. Send your order early.

#### ENTERPRISE.

The cold chilly winds make us think that winter is coming slowly but surely.

Threshing is about done around here. The yield of grain was very gratifying to farmers for their hard labor.

Our merchants have got in a full and beautiful stock of fall goods. All the latest and best material.

Mrs. M. McKoen spent Sunday the guest of her daughter, Mrs. John Dillon, Carmanville.

School was closed on Thursday the 18 inst, much to the joy of the children who anticipated a pleasant holiday.

We are sorry to say that Mrs. Jas. Scantlin who has been sick for the past four weeks is not improving very much. We hope to see her able to go about as usual in the near future.

We are glad to say that the Diphtheria which appeared here, has passed away without an fatal results and hope it may not appear soon again.

Mr. John Carroll takes possession of the Hamilton House on the 22nd inst, which he purchased. We wish him every success.

Moving is the order of the day.

Mr. P. Whalen has moved his family to P. Donohue's house and Mr. and Mrs. Hamilton are taking up their residence in the beautiful brick house lately occupied by Mr. P. Whalen.

A good offer—The Napanee Express from now until January 1908 for \$1.00. Send your order early.

#### NEWBURGH.

Miss Florence Thompson, Albert College, Belleville, is spending a week the guest of her friend, Miss Ella Chant.

Mrs. E. J. Madden and Mrs. Rev. Mears are spending a few days in Toronto, this week.

Mr. Percy Madden is home from the North-West.

The E. L. Convention, of Newburgh was largely attended, delegates from the surrounding places were in attendance. There were three sessions, morning, afternoon and evening.

Mrs. Cook and Mrs. Hughes, of Marlbank, attended the E. L. Convention Wednesday.

Mr. and Mrs. James Boyce spent Sunday the guests of his sister Mrs. Dennis Boyce, Belleville.

The foot-ball match Thanksgiving day between teams of high school and town, resulted in victory for the high school 1-0.

#### FOUND RELIEF BY TAKING

#### PE-RU-NA

MRS. ANNA MUNDEN

There can be no doubt about it that the tendency to resort to surgical operations has been too great in the past and that this harmful tendency is growing less every day.

Experience has demonstrated that many ailments which seemed to require surgical operations in the past are now being cured by the use of harmless remedies. Peruna has done as much as any other remedy to establish this very important fact.

Thousands of people have been condemned to undergo surgical operations.

Their physicians have told them that they must either submit to such operations or lose their lives.

After this they have resorted to Peruna and found relief.

Other good remedies have accomplished the same result, but it is safe to assume that no other remedy has equalled Peruna in its beneficent work.

Many of the alleged incurable arrangements of the pelvis are dependent upon catarrh.

There is no cure for these except the removal of the catarrh.

Peruna seemingly works miracles in some of these cases. The explanation, however, is very simple. Peruna removes the catarrh and Nature does the rest.

#### SURGICAL OPERATIONS AVOIDED.

**Suffered Thirteen Years With  
Pelvic Troubles. Unable  
to Find Relief.**

**AN OPERATION ADVOCATED.**

**Pe-ru-na, Taken as a Last  
Resort, Brings Health  
and Strength.**

**ANNA MUNDEN, Brinkley, Ark., writes:**

"I suffered with female troubles for thirteen years, and tried the best doctors in Louisville, Ky., without relief.

"I spent thousands of dollars at the Springs.

"The doctors desired that I have an operation performed to remove my ovaries, which I would not consent to.

"I saw an advertisement of your Peruna and bought one bottle and before I had taken it all I could get out of bed and walk about.

"After taking three bottles I was as well and hearty as ever.

"I gained in flesh. From 118 I increased to 136 pounds.

"If it had not been for your great and wonderful medicine, I would now be in my grave.

"I would advise all women sufferers to try it.

"I would not be without it for the world."

**A WOMAN'S LETTER TO WOMEN.**

Mrs. Caroline Kramer, Fort Collins, Col., writes:

"The majority of women who are suffering from disordered periods and other troubles, have such strong faith in doctors that they allow them to experiment on them for kidney, liver, or stomach troubles, until they become discouraged and their money is gone.

"This was my unfortunate experience for nearly two years, when my attention was called to Peruna.

"I hardly dared believe that at last I had found the right medicine, but as I kept on using it and was finally cured I could only thank God and take courage.

"I have had most satisfying results from the use of your medicine and have advised dozens of women who were suffering with woman's ills to use Peruna and let the doctors alone, and those who have followed my advice are better to-day and many are fully restored to health."

**SATISFACTORY  
RESULTS FROM  
PE-RU-NA.**

#### Two Sides of a Word.

Miss Sharpe—I've paid this bill once. Baker—Indeed, ma'am, I'm very sorry that I didn't recollect it. Miss Sharpe—I dare say that you are sorry that you didn't re-collect it, but I'll take care of that.

#### The Good One.

"There is but one good wife in this town," said a clergyman in the course of his sermon—the congregation looked expectant—"and every married man thinks he's got her," added the minister.

### They Joined Hands.

Mr. Rhodes once told a circle of friends after dinner the story of his first meeting with Beit. "I called at Pogges' late one evening," he said, "and there was Beit working away as usual. 'Do you never take a rest?' I asked. 'Not often,' he replied. 'Well, what's your game?' said I. 'I am going to control the whole diamond output before I am much older,' he answered as he got off his stool. 'That's funny,' I said. 'I have made up my mind to do the same. We had better join hands.'" Join hands they did. Unlike Alfred Beit, Cecil Rhodes had small patience with arithmetical details. Once this characteristic involved him in a difficulty. Pitching a balance sheet into the pile of papers before Beit, he exclaimed desperately, "Here, you understand things. For heaven's sake tell me how I stand."

### Butterflies That Live on Fish.

The butterfly was blue and transparent. As through blue glass its tiny heart could be seen beating inside its body, and the professor read a newspaper article through its lovely blue wings. "This," he said, "is the pteropoda, a Mediterranean butterfly. It eats fish. On its tongue are rows of pointed hooks. They serve as teeth. This beautiful creature would turn up its nose at a garden of roses and lilies, but it would feast ecstatically upon a putrid eel. Now and then a pteropoda is found on the Florida or the California coast. It is only abundant, though, in the Mediterranean."

### Clearing Sale.

In order to clear out the following lines at the close of the season, we will offer at cost for cash during August and September, our entire stock of gas stoves, gasoline stoves.

MADOLE & WILSON

Sunday the guests of his sister Mrs. Dennis Boyce, Belleville.

The foot-ball match Thanksgiving Day between teams of high school and town, resulted in victory for the high school 1-0.

The Public Library concert in Fink's Hall, on the evening of Friday, November 2nd, promises to be the event of the season. An extraordinary programme is being prepared, and any one who wish a good seat will have to secure it early.

A Great Offer—The Napanee Express from now until January, 1908, for \$1.00. Send your order early.

### BATH.

Mr. and Mrs. M. B. Judson, Brockville, are visiting at P. C. Purvis.

Dr. C. C. Nash and Dr. H. Anderson spent Thanksgiving with friends at Lyn.

Rev. Mr. Farnsworth, Yarker, preached a missionary sermon in the Methodist church here on Sunday last, Rev. Mr. Sexsmith being in Yarker that day.

After a little delay in bringing the safe here, also making necessary alterations in the building, the Crown Bank is ready for business. It opens here on Friday of this week with Mr. Fraser, Brockville, as Manager.

Frank Wiskin, Gananoque, spent Thanksgiving with E. P. Sheppard.

George Irish and wife, Kingston, are visiting at Abraham Irish's.

A great offer—The Napanee Express from now until January 1908 for \$1.00. Send your order early.

John Nobes of Kingston and Bruce McKinnon of Port Burwell, Quebec, were drowned by falling off scows.

### Sporting Goods.

Guns, Rifles, Loaded Shells, Cartridges, Wads, Reloading tools, Fishing Tackle, Trauls, &c.

MADOLE & WILSON

and mosquitoes have carried their cargo of microbes to more congenial markets.

### Golf and the Liver.

Golf is the greatest of all games. It is the only recreation that is at one and the same time health giving and a complete preoccupation without being unduly physically exhaustive. But I am profoundly convinced that it is far better for a man's liver that he should play a poor game than a good one. I know from personal experience that it is far better for the liver to play a really bad game. Nothing stirs up the liver like the irritation, the excitements and the paroxysms of a really bad game.—London Graphic.

### Rough Skin and Chapped Hands

#### ZAM-BUK IS THE THING

The first few months of the Canadian fall season find many ladies with rough red skin on either hands or face, or both. Delicate skins are roughened by the cold, and hands chafed, smart and bleed. That is where Zam-Buk comes in so effectively. Zam-Buk is a skin food. It heals chaps, it smoothens rough skin, but it does more—it stimulates the skin, so that the roughness does not recur. How can a woman follow her housework with sore or chapped hands? Zam-Buk will solve the problem—cure the hands. Purely herbal, Zam-Buk is nature's own balm. Cures skin diseases of all kinds—eczema, ulcers, abscesses. Itch, barber's rash, eruptions, scalp sores, ringworm, bad leg, stiffness, rheumatism etc. Also good for cuts, burns, bruises, and everyday injuries. All druggists sell it at 50c box, or post free from the Zam-Buk Co., Toronto, upon the receipt of price (6 boxes for \$2.50). Send one cent stamp for dainty sample box.

# ANKLE REDUCING

"ONE OF THE 14"

A DOLLY VARDEN ANKLE

Some athletes have clumsy figures while others enjoy the graceful lines of a Sandow.

Some feminine ankles are swollen and bulky while others are as slender as a fawn's.

Whether clumsy or graceful, bulky or slender the method of training is the cause.

The ankles are completely surrounded by muscles. If these muscles are constantly strained and stretched by the feet wobbling about on unskillfully built shoe foundations, bulky ankles cannot fail to ensue.

Dolly Vardens reduce bulky ankles and preserve slender ones. Why?

Because of their Free Flat Tread, which allows the feet to rest free and flat on the sole. This prevents bending and bowing of the ankles and the consequent stretching of the ankle muscles.

Because of their newly devised steel arch support, which holds up the arch and relieves the vertical ankle muscles from the tension occasioned by falling arch.

Because of their Dead Level Ball and Heel Balance which throws the ankles into their natural vertical position.

Because they hold the foot and ankle firmly at every point in a corset-like grip.

The Dolly Varden Agent in your city will be pleased to show you Ankle Reducing Dolly Vardens. Purchasers or Investigators equally welcome. In the States and Canada at the same price—\$3.50 and \$4.00. Every Pair Goodyear Welted. (To be continued.)

# THE BROKEN FAMILY CIRCLE

## Parents Should Not Deal Unjustly With Their Own Family

And Esau hated Jacob because of the blessing wherewith his father blessed him, etc., etc.—Genesis, xxvii., 41-45.

The family is the oldest institution in the world and existed before either the Church or the State. It is founded in nature and a divine institution. Within the family circle the noblest virtues are the cultivated—helpfulness, patience, forgiveness, gentleness, sympathy, brotherly love, the fear of God, true religion; indeed, all that Christianity implies.

A true family is a paradise, an Eden, a heaven on earth. It is the duty of married men and women to so live that their homes may be to them like heaven. We ought to watch night and day to keep Satan out of the household, for if ever he gets his head in he will never be content until his whole body is in.

As there is no more charming picture than a true home, so there is no sadder and darker picture than the broken family circle. We have such a home in the text and no real excuse existed for it. Jacob was a farmer, a cattleman, a herdsman, a rancher.

### HE WAS A MAN OF CHARACTER

and had faith enough to leave his home when he heard the voice of God. He was a man of great prosperity and possessed flocks of sheep, cattle, goats and camels. Yet these did not contribute to his happiness and peace of mind. There was discord, and so a broken family circle. The brothers were jealous of one another and the father and mother were distracted and heartbroken.

The same was true of the family of Saul. He was called from the farm to the throne and had a fine chance, but missed it. His spirit became dark. He grew jealous and threw a javelin at the head of his son-in-law. All this was unkindly, and the family circle was broken.

One of the things that breaks the family circle is jealousy. It was jealousy, largely, that broke the family circle of Jacob. Parents should watch for

the developing characteristics and study the temperaments of their children in order to allay jealousy.

Injustice is another cause. Parents are often unwise in the treatment of their children. Men who pride themselves on being just to their neighbors ought to be just also to their children, for if they deal unjustly with their own family they may look to see the family circle broken.

Still another cause is favoritism, either on the part of the father or the mother. Often there is too much made of one child at the expense of another. Favoritism has broken up many a fine family, for the last thing in the world love can stand is to be slighted.

Divorce is one of the great sins of our times and the cause of many broken family circles. We need a league of all good people for the

### PROTECTION OF THE FAMILY.

Parents should be impartial and strictly just in their dealings with children. God expects this, and unless parents are just they must look to see the family circle broken up. Much should be made of the home. There should be proper amusements for the children; an abundance of good papers, books and magazines, and friends welcomed to the home circle. Home life should be made pleasant, cheerful and bright. When this is done there will be little danger of broken family circles.

In the home religion should be put into practice and family life hallowed by prayer. The Word of God should be honored and the name of Jesus Christ exalted. When children are taught to love and honor God they will be quite sure to love and honor their parents and the family circle will remain unbroken.

May the great God help us to keep our homes sweet and pure, and finally gather us into the greater family circle in the Father's house above!

REV. DAVID G. WYLIE, D. D.

# THE S. S. LESSON

## INTERNATIONAL LESSON.

OCT. 28.

### Lesson IV. Jesus Anointed in Bethany.

Golden Text: Matt. 26. 10.

### THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Chronological Sequence of Events.—In point of chronological sequence our last lesson narrative is out of its proper place in the record of Matthew, as is also the case in the narrative of Mark. The anointing of Jesus by Mary in Bethany really occurred on the evening preceding the triumphal entry. In John's gospel the event is given its proper setting (John 11. 55-12. 11). Matthew and Mark seemed to be concerned more with showing the connection of the treachery of Judas with the event than to observe the exact chronological order in their narratives. The supper in the house of Simon occurred on the evening of Saturday, after the close of the Jewish Sabbath, at sundown, and hence, according to the Jewish reckoning, during the early hours of the day on which the triumphal entry occurred (Nisan 2) and which ended Sunday evening at sundown.

Thirty pieces of silver—Thirty silver shekels, worth about four denarii, or seventy cents each; and hence worth together about twenty-one dollars. We must again remember, however, that the purchasing value of this sum was much greater then than now, being equivalent to about one hundred and twenty dollars. The sum paid to Judas for the betrayal of Jesus was the market price of a common slave.

16. From that time he sought opportunity—A convenient place and time to betray him secretly and to deliver him unto them.

## GROWTH OF OCEAN LINERS

### DEVELOPMENT OF THE ATLANTIC GREYHOUNDS.

### How the Great Time Devourers Have Reached the Present Point of Perfection.

It is interesting to recall the steps by which the steamers of the Cunard line have risen, for the experience of the line is very much like a synopsis of the history of steam navigation. It began in 1840 with the Britannia of 1,050 tons (built by Robert Duncan, Port Glasgow), and not till 1852 was the 2,000

# NEW ELECTRICAL HOME

## MAKES HOUSEKEEPING A JOY AND PLEASURE.

A Wealthy Man of Schenectady, N. Y., Has the Most Complete Outfit in His House.

Time, 7 a.m. The electrical awakening alarm over Katie's bed goes off, and she opens her eyes languidly. But, with a sudden realization that the master's breakfast must be ready in half an hour, she becomes more awake, and, reaching one hand from the bed, she touches a button embedded in the wall nearby. This button is marked "Tea Kettle." Then Katie touches in succession other buttons, labelled "Porridge," "Oven," and "Bath."

Leisurely she arises, dons her clothing, and goes downstairs. In the kitchen the tea kettle is boiling merrily, the porridge is steaming away in its receptacle, and as she opens the oven the blast of heat indicates that all is ready for placing the breakfast rolls, made the night before, in the oven for quick baking.

Upstairs the master can be heard splashing in his morning bath, which has been heated to just the right temperature. In a few minutes another maid comes downstairs, sets the table, and promptly at 7.30, when the master appears in the dining room, breakfast is set upon the table, prepared to perfection.

Who did it? Katie was the "first one up" in all the house. Then who started the kettle boiling? Who turned on the fire under the porridge steamer? Who got the oven ready? One extra servant, an unpaid, unfed servant, who never sleeps, but is always at the call of anyone who will touch the button. And the servant's name is Electricity!

The house is the Electric House. It is no fancy dwelling, for with the "advance" in electricity is has become quite possible. Indeed, one such residence already exists and is quite successful. A Mr. H. W. Hillman, a wealthy man of Schenectady, N. Y., is the inventor, and owner, and occupant of the House of Electricity.

### IN THE KITCHEN.

In kitchen appliances the Hillman house surpasses all others in the perfection and up-to-dateness of its electrical equipment. And if a cook cannot be contented in this house, she can be contented nowhere.

This is an age when the science of man is bent on saving the precious moments, and in the Hillman home no time is lost. The electric kitchen equipment is simplicity itself. It consists of a wooden table equipped with many regulating switches for turning the current on and off. Three heats can be given—the maximum, medium and minimum. In the morning the girl turns a switch in her room when she gets up, and by the time she is dressed the tea kettle is boiling, the electrical frying pan and coffee pot are as soon ready, and breakfast can be cooked in less than half the time usually consumed with the gas or coal stove. The three heat switches are used, so that the cooked food can be kept warm until used.

Water can be heated, and an egg cooked on the stove in the wonderful time of three and three-quarter minutes. Other cooking utensils are equally as fast, and prepare the food in a manner to tickle the palate of an epicure. The oven can be heated ready for baking in less than fifteen minutes. Most interesting about the kitchen utensils is the fact that so many combinations have been arranged. The hot-water heater is later used to cook the porridge, then to boil the eggs, and later the potatoes are steamed in it.

In the laundry, in the basement, the nine-gallon water boiler keeps a steady supply of hot water, all the machinery is run by electricity and the clothes are

# PAGEANT OF PAST AGES

## ANCIENT BUTLEIGH REVELS BEFORE 2,000 SPECTATORS.

Alfred Burns the Cakes Again and Gets a Rating from the Swine-herd's Wife.

On the vivid greensward of Butleigh Court, Glastonbury, the ancient Butleigh revels took place on a recent afternoon in delightful weather in the presence of 2,000 spectators gathered from all parts of England.

The numerous historic pageants were exceedingly effective in their charming setting of woodland scenery and bright blue sky. The tableaux represented scenes in Britain's history from the time of the Phenicians and on through the pre-Christian days to the time of the passing of Arthur and the exploits of Alfred the Great, with special reference to the part which Glastonbury and its grand old abbey played in those great epochs, until the middle of the eighteenth century.

### HISTORICALLY ACCURATE.

The parts were taken by residents of Glastonbury and Butleigh. The costumes were historically accurate, and nothing could have been more striking and beautiful than to see the gaily-attired men, women and children moving animatedly across the natural stage or dancing merrily on the sward to the strains of an orchestra esconced in the greenery.

Perhaps the most successful, certainly the most popular, were the pageant and tableaux dealing with Alfred's time. All the parts were spiritedly taken, and the part of the fair-haired hero-king was wonderfully played. The scene where the swine-herd's wife rates the king for scorching the cakes provoked a storm of cheers.

Another especially successful representation was the old English revel on the green, with a man in motley to provide uproarious fun. The dancing by the young men and maidens before King Henry and his queen aroused great enthusiasm.

### GRAND FINALE.

The local actors and actresses, trained for some weeks back by professionals, acted their parts one and all admirably, entering into the spirit of the thing with notable tact. Ladies in gay summer toilettes largely predominated in the gathering of spectators, and nearly all the clergy of the three Wessex counties were present.

The final pageant was a splendid historical spectacle, all who had taken part in the various scenes joining in the procession and marching under the grand arcade formed by the boughs of the great trees surrounding the lawn to the martial strains of a military band.

So successful were the revels that they may become an annual fixture.

## CHEERS AT MURDER TRIAL

### DRAMATIC SCENE IN AN ENGLISH COURT ROOM.

### A Soldier Who was Acquitted of Killing a Blackmailer is Loudly Cheered.

Dramatic scenes were witnessed at a murder trial at Northampton Assizes—scenes which have rarely, if ever, been equalled in the history of the court.

It was a demonstration of popular joy over the acquittal of a prisoner, which had its basis in the public indignation against the odious system of blackmailing. The prisoner was Private Sam Steel,

Friday, after the close of the Jewish Sabbath, at sundown, and hence, according to the Jewish reckoning, during the early hours of the day on which the triumphal entry occurred (Nisan 2) and which ended Sunday evening at sundown.

Verse 6. Now when Jesus was in Bethany — The manner of introducing this account of the anointing of Jesus by Mary shows it to be parenthetical here, and belonging elsewhere chronologically.

Simon, the leper—One Simon whom, apparently, Jesus had healed of leprosy at some previous time. John records that a supper had been prepared in honor of Jesus in the house of Simon, at which Martha was among those who served.

7. A woman—Mary, the sister of Lazarus and of Martha.

An alabaster cruse—Or, a flask. Compare note in Word Studies on lesson for April 22, page 278, Sunday School Banner, for April, 1906.

Exceeding precious ointment.—"Ointment of spikenard, very precious" (Mark). The special kind of ointment named by the evangelist—nard or spikenard—was extracted from the blossoms of the Indian or Arabian nardgrass. The other evangelist gave three hundred denarii as the value of the ointment. A denarius was equal to a trifle more than seventeen cents, and was the average day's wage of a common laborer. The actual value of the ointment, therefore, in our coinage would be a little more than fifty dollars; but in purchasing value it was equivalent to between three and five hundred dollars.

8. They had indignation—Not all of the disciples, apparently, shared in this indignation as is plain from the account by the other evangelists: "But there were some that had indignation among themselves, saying, To what purpose hath this waste of ointment been made?" (Mark 14, 4).

10. But Jesus perceiving it—Perceiving their indignation and hearing their criticism.

Why trouble ye the woman—Words of unkind criticism had apparently been spoken to Mary. In John's account Judas is made the spokesman of the fault-finding disciples: "But Judas Iscariot, one of the disciples, that should betray him, saith, Why was not this ointment sold for three hundred shillings, and given to the poor?" (John 12, 4).

A good work—Good in the sense of noble or praiseworthy, a deed done under the inspiration of intense and passionate devotion.

11. For ye have the poor always with you; but me ye have not always—In the words of this verse Jesus points out a difference between general ethical obligations and duties arising out of special circumstances. The former are easily recognized by all, but it takes "a genius or a passionate lover to see and swiftly do the latter." Mary saw and did the exceptional thing, and her act therefore was especially commendatory.

12. To prepare me for burial—We are not certain from the wording of the narrative at this point whether or not Mary was herself conscious of the meaning of the act which she performed. If so, then her love had discovered what the disciples could not perceive; if not, then Jesus means to say that an act of loving devotion may have a significance far more profound than its original intention.

13. This gospel—Or, these good tidings, that is, the tidings of the life and death and mission of Jesus.

14. Then—Apparently very soon after the events connected with the supper and anointing at Bethany.

15. Weighed unto him — Actually weighed out with a pair of scales the pieces of money. Money is still weighed even in very small quantities in the Orient, as of course it is in larger quantities in the great banking houses everywhere in the world. The cruder coinage of the time made the weighing of the coins even more important.

which the steamers of the Cunard line have risen, for the experience of the line is very much like a synopsis of the history of steam navigation. It began in 1840 with the Britannia of 1,050 tons (built by Robert Duncan, Port Glasgow), and not till 1852 was the 2,000 tons line exceeded. Two years later the Arabia, the last wooden steamer of the line, was launched, her tonnage being 2,402. Then in 1855 the firm launched its first iron steamer, the Persia, the largest and swiftest in the world at that date. The Persia was 3,300 tons and 4,000-horse power, and it was thought that she could not be surpassed. But screw steamers were then beginning to gain upon the paddle ocean steamers, and the Cunard determined to make a supreme effort and to produce a paddle ocean steamer that would never be beaten.

#### LAST PADDLE STEAMER.

So in June, 1861, the Scotia, of 3,871 tons, the last ocean paddle steamer, and the largest and swiftest of them all, was launched at Govan, and the Cunard people felt that they were secure from attack for many a year. But in November, 1867, the Inman screw steamer City of Paris beat the best run of the Scotia from Queenstown to New York, and the days of the ocean paddle steamer were seen to be numbered. Then the White Star Line came into existence in 1871 with the first Oceanic, and the Cunard steamers were surpassed both in tonnage and in speed by the latest steamers of the Inman and White Star Lines.

Still the Cunard gave no sign of joining in the rivalry of tonnage and speed till 1880, when the line became a public company, and one of the first results of the change was that an order was given for the building of the Servia, a vessel of 7,392 tons, which was launched at Clydebank in May, 1881.

#### OPENED NEW EPOCH.

From that launch there dates a new epoch in the history of Atlantic steaming. The Servia, for a short time the swiftest steamer on the Atlantic, was soon beaten by the famous Alaska, of the Union Line, and the directors of the Cunard Line went to the Fairfield Yard, then the greatest on the Clyde, for two steamers, the Umbria and the Etruria. They are running yet, the largest and swiftest single screw steamers in the world. For a time these two ocean steamers remained supreme on the ocean, but in 1888 the City of New York and the City of Paris were built at Clydebank, and they soon proved themselves superior in speed to the Umbria and the Etruria, while the building of the Teutonic and the Majestic at Belfast in 1889 placed the largest and swiftest of the Cunards still further in the background—so that the Cunard directors went again to Fairfield, and as a result the Campania and the Lucania, of 12,950 tons, were launched in 1893, and these two steamers were then, and are still, the two swiftest ocean steamers under the British flag.

#### WITH NEW CENTURY.

No further advance in large Cunard steamers took place till 1900, when the Ivernia and the Saxonia, of 14,000 tons, were launched. These two were not intended to be ocean racers, but quickly became favorites on the Atlantic because of their steady sea-going qualities. And then there came another pause till in 1905 the Caronia and the Carmania, of 15,700 tons each, were launched, the Caronia with reciprocating engines, the Carmania with turbine engines. Both steamers have had marked success, and now, with a long stride forward, there comes in 1906 the Lusitania and the Mauritania, of 32,500 tons each.

#### WISE.

Mother—Now, Isidor, go and give the new governess a kiss.

Isidor—No, thank you, not me. I know her. She will give me a slap on the face like she did papa.

used to cook the porridge, then to boil the eggs; and later the potatoes were steamed in it.

In the laundry, in the basement, the nine-gallon water boiler keeps a steady supply of hot water, all the machinery is run by electricity and the clothes are ironed by a six-pound electric flat iron, which is always ready for work.

#### THE DINING-ROOM

is equipped with a small table wired for the chafing dish and coffee percolator, where pleasant evening dishes can be made.

All the rooms of the house are heated with the luminous electric radiators. The radiators are instantaneous, and as soon as the switch is turned the fire glows and throws out a strong heat. They give more heat than any gas heater, do not use the oxygen in the room, and are far cheaper, costing less than seven cents an hour for heat.

The bathroom is replete with electrical inventions and conveniences. Water in the bath tub is heated quickly with an immense coil. In forty seconds water can be heated in the shaving mug.

The miscellaneous electrical contrivances about this house are almost without number, and are being added to every day. The sewing is done on a sewing machine run by a small motor, and a little three-pound electrical flat-iron in the sewing-room is more than useful; it is a necessity. An electrical massage motor is another device. There is also the electric heating pad, which takes the place of the old hot-water bottle. It is as light as a blanket, and can be kept for hours at the same temperature.

Matches in the house are an unknown quantity. Cigar-lighters on the veranda, in the den—the only places where matches would be used—remove every excuse for a match in the house. There are also telephones upstairs and down.

A great many of the devices mentioned can be used in almost any home where electric lights are used, such as the shaving-mug, tea and coffee pots, chafing-dish, flat-irons, cigar-lighter, sewing machine motor and laundry iron.

#### SCOURGE OF AFRICA.

Cure for Sleeping Sickness Said to Have Been Found.

Two Europeans are reported to have been cured of sleeping sickness in the Walermael Hospital.

The authorities decline to give details at present, but it is understood that the treatment consisted of the injection of strychnine and atoxyl.

British, French and German investigations have been made in Africa to combat this strange disease, which has swept away hundreds of thousands of natives. Hitherto it has been regarded as incurable.

Its ravages have been described by Livingstone, Selous and other pioneers of exploration on the Dark Continent, and Col. David Bruce discovered that it was caused by the parasite "trypanosoma," which is carried by the tsetse fly.

The disease is at first often put down to laziness, but develops until the victim cannot keep himself awake, and may fall asleep at any time, even while eating. He wastes to a skeleton, and in eight months at the outside is a dead man.

#### INDIA'S MARRIAGE LOTTERY.

Every year in the Rumiati country, in India, about October, a marriage lottery is held. The names of all the marriageable girls and of the young men of the circle who want to get married are written on slips of paper and thrown into separate earthen pots. From these they are drawn against one another by the local wise man. This simply determines the fact that the Rumiati girl has come out and is ready to be married, and the youth whose name is drawn against hers thereby obtains a letter of introduction, with authority to make love immediately, with what ardor and success he is capable of.

—scenes which have rarely, if ever, been equalled in the history of the court.

It was a demonstration of popular joy over the acquittal of a prisoner, which had its basis in the public indignation against the odious system of blackmailing.

The prisoner was Private Sam Steel, of the 7th Hussars, and he was charged with murdering a civilian named Hodges, who shadowed the soldier and his sweetheart for the purpose of levying blackmail.

Steel and a soldier companion were with two young women near a wood when Hodges was detected following them. Steel ran back, and in a fight that ensued he drew his service knife and the civilian received a wound in the thigh from which he bled to death.

#### OFFICERS SUBSCRIBE.

Public sympathy with the prisoner was such that Major Beresford, of the 7th Hussars, and other officers of the prisoner's regiment, subscribed to a defence fund, and Mr. Hammond Chambers, K. C., was engaged to defend him. The court was crowded with officers' wives and other ladies interested in the regiment, and they unwittingly ousted the deputy-mayor and corporation from their customary seats. As the officials of the court declared that they could not find room for all, the members of the corporation withdrew and sent a letter of protest to the high sheriff.

The case lasted all day, and it was obvious from the outset that prosecution and judge leaned favorably towards the prisoner. The jury, after being absent an hour, returned, saying that there was one dissident. They again retired, and three minutes later returned, the foreman stating, "We are all agreed that it was a pure accident."

#### "NOT GUILTY."

"Then there is a verdict of not guilty," said the judge, "and the prisoner is discharged."

Those in court burst into enthusiastic cheers, which were heard by a vast crowd waiting outside. The cheering was taken up lustily and echoed through the open windows of the assize court.

Sympathizers in court crowded round the young soldier, even the police, prison warders and officials joining in the chorus of congratulations. His sweetheart rushed to him and the two lovers, regardless of the eyes upon them, embraced and kissed affectionately.

When he left the building he was caught up and carried shoulder high. An equally enthusiastic welcome awaited him at Weedon Garrison.

#### TREATMENT BY PERFUME.

Physician's Latest Method of Treating Fashionable Patients.

Treatment by perfume is the latest thing in fashionable medicine.

A Paris physician has just started a practice on these unique lines.

Certain scents, he maintains, have a marked effect upon the nervous constitution. He specifies the following:

Geranium — Audacity and self-confidence.

Mint—A clear business head. Oppopanax—Madness. Russian leather—Indolence. Verbena—A fine artistic sense. Violet—Devotion.

A representative of a well-known perfume manufactory favored the Daily Mirror with his views of the Parisian's "prescriptions."

"Of course, some scents," he said, "might stimulate certain nerves a little, but they would have absolutely no effect on others. Even those they did affect would get injured to it in five or six months.

"Some people cannot bear the smell of rose. It gives them headache. Mint would be likely to be refreshing in hot weather, but eau de Cologne and vinegar would be much more beneficial.

"The only effect of a perfume is to please the senses."

# HOME.

## DOMESTIC RECIPES.

**Cheese Rice.**—Boil as much well-washed rice as required in milk. When cooked, drain it on to a very hot dish, cover with grated Parmesan cheese, and serve immediately.

**Tuscan Steak.**—Cut a pound of meat from a loin of veal, and see that it is not less than three inches thick. Beat it well on each side. Season with pepper and salt, and cook on a gridiron before a clear quick fire for half an hour. It must be well cooked, but on no account dried up. Serve very hot with the following: Truffle Sauce.

Rub an enameled saucepan with a piece of onion, melt in it two ounces of butter, and smoothly stir in one level teaspoonful of flour. Add a quarter of a pint of best stock and three sliced truffles. Make the sauce hot—on no account boil—pour over the steak, and serve.

**Spinach Balls.**—Boil some spinach, put it in a cloth and wring all the water from it. Then place on a board and chop it up very fine. Place in a saucepan with a lump of butter, a little milk, a teaspoonful of castor sugar, and an eggspoonful of grated lemon-peel. If liked, a pinch of mixed spice may be added. Place over the fire, and cook for twenty minutes. Now empty the spinach on a dish, leave till quite cold, then form into balls. Egg and breadcrumb them, and fry in boiling oil to a golden-brown. These are delicious with thin slices of fried ham.

**Fried Parsley.**—Use fresh, curled, dry parsley; have a dish of fat hot enough to brown a piece of bread in a minute. Put the parsley into a frying basket, then drop the basket into hot fat; let it remain half a minute, then lay on coarse brown paper till wanted for garnishing.

**Deviled Almonds.**—Take one pound blanched almonds. Split each one in half. Now fry them in butter until they are nicely browned, then sprinkle with cayenne pepper and salt, using twice as much pepper as salt. Serve hot.

**Oatmeal Cookies.**—One egg, one cup rich sour milk, or some milk with a tablespoonful of sour cream stirred in, two tablespoonfuls of sugar, a teaspoonful of soda and two of wheat flour, and oatmeal to thicken. Drop from a tablespoon upon buttered tins and bake slowly, browning slightly. Good for children's lunches. Keep in a dry place.

**Light Potatoes.**—So many people serve hard, moist potatoes that one would not think it so easy to make them light and mealy. If the potatoes are large always cut them in two lengthwise before boiling. When finished drain off water, set the uncovered saucepan over a slight heat, and shake occasionally, till all the moisture from the potato has escaped in steam.

**Stuffed Chicken Legs.**—For this dish use the legs of a small chicken (the remainder can be used for a saute, or fricassee, or for quenelles). Carefully remove the bones, leaving a small portion of the drumstick in each. Mix half a pound of sausage meat with finely cooked chopped tongue, chopped parsley, and one egg. With this fill the boned chicken legs. Cover each well with its skin, and sew up neatly with thin twine. Braise them on a bed of vegetables, and a little stock. When done, take up and let cool. Remove the string, egg and crumb them carefully, and fry in hot fat to a golden color. Dish up on a bed of green pea puree, garnish them with the same puree, and serve with a rich brown sauce.

## ACCIDENTAL RECIPES.

One sometimes stumbles over very welcome knowledge when in distressing emergencies. Years ago, when hastily stirring up a "dark" cake, I found the raisin box quite empty, writes Mrs. J. W. Wheeler. Anything so that as fault

enough fine sugar. As the cake had stuck to the pan and came out in rather shattered condition, it was in sore need of fixing up, somehow. She had a bright idea. While still warm she spread jelly over the shattered bottom, then after it had cooled, poured over this her skimpy frosting. The visitors all begged for the receipt of "that delicious cake." Being one of them I can vouch for its excellence.

## WITH GRAPES.

**Grape Pickles.**—Take seven pounds of ripe grapes and remove the stems; take three pounds of white sugar, one quart of cider vinegar, one ounce of cinnamon and one-half ounce of cloves. Boil this and pour over the fruit for two mornings, and the third morning put fruit and all in preserving kettle; heat so as to simmer for a few minutes; then put it in glass or earthen jars, tie up securely and keep in cool place.

**Grape Jelly.**—Select firm grapes not quite ripe, wash the berries well, pour into preserving kettle, and stew slowly for some minutes to free the juice. Strain through colander, and then through jelly bag. Keep the juice as hot as possible. Measure the juice and add one pound of loaf sugar to each pint of juice. Boil fast, for at least thirty minutes, until done, and put in glasses.

**Spiced Grapes.**—Take the pulp of the grapes, boil, and rub through a sieve so as to get rid of the seeds. Add the skins to the strained pulp and boil with sugar, vinegar and spices, using for seven pounds of grapes four and a half pounds of sugar and one pint of good vinegar. Spice quite highly with ground cloves, allspice and a little cinnamon.

**Grape Marmalade.**—Take one pound of grapes and one pound of sugar. Stew until well dissolved, put through strainer or bowl, and then through sieve. Cook until it becomes stiff as jam. Put away in small preserve jars.

**Grape Leather.**—Use same ingredients as for marmalade. Boil until quite stiff. Spread on marble slabs or china platters to dry.

**Grape Trifle.**—Pulp two pounds of ripe grapes through a sieve fine enough to extract the seeds. Add sugar to suit the taste. Put into a trifle dish, and cover with whipped cream nicely flavored. Serve cold.

**Grape Pie.**—Take the pulp from the grapes and heat a little to soften it; then rub through a sieve to get out the seeds. Add the skins. Sugar to taste, and bake.

## THINGS WELL TO KNOW.

We wonder how many know that tough poultry may be boiled tender if vinegar is added, one-half cup to a fowl? That in boiling milk or cream a pinch of soda will prevent curdling?

That onion juice is preferable to chopped onion in seasoning and to obtain the juice a large grater should be used?

That tins will be easier polished with wood ashes and kerosene and zinc can be cleaned with kerosene and galvanized iron ware, tiles, sewing machine stands, etc., are easier cleaned this way?

That soap bark is one of the best things to wash flannels or any woolen goods? Purchase five or ten cents worth, steep it well, strain, put in water with the goods, rub, rinse twice. Borax will take out ink stains on the carpet; rub vigorously.

## EVE AS PROTOTYPE.

**Wild Woman Captured, But Set Free in the Woods.**

The Mayor of the French commune of Scientien, a few miles from Geneva across the frontier, accompanied by many gendarmes, entered the forest near the village the other day in search of a "wild" woman who has been living for the past few months in a savage state.

She is a mystery to the French villagers. She does not remember her name, but calls herself Eve, and lives in the same way as her original ancestor. She is about fifty years of age, is

# WASTE OF HUMAN LIFE

EMINENT ENGLISH MEDICAL MEN  
DEPLORE IT.

Sir James Crichton Brown and Dr.  
A. T. Schofield Speak to  
Students.

The appalling waste of life and how hundreds of thousands of needless deaths and millions of needless illnesses might have been prevented every year were the subjects of discourse by two eminent medical men of London the other day. Sir James Crichton Brown, while delivering an impressive warning to students against the materialist school of philosophy, quoted some startling statistics regarding the waste of human life by deaths from preventable diseases, and predicted that in another forty or fifty years mortality from preventable disease would have disappeared.

The whole address was a plea for idealism in medical practice, which was summed up in the concluding phrase when Sir James declared that the medical student of to-day was a knight errant of science.

"The aim of many modern physiologists is to bring their science into line with other material sciences," he said, "by showing that all physiological phenomena are but complex problems of physical and chemical nature. But in order to do this they have to deprive their science of its distinctive character, for if physiology is the sum of scientific knowledge concerning living beings it must cease to be physiology when it denies the existence of life and reduces what hitherto has been regarded as a vital function to the phenomena of

## INORGANIC NATURE.

"Determining their laws and measuring their constants by physical and chemical methods, the new materialists have dissipated the phantom of vitality. Have left us plants and animals as more or less complicated arrangements of proteid substances responding in a very simple way to the ordinary physical forces that we see around us. They leave us for a brain a mass of glue-like substance nine-tenths water, with a little phosphorus thrown in, traversed by waves of physical forces, and nothing more.

"They leave us a man—an automobile man, self-made and self-started, with no passengers and no chauffeur, moved by a series of explosions or the redistribution of energy and rushing on to inevitable destruction. The speculations of the neo-materialists are not in accordance with the sobriety of medical philosophy as hitherto understood.

"Your object and aim will be to obviate the tendency to death. In 1904, the last year for which returns are available, there were 549,718 deaths in England. Of these, a very considerable proportion were what might be called lives thrown away. In fact, the debt to nature is overpaid each year to the extent of 200,000 lives. The unnecessary leakage is still going on in all directions.

"Of every 1,000 born, 145 perish within the first year of life. Mothers as well as infants are needlessly sacrificed. Upward of 1,600 of them die every year. Tuberculosis still carries off 60,000 victims annually, but the mortality from it has fallen steadily

**DURING THE LAST THREE YEARS.**

And there are good grounds for hoping it will be stamped out in another forty years."

Taking as his text that prevention is better than cure, Dr. A. T. Schofield, at the opening series of the Gresham lectures, also referred to the enormous number of premature deaths in the United Kingdom every year. As the ratio of illness to deaths was about thirty to one, there must be some 6,000 unnecessary, preventable sick beds in the same

# ON THE FARM.

## CARE OF POULTRY FOR EGGS.

Fall months relieve the poultry-raiser of many cares and close observation. The chicks do not require the care and close attention that they need earlier in the season. Incubators and brooders are cleaned and stored away until another season, but there are a great many things that must have one's undivided attention.

The pullets that we expect for winter layers must be kept growing and in good health. We should rise that the are not overcrowded.

The fall of the year is the worst time for roup. It is generally brought on by letting the cold wind strike the fowls or by letting them roost in damp houses. Damp weather is a breeder of the disease.

An afflicted bird should be separated from the rest of the flock, as roup spreads rapidly. Drinking vessel should be kept clean. Have poultry houses in a dry spot and keep dry, clean and well ventilated. Stacked litter ought to be sprinkled on the floor to absorb moisture.

With proper care roup can be prevented. It is a difficult disease to cure when it once makes its attack. Begin in time and depend upon the prevention and not the cure.

It is important to push the pullets because if they begin to lay during the fall before winter sets in they will keep on laying. Should they not lay before winter begins they will not lay a bit until spring, but will begin early.

Liberal feeding assists in overcoming some of the difficulties. Cull out inferior stock and select only early strong active pullets. One must have an intelligent interest in the case and feeding of fowls to get best results.

Green food and a constant supply of animal food are essentials that must be present to obtain a large number of eggs. One pound of cut bone for a dozen hens once a day, which should not cost over a cent a pound, will produce more eggs than five times as much grain because the cut bone is complete in egg substances, while the grain is largely deficient in many respects. The cost of a bone cutter soon comes back to the poultryman in the increased egg yield of his flock.

The fall eggs are always advancing in price, and will continue to do so. Do not feed too much fresh meat and bone. Remember a hen would have to run a long way to catch enough bugs to supply two ounces of fresh meat. Cut bone lessens the grain bill, cheapens cost of food and gives larger profits on fowls and eggs.

The egg yield during the fall months is usually not one half what it might be, and you can get the results I do. You will be pleased with the increased profit for a very little extra labor.

## SHEEP NOTES.

Size is but little advantage, unless accompanied by quality.

Heavy sheep are sometimes leggy and coarse, and not nearly as desirable as lighter sheep.

It is not the number of pounds that you put on that makes the profit; it is the flesh they are in that makes them sell well in the market.

If the raising of early lambs for market is to be undertaken at all, plan to raise good ones.

In undertaking to raise early lambs for market, the ewes must be of good, healthy stock, fair size, and in good condition. Ewes bred first week in October should have lambs last week in February. If bred first week in September, they should produce last week in January, or 21 weeks after service. The average farmer will do better to have his lambs come in April.

## ACCIDENTAL RECIPES.

One sometimes stumbles over very welcome knowledge when in distressing emergencies. Years ago, when hastily stirring up a "dark" cake, I found the raisin box quite empty, writes Mrs. J. W. Wheeler. Anything so flat as fruitless dark cake was not to be considered with "company to tea." What should I do? Some prunes in soak gave me an idea. Cutting up a cupful of the dry prunes, I mixed them into the batter. The cake was a success.

Another time, when making the same dark cake, and no prunes were on hand, I used figs; they were very dry, but that was all the better for this purpose. I cut them into small pieces, floured them well, and put them with the small handful of currants which was the extent of my fruit. But this was not all of my trouble—the clove box was empty. "Ginger and figs go well in confectionery, why not in cake?" I thought, so I went the ginger, with the same amount of allspice, and a smaller amount of cassia and nutmeg. The result was a very happy one, and frequently I hear, "Mamma, will you make some fig cake?"

Once after mixing a batter for a blueberry pudding, I found that the berries had mysteriously disappeared. There was no substitute in the house but dates. As these were the property of the person who had made a raid on my pantry, I felt no compunctions in confiscating them. It took but a few minutes to put enough for the pudding. Instead of the usual sweet sauce, I made a lemon sauce, and the pudding was eaten to the smallest scrap.

Another emergency receipt came about in this way. A friend in the act of frosting a cake, discovered to her dismay, that she had only half

of a "wild" woman who has been living for the past few months in a savage state.

She is a mystery to the French villagers. She does not remember her name, but calls herself Eve, and lives in the same way as her original ancestor. She is about fifty years of age, is well built, and of more than average height, carries herself like a soldier and has beautiful white flowing hair.

She lives on fruits, berries and roots that she finds in the forest, and has a sleeping place made of branches and twigs in a tree. She has on many occasions refused bread and meat, and also shelter and clothes, of which she is innocent.

"Eve" runs like a deer, and the gendarmes had a long chase before they were able to surround her and bring her before the mayor, who—rather embarrassedly—questioned her for half an hour without being able to obtain any information as to her identity.

"I have always been called Eve, and have always lived in the forest," she repeated many times. The mayor considered the woman a harmless creature and allowed her to return to the forest, refusing to send her to the workhouse or lunatic asylum.

## ARMORED MOTOR-CAR.

The Austrian War Department has just sanctioned the construction of an armored motor-car, especially designed to carry a quick-firing gun, mounted on a pivot capable of being raised or lowered and turning in all directions. The driver's seat is also arranged that it can be lowered sufficiently to sink the man below the line of fire. Heavy haulage work, such as that of stores, ammunition, and even heavy guns, is already done by motor in the Austrian Army.

of a "wild" woman who has been living for the past few months in a savage state. The opening series of the Gresham lectures, also referred to the enormous number of premature deaths in the United Kingdom every year. As the ratio of illness to deaths was about thirty to one, there must be some 6,000 unnecessary, preventable sick beds in the same time. Worry and anxiety about health were the surest way to disease. The great rule for the average man was, "Keep up your weight and don't worry."

Palpitations and pain in or near the heart might safely be ignored, at least in the vast majority of cases. That organ was most difficult to injure. It could stand any reasonable strain. Regard health, he advised with wise indifference, and never "diet."

Moderation and variety in food is all that is needed, not "munching clubs," where forty bites per mouthful must be counted. Hostesses did their guests poor service when they pressed them to eat once they were satisfied. He was happy to think that he had in the cases of several families stopped the intolerable blunder of spying upon the guest's plate.

## SIR VICTOR HORSLEY.

### An English Pen Picture of the Great Surgeon.

Sir Victor Horsley, whose address on the value of alcohol in medicine recently attracted so much attention, not only in Toronto, where it was delivered, but throughout England, where it was extensively reported, enjoys the distinction of being one of the greatest authorities on brain surgery in the world. It was, no doubt, in large measure for his work on that subject that he was knighted in 1902. He, however, by no means specializes in brain surgery, for, as one of the surgeons to University College Hospital, where he received his professional education, he has, like all other members of the staff, to perform operations of all sorts. The subject of alcohol and its effect on the human body in health and disease has long been a favorite study of his, and it is some years since he first drew attention, in private at all events, to the matter on which he dilated in his recent public utterance—the little less than extraordinary way in which milk was being substituted for liquor in the therapeutic treatment of disease at the hospitals. In 1862, as Sir Victor pointed out, seven of the great London hospitals spent £3,000 on milk and over £8,000 on alcohol, while four years ago the amount spent on milk reached the sum which had previously been expended on liquor.

Personally, Sir Victor is a tall man, fully six feet high, if not a shade over. He is a son of the late J. C. Horsley, R. A., and is still on the right side of fifty, though there is little that betokens middle-age about him. Indeed, as a surgeon he might almost be said to be a young man, but for the extraordinary experience he has behind him. His hair is light brown, and he has a fairish or sandyish moustache, cold grey eyes which have the indelible quality of seeing more than they look at, but curiously enough, instead of the strong square jaw and the chin which is always associated with great strength of character and resoluteness of purpose, the chin is set a little back so that the lower part of the face suggests delicacy rather than the strength which the fine brow indicates. Similarly, there is nothing in the least ponderous about his manner. He is alert, vivid, and alive to the very tips of his fingers, while his capacity for work is simply enormous, and voracious is probably the only adjective which adequately suggests his appetite for it. Opposed to alcohol as he is on scientific grounds for his patients, he is equally opposed to its use in health, and he never takes it. On the other hand, he has no dietetic horrors or hobbies, and his habits are those of the ordinary mortal, with perhaps a bias towards tea, of which he is certainly fond.

A large elm tree at Newport Parsonage Farm has been attacked and killed by an army of wasps.

condition. Ewes bred first week in October should have lambs last week in February. If bred first week in September, they should produce last week in January, or 21 weeks after service. The average farmer will do better to have his lambs come in April.

Putting a fine lot of fleeces on the market once a year is by no means incompatible with, at the same time, having a prime lot of mutton ready to help out the income.

In raising early lambs, select at the earliest possible date the kind and number of ewes needed, and purchase in good season the right kind of ram to mate with them.

The same sheep will vary from year to year in the amount of oil secretion, and they are liable to vary, not only by a change of weather, but by a change of food as well.

In weaning the lambs, they will worry less if left in the fields they are accustomed to and the ewes removed, rather than to change the pastures of the lambs.

The sheep, of whatever breed, whether we will it or not, is a general-purpose animal. It furnishes both food and raiment to wear.

Valuable lambs will always pay for the best possible feeding and attention, and it is of the utmost importance that every detail be thoughtfully understood and attended to.

As a gleaner of small crops, a saver of little wastes, the sheep is as necessary to the farm as the cow or hog.

Now is the time to arrange for lambs next spring, because you must select good strong breeding ewes to carry and feed them through fall and winter. It is none too soon to decide the kind of a ram you will use as a sire.

The principle of selection, "that it enables the breeder not only to modify the character of his flock, but to change it altogether, if desired."

A weakened constitution predisposes to disease of any kind, but there is no evidence that docking affects sheep in that way.

Clean, dry pasture, pure water, wholesome food and intelligent, individual attention to the wants of the flock are the first requisites for successful flock management.

Sheep, grain-fed and well protected from the rigorous wintry storms, will furnish wool of much stronger fibre, making a more durable fabric than wool clipped from sheep with less care.

## A SENSIBLE EGG CARRIER.

A chocolate, or broken candy ball, that can be had for ten cents at any grocery store, makes an excellent egg carrier when treated in the following manner—Take a sheet of the corrugated brown paper board used as wrapping for breakable articles and line the sides and bottom of the pail.

Then cut circles from other pieces of the same material to use between each layer of eggs, smaller circles for the bottom, increasing in size as the top is approached. Eggs can be gathered from the nests in such a pail, and carried to market, with reasonable assurance that few, if any, breakages will occur. The cost of the whole will be but a trifle. The corrugated paper can be obtained in large sheets from grocers to whom it has come packed about breakable goods.

## NEW JAP STAMPS.

There should be a large demand for the part of stamp collectors for copies of the special stamps which were issued by the Japanese Government some time ago to commemorate the return of the troops from the seat of war. Two of such stamps of the face value of 1-2 set and 3 sen respectively were issued and they were available for postage of letters on the day of the great review. No more than one copy of each kind was sold to every applicant for the stamps at the general post-offices. The design consists of a Maxim gun and other weapons of modern warfare, with the Japanese flag.

## SUGGESTED NEW COVER FOR AN OLD SONG.

"It is not mine to sing the stately grace,  
The great soul beaming in my lady's face."

# FEAT NOW WITHIN REACH

THE WORLD MAY BE CIRCLED WITH-  
IN FIFTY DAYS.

An Achievement Which Canadian Enter-  
prise Is Helping to Make  
Possible.

Around the world in fifty days seems now a feat within reach. With the launching of two new Cunard liners destined to reduce the voyage to four days and a half, and with the prospective re-opening of the Trans-Siberian Railroad and the Manchurian Railroad in the hands of the Japanese, the possibility of cutting down the record is brought nearer. The present record is held by Henry Frederick, who in the summer of 1903 went around the world in fifty-four days seven hours and twenty minutes. James W. Sayre, of Seattle, was only two hours and twenty-two minutes longer, and, strangely enough, their voyages were almost simultaneous, the former starting on July 2 and the latter on July 26, the former travelling eastward, the latter westward.

## THE RUSSIAN LINK.

The possibility of beating these records depends principally upon the new schedule of the Trans-Siberian Railroad, which has not yet been issued. The road is open now as far east as Irkutsk, on Lake Baikal, but beyond that it is in the hands of the Russian Government, which is monopolizing it for the transport of its armies from the scene of the recent war. How soon it will be opened no one can tell, not even the Russian Minister of Railways, to whom the International Sleeping Car Company applied a few weeks ago for information which would enable it to plan round-the-world tours for the coming season, and who replied that he would advise them to make no such plans over the Trans-Siberian road for the present. But by next year Russia will have ceased to need the road for military purposes, and the line will have been so improved and repaired that it will be possible greatly to reduce the running time between St. Petersburg and the Pacific.

Prince Hilko, the Russian Minister of Railways, made the prediction a few years ago that it would soon be possible to go around the world in thirty-three days, and when asked for details gave the following figures: New York to Bremen, 7 days; Bremen to St. Petersburg, 1½ days; St. Petersburg to Vladivostok, 10 days; Vladivostok to San Francisco, 10 days; San Francisco to New York, 4½ days. But Prince Hilko's figures have never yet been approached. Instead of 10 days from St. Petersburg to Vladivostok it takes 17, and often much longer, and instead of 10 days from Vladivostok to San Francisco the fastest steamers take 12 from Yokohama to Vancouver, and anywhere from three days to a week must be added to this for getting from Vladivostok to Yokohama. Again, he made no allowance for time lost in making connections.

But that Prince Hilko predicted ten-day trains across Asia is good evidence that they are not only possible, but that it is the intention of the Government to have them in operation. It is not improbable that they may be running next year, in which event it should be easy to reduce Mr. Frederick's record by nearly a week to forty-eight or even forty-seven days.

## SKETCHING THE ROUTE.

Now let us see how one would set about reducing the round-the-world record. In the opinion of the managers of Cook's Tourist Agency and of the International Sleeping Car Company, the new four-and-a-half day boats of the Cunard Line may be left out of the cal-

Straits, which may be summarized as follows:

|                                 |           |
|---------------------------------|-----------|
| New York to Paris .....         | 149 hours |
| Paris to St. Petersburg .....   | 47 "      |
| St. Petersburg to Behring ..... | "         |
| Strait .....                    | 312 "     |
| Behring Strait to Chicago ..... | 192 "     |
| Chicago to New York .....       | 17 "      |

Total ..... 717 hours or 28 days and 2 hours.

But the Behring Strait tunnel is not likely to be dug for many years to come, and anyone who is ambitious to beat the world's record for globe-girdling had better wait for it, for by that time airships may have put railroads and steamships out of date.—N. Y. World.

## MISER LIVED IN MISERY.

Gold and Notes to the Value of \$50,000 Found in His Rooms.

An extraordinary story of a miser's misery and wealth was told to the Middlesex (England) coroner the other day, when an inquest was held at Edmonston Workhouse on the body of John Sewell, aged 71, who died in the infirmary.

About a week ago the man was removed to the workhouse in a most wretched condition from his house in Handsworth road. The house itself was more like a pigsty than a human habitation, but when searched £440 in gold and £465 in notes were found, while script to the value of at least £10,000 was lying about the rooms. The place was a veritable treasure house.

In addition to the treasure, there was also a well-stocked armory, consisting of four loaded revolvers, a number of powerful air guns, and a long knife.

Mrs. Coventon, who lived next door, told the coroner that Sewell never permitted anyone to enter the house, and he never spoke to the neighbors. About ten days ago, as she did not hear him moving about, she went to the police, but when a constable went to the house and called out, asking Sewell if he wanted anything, the man answered "No."

On Monday groans were heard, and the police again went to the house. They found the front door locked and barricaded, but broke in from the back. Sewell, dressed in indescribably dirty rags, lay on the floor of one of the rooms. He was very weak, but when the police entered the room he struggled to reach a knife at his side, and when this was taken away from him a loaded revolver was found in his pocket. There was only a bed in the room.

He was taken to the infirmary, where he subsequently died from apoplexy accelerated by the terrible condition in which he lived.

At the inquest Mr. W. Mattingly, clerk to Sewell's solicitor, said that his firm's client refused to tell them where his money was invested. His capital amounted to more than £10,000. Sewell's two sisters, who are also rich, are at present in lunatic asylums.

A verdict of "death from natural causes" was returned.

## ANIMALS' INSTINCT.

How Cats and Dogs Travel Through Unknown Places.

A writer in the Monthly Review, Mr. C. Bingham Newland, argues that instinct is a factor in the migration and movements of birds, animals and insects. It is a guiding power distinct from intelligence, and leads them to localities far removed from the place of departure—in the case of insects to countries where, in the nature of things, they can never previously have visited. Instinct is motion of certain nerve cells which have become fixed by frequent practice or by heredity.

Animals have this faculty (instinct) highly developed, whereas man possesses it only in a very modified degree.

# AUDIENCE WITH SULTAN

FAILURE OF A FOREIGN DIPLOMATIST'S MISSION.

He Went to Obtain an Archbishop's Consecration Through an Interpreter.

A diplomatist recently accredited to the Sultan describes in the London Standard how he once secured an audience of his Majesty and how he fared.

His object was to obtain the confirmation of an already chosen Archbishop to a Macedonian see. For weeks he was thwarted by officials of the court, and then for more weeks by the Sultan himself, who professed to be too busy to see him. However, at last he was really received, and this is what happened:

"His Majesty awaited me in a small but richly furnished room. He stood in the uniform of a Turkish Colonel by a low sofa, with his gloved hand on the hilt of his sword. His rather long, melancholy countenance was curiously and subtly lighted by a sort of good-humored latent smile. Even in his dark and usually sad eyes the same strange laughter seemed to lie. In them one could read either suppressed merriment or irony. Probably he was forestalling the humor of the diplomatic transaction which was to follow, and

## ENJOYING IT QUIETLY!

"I sat exactly opposite the Sultan, who took a place alone upon the sofa. About a yard away on his left the accomplished dragoman of the palace, Ibrahim Bey, occupied a small chair, and on my left was my own dragoman. Looking me straight in the face, Abdul Hamid said a couple of phrases in musical Turkish, speaking very low. Ibrahim Bey bowed low, made the Temenala and began to translate. This he did afresh each time the Sultan spoke, till, at the end of the audience, he was quite weary with the gymnastic exercise. He began thus:

"His Majesty commands me to say how much he regrets not having been able to receive you sooner. It was a great annoyance to him, as he had a subject he particularly wished to discuss with you. His Majesty is pleased to see you, and hopes that you are ready to enter upon the subject." I replied that I was deeply sensible of the honor conferred on me, the more as my Government had charged me to bring to the personal notice of His Majesty a question of some importance. I was especially delighted to find His Majesty so ready to enter upon details.

"The Sultan bent his head slightly toward me and murmured a few words with a sphinxlike smile. 'Before his Majesty begins to talk about that matter he wishes to know how long you were accredited to the Court of St. James's.'

"This seemed a curious introduction to the decision of the Archbishopric in Macedonian question. but I replied that altogether I had been about

## SEVEN YEARS IN LONDON.

"Then you must be well acquainted with English society?"

"I replied that in my modest way I thought I knew something of the English."

"Very well! His Majesty is most anxious to have your opinion on English women."

"In spite of myself I cried out 'What?' and looked to my interpreter to see if Ibrahim Bey had translated aright. He nodded, and Ibrahim Bey repeated, 'His Majesty would know what a man like yourself, who is familiar with English society, thinks of the ladies.'

"They are good and pretty," I answered briefly, wondering what the qualities of English women had to do

tainly; but you would never mix up a Bishop in our interesting conversation on English ladies. No, no. The time has not yet come to talk about your Bishop. Leave it to me to choose the opportune moment. Of a surety our talk then will be as satisfactory as it has been interesting to-day.' Thereupon his Majesty arose, and with a slight inclination of his head and a suspicious smile hovering around his lips and mouth I was graciously dismissed."

# VICAR'S GHOSTLY VIGIL

A MIDNIGHT SCENE AMID SILENT GRAVES.

Sacrilegious Thieves Enter Churchyard, But are Met by Revolver Shots.

The Rev. Forbes Phillips, vicar of Gorleston, England, told a London Daily Mail representative the other day how he kept a watch by night in St. Andrew's churchyard and shot at two burglars—of whom nothing has since been heard—who, he thinks, intended to rob the collection boxes or steal the pre-reformation plate, of great value, in the church.

"After the Sunday evening service," said Mr. Phillips, "I slipped a bulldog revolver into my pocket and went to the churchyard to watch. It was a fearful night of wind and rain; I was speedily drenched to the skin. I had tried to induce the police to set a watch, but owing to an ancient legend that the ghost of an old Abbot perambulates the churchyard not a man would undertake the job. The standing tombstones and high grass made splendid cover for any intruders, and I walked about several times, keeping careful watch.

## "HANDS UP!"

"About a quarter to one I saw two men rise above the wall from the lane and leap into the churchyard. One was tall, the other short. The tall one stopped by the wall while the other hastened across to the tower entrance. I heard a low whistle from the tall man just as I stepped from the priest's door, as if to indicate all well. The short man ran towards the tower door, I from the priest's door down towards him. A shout from the tall man warned me he had seen me.

"Simultaneously I cried to the short man ahead of me, 'Halt! Hands up, or I fire!' He paid no heed, but ran. I fired to warn him; then, as he reached the edge of the sunken pathway, I fired low at his legs. He leaped into the air, uttered a frightful shriek, turned almost a complete somersault, like a winged partridge, and came down prone on the gravel walk. He groaned and writhed, clawing with both hands furiously at the gravel and earth.

"I said to myself, 'You are accounted for, at any rate,' and wheeling round, ran after the tall man. He dodged behind tombstones, until at last I caught sight of his face between two of the stones. I fired. I never saw him after that. I next ran to the sexton's house for assistance. He was asleep and took a lot of rousing. Then we lighted a lantern and returned to the scene.

## LEFT NO TRACE.

"My wounded man was gone, but in his agonies he had almost dug himself a grave with his hands in the gravelled walk. The rain was pouring in torrents so that we could find no blood marks over on the other side of the lane. Outside the church grounds we found a piece of stiff cardboard smeared with blood. The fellow had evidently dragged himself over to a dust-heap there, and lain on it for a while, or what is more probable, his accomplice had returned and borne him away. Not a trace of them has been found since."

of Cook's Tourist Agency and of the International Sleeping Car Company, the new four-and-a-half day boats of the Cunard Line may be left out of the calculation entirely, for they would not reduce the Atlantic voyage sufficiently to make up for the inevitable loss of time in crossing England and the English Channel. Both these experts say the speediest route from New York to St. Petersburg is unquestionably by a steamer landing its passengers at a Continental port, a French liner to Le Havre, or a German liner to Cherbourg, or even to Bremen or Hamburg. As the Trans-Siberian trains run only twice a week, starting from Moscow on Wednesdays and Saturdays, one would have to select his steamer with a view to making the closest possible connections. Five hours must be allowed from Cherbourg to Paris, forty-seven hours from Paris to St. Petersburg and 12 from St. Petersburg to Moscow. That is the actual running time of the trains, and another twelve hours must be added for making connections and waiting for trains. If the traveller go via Bremen he must allow about thirty-six hours for the railway journey from there to Moscow.

At Moscow he boards the Trans-Siberian Express, but he would make a great mistake if he were to go to Vladivostok, for on reaching there he would have to make inquiries as to the next boat leaving for Japan and he might have to wait several days before one sailed, and then it would be a small, slow freighter, that might land him in Japan in four or five days. The wise traveller would take his ticket for Dalny, changing at Soungari, the junction of the Trans-Siberian and Manchurian railways. Regular steamers ply between Dalny and Shimonoseki, Japan, two or three times a week, making the passage in two days and a half.

#### BY STEAMER TO VANCOUVER.

At Shimonoseki the globe-trotter would take the train for Yokohama and reach that port in twelve hours. There he would get a steamer for America. If lucky or accurate in his calculations, he would catch one of the Canadian Pacific steamers, which would land him at Vancouver in twelve days. From there via Winnipeg, St. Paul and Chicago he would come East by the fastest trains he could select, but about five days is the best time he could make.

This figures up forty-five days of actual travelling, but it is manifestly impossible to make so many connections without delays. The traveller might lose one or two days between landing in Europe and taking the train to Moscow or St. Petersburg; he would probably lose a day or two at Dalny, and again in Japan, while the possibility of a steamer being delayed by accident or bad weather might throw all his calculations out of gear and cost him a full week of delay at some point. But if he set out to girdle the world in fifty days he would, according to the foregoing figures, have five days to spare for such delays. Summarized the schedule is as follows:

|                          |           |
|--------------------------|-----------|
| New York to Cherbourg    | 144 hours |
| Cherbourg to Paris       | 5 "       |
| Paris to St. Petersburg  | 47 "      |
| St. Petersburg to Moscow | 12 "      |
| Moscow to Dalny          | 408 "     |
| Dalny to Shimonoseki     | 60 "      |
| Shimonoseki to Yokohama  | 12 "      |
| Yokohama to Vancouver    | 288 "     |
| Vancouver to New York    | 120 "     |

Total ..... 1,096 hours

But it must be remembered that all these calculations are based upon the assumption that the Trans-Siberian Railroad is to be opened soon. If the running time on this road be cut to ten days from Moscow to Dalny, seven days can be subtracted from the forty-five, which would show that it is possible to go around the world in thirty-eight days. The time is not far distant when this will be perfectly true.

In this connection it is interesting to recall the figures published by the projectors of the tunnel under Behring

practice or by heredity.

Animals have this faculty (instinct) highly developed, whereas man possesses it only in a very modified degree. Man, before committing himself, reflects, and then acts accordingly, as his own individual intelligence prompts him. Animals, on the contrary, rely on the accumulated knowledge of thousands of generations of their kind, which is stored up in nerve cells ready for immediate use as occasion may require.

A man lost in a forest, without mechanical aid (compass), and unable to take observations, would in all probability fail to find his way out; but an animal, having the homing instinct, is never at a loss providing the way is possible.

A cat, eight months old, the writer relates, was sent in a shut-up basket to a village some ten miles out of the town of Nice. On the third day the same animal reappeared at its former quarters. In this and like cases there can be no question of landmarks. Instinct it is, and instinct alone, which accounts for these acts.

People exclaim, "What marvellous sagacity." The occurrence causes astonishment because it is the performance of an inferior animal, and one beyond the attainment of man, with all his superior knowledge. But though we marvel, these demonstrations are only the inevitable outcome of a natural law (law of heredity).

#### THINNER AND LIGHTER BOOTS.

Foot Covering Becoming as Soft and Pliable as Gloves.

Boots and shoes as thin and as pliable as gloves are probable in the near future.

In response to the demand of the public, boots for some time have been steadily becoming thinner and lighter. And now, with glaze kid supreme in the place of patent leather, there are boots in shop windows so pliable, in spite of quite normal strength, that heel and toe might be bent to meet without detriment to shape. Why not have boots approximating to gloves? The public has begun to ask—boots with flexible soles a little thicker than the uppers, which shall fit the foot with the lightness and closeness of silk? To this ideal the bootmakers are rapidly approaching.

"For a long time past," said a manufacturer in London, "the public has been asking for thinner soles and thinner uppers. The lighter the boot the more comfortable to wear, the smarter in appearance. You may guess how the recent hot summer has emphasized the cry. Where in the past we sold ten pairs of patent leathers, we now sell one. Glaze kid, light and neat and strong, has now supplanted everything."

The question, however, is whether even the lightest kind of leather will be light enough in the future. We may even see silk boots with strong, thin leather soles, or in the summer lace "open-work" boots and shoes with hardened paper soles. At the present time, such is the insistence on comfort and lightness, that ladies are wearing sandals, though for the most part they hide them from view by long skirts."

#### KING'S ARCHERS.

The Royal Company of Archers is the King's Bodyguard in Scotland. This ancient and honorable guard has its colors, its pipers, its adjutant, and its mounted officers, the same as a regiment of the line. Its officers comprise a captain-general, four captains, four lieutenants, four ensigns, twelve brigadiers, an adjutant and a surgeon. Being a purely civilian body, however, its drill is not necessarily in harmony with the drill book. There is no age limit attached to the conditions of joining. The methods of saluting are quaint and peculiar to the corps, being different to any in use in the service.

Doctors before they heal their rich patients generally heal themselves.

like yourself, who is familiar with English society, thinks of the ladies."

"They are good and pretty," I answered briefly, wondering what the qualities of English women had to do with the case of my unconsecrated Bishop.

"His Majesty says that when he was in England he saw many beautiful women." I opened my eyes wider and wider, and ventured to ask: "Was His Majesty ever in England?"

"Certainly; I and my elder brother, Murad, accompanied our uncle, Sultan Abdul Aziz—Heaven rest his soul—to England to visit Queen Victoria." His Majesty uttered these words scarcely above a whisper, looking very seriously and sadly at the floor. We were all silent for a minute. In deference to the recollections of his uncle and brother awakened in his pious memory.

"Then, however, he broke into a long speech, which Ibrahim rendered quickly into French.

"His Majesty says that a tall and fine officer was attached to his suite; a very agreeable officer. His Majesty fancies to have read or heard that this same officer fell like a brave soldier on the battlefield later. When we were in England the officer ordered

#### A BOTTLE OF SCOTCH WHISKEY

and soda water to be placed on a little table in the anteroom, and made a speech to my brother and me on the sovereign virtues of this drink. He also tried to convince us that it was impossible that the *moran* should forbid its use. When he found he could not persuade us he concluded by trusting that though we did not partake ourselves we would not take it ill if he did."

"Evidently the Sultan understands French perfectly, as Ibrahim Bey had no sooner ended the translation of one phrase than he began another, punctuating here and there with audible laughter.

"His Majesty says that the officer often repeated these tactics. At last, says his Majesty, when my brother and I saw bottle after bottle of Scotch whiskey disappear, we said to ourselves, 'The officer is a nice fellow and a fine soldier; he is our friend, and we are his friends. We are not doing our duty as friends if we don't tell him that he drinks too much.' So we remonstrated with him; and what was his answer? He gazed at us in amazement, and then burst out laughing. 'Is it possible that your Royal Highnesses think that I drink too much of this whiskey? What would your Royal Highness say if you could see how much many of the ladies in our best society drink?' And he laughed louder still. 'And now, your Excellency,' concluded Ibrahim Bey, solemnly, 'what his Majesty wishes to know from you is this—is it really true that English ladies drink?'

"I answered warmly that whatever may have been the case thirty or thirty-five years ago, his Majesty might take my word for it that English ladies

#### DID NOT DRINK NOWADAYS.

"His Majesty's ironic smile departed. He looked grave, as if meditating some great problem, and then said: 'It gives me great pleasure to hear you say so. You confirm my own view. Often since then have I asked myself, 'Could the English nation be what it is if the women of England drank more than or even as much as the men? I am glad that your observations in London support my own theories.' His Majesty then went into a long praise of English women, referring to the saying *Non Angli, sed angeli*. I seized this allusion as a drowning man reaches at a straw.

"Sire," I interrupted, rising and bowing deeply, being copied by Ibrahim Bey, "your Majesty's mention of angels reminds me of heaven, and heaven reminds me of churches, and so I am brought back to the thought of that excellent man and most true and worthy servant of your Majesty the Archbishop of Macedonia, whose consecration—"

"Here his Majesty showed how well he understood French, as he would not let me go on, but broke in with, 'Cer-

ged myself over to a cathedral, and lain on it for a while, or, what is more probable, his accomplice had returned and borne him away. Not a trace of them has been found since."

Last week, said Mr. Phillips, the church was broken into twice, and similar crimes are reported from many places. On Friday, while he was in the vestry, a tall man and a short man entered, and were taken aback to find someone there. They scrutinized the safe, though they explained that they wanted to copy an ancient inscription above it. Mr. Phillips is convinced they are members of a gang with a motor-car, which was seen near the church on Sunday. He suggests that the wounded man was conveyed to London in the car.

All the police and all the hospitals in East Anglia have been warned, but no clue has been found, beyond a report that a tall man and a short man were seen loitering at Lowestoft, and hired a boat at Yarmouth and rowed up the river one day last week. Mr. Phillips adds that burglars have an inducement to steal the old church plate on account of the prices offered for it by Americans. He advises every country clergyman with such valuable property "to try the shot-gun method."

#### MOBBED BY BEES.

A Traveller's Experience With the Honey-Seekers in Abyssinia.

Bees abound in certain parts of Abyssinia, and, as the land is almost waterless in the dry season, the insects suffer much from thirst. In "The Source of the Blue Nile" is an interesting account of the manner in which, on his journey, the author was mobbed by bees, which were after his drinking water.

Every drinking vessel was crowded with them. Our boys drank from calabashes, and when they were put upon the ground, bees clustered on the edges and crawled toward the liquor. Impatient successors thronged upon the first comers and pushed them into the water, so that in a few minutes, the surface was a mass of "struggle-for-lifers." In spite of the heat we had to keep moving; for when we settled, so did the bees—all over us.

We halted for luncheon in a small ravine, and the bees did not find us till we had nearly finished the meal. We smoked them with cigarettes, cigars, and a bonfire, to no purpose. Then we shifted our quarters, but they followed. All of us were stung, and we were out of quilt of them till we mounted our camels and outdistanced the swarm.

They got their their honey from the flowers of the mimosa-tree. We camped that night among the mimosas, thinking that we had been delivered from the plague of insects, but we were mistaken. A host of the honey-seekers thronged and crawled on one's candle, one's book, one's face and one's hands, adding insult to injury by stinging us. It was more than twenty-four hours before we were free from them.

#### ORIGIN OF ICE CREAM.

Though the ancient Greeks and Romans used ice for table purposes to get through even hotter weather than we have, they knew nothing of "ices." These were introduced into France from Italy about 1660, and known at first as "fromages glaces," iced cheeses, although they were made of strawberries, apricots, and so forth, and contained not a drop of cream. From 1762 the use of "glaces" in the plural was sanctioned by the academy, but not before 1825 did "une glace" force its way into recognized acceptance. "Ices" are referred to from time to time in the eighteenth century in English people's letters from abroad. "Iced creams," however, were known as early as the year when William of Orange came over, and by the middle of the eighteenth century "ice cream" figured in cookery books.

## REMARKABLE WIRE GUN

**WILL PIERCE SIX-INCH STEEL PLATE AT THIRTY MILES.**

**Sixteen-inch Gun of This Kind Would Hurl a Projectile a Distance of Ninety Miles.**

The most powerful gun ever constructed was recently completed by the Scott Iron Company, Reading, U.S.A. It is known as a 6-inch Brown wire-gun, and its inventor, Mr. John Hamilton Brown, asserts that the projectile will issue from its mouth at the remarkable speed of 3,500 feet per second, and will pierce a 6-inch steel plate at a distance of 30 miles. In its course the shot, which weighs 100 pounds, will rise to a height of ten miles.

The strength and range of this unique piece of ordnance lie in the employment of steel sheets forming the central tube of the gun, round which many miles of square wire, one-seventh of an inch thick, is wound.

The sheets of the central tube are 308 inches long, 26 inches wide, and one-seventh of an inch thick. Upon the wire binding a jacket of steel has been shrunk in such a way that it is impossible for the gun to burst. The complete gun is 313 inches in length, and weighs just over ten tons.

This wire-gun is the first of twenty-five ordered by the American Government for home defence.

### A LONG SHOT.

The inventor declares that he could construct a 16-inch gun of a similar kind which would be capable of hurling a monster projectile the record distance of ninety miles. Such a weapon in the possession of the French would allow them to shell London without leaving their own territory.

The halpine dirrigible torpedo, the invention of Lieutenant Halpine, of the United States Navy, will probably play an important part in the next war.

This skiff, which is attached to the torpedo by a cable, is fitted with a kind of controller board, which, by the turning of a crank, sets the torpedo's electric mechanism in motion. The torpedo and the frail boat then put out to sea, and the man in charge brings them to a standstill about three miles from the ship which is to be attacked.

Dropping an anchor out of his boat, he mounts the torpedo, sitting astride, and releases the cable. Restarting the machinery, the torpedo dashes forward at a terrific speed, and the man has to hang on for very life.

### LITTLE NERVE NEEDED.

When well within the mile limit he guides the torpedo towards the ship, and then flings himself into the sea, relying solely upon a cork jacket to keep him afloat and assist him to regain his skiff.

The torpedo dashes on its mission, and when its "nose" runs into the steel netting of the ship—all ironclads are protected by netting in wartime—the propeller automatically reverses and the weapon retreats, leaving its "nose" in the net.

As the torpedo reverses and the "nose" continues to hold fast, a leaden cap is pulled off the former by a chain attached to the latter, and a cavity containing metallic potassium is disclosed. The action of the air and water upon the contents of this cavity forces a projectile through a tube in the under-body of the torpedo. This projectile is attached to the clinging "nose" also by a chain, and sinks below the sea at an angle of forty-five degrees.

When it comes to the end of its tether, about one hundred feet down, it strikes upwards, and is pretty certain to explode under the hull of the battleship and away from the netting, thus sending the vessel to her doom.

## IN INTERESTS OF EMPIRE

**DIRECTION OF EMIGRATION FROM THE UNITED KINGDOM.**

**A Correspondent of the London Times Makes Several Very Sensible Proposals.**

A comprehensive article on "Direction of British Emigration" appears in a recent issue of the London Times. The writer begins by expressing regret that the Departmental Committee appointed to receive Rider Haggard's report on settlements in the colonies did not consider any practical proposals directed towards increasing and directing emigration from the United Kingdom to points within the Empire. The writer says:—

Our fellow-subjects in the colonies would welcome a greater show of practical interest on our part in this all-important question. Our reserve hitherto has been a standing disappointment to them, if not a grievance, arguing, as it does, an ignorance of their resources or an indifference to their future. Moreover, the necessity of a more generous British emigration to the colonies in the common interest grows with each succeeding year.

### ALIENS IN CANADA.

Canada is receiving annually a large alien immigration, in the proportion of two aliens to one of British stock. Canadians anxiously look for an increased proportion from the old country, in order to maintain the balance and secure the predominance of British influence and ideals. Australia and New Zealand and South Africa all set a premium upon British emigrants of the right stamp.

### GOVERNMENT'S TASK.

The Government's share in this work it may be said, should consist in sedulously cultivating an attitude of tactful and practical sympathy towards colonial growth and aspirations, co-operating where possible in matters of common interest that make for closer union and mutual understanding; for instance, in such matters as inter-imperial postal and cable facilities, which alone would go far to consolidate the Empire and bring the local conditions and needs and the local point of view of each part home to the people in every other part; in fostering inter-imperial trade and commerce, by such means as the appointment of official commercial agents in the colonies, the despatch of commercial missions, etc., in promoting a fuller knowledge of the resources of each of our possessions by every reasonable means, so that their investigation and development by Britons should follow as a natural consequence.

### THROUGH SCHOOLS.

Lastly, and not least, much might also be done by the Government for the colonies through our schools, by making provision that the rising generation should receive throughout school life more definite, useful and sympathetic instruction in that which relates to his Majesty's dominions beyond the seas, so that a career and a home in one of them would never appear other than a welcome and a natural idea.

Other than official activity might also be used. He suggests that the clergy become educated in colonial knowledge, that they may advise their parishioners; they could be helped by an army of clerical advisers in the colonies who might also aid the emigrant on arrival. The Salvation Army and other organizations are examples of this plan.

### COLONIAL EXTENSION.

A further proposal, with a similar tendency, is put forward for the consideration of the great Public school of the United Kingdom. It is briefly, the adoption by each Public school of an agricultural training extension scheme in

## TO THE POLE BY AIRSHIP

**SOMETHING ABOUT WALTER WELLMAN'S EXPEDITION.**

**Description of the Big Dirigible Balloon in Which He is to Make the Attempt.**

Whether or not Mr. Walter Wellman succeeds in his proposed aerial dash for the pole this month, and whether or not the enterprise is prompted by the scientific spirit or by a desire for advertisement, it seems certain that the big dirigible balloon in which he is to make his attempt is a remarkable piece of work, entirely apart from its great size. The balloon, we are told in an article contributed to the Scientific American by its Paris correspondent, has been designed and constructed with very great care by Louis Godard at his aeronautic establishment near Paris.

### SUBSTANTIALLY BUILT.

He says:—"The most casual observer will notice its substantial construction, and it seems likely to weather the severest shocks which it may receive in the voyage toward the pole. No less than seven thicknesses have been used by Mr. Godard in making the canvas. The principal novelty lies in the use of layers of pure Para rubber, which are placed between the layers of silk and cotton canvas. This is the first time that a light, as well as a strong, envelope has been secured in this way. Starting from the inside, we have first a layer of strong and specially woven French silk fabric; then, on the silk, applied a layer of rubber, and on top of this comes a layer of cotton canvas. A thinner layer of rubber comes next, and then a second layer of cotton. Over this ad forming the outer coating of the balloon is a thin layer of rubber.

### VERY STRONG.

Such a combination of layers is very resistant, both to the pressure of the gas and to the moisture, which is one of the well known features to be met with in the polar regions. Seeing that the rubber is attacked by the atmosphere, it is not a usual thing to place it on the outside of the balloon; but in the present case it has been used for a number of reasons, the principal ones being that the airship will be in use but comparatively short time, and that it was desired to have a smooth surface and especially to avoid the penetration of moisture into the tissues of the balloon, which would weigh it down.

### SHORT BODY.

"What is striking about the whole construction is the practical ideas which prevail in the design of all the parts. Thus instead of using a long cigar-shaped body, Mr. Godard preferred to shorten up the balloon considerably, and give a length which is only three times the largest diameter, so as to make it quite steady and easy to handle in the filling operations as well as in the actual flight. Thus we have a balloon whose total length is 160 feet and greatest diameter 52 feet. A long guide rope will trail upon the ice so as to steady the airship's flight. For these different reasons it will be seen that the chances of accident are very much lessened."

The car is suspended by steel piano wires, and at each end is a propeller driven by a separate motor. Between them is the main "deck" and also the "cabin" which is thus described:

"The main cabin, made of osier, is somewhat above a man's height and covers the whole width of the nacelle, having almost a cubical form. On either side are six windows of a light basket work, and other windows are made in the front and rear of the cabin. A complete set of wireless-telegraphy apparatus is to be installed in the cabin. The mast wire is formed by the steel

## CHILD DETECTED ROBBER

**GOLD STOLEN FROM ROYAL BANK AT MUNICH IS RECOVERED.**

**Child Noticed That Man Paid Fare From Purse Full of Gold Pieces.**

The authors of the great mint robbery at Munich, Germany, have discovered, and the police have recovered possession of nearly all the stolen coins. The merit of the discovery belongs to a child who, while sitting in a tramway car the other day, observed that her neighbor, a man in workman's clothes, paid his fare from a purse full of golden ten-mark pieces.

With a quick sense of apprehension the child turned to the conductor and quietly observed, "This man has got stolen money from the mint." The conductor signaled the driver to stop the car, and handed the workman over to the police headquarters. There the prisoner confessed to having been associated with the burglary, but averred that he had not actually committed the crime. He gave his name as Max Ruf, by occupation an expert mechanic.

### A REMARKABLE COINCIDENCE.

Meanwhile, by a remarkable coincidence, the police had discovered, independently of Ruf, the real burglar. This was a soldier named Koenig, who, before he began his two years' compulsory service in the army, was a worker in the mint where his father is still employed. On the night of the burglary Koenig was absent from barracks, and this fact came to the cognizance of his superiors through a postman.

At about midnight on Thursday last a letter marked "express" was brought to Koenig at the barracks and he bed was found to be empty. Early on the following morning he climbed over a railing and regained his sleeping berth. To the corporal who called on him for an explanation he said he had been on an amorous quest.

### MAN IS WATCHED.

From that day Koenig was watched, and at the very hour when the child in the tramway car was calling the attention of the conductor to the contents of her neighbor's purse, Koenig was arrested at the dwelling of his sweetheart, where large quantities of gold were found. Further sums of money were discovered in a house on the outskirts of Munich, where Ruf, the accomplice of Koenig, had established a workshop for the execution of repairs to motor cars.

The rest of the coins were unearthed by a detective in the celebrated English garden in Munich, where the burglars had buried some \$15,000 of their booty under a heap of twigs and wood. Altogether a sum of \$30,000 has been regained.

## DISGRACEFUL PRACTICE

**THE WILES OF BODY-SNATCHERS IN LONDON.**

**Undertakers Seize Bodies in Their Desire to Obtain Funeral Orders.**

The British Undertakers' Association has been stirred to action by the revelations published recently regarding the disgraceful practice of "body-snatching" by touting undertakers.

The secretary of the London centre of the association wrote to the South-west Guardians asking them to receive a deputation in order to discuss the

When it comes to the end of its tether, about one hundred feet down, it strikes upwards, and is pretty certain to explode under the hull of the battleship and away from the netting, thus sending the vessel to her doom.

## NEWEST TERROR OF SEA

### THE VERY LATEST THING IN NAVAL WARFARE.

#### Motor Boat Built to Fight Submarines —Will Be Carried on Warship.

Though the naval manoeuvres now in progress in England may prove many definite points in ocean warfare, tactics may shortly be modified in some points by a new invention. For another naval terror has been added to the list, says the London Express.

First we had the wooden ship, armed with cutlass bearers and fustilers; then the cannon that would crash its round shot through the oaken timbers of the ship.

Next the ironclad, against whose impenetrable sides the solid shot fell harmlessly off into the water like a handful of peas rattling against a barn door; then the rifled gun with its bursting shell that crashed through the heavy iron as if it were cheese.

#### TUBEFUL OF DEATH.

On its heels the Harveyized steel armor that seemed to be man's last word in the work of resisting destruction; but then the armor-piercing, explosive steel projectile that could bore its way through anything built of steel if only it could hit fair and true.

Again, the agile, speedy torpedo-boat with its tubeful of death and destruction, ready to strike the steel-armored ship in its very vitals; then then torpedo-boat destroyer that could sweep the seas clean of these little hornets, terrors of the battleships.

At last the submarine, afraid of nothing, and now comes something that is believed to be master of the submarine—the destroyer of submarines. This is the very last cry in naval warfare.

#### NEW DESTROYER.

The new submarine destroyer is the invention of Mr. Lewis Nixon, graduate of Annapolis, and former naval officer, then shipbuilder, and now an official with the Carbon Steel Co. of Pittsburgh.

The essentials of the submarine destroyer are kept a secret as yet, because of the patent rights that must be preserved. Patents will be asked in all the countries of the world where patents may be had.

"The boat," writes Mr. Lewis Nixon, "will be small enough to be carried by battleships and large cruisers, have a speed of twenty-one knots an hour, and be as seaworthy and self-contained as a destroyer."

"The arrangements for the destruction of submarines I cannot now divulge, but they will be efficient."

#### SPEEDY MOTOR BOAT.

It will be built wholly of steel of the thinnest possible plates compatible with strength, and securely braced with light frames. Within and safely protected will be a modern motor, capable of creating great speed for short distances. In a word, the new submarine destroyer will be a speedy, high-powered motor boat, armed with a vertical torpedo tube, which can shoot a torpedo straight down through the water at its mark—the slow-moving but death-dealing submarine.

The submarine vessel must keep within twelve or fourteen feet of the surface to cause any damage to the enemy. And with a destroyer right overhead what chance would the crew, locked within the submarine, have for their lives?

A further proposal, with a similar tendency, is put forward for the consideration of the great Public school of the United Kingdom. It is briefly, the adoption by each Public school of an agricultural training extension scheme in the principal colonies, on the lines of the successful experiment of the Berkhamstead School Training Farm in North-West Canada. The aim of this school is to train the boys electing a colonial life in the best methods, and under the local conditions and circumstances they must themselves encounter when they set up on their own account. Extension schools might be multiplied indefinitely, young men could pass annually to a useful, honorable and satisfying career in every part of the King's dominions, under auspices which would satisfy the parents.

#### TRAINING FARMIS.

Training schools do not require to be large in order to be successful; indeed, the more moderate their size the more completely will that effect their object. With freehold land in Canada at £1 to £1 10s an acre (the Canadian Government might be disposed to assist with free land) the total expenditure involved will be trifling, provided Canadian local practice, in buildings, equipment and management be generally followed. If these schools be conducted on a self-supporting basis, as in Dr. Fry's experiment, low and even nominal inclusive fees become possible. It may be assumed that where the boys went and prospered their sisters would in many cases follow. The plan, therefore, may be said to contain the solution to some extent of the problem of what to do with our boys and girls.

#### FOR THE PROFESSIONS.

A recent proposal to link together the English and colonial schools and universities may be revived in this connection, as another useful measure for directing to the colonies many boys who may desire a career outside of agriculture in the colonies, say, in the liberal professions, in commerce, engineering, civil mechanical, or electrical, mining and metallurgy, the industrial arts and manufactures. In Canada the future offers bright prospects for capable young men from this side who are trained locally. The whole expense in such cases would probably be less than one-half that which is usually incurred in this country, while the opportunities for sound training are excellent. The collection and issue of the necessary information has been invited, and the Colonial Office has offered to undertake the distribution in the right quarters.

An exchange of secondary schoolmasters between motherland and colonies would help to bring education into line throughout the Empire.

Travelling scholarships for elementary school teachers might also be offered in imitation of Mr. Moseley's plan.

#### SMOKING JUSTICE.

An offensive thing in our law courts one has the misfortune to notice nowadays is smoking on the bench says the Calcutta Indian World. Among assistant and joint magistrates and the deputy and sub-deputy magistrates, and even among munsiffs and the subordinate judges, one is getting more and more largely accustomed to the picture of blind justice holding the scales with a cigarette between his lips and sometimes with a cigar or a pipe in his mouth.

#### MILITARY KITES.

The efficient military kite is of the well-known "box" type, and, like the captive military balloon, each kite is attached to a cable drum, mounted on a wagon when in use. These "aids to observation" can be raised by a very light wind, and notes have been taken at an altitude of upwards of 3,000 feet by their instrumentality. A light telephone is used by the observer attached to the kite in transmitting observations,

having almost a cubical form. On either side are six windows of a light basket work, and other windows are made in the front and rear of the cabin. A complete set of wireless-telegraphy apparatus is to be installed in the cabin. The mast wire is formed by the steel guide rope cable which trails upon the ice. Thus the party will be able to keep up a constant communication with the base of operations at Spitzbergen and from there with Hammerfest, so that if all goes well we will constantly have news of the expedition."

#### GASOLINE PROPULSION.

The motive power for this great airship is to be furnished, as noted above, by two gasoline motors and two separate propellers, so that if anything should happen to the principal motor the second one will be sufficient to run the balloon.

#### FRENCH COINER CAUGHT.

Students of Respectable Families are Engaged by Counterfeiters.

More than forty young men and women of good family, students from the Latin quarter, are lying in La Sante Prison awaiting trial on a charge of uttering base coin.

They have as companions in jail six of the most notorious professional coiners of the Continent, whom the police were enabled to capture at the same time.

These wholesale arrests have created great perturbation in some of the most respectable families in France. One of the prisoners is the son of a deputy, and most of the others are sons or daughters of highly-placed Government officials, magistrates, and legal luminaries.

The discovery of the far-reaching operations of the coiners was brought about by the frequent complaints of shopkeepers in the Latin quarter. So many reports were recovered of the passing of spurious 20-franc and 10-franc pieces that a watch was kept, and suspicion fell on the students of the Law and Fine Arts School.

One of these was arrested, and from his story it appears that the students were enticed into the traffic by the gang of professional coiners.

It appears that a number of the students whose remittances had run out were one day discussing their financial difficulties in the garden of Luxembourg, when three well-dressed men, who were strolling near by, entered into conversation with them. These men appeared to be strangers to Paris, plied the students with questions about the city, and eventually invited them to drink at a neighboring cafe.

Afterwards there were continual meetings, apparently by chance, and eventually the three men made a proposal that four of the students should join them in circulating imitation gold pieces. These pieces were to be supplied to the students at a fourth of the face value.

#### SACRIFICE TO SUN GOD.

Self-Elected Emissary of Sun God Commits Brutal Crime.

A pretty little dressmaker, returning from her work in Paris, France, the other day, was startled by the sudden appearance of a strangely-dressed woman from behind a door. The woman wore a veil, which reached down to her feet, and she advanced towards the frightened girl and said, with a wild look in her eyes:—"Listen, my little one, you are too pretty, too fresh to live among men on this earth. I will sacrifice you to the Sun God, my divine lover." The poor girl tried to escape, but the mad woman drew a dagger from beneath her dress and began to mutilate her victim's face and throat with it. Only with great difficulty was the girl rescued from her assailant, who continued to say, "I am the emissary of the Sun God on earth; I fulfil a divine mission; my lover has commanded me to recruit young and beautiful priestesses for him."

lations published recently regarding the disgraceful practice of "body-snatching" by touting undertakers.

The secretary of the London centre of the association wrote to the South-west Guardians asking them to receive a deputation in order to discuss the question, and a reply was sent stating that the request would be acceded to.

The subject was discussed at the meeting of the Guardians, and the Mayor of Southwark, Councillor J. O. Devereux, declared that there were many things happening that should not be allowed.

#### INDECENT HASTE.

What was practically body-snatching went on. When certain undertakers heard of a death at the board's infirmary they went to the institution and got hold of the body in order to be able to demand the order for the funeral.

The Rev. D. Bryant mentioned that on one occasion an undertaker took away a body and refused to give it up to another undertaker who had secured the order for the funeral.

Further details regarding the scandal were given to a London Express representative by Mr. Devereux.

"Immediately a death occurs in the infirmary," he said, "an undertaker learns of it through his agent in the place, even before the relatives are informed. He at once rushes to the house of the relatives.

#### DISGRACEFUL PROCEEDING.

"Having made some statement, which those in the house may not understand, about putting the body in a shell, he proceeds to the infirmary and removes the body, stating that he is acting on behalf of the relatives. If he has a mortuary at his premises he takes the body there, but in many cases he uses the public mortuary, maintained by the ratepayers.

"The head of the house may wish to give the order to another undertaker, but what is he to do when he finds the body already in the possession of the other man? He has no choice.

"In some cases the thing is even done before consulting the relatives. In others the relatives are simply beset by touts who want the order. We are not alone in the matter, for the same thing is done at all infirmaries and hospitals.

"It is a disgraceful proceeding and a great hardship for those respectable funeral furnishers who do not lend themselves to such practices."

#### HUNGRY ZOO LIONS.

Desert Kings in England's Famous Zoo Have Big Appetites.

The London Zoo lions have been showing bad temper and indignation. And no wonder, for they have had to starve for nearly a whole day. The usual horse with which the animals at the Zoo are fed failed to arrive to time, and breakfast was not served till five in the afternoon.

This is how the daily horse is apportioned at the Zoo:—Ten lions, 11 lbs. each; three lion cubs, 6 lbs. each; eight tigers, 13 lbs. each; ten leopards, 6 lbs. each; three jaguars, 6 lbs. each; smaller animals and birds, 60 lbs.; grand total, 376 lbs.

The superintendent of the gardens told the Daily Mirror that many carriage people send their old and infirm horses to the Zoo, where they know they will be humanely killed.

The largest firm of horse-flesh dealers in London threw some light on the horse-flesh traffic the other day.

"From September to May we slaughter nearly 1,000 horses a week in our yards," said the manager. "Most of the flesh is purchased by cats'-meat men."

An East End dealer told the reporter that live horses, sometimes numbering 1,500 to 2,000 are shipped every three days to Germany or Austria. They are sold for about 8 pence and mostly made into sausages.

## Lots of Bargains Yet

In the Graham Stock Sale.

## THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.  
 When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.  
 A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

NAPANEE,  
16th January, 1906.

A special despatch from Newburgh states: "Dennis McGuire, of Strathcona, was found drowned in the Napanee river near here at noon, on Saturday. He was last seen about ten o'clock Friday night, and it is supposed he took the wrong road, and fell off the bank into the stream. His watch was stopped at 10.30 o'clock. The remains were removed to C. H. Finkle's undertaking rooms, and Coroner Leonard, of Napanee, notified. The latter deemed an inquest unnecessary. The remains were then removed to the residence of deceased's brother, James McGuire. The burial took place on Monday to Centerville. Deceased was sixty-five years of age and unmarried."

Belleville Oct. 21.—An accidental discharge of several sticks of dynamite at the works of the Belleville Portland Cement Company at Point Ann, three miles from this city, at 5 o'clock last evening, resulted in the instantaneous death of two men, William Bowler, son of George Bowler, aged 19, and George Rion, a widower, aged 32. They were engaged loading blast holes with dynamite, and were carrying a box of the explosive. It is thought in ramming the dynamite down the percussion cap was struck. Bowler was thrown sixty feet. Not a vestige of clothing remained on his body, which was dreadfully mutilated. Rion was blown in the opposite direction over eighty feet, landing among some trees and then falling to the ground.

Robert Boyes, Napanee, has been looking backward, like many of our venerable men, who are reminiscing. He thinks that few men have been spared till now who saw Cairn hung in Kingston at the old jail window at the south corner, from which Brass, the much discussed, was also executed. One of the evidences used against Cairn was a missing watch and this was found to have been mislaid accidentally by the owner. Mr. Boyes' father was one of the volunteer dragoons, who escorted to execution, near Fort Henry, Von Shultz and the other outlaws captured in the battle of the Windmill, Prescott, 1837. Robert was a lad, and had the privilege of getting inside the military lines about the scaffold. Von Shultz was brave to the point of admiration. Mr. Boyes was upon the decks of the steamer William Fourth at Gananoque and the Sir James Kemp at Bath, when they were launched. He remembers the steamer Calhoun which made only one trip to Toronto, then "muddy little York." He also witnessed the arrival of the first press for the Whig, about 1834.—Whig.

Hammocks a fine assortment. **MADOLE & WILSON.**

E. LOYST has large stock of flour, Royal Household and all other grades, all kinds of feed, large quantities at the lowest prices. He wishes to sell out in the next month. Salt, Coal Oil Groceries. Highest price for eggs cash or trade. A call solicited,

Ummage Sale.

The W. C. T. U. purpose holding their Annual Rummage Sale, the second week in November. This early notice is given with the hope that housekeepers will hold in reserve any second hand clothing or furniture that they may be disposed to donate. A committee of ladies will shortly canvass the town for such contributions. Proceeds of sale in aid of Deaconess work.

**Paints Oil and Glass.**

Our import order of glass is now here and we are ready for the fall trade. Do not overlook the fact that we are the largest dealers in these lines and are gratified to know that the quality of the goods we have been enabled to furnish the public within the past has brought to us this large and growing trade. Elephant Brand of white Lead and readymixed paints are guaranteed for quality.

**MADOLE & WILSON**

**Mr. Carscallen wants to see the Bay of Quinte Denuded of Fish.**

T. G. Carscallen, M. L. A. for Lennox, introduced a deputation to Hon. Dr. Reaume Thursday to ask that the prohibition of commercial and sporting fishing in the Bay of Quinte be removed. The prohibition only went into effect last season to preserve the bay from depletion of fish—bass especially. Consideration was promised to the deputation which consisted of W. H. Reid, P. H. Fox, D. Belnap, H. W. Bedell (Prince Edward), A. A. Richardson, (Deseronto), R. A. Norman (Picton), W. H. Rikeley, T. S. Vanorden South Fredericksburgh. Later in the day, Dr. Reaume stated that upon looking into the facts, he found that, in his absence during the summer, promises had been made to the fishermen of the district, which had led them to make preparations for the season's fishing. He had decided from the representations made to him, it would only be fair, after the expense that had been incurred, to permit them to fish during the present year. It is to be clearly understood that next season the waters will be preserved.

**As Clear as Crystal.**

And as bright as a new dollar is our highest grade of American Coal Oil. It gives a clear bright light and will not smoke the lamp chimney. Try a gallon next time. Sold only at Wallace's Red Cross Drug Store.

**A Successful Appeal**

The Rector and Wardens of St. Luke's church, Camden East, appealed Thursday Oct. 18th Thanksgiving Day for 175.00 to pay off the debt on their handsome Parish Church. The church was tastefully decorated with cereals fruit vegetables and potted plants. Archdeacon McMorine D. D. rector of St. James church, Kingston, preached two powerful and instructive sermons at 11 a.m. and 7.30 p.m., the organist and choir acquitted themselves admirably. The congregation which was large, contributed \$179.78, the Treasurer, Mr. Samuel Greenway, the Rector and the Wardens desire to thank the members of the congregation and their friends in the neighborhood who through their liberality have cleared their church from debt. It is hoped that the sacred edifice will be consecrated in June by Bishop Mills. We notice present at the services Dr. E. and Mrs. Price, Harold and Mr. Thomas Price, from Oakland California, Mr. and Mrs. Edwin Price, Miss Lucy Hinch and Messrs Robert and William Dowdle, Hinch street, Mr. B. S. O'Longhlin and Mr. E. R. Checkley, Yarker, and others Thursday Oct. 18 was indeed and in truth a Red Letter Day in the history of the Parish of Camden East. Congratulatory letters were received by the Rector from Rev. A. Elliott, of Carleton Place, and Rev. F. D. Woodcock, of Brockville, former rectors of this Parish.

**CASTORIA.**

Bears the Signature of *Charles H. Pritchard* The Kind You Have Always Bought

including Nov. 17th. Remember the Conditions—you must bring your own bottle—none given to children.—T. B. WALLACE, at the Red Cross Drug Store.

**St. Patrick's Church Bazaar.**

The Committee in charge of the above event are sparing no pains to make it the most successful bazaar ever held in Napanee. The bazaar will be held in the Town Hall, on November 5th, 6th, 7th and 8th. On the evening of Nov. 6th, Rev. John Kehoe, Rector St. Mary's Cathedral, Kingston, will give a lecture of his travels in Italy, Switzerland and Ireland, illustrated by stereopticon views. On the evening of the 7th, highclass Instrumental selections will be given by Chas. E. Millner, Organist of St. Mary's Cathedral, Kingston, assisted by local talent. On the evening of Nov. 8th, the bazaar will close with a Progressive Euchre party and Refreshments. Admission, Gentlemen 50c, Ladies 25c. Dinner will be served on Thursday, 8th, from 12 noon to 2 p.m., sale of fancy articles each day and evening.

**The Stock of the late Robt. Denison is now being sold at a bargain, at the Store.**

**Firemen Have Several Runs.**

Early Saturday morning last Collier Bros' evaporator was partially destroyed by fire. The small building, in which was located the drying kilns, was completely destroyed, but only the roof of the main building was damaged. When the night-watchman discovered the building on fire he attempted to extinguish it by shovelling green apples on it, but was unable to check it, and by the time the fire alarm was sounded the small building was a roaring mass of flames. Within ten minutes from the first alarm of the bell the firemen had a stream of water playing on the fire, but unfortunately a coupling blew off near the branch and considerable time was lost in making changes. However the fire was soon under control. The fire engine was taken down to the dock below the burning buildings, but quite a long time elapsed before steam was raised, which called forth considerable unfavorable comments from the spectators. Collier Bros' loss is considerable. The insurance company awarded them \$750 damages, \$350 on the main building, and \$500 on the contents therein. Shortly after noon on Sunday the firemen again visited the scene of the conflagration and put out what smouldering fire remained.—Wednesday evening about 5 o'clock the firemen had a call to the building occupied by the Bell Telephone Co., the cause being a chimney fire. The chimney became so warm that the woodwork in the walls were in danger of taking fire, and a portion of the plaster and woodwork had to be torn away in order to watch it closely. The laths and woodwork were so hot that they could hardly be handled, and had it not been watched a serious fire might have resulted.

Mr. Percy Johnston has sold his horse "Prince Roy" to a gentleman in Alberta. Price \$350.

The plastering of the new Eastern Methodist church was started on Thursday. The steam heating plant is also being put in place.

The new seats and carpets for the Western Methodist church arrived this week and are being placed in position ready for reopening the church about the first Sunday in November.

Miss Halston, Provincial Dorcas Secretary of the Women's Auxiliary, lately returned from the Indian missions of the North-west, will address a meeting in the church hall of St. Mary Magdalene's church on Friday evening at 8 o'clock. Canon Greene, of Orillia, is also expected to be present. The public cordially invited to attend. Silver collection.

**WHERE CANADA LEADS**

Americans boast of their great business houses, newspapers, etc., and they are right in doing so; but Canada has a newspaper that outstrips most of American papers and Canadians are proud of it. Think of it: in this sparsely settled country we have a paper that reaches over 150,000 homes each week, representing 750,000 readers. We refer to the Family Herald and Weekly Star of Montreal, the greatest family and agricultural paper on the American Continent. Its success is well deserved too, for every year it goes on improving and to-day is certainly the greatest value to be had in the newspaper line. The home without it is missing a great deal. To farmers it is almost indispensable. Their beautiful picture gift "A Tug of War," is alone worth far more than the year's subscription, which is only one dollar. Canada easily has the best of our neighbors for a great newspaper success.

Peterboro', Oct. 23—One of the closing acts of the Baptist convention of Ontario and Quebec was to repudiate Deacon Graham's attack on Sir Wilfrid Laurier last Thursday. This was done through President R. D. Warren, while Vice-President Walker temporarily occupied the chair, in the form of speaking to a question of privilege. He said: "At an earlier session an incident occurred which appeared to me to be most untimely and unnecessary. This convention is in no sense a political assembly and ought not in any way to give utterance to any expression of opinion that would prejudicially affect either of the great political parties in our country unless a great moral issue were involved. For this reason I desire to say here, and to give my words the widest possible publicity, that the utterance of our brother, Deacon Graham, regarding Premier Laurier and the Dominion Government was simply the expression of a private opinion made before this convention and entirely without its previous consent or subsequent endorsement. I make this statement simply because I have learned from reliable sources that Brother Graham's words have been accepted as the voice of the convention. I believe that such expression of political opinions should be carefully avoided in our convention gatherings." This statement was received by the convention with every evidence of favorable acceptance and without a dissenting voice.

**Overrun with Rats.**

Now is the time to rid your premises of Rats—there's nothing so good as "Wallace's Electric Rat Paste," for doing the work—25c. A Bottle at the Red Cross Drug Store, Napanee.

**The Overcoat Proposition.**

**LOOK FOR THIS LABEL.**

A great many men wear the three-quarter length overcoat. They prefer it, as the style changes but little from season to season, and it looks as well on the tall man or the short man as on the normal figure.

**It's an Ideal Coat**

The cut of this Coat this season is a trifle longer than usual and more form-fitting. The Collar and Lapel are wider and longer. Melton and Beavers in black and oxford mixtures, are the favorite fabrics.

We want men, who enjoy a sensible Overcoat, to see these three-quarter length Coats.

Overcoats range from \$7.50 and \$10.00 up to \$16. We would like to meet the man, who is looking about for the best overcoat his money can buy.

**SPLENDID TWEED SUITS,  
FOR MEN AND BOYS.**

We have never been as well satisfied with our Fall and Winter Suits as we are this season. Our manufacturers of "Ready-to-Wear" clothing are making vast strides—and every season shows marked improvement—We are showing an immense range of splendid tweed suits in all the latest patterns and style—single or double breasted.

Men's suits start as low as \$5 and run as high as \$14. Boys' suits run from \$3 to \$7.50.

We want you to see our Men and Boys' clothing before making your Fall purchases. You will find our prices very reasonable—quality and style considered.

We guarantee our clothing—and if anything bought at our store does not give entire satisfaction—let us know it—and we will make it right.

**Men's Caps in all Styles and Shapes**

**From 25 Cents to \$1.50.**

We are showing a good, serviceable, stylish Tweed Cap with fur veser for 50c.

**J. L. BOYES.**

### THADDEUS STEVENS.

**His Sense of Humor and His Unostentatious Charity.**

Many a joke is credited to Thaddeus Stevens, who led the Republicans in congress during the civil war and the troublous times after.

One of the very keenest of his jests, which is undoubtedly authentic, is so commonplace in sound that one might easily be forgiven for failing to take in its meaning. In his last days David Reese and John Chauncey, two employees of the house of representatives, used to carry him in a large armchair from his lodgings across the public grounds, up the broad stairs of the capitol.

"Who," he said to them one day, "will be so good to me and bear me in their strong arms when you two mighty men are gone?"

Such a question implied nothing short of a sense of intellectual immortality.

When he had taken to his bed for the last time a visitor told him he was looking well.

"Oh, John," was the quick reply, "it is not my appearance, but my disappearance, that troubles me!"

One day a member of the house of representatives, who was noted for his uncertain course on all questions and who confessed that he never investigated a point under discussion without finding himself a neutral, asked for leave of absence.

"Mr. Speaker," said Stevens, "I do not rise to object, but to suggest that the honorable member need not ask this favor, for he can easily pair off with himself!"

One anecdote always remembered in connection with Stevens illustrates his unostentatious charity. A beggar woman met him one morning as he was limping to the house.

"Oh, sir," she said, "I have just lost all the money I had in the world!"

"And how much was that?"

"Oh, sir, it was 75 cents."

"You don't say so?" he replied, putting a five dollar bill in her hand. "And how wonderful it is that I should have found what you lost!"

### THE HUMAN BRAIN.

**Its Capacity to Receive the Impressions of a Lifetime.**

Authorities differ as to the capacity of the average brain to receive the impressions of a lifetime. "It is pretty well believed that there is in the brain a center of conservation distinct from the center of perception. We of course know nothing as to the nature of the relation of brain cells to precepts and conservation, but we do know that there must be a relation. The researches of Hammerberg and Thomsen show that the number of cells in the brain is 9,200,000,000. All stimuli, external (through the five senses) or internal (through processes), must leave some trace upon these cells, chemical, physical or dynamic. These stimuli are composed of all sorts of precepts—words and sounds heard; things and

HOSIEDV VALUES WEDE NEVED RETTED

**SATURDAY SPECIAL--CULLANS** a most elaborate range of designs and patterns--in regard to style (strictly up-to-date) 11 distinct patterns to choose from. Marvellous value at 9.30 a.m. Saturday 10c each.

A specialist in Book-keeping, who is also an expert penman, and a specialist in shorthand in constant attendance. The teachers in the literary department also assist in the work. The high character of the college is a guarantee of thoroughness. Catalogue with specimen of penmanship free. Address **PRINCIPAL DYER, D. D.,** Belleville, Ontario.

brain is 9,200,000,000. All stimuli, external (through the five senses) or internal (through processes), must leave some trace upon these cells, chemical, physical or dynamic. These stimuli are composed of all sorts of precepts—words and sounds heard; things and words seen; objects felt, tasted, smelled; sensations perceived in our own bodies; thoughts pushing upward into consciousness. And a little reflection will show how innumerable such imprints must be in the course of a single waking day.

Even without reading, the resident of a city must receive an incalculable number of impressions upon his brain every twenty-four hours. The reading center of the brain occupies a comparatively small area in the back of the left hemisphere and consequently must possess a very small portion of the 9,000,000,000 cells referred to above. We can only guess at the number, but a fair estimate would be about a twentieth, or, say, 500,000,000, which in a lifetime of sixty years would allow us about 25,000 cells a day for the perception and conservation of words and sentences read. These figures may have no scientific value, but at any rate they emphasize a very important fact, and that is that our brain capacity is limited and that we should be sparing of the cells we daily squander.—Dr. Fredrick Peterson in Collier's.

### As Mark Twain Saw It.

When Mark Twain was city editor of the Virginia City Enterprise, back in the seventies, he used to brighten up the columns of the paper with comic paragraphs setting forth the advantages of advertising. These paragraphs were based on all kinds of odd facts—on murders, on crop reports, on kidnapping, on the weather. One paragraph ran like this:

"Germany has just discovered a buried forest in her midst, supposed to be 10,000 years old. If the man who lost it had advertised in the Enterprise, the chances are that it would have been returned to him that night."

### The Ingenious Author.

"I have quite a unique little episode worked out for my new historical novel."

"What is its tenor?"  
"Instead of having my hero fling the driver his purse, I propose to have him proffer the exact legal fare. This will naturally bring on a dispute and afford the hero an excellent and logical opportunity for shedding gore."

### The Useful Policeman.

Mrs. Knecker—Some of these wealthy families have detectives guard their jewels. Mrs. Bocker—I know. We can't keep a cook unless there is a policeman on the beat.

### Two Passions.

Mrs. Prosy—Reading is quite a passion with my husband. Mrs. Dresser—So it is with mine when he reads my milliner's bills!

Falseness is so easy, truth so difficult.—George Eliot.

Belleville, Ont., Oct. 20—There is great gratification in this city to-day, over the fact that the rolling mills, which have lain idle for years, started operations this morning. The eighteen-inch mill is running and the others will start in a short time. Some eighty five men are now employed and the number will be speedily increased to two hundred or more.

### That Night has Passed.

When one is obliged to sit by a smoked lamp chimney, and do their reading or sewing. The high grade American Coal Oil sold at The Medical Hall will give you light without the smoke. Try one gallon. Fred L. Hooper.

Twenty-three were drowned by the sinking of a German ship in a collision in the British Channel.

By a ukase yesterday the Czar granted freedom of worship to the sect of "Old Believers."

The report that the Duke and Duchess of Marlborough have signed a deed of separation has been denied.

Seventy or eighty persons were drowned in Atlantic City by the plunging of a train from a bridge.

The deer hunting season opened yesterday. The woods in the North Country are full of hunters looking for game.

Mrs. Mary B. Courtice and Mrs. James Wilson lost their lives in a fire that destroyed the Home for the aged at Bowmanville.

ITCH, Mange, Prairie Scratches and every form of contagious Itch on human or animals cured in 30 minutes by Wolford's Sanitary Lotion. It never fails. Sold by F. L. HOOPER.

The inquest at Buckingham, Quebec over the victims of the strike riots showed that both sides provided arms and ammunition extensively.

Henry H. Hull bookkeeper for the Cambridge Society of Montreal, has disappeared with about \$2,000 of the Society's money, and there are charges of perjury made against him.

We can live without food thirty days or more. We can live without water seven days, but we cannot live five minutes without air. Moreover, we can as readily poison ourselves with foul air as with foul food or water. Get these three things into our heads in their true proportion, and we will do something at once to supply the stables as well as our houses with pure air.

Thomas A. Edison has accomplished a surprise for the world. He has worked out successfully the problem of cheap power. He promises to put on the market within six months a new storage battery which will enable every man to travel in his own private carriage at about the cost of car fare. Without danger, without breakdowns without cost, almost, a carriage, once supplied with the new power for \$200, will travel without repairs for fifteen years, for 100,000 miles if necessary, says the wizard. In fifteen years from now the horse will be a curiosity: we shall be paying fifty cents to look at him in sidshows, said Mr. Edison to an interviewer.

#### A Stove Talk.

The stove season is nearly here again and you are beginning to plan for that new up-to-date Range and thinking of the comforts, which it will bring to you. We wish to announce to you that we find ourselves in a much better position than formerly to accommodate this growing trade. Increased floor space, and light enables us to make a much larger exhibit of this class of goods. Imperial Oxford Ranges still lead, but we have several other good and up-to-date lines. Sizes and prices to suit everyone. Be sure and inspect our stock before you purchase. It will be a pleasure for us to show you the goods.

**Ryrie Bros Limited**  
Toronto, Ont.

nought death's effacement, think of them, as the custode slowly swings him forward on his hinges, so that the day-beams may bring out more clearly still the arresting charm of his serious face, his outstretched arm, and grave, gallant bearing? Looking at him, whose heart among us is not besieged by an ache of longing that that "young and princely" gentleman on the brave white charger should ride down to us out of his frame, and bring back his world with him? Probably not a better world than ours, but surely, surely a handsomer one.

After awhile the other tourists drift away, but the two men still stand and gaze. Into Burgoyne's mind has come a sense of disgust with the present, a revolt against steam trains and the Cromwell Road—most perfect symbol of that bald, unending, vulgar ugliness, which, in some moods, must seem to everyone the dominant note of nineteenth century life. The light-hearted Byng, who always takes his color from his surroundings, is hushed into silence that is almost reverent too.

"What a difference there is between his Italian and his English pictures," he says, presently. "Do you remember the Marchesa Balbi, and those divine Balbi children in the Grosvenor, last year? Oh, no! by-the-by, you were in

## OPERATIONS ON DOLLS

NOW LESSONS ARE GIVEN IN A LONDON HOSPITAL.

Little Patients are Taught to Work and Play — Tasks are not Compulsory.

Among various places where London County Council school work has begun again is the Alexandra Hospital for children with hip disease. The little patients all greeted the recommencement of work with a sigh of relief.

Three County Council teachers are told off to work among the 65 beds. One or two of the children, of ages from three to twelve, may be too ill to work, while one boy may have a really marvellous talent for drawing and another cannot read. A twelve-year-old boy who came in recently seemed resolved to shirk all lessons, pleading every day a headache, backache, or other similar excuse. At last, however, a sympathetic sister he confided the truth; he had been ill for seven years, and did not know his A B C, and was ashamed to say so.

### NEW COMERS SHY.

Lessons continue from ten to twelve in the morning, and 1.30 to 3 in the afternoon; morning lessons going on simultaneously with the daily surgical work, to the brief pain of which the little folk soon get accustomed. After it, however, and again after dinner, many of the children go to sleep for half an hour or so, and, of course, are not awakened. New-comers are mostly shy or ill, and do not readily join in the lessons; but work is never forced on them, and they are soon eager enough for the break in the long dull day.

### FELL ASLEEP.

The other day Scripture and history lessons went on for some time, the teachers moving rapidly down the wards and spending a few minutes at each bedside to portion out and then criticize the work; later on basketwork, needlework, and drawings were given out, and finally came such physical exercise as was possible. In front of a row of beds on the balcony the mistress stood, moving her arms about in the standard exercises, and, lying flat on their backs, most of the little patients followed her movements with thin white arms and many jokes and much laughter. Then came some singing. A little newly-admitted person watched the lesson with wide, wondering eyes. Two other beds were wheeled quietly back into the ward because their small occupants had fallen placidly asleep.

Lessons being over play begins. Two literary geniuses, aged eleven and twelve, go on with an illustrated story which they are writing, and dolls come out to figure in rather awesome games, in which operations, bandages, temperature-taking, and death, of course, play a prominent part.

### NO COLORS IN ACTION.

Some people may not know that colors are now taken into action. Before a regiment proceeds on service, the colors are placed in safe custody as suits such honorable insignia, and "when Tommy comes marching home again" they will be all the fresher for not being carried through dusty lands and trying rivers. The men whose duty it would have been to carry them and stand by them to the last are nowadays employed in less sentimental, if more useful, duties.

### A THANKFUL MOTHER.

### REMARKABLE WRECK-RAISING.

A somewhat unusual operation in wreck-raising has been carried out in Kiel harbor. Some time since the torpedo-boat "S 126" sank in port after collision with another war-vessel, and notwithstanding the known condition of the sunken boat, the authorities decided to have it brought to the surface. For this purpose two floating cranes of formidable dimensions were utilized, and the broken and twisted hull was fished up from the depths and swung through the air like a bale of merchandise to a barge on which it was laid. The boat

## A SNAP IN A WHEAT FARM NEAR WINNIPEG.

1,066 acres of clean unbroken prairie, the finest wheat land on earth, on the banks of the Red River, 45 miles from Winnipeg, four miles from two railway stations. 815 an acre takes it, \$5,000 cash, balance easy. No better farm, no better investment.

**WAUGH & BEATTIE.**  
12 Merchants Bank Building,  
Winnipeg, Man.

his English pictures, he says, presently. "Do you remember the Marchesa Balbi, and those divine Balbi children in the Grosvenor, last year? Oh, no! by-the-bye, you were in America. The fog seemed to get into his brush whenever he painted an Englishwoman, always excepting Henrietta Maria, who was not an Englishwoman, and whom he was obviously rather in love with."

"Is that a piece of scandal of your own invention, or is it founded on fact?" asks Burgoyne, rousing himself, and looking over his shoulder towards the entrance to the next frescoed, mirrored picture room, whence he hears the sound of approaching voices. In his eye is an idle and mechanical curiosity, mixed with vexation that his short respite from his fellow-countrymen is ended, for the tones that are nearing are those of a woman, a woman who is saying in a key of satisfaction, "Oh, here it is! I thought I remembered that it was in this room."

At the same moment the speaker, as well as the person addressed, came into sight; and in an instant out of Burgoyne's eye has raced away the lack-lustre curiosity, and has given away to an expression of something beyond surprise, of something more nearly verging on consternation; and yet, after all, there is nothing very astonishing in the fact that it is Mrs. Le Marchant who is the woman in search of the Vandyke. There is nothing more surprising in her being at Genoa than his being there himself. At that mart of nations it can never be matter for wonder to meet anyone; but who is this to whom her observation is addressed? It is not Mr. Le Marchant, it is not a man at all; it is a slight woman—

"White as a lily, and small as a wand"—

like Lance's sister, dressed with that neat, tight, grey-tinted simplicity, severe, yet smart, which marks the well-bred Englishwoman on her travels. Is it one of the younger ones, who has grown up so startlingly like her? Miriam? Rose? or is it, can it be, the dead Elizabeth?

(To be continued).

## SHARK PRODUCED EVIDENCE.

### Story of Slave Suppression on the High Seas.

In the days when slave traders dealt illegally in slaves, they often carried them from port to port in "slave dhows."

An English naval officer, Captain D., on the lookout for slave traders, sighted one morning what he thought was a slave dhow and gave chase. On coming up with her he went on board, and, finding negroes there, demanded from the captain his papers, showing that he dealt in slaves. The captain declared emphatically that he carried no such papers, therefore the Englishman had to retire.

The same day some sailors on the English ship caught a shark, and on cutting it open, found inside a small bundle of papers, which proved that the other ship had slaves on board.

Captain D., on discovering this, gave chase again, and came up with the other ship in a port, where she was unloading her cargo. He demanded to see the captain, and, wasting few words, produced the bundle of papers. When the slave trader saw them he turned deathly pale, and, shaking with fright, made a full confession, how he had been carrying slaves to sell at the port, and, on seeing the English man-of-war following him, he threw the papers overboard, little thinking that it would be swallowed by one of the sharks following the vessel and come to light again. This is confirmed by the fact that the original judgment is in a frame, and is on view in the Royal Museum, Kingston, Jamaica, and a photograph of the document is in the possession of a Toronto gentleman.

## A THANKFUL MOTHER.

"I thank you with all my heart for what Baby's Own Tablets have done for my little girl," says Mrs. Antoine Charette, Jr., of St. Boniface, Que. "When I began giving her the Tablets she seemed to be pining away, but after using less than a box she was rapidly gaining and she is now a fine, fat, healthy little one, and I write you this as the acknowledgement of a mother who will never forget what Baby's Own Tablets have done for her child." Letters like this must bring hope and comfort to all mothers who have feeble or sickly children. Baby's Own Tablets will cure all the minor ailments and can be given just as safely to a newborn baby as to a well grown child. If you cannot get these Tablets from your dealer write The Dr. Williams' Medicine Co., Brockville, Ont., and get them at 25c a box.

"Madam," said the master of the house, authoritatively, "when I put my foot down it stays there!" But the little tack on which he brought it down took all the point out of his illustration.

Be There a Will Wisdom Points the Way.—The sick man pines for relief, but he dislikes sending for the doctor, which means bottles of drugs never consumed. He has not the resolution to load his stomach with compounds which smell villainously and taste worse. But if he have the will to deal himself with his ailment, wisdom will direct his attention to Parmelee's Vegetable Pills, which, as a specific for indigestion and disorders of the digestive organs, have no equal.

Mrs. Hasymatch: "I had a dozen proposals before yours. And from smarter men than you, too!" Mr. Hasymatch: "They must have been. How did they manage to crawl out of it?"

DO NOT ALLOW yourself to become alarmed because you have lost your appetite and are losing flesh, but commence taking "Ferrovin" the best tonic. It will build you up quickly.

Ethel: "I rather like that young Doubleday. He has a good firm mouth and chin." Myrtle: "Goodness! Has he been kissing you, too?"

There can be a difference of opinion on most subjects, but there is only one opinion as to the reliability of Mother Graves' Worm Exterminator. It is safe, sure and effectual.

A gentleman who was on a visit to Niagara (when the car raised and lowered by steam-power was in use) went into the starting-house to witness the descent, being too timid to go down himself. After the car started, fully impressed with the danger, he turned to the man in charge, and said, "Suppose the rope should break?" "Oh," replied the man, who had no eye for anything but business, "they all paid before they went!"

## 1,355 KISSES BY THE POST.

### Judge Puzzled to Know How Counsel Got His Figures.

Instead of going to church on Sunday, Mr. Riley, counsel for the fair plaintiff in a breach of promise case, confessed to Mr. Justice Bingham at Liverpool, England, assizes recently that he stayed at home to count the crosses in forty love letters sent from Canada by the son of a Lancashire builder, Mr. Frank Jepson, to Miss Mary Tipping, of Blackburn, who now sued Mr. Jepson for breach of promise of marriage.

"How did you obtain these figures?" asked his Lordship, with a puzzled smile. "You must have read your brief with an attention that is quite exceptional." (Laughter.)

Mr. Riley—To be perfectly frank, my lord, during part of the time yesterday I was counting the crosses in the letters. I regarded it as a mental rest. (Laughter.)

His Lordship—I am afraid you weren't at church.

Mr. Riley—Am I bound to incriminate myself, my lord? (Laughter.)

Mr. Riley, further elaborating his mathematical calculations, remarked that the crosses worked out at three for every weekday and fifteen for every Sunday. (Laughter.)

Mr. Riley explained that the promise

WAUGH & BEATTIE,  
12 Merchants Bank Building,  
Winnipeg, Man.

of marriage was made by the defendant on his twenty-first birthday.

The Judge—Can you tell us the hour? Mr. Riley—I am not instructed on that point, my lord. Still, he was a temperate man. (Laughter.)

The Judge—Oh, I wasn't thinking of that. But was this promise made before he was twenty-one or after twenty-one? Because, if it was made before he was twenty-one, it is no good.

Mr. Riley—There was a long succession of promises, my lord.

Eventually the jury found for the lady, awarding her £10 damages, but his lordship deprived her of costs, stating that these actions for breach of promise between boys and girls were no use to anybody, except, as in this case, that small sums had been extracted from the boy from time to time.

Some persons have periodical attacks of Canadian cholera, dysentery or diarrhoea, and have to use great precautions to avoid the disease. Change of water, cooking, and green fruit, is sure to bring on the attacks. To such persons we would recommend Dr. J. D. Kellogg's Dysentery Cordial as being the best medicine in the market for all summer complaints. If a few drops are taken in water when the symptoms are noticed no further trouble will be experienced.

## A CLOUD OF HAY.

At Sprimont, in Belgium, on June 7th, an hour before noon, people at work in offices were surprised by a sudden darkness which obscured their rooms. Going outdoors, they saw above the centre of the town a dense cloud, like a great mattress, which hid the sun. Here and there the extraordinary cloud was gathered into thick flocculent masses, from which filaments were seen falling to the earth. These filaments turned out to be sprays of hay, and in a short time they lay thick in the market-place. The cloud was composed of a great quantity of hay, which had been carried up into the sky by a whirlwind, and then transported to a great distance by the wind. The cloud drove from north to south, and occupied nearly 10 minutes in passing over the town.

Mother—"I hear that Mr. Jones had the impudence to kiss you at the station. What did you do?" Daughter—"Oh, I kissed him too, so as to make the people think we were relatives."

THE JAPS did it. They supplied the Menthol found in the "D & L" Menthol Plaster, which relieves instantly backache, headache, neuralgia, rheumatism and sciatica.

A child of three years old is half the height that it will ever reach.

Mistress: "Bridget, I don't suppose you mind having dear little Fido in the kitchen with you when we go out?" Bridget: "No, mum; Oi loike t' have him here. Y'see, whin things go wrong an' Oi gits me dander up it's a mighty big relief to have something to kick 'round."

## FROM BONNIE SCOTLAND

### NOTES OF INTEREST FROM HER BANKS AND BRAES.

#### What Is Going On In the Highlands and Lowlands of Auld Scotia.

Major E. W. Blunt, the husband of the Countess of Cromartie, has assumed the name of Blunt-Mackenzie. Her surname, like that of her son, Vicount Tarbat, remains Mackenzie.

The largest quantity of fish that has ever been brought to Kirkwall during a period of four days, was landed there recently, 13 large Grimsby trawlers landing 200 tons of fish.

The top stairs in a house in Walmer Crescent, Ibrox, a fashionable Glasgow suburb, collapsed the other day, and brought down the lower staircase. The tenants were rescued by means of a fire-escape.

The coming of age of Mr. John Peter Grant, jr., of Rothiemurchus, son of Sheriff Grant of Rothiemurchus, was celebrated by several functions held at the Doune House, Rothiemurchus, near Aviemore.

The death has occurred at Berwick of Mr. Thomas George Turner, a well-known townsman. Mr. Turner was 74 years of age. He had been for the past quarter of a century secretary of the Berwick and Tweedmouth Gas Company.

Sir Wm. White is a believer in the turbine for maritime propulsion purposes. In a lecture on the 26th ult in London, on "Modern Warships" he referred to the turbine machinery of the Clydebank-built Cunarder Carmania as a marvel of modern engineering. He expressed satisfaction that the turbine is to be adopted in all new British war vessels.

After six years' waiting, the Victoria cross and donation, together with the usual annuity, has been received by John Ross, who was a trooper in the Highland Mounted Infantry at Paardeberg, and at great personal risk ran to a wounded officer's aid and carried him out of the zone of fire. The incident was seen by General Lyttellon. Ross is now a gardener in the employment of an Elgin nurseryman. He is 33 years of age and a native of Aberdeen.

Information has been received at Stornoway of the death at Lucerne of Mr. William Lees, an old and well-known citizen of Stornoway. The deceased, who was 84 years of age, was in his early life a shipmaster, having served his apprenticeship with his father, who was a well-known master mariner, sailing out of Stornoway in his own vessel, in which he visited nearly all parts of the world. After his retiring from the sea, Mr. Lees was appointed harbor-master and collector at Stornoway.

Mr. George Thompson, the oldest man

## AUSTRALIA TO GROW LINEN FLAX.

### Experts Find Fibre Can Be Raised in State of Victoria.

It has for some years been demonstrated that linen flax can be successfully grown in the State of Victoria, reports the Canadian commercial agent in Australia. In favored districts an acre of land will produce three tons of flax and seed. The state department of agriculture has encouraged its growth by a system of bonuses for the cultivation and extraction of the fibres. The profitable nature of the New Zealand crop—though of quite a different variety—has drawn the attention of growers to the remunerative results which should be attained in this state. Hitherto, the chief difficulty to overcome was the absence of a process by which the flax straw could be quickly treated, and the tedious methods in the preparation of the fibre in a marketable condition.

To overcome all difficulties heretofore experienced in growing flax, a Melbourne firm is now obtaining patents throughout the world for a process that is said to produce a much larger yield of fibre of greater strength, and of an unstained or natural color, which, for the purpose of manufacturing such lines as linen, damask, canvas, etc., requires no chemical bleaching in the finishing operations. The state expert strongly favors this new process, after exhaustive trials, on account of its expedition in producing fibre of exceptionally fine quality.

The flax in its rough condition is passed through a machine consisting of three pairs of rollers, after which it is immersed for an hour in a bath of hot water, containing added ingredients (not chemicals). Then the material is drained and dried, put through the breaking machine, and finally through the scutcher. To make a superfine quality it is washed twice, by which means the fibre is made pure white. In addition to the great saving of time, the inventors claim there is little or no waste (tow) and thereby much greater quantities of finished flax are produced of a stronger quality than by any process hitherto followed.

### COULD SCARCELY WALK.

#### A Rheumatic Sufferer Cured by Dr. Williams' Pink Pills.

Rheumatism is rooted in the blood—that is a medical fact every poor rheumatic sufferer should know. Liniments and outward applications cannot possibly cure rheumatism. They are a waste of money, and while the sufferer is using them the disease is steadily growing worse—is slowly but surely taking a firmer grasp upon the entire system. Rheumatism must be treated through the blood. That is the only way in which the poisonous acid can be driven out. Dr. Williams' Pink Pills actually make new blood and thus always cure rheumatism. Every dose of these pills helps to make new rich red

# DARE HE?

## OR, A SAD LIFE STORY

### CHAPTER III.

"Do you know that Willy has been sent down again?"

Six weeks have passed since Burgoyne's eye followed his quondam friends down Mesopotamia, and he is not in Oxford now. He left it, indeed, twenty-four hours after the re-encounter described; left it with something of a determination never to revisit it. This, too, in spite of the good Brown's vociferously reiterated invitation to him to run down for another Sunday whenever he should feel inclined, and which he accepted civilly, knowing that he should never feel inclined.

At the present moment he is pacing up and down the still wintry, north-wind-swept walk of a country-house garden in Shropshire, in the company of a lady whom he has known as long as he can remember; a lady who would have been a friend of circumstance, even if she had not been one of choice, since her home has been in the immediate neighborhood of the only one he has ever had; a lady whose friendship he has tested by letters on thin paper from New Guinea and Central Africa all about himself; at whose feet he has laid on his return more heads, and skins, and claws than she has well known what to do with; whose husband he thought a very good fellow, and to whom he wrote a very nice letter on that husband's death; lastly, concerning whose only child has been made the communication that opens this chapter—"Do you know that Willy has been sent down again?"

"I did not know it; but I am very sorry now that I do know."

"You need not be," returns she cheerfully, "he does not mind it in the least; indeed, happily for him, most of his friends have been sent down too."

"What has he been doing this time? Putting the porter into the fountain? or screwing up the dean? or what other playful little peasantries?"

"You need not speak in that nasty sarcastic voice," says she, half laughing and half vexed. "After all, you must know that young men will be young men, or, at least, if you do not know it now, you must have known it once."

"If you take that tone to me," retorts Burgoyne, smiling, "I shall have to souce your gardener in your fountain, to prove my juvenility; but come, what has he done?"

"Absolutely nothing, as far as I can make out," replies she, spreading out her hands as if to emphasize the statement.

"Do you mean to say that the authorities have sent him down de gaite de coeur without any provocation at all?" asks Burgoyne, in a tone out of which he is unable to keep a shade of incredulity.

"I mean to say," replies she, nettled, "that he had a few men to supper, and I suppose they were making a little noise; did you ever in your day hear of an undergraduates supper where there was not noise? However, in this case, from what he tells me, Willy was taking positively no part in it."

"He was sitting in a corner, with cotton-wool in his ears, reading Aristotle," suggests Burgoyne teasingly.

"And it seems," continued she, not deigning to notice the interruption, "that the proctor came in, and was very rude, and Willy was told to go to the dean next morning, and he either was

would meet with his approbation? He has probably made up a party with some of the other innocent victims of a corrupt University system."

"No, he has not; the friend with whom he was to have gone has thrown him over; at least, poor man, that is hardly the way to express it, for he has broken his leg; but anyhow he is hors de combat. If you went with Willy," she adds, after a pause, and with a rather wistful air, "I should be sure of knowing if anything went wrong."

"I am to dry-nurse him, in fact, only I stipulate that, if he brings you home a Contadina daughter-in-law, or 'commits himself with a countess', like the commercial gentleman at Todgers', you are not to hold me responsible."

And so it comes to pass that a fortnight later, while April is still young, Burgoyne, en route to his Amelia, is standing at a window of the Hotel de Genes at Genoa, noisiest of hotels, though, to be sure, that is its only fault. He is looking out at the gay market that is held in the piazza below—the gay market that is over and gone by nine o'clock.

It seems odd that so many women, so many umbrellas, so many baskets, so many oranges and lemons—each lemon with a glossy green leaf still adhering to its inch of stalk—so many fresh vegetables, can be swept away in so short a time. But they are; all the gay kerchiefs are fled, and have been replaced by a row of flaccid with sad droop-headed horses, a good hour before Byng appears—appears radiantly well washed and apologetic.

"How many morning chapels did you attend last term?" asks Burgoyne with some dryness.

"It is a vile habit," replies the other, sweetly, sitting down at a little table, and unfolding his breakfast napkin. "I do not mean going to chapel, but being so late; however, I really am improving. I am a quarter of an hour—twenty minutes earlier than I was yesterday, and, thank God, we have no train to catch to-day."

Burgoyne is rather inclined to echo the thanksgiving a little later in the day, as they stroll with the pleasant vagueness with which one strays about a little-known foreign town, not exactly knowing whither, through the streets of the quently city, with which neither of them has much acquaintance; Byng's twenty-two years of school and college, of cricket and grouse, and stalking, have left not much margin for aught else; and Burgoyne being in the case of some widely wandered shols and explorers, to whom the Nyanza Lake and the Australian Bush are more familiar than Giotto's Campanile or the Lagoons. There is a greyish-looking English sky, with now and then little sprays of rain, and now and then flashes of warm sun.

Neither of the young men know much Italian, and such as they possess they are ashamed to air before each other in asking their way, so they wander wherever chance or fancy leads them. They look curiously into churches, they walk down deep narrow streets, whose houses have for three centuries been threatening to embrace each other across the straight sky strip far, far above their heads. They glance at the palace fronts, and wonder at the sculptured portals where fresco and fruit garland and fine tracery speak of a time at more leisure for delicate work

mariner, sailing out of Stornoway in his own vessel, in which he visited nearly all parts of the world. After his retiring from the sea, Mr. Lees was appointed harbor-master and collector at Stornoway.

Mr. George Ferguson, the oldest master joiner in Glasgow, has died at his residence in Lenzie. Born eighty-four years ago at Carlstairs, deceased became a joiner on his own account as far back as 1846, and among his contracts were Coats' Spinning Mills, Paisley; Kelvingrove Art Galleries, and the Technical College. He was a widely travelled man, and was a keen curler and bowler.

The Docks and Pilotage Committee of the Aberdeen Harbor Board reported that they had under consideration the subject of providing an additional pontoon dock. They recommended that, as suggested by the harbor engineer, the dock should be 150 feet long, 42 feet wide, with draft on keel blocks 16 feet, and a lifting capacity (deadweight) of 600 tons, to cost £17,850.

There has passed away in her hundredth year Miss Macrae, who resided with her nephew, Bailie Macrae, Beechwood, Nairn. She retained all her faculties up to the last, and could tell many stories relating to stirring times of last century. Miss Macrae was present in Ferintosh Church when the joyful news of Wellington's victory at Waterloo was announced, and she could recall the rejoicings in Aberdeen on the coronation of Queen Victoria.

"His wife is very accomplished. She can cook or play a piano with equal facility." "That is an accomplishment. I have never before heard of anyone cooking a piano."

**A Clear Healthy Skin.**—Eruptions of the skin and the blotches which bluish beauty are the result of impure blood caused by unhealthy action of the liver and kidneys. In correcting this unhealthy action and restoring the organs to their normal condition, Parmenter's Vegetable Pills will at the same time cleanse the blood, and the blotches and eruptions will disappear without leaving any trace.

Passer-by: "I thought you were blind?" Mendicant: "Well, mister, times is so hard and competition is so great, that even a blind man has to keep his eyes open if he wants to do any business at all."

**A SKIN THAT BURNS** with eczema, and is covered with eruptions that discharge a thin fluid, may be made smooth and healthy with Weaver's Cream. But this external remedy should be used in conjunction with Weaver's Syrup.

#### THE WOMAN'S PRIVILEGE.

"What are you looking so glum about?"  
"Oh! my fiancée has changed her mind."  
"Still worrying over that? It was fully two weeks ago since you told me she had broken off the engagement."  
"Oh! it's been on and off again twice since then."

system. Rheumatism must be treated through the blood. That is the only way in which the poisonous acid can be driven out. Dr. Williams' Pink Pills actually make new blood and thus always cure rheumatism. Every dose of these pills helps to make new rich red blood which sweeps the poisonous acid from the system, loosens the aching joints and muscles and gives the rheumatic new health free from pain. Among those who can bear witness to the truth of these statements is Miss Dorsina Langlois, of St. Jerome, Que., for weary months she suffered from rheumatism and had begun to think she was incurable. "I could not straighten up," says Miss Langlois. "My limbs were almost useless, so stiff were they. For many months I endured such pains as only rheumatic sufferers can understand. Although only thirty years of age the suffering I endured actually made me look like an old woman. I used liniments and tried several medicines, but got not the slightest help until almost by chance my attention was directed to Dr. Williams' Pink Pills. I began taking them and in the course of a few weeks I could see they were helping me. Little by little the pain began to go, and the stiffness to leave my joints. I continued taking the pills for several months when every symptom of the trouble had disappeared. I have not felt a twinge of rheumatism since, and I bless the day Dr. Williams' Pink Pills came to my notice."

Dr. Williams' Pink Pills never fail to cure rheumatism because they go right to the root of the trouble in the blood. That is why these pills cure all the common ailments due to poor and watery blood, such as anaemia, headaches and backaches, indigestion, neuralgia, St. Vitus dance, general weakness, and the distressing irregularities that afflict women and growing girls. If you need a medicine you will save money by taking Dr. Williams' Pink Pills at once. See that the full name, Dr. Williams' Pink Pills for Pale People is printed on the wrapper around every box. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

#### LEPROSY IN SWISS VILLAGE.

The Place Has Been Often Visited by Mountain Climbers.

Tourists in Switzerland have been suddenly horrified by the discovery that leprosy has flourished in a little village in the Alps which has been frequently visited by mountain climbers, and that the Swiss authorities knew nothing about it. The terrifying fact was discovered through a conscript presentation, himself for military service the other day who was discovered to be suffering from leprosy. He declared that many people in his village suffered the same way.

The village which harbors this scourge is called Guttet, and is about two hours distant from the railway station of Lousche, in the Haut-Valais.

So much indignation has been expressed by tourists at the risks which the authorities have permitted them to incur through negligence in controlling the hygienic status of Guttet, that at once the famous Prof. Jadassohn, the great skin specialist of Berne, was sent to investigate. He discovered that among the 200 inhabitants of Guttet five were in a very advanced stage of the malady (one has since died) and numerous others showed suspicious symptoms.

The lepers have been temporarily isolated in a few huts in the midst of the extensive grazing grounds between Galm and Torrentalp, until proper provision can be made for their care.

The hotelkeepers of the neighborhood are furious at the discovery, as it will ruin their trade. Among the country people the disease was known to have existed in certain families in Guttet for several generations.

cotton-wool in his ears, reading Aristotle," suggests Burgoyne teasingly.

"And it seems," continued she, not deigning to notice the interruption, "that the proctor came in, and was very rude, and Willy was told to go to the dean next morning, and he either was a little late, or mistook the hour, or some trifle of that sort; and when he did go he was told that he was sent down. However—with some triumph in her voice—"it did not matter in the least—he did not mind; in fact he was rather glad, as he has long wanted to go to Italy in the spring."

"To Italy? Then perhaps we shall meet; I, too, am going to Italy."

"Are you?" she says. "Why should you go to Italy? There is nothing to kill there, is there? Is not it at Naples that they go out in full chasseur uniform to shoot tomits?" Which speech is her revenge for his sarcasms upon her son.

But, Burgoyne's face has taken on a rather careworn look; and her little arrow misses its mark.

"You see Amelia is at Florence," he says explanatorily; "her father, Mr. Wilson, had a clergyman's throat in the autumn, and was obliged to give up duty, so they all went abroad. They have been abroad all the winter; you know that I have not seen her since I came back from the Rockies."

They are now walking in a winding shrubbery path, whose laurels protect them from the pinching wind. They have turned several corners, and traversed half a quarter of a mile before either again breaks silence. It is the lady who does so finally.

"Jim, how long have you been engaged to Amelia?"

There is a sigh mixed with his answer.

"Eight years—eight years this next June; it was the second summer term after I came up."

"And as far as you can see, you are likely to be engaged for another eight years?"

"As far as I can see—yes; but then I cannot see far."

Perhaps his companion is a fanciful woman; but she notices that this time he does not sigh.

"Poor Amelia," she says, half under her breath.

"Poor Amelia," repeats he sharply; "why poor—for being engaged to me? You are not very complimentary, Mrs. Byng."

She looks up friendly at him. "For being engaged to you, or being only engaged to you?—which? I leave you a choice of interpretation."

But either Jim is too ruffled by the pity expressed in her tone towards his betrothed, or her remarks have provoked in him a train of thought which does not tend towards loquacity. The loud rooks, balancing themselves on improbably small twigs above their heads, and hoarsely melodious, calling out their airy vernal news to each other, are for some time the only sound that breaks the silence of the cold spring afternoon. It is again Mrs. Byng who at last infringes it.

"If you and Willy are both going to Italy, why should not you go together?"

Jim does not immediately answer; the project is sprung upon him with such suddenness that he does not at once know whether it is agreeable to him or the reverse.

"You do not like the idea?" continued the mother, trying, not very successfully, to keep out of her tone the surprise she feels at his not having jumped at a plan so obviously to his own advantage.

"I did not say so. I did not even think so."

"Willy is an ideal fellow-traveller," says she, "excelling in the matter of punctuality; I warn you"—laughing—and you would always have to drag him out of bed."

"But," suggests Jim, slowly, "even supposing that I embraced your design with the warmth which I see you think it deserves, how can you tell that it

threatening to embrace each other across the straight sky strip far, far above their heads. They glance at the palace fronts, and wonder at the sculptured portals where fresco and fruit garland and fine tracery speak of a time at more leisure for delicate work that has no end but beauty, than this breathless one. Everywhere in the gardens they see budding green, untrained roses making bowers, ripe oranges hanging over the walls. They jostle against women, each made charming, even the ugliest of them, by the black lace kerchief tied about her head.

"Henry James says that an English crowd is the best-looking in the world," says Byng, in a tone of strong dissent, following with his eyes a little tripping figure, and with an expression of pronounced approbation in those eyes, which gives Burgoyne a momentary twinge of misgiving as to his chaperonship. "I should put it the other way up, and say that they are the ugliest."

"All crowds are ugly, and most individuals," replies Burgoyne, misanthropically, looking up from his guide-book.

They are sauntering down the Via Garibaldi, street of palaces that deserves an antiquer name than that of the somewhat shoddy and recent hero who has godfathered it. Noblest Via, down whose stately length great towering bulks succeed each other in solid majesty on either hand; bulks on whose high fronts, lofty portaled, o'errun with fresco, glorified by brush and chisel, strength and beauty take hands in unending wedlock. Into the noblest of all, up the echoing stone stairs, down which the feet of the masters have forever ceased to tread, they enter. As we all know, it has been given to the city of Genoa—lovely queen-city meriting so great a gift—by the dying hand of its latest possessor, the last of that high and beautiful race—if we may judge of the dead by their pictures—who paced its floors, and went forth in final funeral pomp through its worthy-to-be-imperial portals.

Burgoyne and Byng are standing before the great Vandyke. The custode, opening a shutter, and throwing wider a door, casts a brighter ray of light for the staring Britons—several others have joined themselves to our friends—to gaze at it by. What does the stately gentleman on his great white horse, whom Vandyke has made able to set at

## Throat Coughs

A tickling in the throat; hoarseness at times; a deep breath irritates it;—these are features of a throat cough. They're very deceptive and a cough mixture won't cure them. You want something that will heal the inflamed membranes, enrich the blood and tone up the system . . . . .

## Scott's Emulsion

is just such a remedy. It has wonderful healing and nourishing power. Removes the cause of the cough and the whole system is given new strength and vigor . . .

# THE HALLOWED NAME

## The Duty of a Son Is to Give Glory to His Father's Name.

"Our father who art in heaven, hallowed be thy name."—Matt. vi., 9.

By itself the petition "hallowed be thy name" means little to us. Why should mortals pray that the name of the Almighty should be revered? Great as may be the sin of blasphemy, surely there are many others against which we need to pray before this, many that work greater harm to him who prays and to the whole of society. Indeed, does not the act of prayer suggest that the petitioner already holds in reverence the name of him whom he addresses?

But couple the two parts of the sentence together, "Our Father, let thy name be hallowed," and what a new significance appears. It is not the solitary dignity nor the exclusive office even of the Most High that we would revere, but a new relationship to be revered, a family dignity to be maintained. It is the son's cry: "Make me worthy of my Father's name."

The Most High is best worshipped by whatever gives greater worth to the name which the great teacher then gave him and the relationships for which it stands. The way to reverence him is to live as true brother to man, his child, to be yourself his true and worthy child. Work for man is thus often true worship of God. The great prayer opens with a petition that embraces in its sweep both the divine and the human—

### THE WHOLE UNIVERSE OF BEING.

Not by carving ancient names which have long stood for conceptions of the Deity, gilding them, or adorning their letters; not by putting these names over our altars, in our halls of devotion, or wearing them on our brows, shall we honor the infinite Father of spirits. Only an unworthy son would be satisfied with thus seeking to give glory to his father's name. It is an indolent way of worship that does no more than bow before names and phrases.

If we are his children we shall care more for the family honor, for the family name, than for any other form of reverence; we shall honor the head of the house by lifting up its lowliest member. Whatever degrades humanity dishonors the divine. You cannot separate your attitude to God from your attitude

to mankind, to every man, woman and child. He alone hallows the name of father who does the duty of a son in purity of heart and nobility of neighborly service.

Too many are there who think to honor heaven with their pious phrases or with costly consecrated edifices, while the phrases deaden their ears to the cry of their oppressed brothers and the buildings have been built by the blood of those who lift worn, despairing hands to the same Father. With their lips they cry, "We worship thee," while all their lives do but dishonor him by defrauding and debasing as many as they can of his own family.

The blasphemy this age needs to fear is the failure to realize the essential divinity of every human being; the sin it most needs to dread, the worst of all in the sight of heaven, is the regarding of the sons of God as

### MACHINES OF MERCHANDISE.

Labor may be a commodity; but the laborer can never be a commodity in a just age. This is a lost world as soon as we lose the sense of reverence for our fellows and begin to think of them as but tools for our service and the means alone of our satisfaction.

Back of all our dealings with men must lie this great thought of the common brotherhood, the one family, and back of that will lie the simple and sublime thought of the one Father of us all. This will mean not the reverence that looks up to an imaginary throne in the skies but the reverence that looks out through all the world and sees in it the household of heaven, the dwelling place of the family born of the Father of spirits.

Just as the thought of the true family life makes the home the most hallowed spot on earth, so this thought of the divine family of which we are all members, this conception of such a family with such a father, will make the whole earth a hallowed place, will make all living and doing either worship or blasphemy, and will make the noblest endeavor, the highest religion of every life, the bringing of the Father's likeness to all his children and the joy of his love to all their lives.

HENRY F. COPE.

# THE S. S. LESSON

INTERNATIONAL LESSON,  
NOV. 4.

Lesson V. The Lord's Supper. Golden Text: I. Cor. 11:24.

### THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

The Last Supper.—From the narrative of the synoptic Gospels alone the reader must inevitably derive the impression that the Last Supper of which Jesus partook with his disciples on the eve of his passion was the Paschal meal (comp. Matt. 26: 2; 17:19; Mark 14: 14-16; Luke 22: 7-15). But commentators and New Testament scholars generally prefer to follow the clearer and more definite chronology of John who specifically dis-

table. The simple courses of the meal would follow the regular ceremonial of the passover feast which was as follows: (1) A cup of red wine mixed with water was partaken of (Comp. mention of a first cup, Luke 22: 17). After this all guests present washed their hands. (2) Bitter herbs with unleavened cakes and a sauce called charoseth made of fruits and vinegar were eaten, the unleavened bread and herbs being dipped into the dish holding the sauce. (3) A second cup of wine with a blessing, after which the first part of the hallel (Psalms 113, 114) was chanted by the company. (4) The Paschal lamb was served. We note that no mention of the lamb is made in connection with the gospel reports of the Last Supper. It has been suggested that the simple bread which Jesus broke and gave to his disciples took the place of the Paschal lamb and that it was at this point of the evening meal that Jesus instituted what has since been known as the Lord's Supper. (5) A third cup of wine followed the breaking of the bread. (6) A fourth cup of wine mixed with water was, like the three preceding,

# KING EDWARD'S TAILOR

CHAT WITH THE MAN WHO CLOTHES HIS MAJESTY.

His Tailor Says That the King is the Best Dressed Man in Europe.

I was fortunate enough to meet him outside the Hotel Bristol during the King's last visit to Paris, and, thanks to a common acquaintance, was enabled to have a chat with him.

He was the tailor of his Majesty, King Edward the Seventh, and, therefore, an authority on dress, for we all know that the King is the best-dressed man in Europe. His tailor has formally claimed this distinction for his august customer, says Pearson's Weekly.

"I have never known," he said, "anyone who had such a genius—genius is the only word to express his gift—for knowing what to wear and how to wear it."

"In any other position his enlightened taste would certainly have made his fortune."

"While other men will spend half-an-hour in deciding upon a pattern for trousers, his Majesty will choose a dozen in as many minutes, with unerring taste."

"While he was still Prince of Wales, I was in the habit of waiting upon him at Marlborough House with my patterns. 'I can safely say that upon these occasions he never kept me more than ten minutes or a quarter of an hour; during that short time he would choose perhaps \$500 worth of cloth.'

"Eleven in the morning was the hour invariably fixed for these appointments."

### HE IS A GOOD JUDGE OF CLOTH.

"At the first stroke of the clock the King would leave the library and enter the room where I was awaiting him, and, after a cheery 'Good morning,' would at once begin his selection in the most business-like manner imaginable. His punctuality was extreme. I have never known him even a minute behindhand."

"Once, it is true, my watch showed two minutes past the hour when he made his appearance, and I thought that, for once, I had caught him tripping; but I am bound to confess that later in the day I learned that it was my watch, and not that of the King that was at fault."

"Occasionally, when he hesitated for a moment between patterns, he would deign me the honor to consult me."

"Do you think this would suit me, Mr. —?" he would ask, or, 'This is nice! Don't you think so?'

"And I always approved his choice, for reasons of taste, and not for politeness' sake; for he was always right."

"Often he would come to my establishment, to inquire whether I had any new patterns, and would sometimes be accompanied by one or other of his sons. He never tried to influence their choice; but I always noticed that they followed his taste, and chose the same sort of patterns as himself; a proof of their good taste."

"We often had quite lengthy conversations. He has a thorough knowledge of the respective merits of Cheviots, Saxons, diagonals, and checks; and his acquaintance with the technique of my art never failed to surprise me."

### 100 PAIRS OF TROUSERS A YEAR.

"Naturally, the King pays a good price for his clothes; but by no means an extravagant one, as might be imagined. If you wanted the same things, you would have to pay just as much. For instance, from two to two and a half guineas for a pair of trousers; ten for a lounge suit. An evening suit costs, perhaps, half as much again. They are, of course, the acme of perfection, as regards cloth, lining and cut."

# HOME.

### SOME DAINTY DISHES.

Swiss Cutlets.—Chop small two or three hard-boiled eggs, add to them two tablespoonfuls of white breadcrumbs, the same of grated cheese, a pinch of curry powder, and sufficient cayenne to taste. Bind all with a beaten egg. Form into pear-shaped cutlets, dip into frying batter, drop into boiling fat and cook till a golden color. Scatter grated cheese over just before serving.

Stew of Cod.—For this take about one pound of boiled cod free from skin and bone. Make some white sauce with milk and warm up the flakes of fish in it, adding two or three hard-boiled eggs cut in quarters and about half a pound of mashed potato. Arrange all together lightly in a pyramid on a china baking dish, scatter fine breadcrumbs over, and bake till it is a delicate brown.

A Savory Cheese Pudding.—Take a teacupful of milk, grated cheese, and breadcrumbs, with seasoning of cayenne pepper, white ditto, dry mustard, salt, and one egg. Put all the dry ingredients with the milk into a saucepan, and stir gently over a low fire till the cheese is dissolved. Beat up the yolk of egg and add to the mixture. Lastly, add the white, beaten to a stiff froth, pour into a pie dish, add a lump of butter, and bake twenty minutes in a moderate oven. Serve quickly.

Scottish Bread.—For an agreeable change, make oatmeal bread. Make as any good yeast bread, with one-third whole wheat flour and two-thirds oatmeal (not breakfast food), ground fine. Add two tablespoonfuls of butter, one tablespoon of brown sugar, and salt to taste. This for two loaves. Mold into oval shapes, let rise again, and bake one and one-fourth hours or a little more, so as to have a well baked crust.

LITTLE SCONES.—Prepare pie crust as for nursery crust, good but not too rich, with butter, adding one-fourth teaspoon of soda melted in warm water. Roll out to the thickness of one-third inch, cut into rounds the size of a dollar, and bake at the top of the stove on a griddle, light brown on both sides. They should taste like pie crust biscuit of the top baking. When ready to serve open these hot, butter well, and spread with raspberry jam. This tea cake makes a dainty relish. Always add the soda melted in warm water the last thing to the flour.

Apple Cider Jelly is a piquant and appetizing relish. Boil best sweet apple cider down till it becomes a firm jelly. Put in an enameled saucepan. Do not use a metal pan, as it will spoil the color. It is easy and excellent, and the best sweet cider must be used.

County Fair Cake.—This cake always takes the prize at the fair. Take three cups of sugar, one and one-half cups of butter, six eggs, one and one-half cups of cream, one-half pound currants, one-fourth pound citron, one nutmeg, sufficient flour, two teaspoonfuls of soda. Beat eggs together well, add sugar and butter, and beat smooth. Add fruit. Dissolve soda in warm water and add to one-fourth cup of sour cream and make the cake quite thick to prevent the fruit from settling at the bottom. Seed raisins, halve but do not chop, wash in hot water, dredge with flour. Cut citron in thin slices, put dough in pan, then a layer of citron and again until it is evenly distributed through the whole. It is a great favorite.

Beet Tops.—Make a very good vegetable course. Take the tender young tops of beet, pick and wash carefully as you would spinach, throw them into fast boiling water and cook them for half an hour. Then strain and carefully press out all the moisture. Melt a piece of butter in a saucepan over the fire and put back the beet tops chopped finely, season with salt and pepper. When hot place on a fancy china dish.

to his disciples on the eve of his passion was the Paschal meal (comp. Matt. 26, 2; 17-19; Mark 14, 14-16; Luke 22, 7-15). But commentators and New Testament scholars generally prefer to follow the clearer and more definite chronology of John who specifically distinguishes this supper from the passover feast which on the day of crucifixion was still to be eaten. "And they themselves entered not into the Prætorium, that they might not be defiled, but might eat the passover," Pilate therefore went out unto them." (John 18, 28, 29). "For some thought because Judas had the bag, that Jesus said unto him, Buy what things we have need of for the feast" (John 13, 29). The two references just quoted indicate (1) that on the day of crucifixion in the morning the passover feast was still to be eaten by the Jews, and (2) that the disciples during and after the Last Supper thought of the passover feast proper as still to be provided for by some purchases to be made by Judas. The statements of the synoptists on this point refer rather to the significance of the meal in retrospect, while those of John cover the whole period of time from the Supper to the crucifixion in a careful chronological survey with clear indications of time all along. It has been suggested that the words of Jesus as quoted by Luke, "With desire I have desired to eat this passover with you before I suffer; for I say unto you, I shall not eat it, until it be fulfilled in the kingdom of God" (Luke 22, 15, 16), furnish us the key to the solution of the apparent disagreement between the statements of the synoptists and those of John, the regular passover being purposely anticipated by one day by Jesus since he knew that on the day following he would suffer the death on the cross. The Last Supper therefore must be thought of as having taken the place of the Paschal meal for Jesus and his disciples.

It must be borne in mind that the exact sequence of events in this closing period of Christ's life cannot be determined with certainty in detail, and that the exact date and time of none of the events is known. For the sake of clearness of view, however, it is well to have at least a tentative scheme of chronological sequence. The most probable order of the chief events of the passion is the following: Thursday, Nisan 14, after 6 p.m., The Last Supper. Following the Supper and before midnight Christ's Farewell Discourses and Interspersory Prayer. About midnight, the Agony in Gethsemane, the Betrayal and Arrest. Friday between midnight and 5 a.m., the Trial before the Jewish Authorities. Between 5 and 7 a.m., the Trial before Pilate and the Examination of Herod. 9 a.m., the Crucifixion. 5 p.m., the Burial. The death of Christ, our sufficient Passover, thus coincided with the time for slaying of the Paschal lamb, which occurred on Friday afternoon, the Paschal meal of the Jews following later on the same evening.

Verse 17. The first day of unleavened bread.—This was Thursday, the 14th of Nisan, which commenced after sunset on the 13th. The feast of unleavened bread properly followed the passover and lasted seven days, from the 15th to the 21st of Nisan. The two feasts were sometimes included in the term "passover," sometimes in the term "unleavened bread." This first day, Nisan 14th, was in reality a day of preparation, and was often so called (Paraskeue).

18. To such a man.—Apparently an acquaintance and friend of Jesus and his disciples whom Jesus doubtless specified by name, though for some reason the name is not given in any of the Gospel narratives.

The Teacher saith, My time is at hand; I keep the passover at thy house.—The manner of address and the familiar form of the message makes it almost certain that the person so addressed was a disciple of Jesus, though, possibly, like Nicodemus and others, a secret disciple.

of the evening meal that Jesus instituted what has since been known as the Lord's Supper. (5) A third cup of wine followed the breaking of the bread. (6) A fourth cup of wine mixed with water was, like the three preceding, passed from guest to guest around the circle. The second part of the hallel (Psa. 115-118), concluded the ceremonial. 21. Betray me — Lit., Deliver me up, that is, play the traitor.

23. He that dipped his hand with me in the dish — The dish of charoseth (comp. 20 (2) above). John who was an eye-witness of the events goes more into detail in his narrative at this point (comp. John 13, 12-30), though omitting entirely the account of the institution of the Eucharist.

25. Thou hast said — The common formula of assent both in Hebrew and in Greek. Jesus apparently spoke these words in a low voice inaudible to the rest of the company.

26. Jesus took bread, and blessed, and brake it; and he gave it to the disciples and said, Take, eat; this is my body.—We note that it is the bread, and not the flesh of lambs, which Jesus makes the symbol of his body. This fact lends plausibility to the suggestion made above that the Paschal lamb was not partaken of by Jesus at this supper.

27. A cup — The third cup mentioned in 20 (5).

28. Covenant — Some ancient authorities insert the word new before covenant, and the King James version translates "new testament." It is from this passage that the title of our New Testament is derived.

For many unto (Gr. for) remission of sins.—The second "for" in the original indicates intention, "in order that there may be remission of sins." Matthew only records these words.

29. When I drink it new with you in my Father's kingdom — The feast referred to is a symbol of the glorified life in heaven (comp. Luke 22, 30).

30. When they had sung a hymn — The second part of the hallel—(comp. 20 (6) above).

### BY THE RIVER'S BRIM.

"I saw a cowslip by the river's brim," murmured the long-haired borderer, who had just returned from a stroll. "I hope 'twan't one of my cows," said the practical farmer. "Did she slip clear in?" "She would have, but I saw the bull-rush to her assistance."

### ONE ON MARY.

"Now, Mary," said old Podkins, "when you bring in the tea again, always remember to put on the cosy." "Yessir," quoth Mary; and the next time—

—she did.

would have to pay just as much. For instance, from two to two and a half guineas for a pair of trousers; ten for a lounge suit. An evening suit costs, perhaps, half as much again. They are, of course, the acme of perfection, as regards cloth, lining and cut.

"You can easily imagine that the King's wardrobe is well-stocked. He wears a pair of trousers three or four times at the most, and he gets through a hundred pairs in the course of a year. Each year he orders a dozen evening suits, twelve or fifteen frock coats, in addition to vests, and fifteen overcoats; so that, apart from uniforms, his yearly clothes-bill will probably amount to from \$5,000 to \$6,000.

"As to his uniforms, I am quite positive that he alone is capable of describing them all, and of recalling the particulars in which each of them differs from the others, and pleases him, or otherwise. He certainly has the most wonderful memory in the whole of his kingdom. His uniforms number at least one hundred, and their value reaches several thousand dollars.

"He often changes his dress during the day. Happily, he is a quick dresser, and can change with astonishing rapidity. Certainly, among all the customers I have ever seen, no one can approach him in this respect.

"When younger, he had rather a decided preference for striking patterns; but for many years now his taste has shown an irreproachable simplicity. He likes plain things, and is particularly fond of simple navy-blue serge."

So spoke the man who for many years has clothed his Majesty King Edward VII., King of Great Britain and Ireland, Emperor of India, and Arbiter of Taste.

### THUNDER LORE.

Ancient Beliefs as to the Meaning of Noises of the Sky.

Thunder, just because it is a noise for which there is no visible cause, has always excited the imagination of the unscientific; so it is natural that the most outrageous superstitions about storms should date back to the time when everybody, more or less, was unscientific. One old writer explains the belief of his day—that "a storm is said to follow presently when a company of hogs run crying home," on the ground that "a hog is most dull and of a melancholy nature, and so by reason doth foreseen the rain that cometh." Leonard Digges, in his "Prognostication Everlasting" (1556), mentions that "thunder in the morning signifies wind; about noon, rain; and in the evening, a great tempest."

The same writer goes on to say, "Some write (but their ground I see not) that Sunday's thunder should bring the death of learned men, judges and others; Monday's, the death of women; Tuesday's, plenty of grain; Wednesday's, bloodshed; Thursday's, plenty of sheep and corn; Friday's, the slaughter of a great man and other horrible murders; Saturday's, a general pestilence plague and great dearth." After this, the gay and light-some manner shown by Lord Northampton toward these grave matters in his "Defensative" is most cheering. "It chaunceth sometimes," he writes, "to thunder about that time and season of the year when swannes hatch their young; and yet no doubt it is a paradox of simple men to think that a swanne cannot hatch without a cracke of thunder."

### MARRIAGE BY CIGAR.

In Siam the lighting of a cigar indicates a betrothal. In that country a person wishing to become engaged to a girl of his choice offers her a flower, or takes a light from a cigar or cigarette if she happens to have one in her mouth; and thereupon, provided there is no impediment, steps are at once taken to arrange for the payment of the dowry.

Yeast: "Does your wife argue with you often?" Crimzonbeak: "No, indeed! How can you call it arguing when all the talking is on her side?"

fast boiling water and cook them for half an hour. Then strain and carefully press out all the moisture. Melt a piece of butter in a saucepan over the fire and put back the beet tops chopped finely, season with salt and pepper. When hot place on a fancy china dish, garnish with croutons of fried bread and quarters of hard-boiled eggs.

Bran Bread.—Weigh two pounds of bran and eight pounds of wheat flour, and put both into a pan, make a hole in the centre. Mix two and a half ounces of yeast with one quart of warm water, pour this into the pan, and with a spoon work in sufficient flour to form a light batter. Dust some flour over and set to rise for one hour near the fire. After this time the dough would have risen and the meal will be cracked. Then work in more water and a dessertspoonful of salt, until you have kneaded all into a light dough and the paste has worked off the hands. Set this to rise for one hour, covering with a cloth. Make into loaves and bake for an hour.

Calf's Foot Jelly.—Put the two feet, after they have been well cleaned, into a saucepan with two quarts of cold water, let them boil up, skim off the scum as it rises to the surface, and then let all cook gently for four hours; strain the liquor from the feet and let it cool. When cold remove every atom of fat, dip a cloth into boiling water, squeeze it out and wipe over the surface of the jelly. Take the whites of two eggs, wash the shells clean, beat the shells and eggs lightly together with a tablespoonful of cold water, add them to the jelly and whisk all together till the mixture begins to boil. Take out the whisk, let the jelly simmer for ten minutes. Pour boiling water through a straining cloth, then strain the jelly through it into a basin. Favor and sweeten the jelly to taste and pour into a wet mould.

### HINTS FOR THE HOME.

An excellent toothwash is made by adding a squeeze of lemon juice to a tumbler of warm water. This helps to remove tartar and sweetens the breath. Clean water bottles by putting tea leaves, fine ashes or potato peelings into them with lukewarm water. Shake well, empty, rinse with cold water, dry and polish.

Young fowls should have smooth skin and legs, pliable joints and breast bones, plump breasts and necks, bright red combs, and the flesh should be finely grained.

For Tired Feet.—Put a handful of common salt into a quart of hot water, and while it is as hot as can be borne, place the feet in it. Afterwards rub dry with a rough towel.

Bread should always be kept in an earthenware pan, with a wooden cover, and both should be scrubbed out at least once a week, and dried by the fire or in the sun.

Children's Food.—Salt meat of any kind should not be given to children, nor food that is highly seasoned. Fish, poultry, lamb, and mutton are light and can be easily digested. Fruit, when it is thoroughly fresh and sound, may be given with any meal, either raw or stewed. Never allow children to eat much jam, cake, sweets or pastry. The best bread, plenty of fresh milk, butter and eggs should form the staple of their diet.

To Ease a Corn.—At this time of year so many of us are suffering from corns, which as a rule hardly trouble us at all. Rub a little oil of peppermint over a sensitive corn, and the soreness will be eased in the most wonderful manner.

On Biting Cotton.—If you are in the habit of doing much sewing do not bite off the thread, use a pair of scissors. Apart from the fact that biting cotton is injurious to the teeth, this trick often results in a very sore mouth. When silk thread is bitten the danger is greater, for it is quite usual to soak the thread in acetate of lead, so the result may be very serious and may even lead to blood poisoning.

### LAUNDERING LACE CURTAINS.

The first thing to do is to shake all the

dust out carefully, then look them over to see if there is the smallest hole or tear in them; if so, mend them with rather fine white cotton floss. It holds the meshes together better than thread, as it is wiry. Let them soak over night in cold water, then the next morning rinse them through several clean waters. This makes very little rubbing necessary and saves the curtains, as hard rubbing makes holes in them. Then put them in a tub of warm pearline suds, with a little white soap added. Squeeze them up and down, then wash in a second tub of suds prepared as the first, then put them in a tub of boiling suds.

If you desire to have them pure white blue the water slightly, but if you wish them a pale yellow, rinse them through water to which a little coffee has been added. Dry them in the sun and open air if you have frames, and can put in several pairs at once, but if not, tack sheets onto the carpet in a room not used at night, and pin the curtains to them, carefully pulling out each little point and edge.

Two or three curtains can be placed at once, and they should be perfectly dry before taking up.

Some put the curtains through a thin starch water. This gives them a little stiffer appearance, but most housewives prefer them without stiffness, as they are when new.

## SHIPS BUILT IN SECRET

BRITAIN WILL ADD THREE DREAD-  
NOUGHTS TO NAVY.

German Press Says Britain is Selling  
a Strange Example in  
Disarmament.

Unbounded amazement has been created by revelations regarding the secret building of three huge, swift battleships for the British navy. It has been so unusual hitherto for the naval authorities of Great Britain to keep anything up their sleeve that their new policy of reticence is regarded with surprise.

It may be remembered that a storm of indignation was created throughout Great Britain at a suggestion of building only one of the new proposed Dreadnoughts. Consequently the sensation was intense when it transpired that three mysterious armored cruisers were approaching completion on the Clyde and at Elswick, which are too far advanced to preserve the secret any longer, are not cruisers at all, but battleships—every bit as powerful as those of the Dreadnought type, and a great deal faster.

Berlin despatches show how intense is the German surprise. Newspaper comments betray considerable chagrin. Is this, they demand, how Britain sets the example of universal disarmament?

The new vessels, which will be named the Invincible, the Inflexible, and the Indomitable, are each to carry eight of the new 12-inch guns.

The Dreadnought has ten, but can fire only eight of its guns on broadside. Owing to an improved method adopted in the three vessels, they will bring exactly the same number of guns to bear on the enemy on either beam.

Each of these vessels will be able to bring the whole armament to bear either on port or starboard, consequently their fire in chasing will be as heavy ahead as astern.

Whereas the Dreadnought has been built for a speed of twenty-one knots, these new ships are designed to steam at twenty-five knots, and may reach twenty-seven on their trials. They are the swiftest armored ships in the world, with a speed nine knots greater than any battleship of the German, French, or American fleets.

WILL CARRY MUCH COAL.

Apart from their remarkable difference in speed these ships will carry more

## ON THE FARM

### CLEAN CULTURE FOR ORCHARDS.

The cultural system of orchard management practiced upon a thoroughly practical basis and in accord with present knowledge of soils and tree and fruit physiology is suited to a greater variety of conditions than any other system and is within the reach of every orchardist, writes Mr. A. N. Brown. This method, pursued as it should be, requires that orchards be plowed as early in the spring as the soil will permit. After plowing they should be cultivated once a week. This is continued each week until July 1 to 10, according to lateness or earliness of the season. Culture should be given twice a week in times of drouth. When this culture ceases the orchard should be seeded down to cowpeas, crimson clover, soy beans, or hairy vetch. These should remain on the soil until following spring, when they should be plowed under and this intense system of culture resumed.

The advantages of this system are that the wood and buds for the following season's crop grow in the early summer when they should be grown, and the culture ceases, to afford opportunity for wood and buds to harden and mature fully before winter. Again it makes it possible for the trees to store up all the necessary plant food elements to mature its fruit fully by the time the culture ceases. The culture also conserves the moisture, aerates the soil, and in fining it exposes a larger surface to the action of the oxygen of the air; thus liberating phosphoric acid and potash, putting the soil in condition for the operation of the feeding roots. Without humus in the soil and constant culture to conserve the moisture and the fining of the soil it is impossible to maintain the moisture supply needed.

The Illinois experiment station has determined that the amount of moisture in soil cultivated as against that in soil not cultivated varies from 13 to 27 per cent; or the cultivated soil will contain in an acre 104,000 gallons to 153,000 gallons more water than the uncultivated soil. This added moisture together with the air admitted into the soil by culture unlocks phosphoric acid, potash and other mineral elements. The growing of legumes by their root system going deep into the soil, also aerates it, so that the plant food elements can be elaborated and conserved.

These crops improve the physical condition of the soil by filling it with humus and admitting of the free passage of the soil waters, and retaining this water to be taken up by the tree as required. Lastly it must be remembered that a legume crop managed in this way in an orchard will give to each acre 203 pounds nitrogen, 49 pounds phosphoric acid and 202 pounds potash, valued in the market to-day at \$43. This amount of necessary plant food elements is therefore returned to the soil less the amount required for the growth of the crop itself, and as may be eliminated in the process of disintegration.

Dr. Warren of the Cornell station shows that New York orchards tilled five years yielded 80 per cent more fruit than orchards left in sod five years, where conditions were similar and substantially the same. The question, therefore, of adopting a system that will bring best results should be easy of solution. Location, conditions, environment will necessitate some modification of any system that may be adopted, but the principles must be observed where regular annual crops of fruit of high quality are to be secured.

The best evidence of the advance that horticulture has made lies in the fact that we control conditions surrounding fruit culture, instead of having conditions control us. The modern demand of the market for fruit is that it must be of highest quality and abundant

### WASHING DAIRY UTENSILS.

The principal things necessary for keeping utensils clean are hot water or steam, some alkali, a scrubbing brush or a coarse cloth, combined with plenty of elbow grease, to make these agents effective. All utensils should be cleaned immediately after using. The method for cleaning varies slightly, according to what the utensils have contained. If they have been used for milk, they should first be rinsed with cold or lukewarm water, so as to wash off the viscous albuminoids, which, if subjected to boiling water, would coagulate and adhere firmly to the tin, thus becoming difficult to remove.

## BENEFITS OF DISASTERS

SMALL FOLK OFTEN BENEFIT BY  
BIG CALAMITIES.

Sometimes Means Money in the Pockets  
of Shrewd and Uscrupulous  
People.

It might be too much to assert that when Vesuvius recently went in for the worst eruption that has been known for these fifty years, and did great damage, and threw thousands of people into a state of terror, the sole motive of the playful Dame Nature in causing all the trouble was a desire to benefit a Neapolitan macaroni seller. Yet this was very probably the way in which Tito Ferrugini, the man in question, regarded the matter.

He was in the habit of selling his wares in the streets of Naples, and when Vesuvius recently belched forth innumerable tons of blinding dust and ashes, so that the beautiful city was plunged into a state of darkness and terror, he turned his familiarity with the place to account by guiding frightened tourists from Naples, and leading other folk through the streets, which had been familiar enough to them a day or so before, but were now rendered invisible and bewildering by the unnatural darkness.

### FORTUNES FOR ARCHITECTS.

After the occurrence of any great calamity it is common enough to hear of this or that big industry benefitting. Thus, the wrecking of San Francisco will mean the earning of millions of dollars by architects, builders, and manufacturers of steel frames and girders for the "Skeletons" of "sky-scrapers."

But there are extremes in everything, and it is frequently curious, to say the least of it, to see how some gigantic calamities benefit not only big firms, but very small folk, indeed. It looks as if Nature and Fortune were fond of jesting together, by making the unexpected happen.

At San Francisco, for instance, after the earthquake had laid the chief business parts of the city in ruins, and when the grand hotels had vanished from sight, dirty, out-of-the-way little restaurants, which had hitherto struggled desperately for existence, and had been patronized by none but the humblest customers, suddenly leaped into prosperity, and found themselves flooded with wealthy men and elegant, delicate ladies, who were ready to pay famine prices for the coarsest fare.

### ENHANCED PRICES FOR FOOD.

Another humble individual to whom the wrecking of San Francisco was a blessing was a young man who had for years been trying to establish himself as a stockbroker.

When the earthquake suddenly reduced many wealthy men to a state of temporary beggary, the stockbroker saw his chance, and lent them money to get away. Nobody grumbled at having to pay extortionate interest at such a time of danger, and many frantic men were willing to offer anything for the means of buying food for their

## EGYPTIAN SAILOR'S YARN

REMARKABLE STORY DISCOVERED  
IN HIEROGLYPHIC TEXT.

Tells of Wreck and Some Remarkable  
Adventures Which Befell Him  
Among Serpents.

Prof. Goleniescheff, of St. Petersburg, has published in the current number of the Paris *Revue des Travaux*, the hieroglyphic text and translation of a most interesting papyrus now in the collection of the Hermitage Museum. The papyrus was found at Feshen some years ago, but has not been hitherto published on account of the difficulty of reproducing the red ink in which it was written. The document purports to be the report of a most adventurous voyage made by an Egyptian captain, who wishes to be introduced to the Court of Pharaoh in order to relate to his Majesty the wonders he encountered. The colophon which is appended at the end enables us to date the composition with considerable certainty. It reads: "It is written from the beginning to the end by the scribe of cunning fingers, Ameniamen-ra-may; he lived a life of prosperity and health." This name marks it as a work of the period of the twelfth dynasty, about B.C. 2800, a time when Egypt was beginning to expand its power and trade beyond the Nile Valley. The ancient mariner begins by saying: "I was going to the mines of Pharaoh, in a ship of 150 cubits, with 150 sailors, who had seen Heaven and Earth, and whose hearts were stronger than lions." Truly, a band of fearless venturers; but ill-fate awaited them. "The wind rose and threw up mighty waves, but as for me, I seized a piece of wood, but all who were in the vessel perished, not one remaining."

### THE SHIPWRECKED MAN

was washed ashore on an island, and after three days began to search for food. It appears from the account that it was no desert island, but one rich in food of fruits, herbs, and all manner of good things, and the sailor ate his fill and "made an offering to the gods" in his gratitude. Scarcely had he finished his meal when a new adventure awaited him. "Suddenly," he says, "I heard a noise as of thunder, and the earth shook." He then saw drawing near to him "a huge serpent of terrible aspect, his body overlaid with gold, his color of bright lapis lazuli." The serpent, however, appears to have been a kindly beast, for, after asking how he came to the island, he opened his mouth and carried him to his resting place, where he finds a tribe of serpents, seventy-five in all. We now come to a most valuable passage. The serpent king says: "If thou hast come to me it is God who has let me live. It is He who has brought thee to this 'isle of the blest,' where nothing is lacking, and which is filled with all good things." This reference at so early a period to the "isle of the blest," Prof. Goleniescheff points out as showing how old is this tradition, which appears in later Egyptian, Greek, and Arabic tradition. The serpent king tells his guest that after three months "a ship shall come from thine own land, and thou shalt go to thine own land."

Like many another mariner, this Egyptian sailor waits anxiously, and climbs a tall tree to watch for the ship, and he runs in haste to tell his kind serpent, but he finds that, with the proverbial knowledge of that reptile,

HE KNOWS ALL ABOUT IT.

The rescued one is not allowed to go away empty-handed. The king says:—"Farewell, go to thy house, and see thy little children again; let thy name be good in thy town; these are my wishes for thee." Full of gratitude, the sailor promises to mention the king to Pharaoh, and return with "a ship of treasures, such as are fit for a god, a friend of man in a far-off land." The answer

the swiftest armored ships in the world, with a speed nine knots greater than any battleship of the German, French, or American fleets.

#### WILL CARRY MUCH COAL.

Apart from their remarkable difference in speed these ships will carry more coal and oil. So presumably, they will have a greater radius of action.

They will carry in addition to their eight 12-inch guns a number of smaller pieces for repelling torpedo attacks.

In construction of hulls the same principles will be adopted as in the case of the Dreadnought, though they will be less heavily armored. The saving effected in protection is being utilized for far more powerful turbines than the Dreadnought has.

At the beginning of last week Admiral Sir Edmund Fremantle, in discussing the result of the trials of the Dreadnought, did not display much enthusiasm. He admitted, of course, that all was satisfactory. The turbines worked so well that the great battleship attained a high rate of speed and there was little vibration.

"But," said Sir Edmund, "I don't think it is of much use having one ship of great speed if we don't have more. Evidently it is not in condition to fight in the line with our existing ships. If it does fight in the line its extra knots are thrown away, and if it uses them it will have to fight by itself.

"It is plain that the sooner we have a squadron of Dreadnoughts the better."

#### ABLE TO SINK ANY CRUISER.

Asked concerning his views on the new battleships, the veteran admiral said: "They really are battleships, and could make short work of any cruiser afloat.

"Of their value as battleships much cannot be said until the thickness of their armor is definitely known. They could fight any existing battleship, except Dreadnought, because of their gun power. At any rate, they could pick up ships ahead, and engage them for a time, knocking them around so much with their powerful guns that the other ships could catch up.

"The chief question raised by them is that of the value of speed—how much has been sacrificed to it. Capt. Mahan says that speed is of little use, specially for ships of the line, but I think he depreciates speed too much.

#### FEARS ARMOR IS TOO WEAK.

"Judging from the measurements, I should calculate that the thickness of their armor cannot be more than 6 or 7 inches, certainly not more than 8. They must have had to skimp the defence, I think. Nine inches is weak, and 12 none too much.

"If the guns are placed en echelon it is not satisfactory, for that means that they must be fired across the deck. This method was tried in the Colossus and other ships; but the superstructure was knocked to pieces. Possibly they may have found a satisfactory solution of the difficulty with the present long guns."

Three more Dreadnoughts are to be built next year. Thus by the time a single foreign rival takes the water Great Britain will have at least seven ready to meet it.

#### RIDING A CAMEL.

Dr. Nachtigal, the celebrated African explorer, once said to a youth who expressed a desire to cross the Sahara on camel back: "Young man, I'll tell you how you can get a partial idea of what riding a camel in an African desert is like. Take an office stool, screw it up as high as possible, and put it along with a savage dog, into a wagon without any springs. Then seat yourself on the stool and have it driven over uneven and rocky ground during the hottest parts of July and August, being careful not to eat or drink more than once every two days and letting the dog bite you every four hours. This will give you a faint idea of the exquisite poetry of camel riding in the Sahara."

of fruit of high quality are to be secured.

The best evidence of the advance that horticulture has made lies in the fact that we control conditions surrounding fruit culture, instead of having conditions control us. The modern demand of the market for fruit is that it must be of highest quality; and fortunately the fruit grower can grow quality into his fruit by feeding his trees a full balanced ration just as best results are obtained in a dairy herd, by the proper balanced feed. In the degree that fruit growers will meet the requirements so clearly indicated by scientific investigation and practical experience, will horticulture still further advance as the noblest occupation of man.

#### FARM NOTES.

The older the country becomes, the more carefully farmers must study the culture of grain; for the farmer's business is not merely to grow grain, but to get value out of it. He is not working for bushels but for dollars.

There is no reason under the sun why any ordinarily healthy man should be homeless in this country. Thousands of farmers are working two fifths to half their time for landlords because they imagine they could not make a living on a small farm of their own.

After a series of experiments conducted at the University of Illinois, it is urged "that extreme cleanliness is absolutely essential to the most successful dairying."

Investigations of recent years have shown that all the troublesome changes that take place in milk and make it difficult to handle properly are caused by bacteria. In fact, successful dairying depends largely upon the ability to limit the number of bacteria obtaining access to milk, and to control those that cannot be kept out.

Tree seedlings are quickly bruised and crushed by the trampling of live stock. Hungry cattle browse upon them. The soil becomes packed hard, unable to retain moisture so needed. Don't thin your wood lot too heavily. If you do, large openings are made through which the sunlight streams in, drying the soil and encouraging the growth of grass, which should never be suffered to replace the spongy humus that forms the natural top layer of soil in a healthy forest. A canopy, formed by the leaves and branches, should always shade the forest floor. Too much light encourages the formation of branching, short stemmed trees.

#### LIVE STOCK NOTES.

To make the horse's coat shine, feed him a bit of oil meal every day. Begin lightly with not more than a tablespoonful at first. Gradually increase until he will take a pint, then hold at that.

Begin now to give your fowls a more heavy ration of nitrogenous foods, such as linseed meal, animal meal, etc., and thus induce them to grow a new coat of feathers before the cold weather catches them in nude condition.

A fair test of the milk given by a herd of cows may vary from 3.5 to 4.0 per cent. fat. This, of course, will change according to the period of lactation. If the cows, the milk of new milch cows not being usually so rich as that of strippers. It will pay any farmer to feed his cows so that they are in good, healthy condition and produce the maximum amount of milk which their natural capacity as dairy animals will permit them to give.

It is claimed that fowls will fatten more readily in close confinement, in coops and pens that are so darkened that they cannot see anything which might attract attention and cause them to worry and excite themselves. Fattening should not be attempted until the birds have attained their full growth as young birds convert a large share of their food into growth, nor is it advisable to fatten on corn alone, as the fowls would be subject to indigestion. While grain should form the principal food, they should be supplied with a variety of anything they will eat, clover and all kinds of green food being particularly desirable.

duced many wealthy men to a state of temporary beggary, the stockbroker saw his chance, and lent them money to get away. Nobody grumbled at having to pay extortionate interest at such a time of danger, and many frantic men were willing to offer anything for the means of buying food for their wives and children, and getting away with them from what seemed a city of doom.

It needs no saying that there's not much philanthropy in connection with trading on the necessities and terrors of one's fellow-creatures during a time of panic; but it is very decidedly business.

The stranding of the Montagu, which has cost John Bull a million dollars' worth of first-class fighting material, was a godsend to the boatmen of Ilfracombe and round about, who, during the summer, have reaped a golden harvest by taking hundreds of curious visitors to see the great ironclad held as fast on the rocks as though she had been a child's boat.

#### MISSING RELATIVES.

When Chicago was burnt down, more than thirty years ago, with the consequent loss of millions of dollars, at least one humble person made his fortune out of the calamity. That was a boy who had, up till then, been making a slender living by driving a butcher's cart. The destruction of the city took away his regular employment; but, nothing daunted, he set to work to search among the smoking ruins, not for the sake of plunder, but with the object of learning the fate of, and tracing the whereabouts of, as many as possible of the homeless victims of the calamity.

All the information he collected he took to the police, who were deluged with inquiries from frantic, distracted people who had been separated from, or were anxious to have tidings of, those dear to them. Thanks to the butcher boy, many people were reunited who, but for him, might never have found each other again, amid the terror and confusion of the smoking city. The rewards he netted helped him to start life handsomely on his own account when the city was re-built.

It sounds cold-blooded to say in so many words, but the fact remains that a big calamity almost always means a golden opportunity for some small person, sharp enough to seize it. Just to show how this fact may be proved by all sorts of instances, it can be mentioned that there is a large and flourishing shop in London the proprietor of which owes his success

#### ENTIRELY TO CALAMITIES.

He was a newspaper hawk in the streets, and was very watchful and intelligent. He noticed how keenly public interest was aroused by the occurrence of a great catastrophe in any part of the world.

He did not see why he should leave all the profits derivable from such events to the newspapers. Therefore, with a keen eye to business, he nearly starved himself, and wandered about the streets many a night, to save as much as he could. At last he had a few pounds for a capital; and then he waited for some big misfortune to happen.

What did happen was the frightful Overend and Gurney smash—a financial catastrophe which plunged thousands and thousands into ruin and poverty. Everybody was talking about the affair, and the interest in it rose to fever heat.

Then the humble capitalist sank all his money in bringing out a sensationally-written and crudely-printed account of the failure. It sold like wildfire, and the profits helped him to embark on similar ventures, as fresh catastrophes occurred; until he had laid the solid foundation of a fortune.—Pearson's Weekly.

#### A DIPLOMAT'S QUALIFICATIONS.

Tommy: "Pop, does a diplomat have to know much?"

Tommy's Pop: "Well, he has to know enough not to know too much."

away employed—himself. The king says: "Farewell, go to thy house, and see thy little children again; let thy name be good in thy town; these are my wishes for thee." Full of gratitude, the sailor promises to mention the king to Pharaoh, and return with "a ship of treasures, such as are fit for a god, a friend of men in a far-off land." The answer of the serpent is valuable. "When thou shalt depart from this place, thou shalt never more see this isle, for it will be changed into waves." Such are the main details of this document, but amid the romance it is possible to trace some solid substratum of truth. The islands filled with serpents may have some basis if we suppose that the voyage had not been on the open sea, but up the Nile to the regions about Khartoum and the Bahr-el-Gazal. Here the voyager would come upon the great marshes and the islands of mud or vegetation, which, at that remote period, would be swarming with serpents and the great amphibians.

In the time of the kings of the twelfth dynasty, especially in the time of Sankhkara and Amenemhat I., many half-military, half-trading expeditions were sent up the Nile, and no doubt the voyagers returned with many a mariner's yarn. These floating islands, often covered with vegetation, and even trees, during storms or heavy floods, because saturated and sank out of sight, as the serpent king predicted. The idea of the locality is indicated when we see the presents which the sailor brings away: "Precious perfumes of Cassia, of sweet woods. Khol, abundance of incense, ivory tusks, baboons, and apes," all of which are products of Nubia and the Upper Nile. The time occupied in the journey,

#### THREE MONTHS EACH WAY.

would be about the time required, and certainly not sufficient for a voyage to Pune or Somaliland on the open sea. No doubt these ancient navigators, like those of more modern times, told these tales of strange adventure partially to deter others and to keep to themselves the ancient El Dorados of Africa, and also to give an exalted idea of their bravery.

Prof. Golienischeff says it is probable that it was some such ancient seaman's yarn, coming in after years as part of the flotsam and jetsam of folk-lore, which formed the basis of the story of Sinbad the Sailor. That this charming story of the Arabian Nights is one composed of old stories gathered from many sources is beyond doubt. Two incidents can be traced to Old Babylonian sources. The great Rukh bird that carried the hero away is evidently a survival of the story of Etana trying to fly to Heaven, holding on to an eagle, a legend which was borrowed in Hebrew folk-lore, and attached to the deeds of Nimrod, and latter by the pseudo-Calisthenese attributed to Alexander the Great. So also the story of the Valley of Diamonds is an echo of the episode in the Chaldean epic, where Gilgamesh, Nimrod visits the distant Western mountains, where the sun sets guarded by scorpion men, and comes to the garden of jewels, where the leaves of the trees and the birds' nests are full of precious stones. Stories live on in the East for centuries, passing from nation to nation, and many a tale of old Egypt or older Chalda found its way by strange routes into the beautiful literature of the "Thousand and One Nights."

Husband (who makes a specialty of manufacturing excuses): "The truth is bound to leak out some time." Wife: "Yes; and I am inclined to believe that it leaked out of you long ago."

"I was wending an aw—account of a woman being hooked to death by a beastly cow, doncher know," remarked young Dudeleigh. "Weeily, I cawn't imagine a more howwible affair—can you, Miss Caustique?" "No, Mr. Dudeleigh," replied Miss Caustique, "unless it is being bored to death by a calf." And when she illustrated her remark with a large, open-faced yawn, young Dudeleigh proceeded to get a hurry on himself.

## For the Children

To succeed these days you must have plenty of grit, courage, strength. How is it with the children? Are they thin, pale, delicate? Do not forget Ayer's Sarsaparilla. You know it makes the blood pure and rich, and builds up the general health in every way.

The children cannot possibly have good health unless the bowels are in proper condition. Correct any constipation by giving small laxative doses of Ayer's Pills. All vegetable, sugar-coated.

## SEASON OF 1906.

UNTIL FURTHER NOTICE THE

## Str. REINDEER

WILL RUN AS FOLLOWS:

LEAVE—Prinver's Cove at 5.30 a. m. for Napanee and all way places. Leave Pictou at 3 a. m., Deseronto at 9.30, arriving in Napanee at 10.40, connecting with G.T.R. noon trains going East and West.

RETURNING—will leave Napanee at 1.00 p. m., connecting at Deseronto with Steamer "Yaruna" for Belleville and Trenton. Leave Deseronto at 2.50 p. m., Pictou at 4.30 p. m. for down the bay.

## S. A. IMMIGRATION.

The season now closing is easily the record Breaker so far as immigration into Canada is concerned. At Quebec alone more than one hundred Thousand Immigrants will be registered, and when we consider that Montreal, St. John and Halifax are Ports of landing also, we get some idea of the mighty inrush of human souls into our Fair Dominion. In the doing of this the Salvation Army has figured largely and succeeded in dispersing its people well throughout Ontario.

Staff Capt. Creighton the Army's representative claims that much greater satisfaction would be secured to all if the farmers and others Employees could foresee their requirements some months or weeks ahead and send in their applications accordingly. He has found the Chief difficulties to arise from the fact that applications generally are not sent in until help is needed immediately, leaving little time for selection and transportation. Let Employees of Labor once acquire the habit of anticipating their want some reasonable time in advance and much greater good will result from this invasion of our shores by our friends from over the seas.

Forms of application can be had by addressing Brigadier Howels, 24 Albion St. Toronto, Ont. or at the office of this paper.

### WHAT OTHER PAPERS SAY

Alexander Glengarran.

If there is anything more contemptible than the man who sells his vote, it is the man who sells his vote and then does not deliver the goods.

Lindsay Post.

Well why shouldn't a poor scrub of a voter sell his franchise for \$10 where he has the example of leading members of parliament selling their honor for \$200,000?

Mr. Emerson, minister of rail ways, is making a record with the Inter-colonial. No more deficits, eh? It is hoped not. If the road is ever going to pay it should in these boom times.—Whig.

Toronto Globe.

The Inland Revenue Department is not moving too soon in punishing the adulterators of food. The difficulty would be greater if such dishonesty were allowed to develop into an important commercial interest.

Chicago Record-Her. Id.

Mrs Sage has given \$1000 to a church. It is the first bequest she has made out of the \$70,000,000 which was left in trust to her. She will have to pass it out more rapidly than this if she expects to get rid of all of it before she dies.

Kingston Whig.

Mr. Borden a "bandit"? Yet that is what Dr. Weldon called him. All men are bandits who accept the larger indemnity, and Mr. Borden's is now \$7,000 a year. He might have been referred to as the chief bandit.

Hamilton Times.

Billy Maclean of The Toronto World denounces Hon. Mr. Hyman as "the beneficiary of a fraud," and calls on him to resign. Billy's bona fides will always be suspected while he pockets the increased indemnity, which he denounces as a fraud on the Canadian people. Catch him disgorging!

## Do You Want to Know

### What You Swallow?

There is a growing sentiment in this country in favor of medicines of known composition. It is but natural that one should have some interest in the composition of that which he or she is expected to swallow, whether it be food, drink or medicine.

Recognizing this growing disposition on the part of the public, and satisfied that the fullest publicity can only add to the well-earned reputation of his medicines, Dr. R. V. Pierce, of Buffalo, N. Y., has "taken time by the forelock," as it were, and is publishing broadcast a list of all the ingredients entering into his leading medicines, the "Golden Medical Discovery" the popular liver invigorator, stomach tonic, blood purifier and heart regulator; also of his "Favorite Prescription" for weak, over-worked, broken-down, nervous and invalid women.

This bold and out-spoken movement on the part of Dr. Pierce, has, by showing exactly what his well-known medicines are composed of, completely disarmed all harping critics who have heretofore unjustly attacked them. A little pamphlet has been compiled, from the standard medical authorities of all the several schools of practice, showing the strongest endorsements by leading medical writers of the several ingredients which enter into Dr. Pierce's medicines. A copy of this little book is mailed free to any one desiring to learn more concerning the valuable, native, medicinal plants which enter into the composition of Dr. Pierce's medicines. Address Dr. Pierce as above.

Dr. Pierce's Pleasant Pellets are tiny, sugar-coated anti-bilious granules. They regulate and invigorate Stomach, Liver and Bowels. Do not beget the "pill habit," but cure constipation. One or two each day for a laxative and regulator, three or four for an active cathartic. Once tried always in favor.

**\$50,000 GIVEN AWAY.** In copies of The People's Common Sense Medical Adviser, a book that sold to the extent of 500,000 copies a few

### A Few Corrections.

A few things picked up from a child's schoolbook: Never say, "I don't think it will rain." What you mean is, "I do think it will not rain." "All over the world" is bad; say "Over all the world." "The reason why" is not only incorrect, but doesn't sound as well as "The reason that." In the King James version of the Bible, quoted by some authorities as a standard of pure English, one may find the following, which occurs in Isaiah xxxvii, 36: "Then the angel of the Lord went forth and smote in the camp of the Assyrians a hundred and fourscore and five thousand, and when they arose early in the morning, behold they were all dead corpses." In other words, the corpses arose early in the morning and found themselves dead. Don't say "A man fell off the dock." A man might fall into a dock, but to say that he fell off a dock is no better than to say he fell off a hole.

### The Crested Rat.

The crested rat of East Africa is remarkable, first because of the great length of the black and white hairs down the ridge of the back, which are rendered the more conspicuous because the hairs along the sides of the body are so short and so differently colored, being brownish gray and looking for all the world as if some one had taken a pair of scissors and maliciously shorn off the decorative hair, leaving only a dull underfur. Secondly, it is remarkable because the skull has a roofing of

announces as a fraud on the Canadian people. Catch him disgorging!

**Brantford Expositor**  
 The bye-elections to fill the existing vacancies in the House of Commons are being strung along in a sort of endless chain. This is a departure from a well understood Liberal practice which ought not to be made without ample justification. After Alexander Mackenzie assumed office, and it became necessary to appeal to the people without waiting for Parliament to meet he put into force the policy of simultaneous polling, which the party had always stood for while in Opposition. Even in bye-elections this policy should be closely adhered to

**Parry Sound Canadian.**  
 In our opinion the proper inspection of hotels, both licensed and otherwise will never be thoroughly carried out until the Government ceases appointing a local man as inspector. He should be brought from a different locality, which would make him free from any local prejudices and antipathies. He should be given salary sufficient to enable him to give his whole time to his inspector's duties. As it is now license inspectors receive such small salaries that they have to devote a good part of their time to their private business, and as the larger part of their income come from that source, and too rigid enforcement of the law is likely to injure it, it follows naturally that their public duties take second place.

**Pressed to Death.**  
 An English court has sentenced a woman to imprisonment because she refused to speak during a trial. The old penalty for remaining mute under similar conditions was being pressed to death. The form of sentence set forth "the prisoner shall be laid in some low, dark house, where he shall lie naked on the earth and one arm shall be drawn to one quarter of the house with a cord and the other arm to another quarter, and in the same manner let it be done with his legs, and let there be laid upon his body iron and stone, as much as he can bear—or more." There the man had to lie. On the following day he was given three morsels of bread without water, on the following water, but no bread. And this was his diet until he died.

a pair of scissors and maliciously shorn off the decorative hair, leaving only a dull underfur. Secondly, it is remarkable because the skull has a roofing of bones exactly resembling that of some turtles, while, furthermore, this roof has a granulated appearance recalling that presented by the skulls of certain fishes. In its habits it appears to be arboreal while from the structure of its teeth it would appear to be at least partly insectivorous.

**A Curious Tomb.**  
 The most curious tomb in England is that of Lady Anne Grimston, daughter of the Earl of Thanet, who died nearly two centuries ago and was buried in Tewin churchyard. Upon her deathbed she disregarded the efforts of those who sought to administer spiritual comfort. An atheist she had lived, an atheist she would die. "It is as likely that I should rise again from the dead," she said, "as that a tree should grow out of the middle of my coffin." A tree has grown out of the middle of her coffin—an oak—and by its side a sycamore. The vault is square, of brick and granite. The two trees first filled the interior before they could find a way out. When they did burst through the masonry they so spread as completely to envelop the grave.

**When Everything Is Poisonous.**  
 All substances, even eggs, are poisonous when they are injected in certain quantities into the circulatory system of an animal. A French investigator has taken the powdered yolk of a duck's egg, treated it with a 20 per cent solution of salt and injected it into the veins of an animal until it died. In order to kill a rabbit fifty-five grains of the substance were required for each pound of the rabbit's weight. The yolk of a hen's egg is less poisonous, but that of a turtle more so than that of a duck. The albumen of eggs is also poisonous.

**The Dog and the Stick.**  
 Professor Wilhelm Wundt, the famous German psychologist, tells of teaching a dog to jump over a stick. One day the professor commanded his dog to jump, but held out no stick. At first the dog seemed surprised, and on repeated ordering to jump he barked. At last he sprang into the air and barked very vigorously, as if to complain of the absurd and ridiculous command to jump when no stick was held out.

**Man's Debasement Influence.**  
 "This African explorer whose experiences are being published in some of the papers says parrots are delicious eating. I always thought they were very tough."  
 "But he refers to wild parrots. It's their association with men that makes most parrots tough."

**A Bad Break.**  
 At a banquet held in a room, the walls of which were adorned with many beautiful paintings, a well known college president was called upon to respond to a toast. In the course of his remarks, wishing to pay a compliment to the ladies present and designating the paintings with one of his characteristic gestures, he said, "What need is there of these painted beauties when we have so many with us at the table?"

**Signs of Brain Exhaustion.**  
 A doctor says that when a person begins to have doubts about the spelling of common words, to write an unnaturally small hand that shows a tendency to waver above and below a straight line and to grasp the pen with unnecessary force, especially at the end of a long word, then that person is suffering from brain exhaustion and ought either to take a complete rest or else to find work of an altogether new and different kind.

**An Old Proverb.**  
 The proverb, "Necessity is the mother of invention," can hardly be traced to one independent source. The idea was expressed by Persius, the Roman satirist, about 60 A. D. and is found in the precise form now quoted in Richard Franck's "Northern Memoirs" (printed in London in 1694) and in various later English writers.

**Mother.**  
 Mother (entering parlor suddenly)—Mr. Snowball kissing you? I am surprised. Daughter—So am I, mother. He has been coming to see me five years and he never got up enough courage to do it before.

**Confirmation.**  
 Blobs!—Poor old B Jones! The doctor says he won't live six months. Blobs!—I've been telling him that for the last two years.—Philadelphia Record.

The learned man has always richer within himself.—Phaedrus.

## EVERY HOME NEEDS ZAM-BUK

### EXPERIENCES OF HOUSEKEEPERS WHO KEEP IT HANDY

In every home cuts, bruises, scalds and similar injuries are sure to occur, especially where there are children. In most homes too chapped hands, chilblains, eczema, ring worm, ulcers and other skin diseases occur.

For these you need a balm which is purely herbal, free from mineral compound, free from animal fat, antiseptic, able to stop bleeding and which should heal.

Zam-Buk meets all these requirements. Why not prove its merits. Read this:—Mrs. Angus, of Fenelon Falls, says:—“In 40 years of housekeeping I have never met with such an excellent salve as Zam-Buk.”

Mrs. Everett Brown, of Markham, (Ont.), says:—“Zam-Buk cured some bad bruises on my knee. I also find it excellent for chapped hands.

Mrs. Lizzie Gilmour, of Kingston, says:—“I had an ulcerated leg, which became so bad that I could not wear a boot. The foot and ankle were swollen to nearly double their ordinary size and the pain was terrible. The ulcers spread in a ring all round the limb. Doctor's treatment brought no relief, and at one time it was thought only amputation could end the agony I suffered. Zam-Buk was brought to my notice, and I bought a few boxes. Each box gave me more ease and healed the ulcers. To-day I am quite cured, the limb is sound, and whereas before I could not stand, now I can go up and down steps with ease. I own it all to Zam-Buk.”

Zam-Buk also cures eczema, cold sores, ringworm, stiff joints, bad leg, sore nipples, boils, abscesses, blood poison, poisoned wounds, etc. Used as an embrocation it cures rheumatism and sciatica and rubbed well into the chest cures lung troubles, colds, etc. For all purposes to which a household balm is put Zam-Buk will be found unequalled. All druggists sell at 50c a box, or direct from the Zam-Buk Co. upon receipt of price. 6 boxes for \$2.50.

#### Effective.

Mr. Bowler—I should like to know what good all these cooking school lessons are doing our daughter?

Mrs. B.—Everything she cooks she brings home.

“Yes, and none of the family will touch 'em, and the things are just thrown away.”

“No, they are not. She gives them to beggars.”

“Hub! What good does that do?”

“We are getting rid of beggars.”

#### The Hesitant Swain.

He—What would your father do if I told him I wanted to marry you? She—He'd refer the matter to me. He (hopefully)—And what would you do? She—I'd refer the matter to the young man who proposed to me and was accepted while you were trying to make up your mind.—Bohemian Magazine.

#### A Little Short of Funds.

Mr. Tyte-Phist—More money? What have you done with that dollar I gave you last week? Mrs. Tyte-Phist—That's in the savings bank, but I can't draw the interest on it till next January. I want another dollar to run the house on in the meantime.

#### His Contribution.

“What did that old miser put down when you asked him to contribute to the charitable fund?”

“His foot.”

To wait and be patient soothes many

#### Our Voices Deepen.

The primitive inhabitants of Europe were all tenors; their descendants of the present time are baritones, and future generations will have semibass voices. The voice has a tendency to deepen with age. The tenor of twenty becomes the baritone of twenty-eight; and the bass of thirty-six. The inferior races have higher pitched voices than the more cultured. The negro has a higher voice than the white man. Among white races, the fair complexioned man has a higher voice than his darker skinned brother. The former is usually a baritone or a tenor, the latter a contralto or bass. It is asserted that tenors are usually of slender build, whereas basses are stout, but there are too many exceptions to such a rule for it to be reliable. The same remark applies to the statement that thoughtful men have deep toned voices and vice versa. The tones of a voice are perceptibly higher before than after a meal, for which reason tenors are generally careful not to sing too soon after dinner.—Pearson's Weekly.

#### Henry Clay's Popularity.

The greatest popular idol in a political sense the country has ever known was Henry Clay. Only one other American statesman ever possessed the quality called personal magnetism to the same extent that he did, and no other ever had a more enthusiastic personal following. He was an aspirant for president from 1824 to 1848, but never reached the goal. He received 37 electoral votes in 1824, 49 in 1832 and 105 in 1844, but never enough to elect him. Clay was elected speaker of the house of representatives on the first day of his term in that body and was five times re-elected. He was twice elected United States senator, once unanimously by the Kentucky legislature, and held several other high offices. If there was ever a popular idol in the politics of this country, it was Henry Clay, but he could not be elected president.—Indianapolis Journal.

#### The Old Plane Tree of Cos.

In the Island of Cos, in the Aegean sea, there stands, jealously guarded, a huge plane tree measuring nearly eight feet yards in circumference. It is surrounded by a podium, or raised platform breaking high, doubtless built to support the trunk of the tree after it had become hollow and weak from age. The lower branches are still well preserved and have been shored up by pieces of antique columns, over the upper ends of which the branches have grown like caps in consequence of the pressure of their own weight. Close by the tree is a solid marble seat, which is said to be the chair of Hippocrates, the father of medicine, and it is supposed that he taught the art of healing from that seat. He was born at Cos 460 B. C. This gives a clew to the age of the celebrated plane tree, which must be considerably more than 2,000 years old.

#### This Peculiar World.

This is a peculiar world, says an exchange. One is struggling for justice and another is fleeing from it. One man is saving to build a house and another is trying to sell his for less than cost to get rid of it. One man is spending all the money he can make in taking a girl to the theater and sending her flowers, with the hope of making her his wife, while his neighbor is spending what gold he has in getting a divorce. One man escapes all the diseases that flesh is heir to and gets killed on a railroad. Another escapes with a scratch and dies with the whooping cough. One man stands off his creditors and goes traveling while another

# RHEUMATISM FLIES

IN ONE TO THREE DAYS

WHAT A “HEAVEN BEGUN BELOW” IT WOULD BE TO MANY A WEARY SUFFERER FROM RHEUMATISM, NEURALGIA AND ALL THE KINDRED AILMENTS, IF FAITH WOULD TAKE HOLD OF AND USE SO RADICAL A CURE AS THE GREAT

## South American Rheumatic Cure

Why, its very nature makes it the most natural and easy cure than human intuition and diligence have discovered. Its wonderful power is in its simplicity; its effectiveness is in its going right to the seat of the trouble, dispelling the causes that “bode evil,” give pain, stiffer joints, distort limbs, twist muscles, and when it reaches vital spots oftentimes cause death. South American Rheumatic Cure is as harmless as milk. One of its marvels is the rapidity with which it effects a cure and the testimony of the thousands who have “thrown away their crutches” and climbed from the valley of suffering to the mountain top of health would fill a book.

Don't be incredulous. Encouragement comes with the first dose no matter of how long standing.

ALL DRUGGISTS AND MEDICINE DEALERS HAVE IT.  
SOUTH AMERICAN NERVEINE for all stomach and nerve troubles.  
SOUTH AMERICAN KIDNEY CURE is a wonder worker. South American Kidney Cure gives relief in six hours in all kidney troubles.

Removed the Growth

"His foot."

To wait and be patient soothes many a pang.—Dutch Proverb.

## CAUGHT COLD ON THE C.P.R.

**A. E. Mumford tells how Psychine cured him after the Doctors gave him up**

"It is twelve years since Psychine cured me of galloping consumption." The speaker was Mr. A. E. Mumford, six feet tall, and looking just what he is a husky healthy farmer. He works his own farm near Magnetawan, Ont.

"I caught my cold working as a fireman on the C.P.R.," he continued. "I had night sweats, chills and fever and frequently coughed up pieces of my lungs. I was sinking fast and the doctors said there was no hope for me. Two months treatment of Psychine put me right on my feet and I have had no return of lung trouble since."

If Mr. Mumford had started to take Psychine when he first caught cold he would have saved himself a lot of anxiety and suffering. Psychine cures all lung troubles by killing the germs—the roots of the disease.

## PSYCHINE

(Pronounced Si-keen)

**50c. Per Bottle**

Larger sizes \$1 and \$2—all druggists.  
DR. T. A. SLOCUM, Limited, Toronto.

HALK dust is fine and white, but it won't make good bread. Fine, white flour is all right as it goes, but if it lacks nutrition its other qualities amount to nothing more than as baking is concerned.

## White Flour

Not only the finest and best of flours but also the most nutritious. It is produced by a process which preserves all of the nutritive properties of the wheat in the best form for use. You can get it from your grocer.

**White Flour Mills Co., Ltd.**  
MONTREAL

"Ivlie's Book for a Cook," containing 30 pages of excellent recipes, never published before. Your grocer can tell you how to get it FREE.

a scratch and dies with the whooping cough. One man stands off his creditors and goes traveling while another pays his debts and stays at home.

### Consoling.

A New England congressman once went to Franklin Pierce demanding an office for a constituent. Pierce sent him to James Guthrie, secretary of the treasury. By and by the congressman returned to the president in great dudgeon.

"What did Guthrie say to you about appointing your friend?" inquired the president. "He said he would be hanged if he would."

"Did Guthrie talk that way to you?" "He did."

"Well, that's the way he talks to me, too," was Pierce's consoling reply.

### Golf or Croquet?

It was a twosome. The player who drove off first had bandy legs. The second in driving off did not notice that his opponent had got in front of him and the ball ran through between the opponent's legs. Turning around in anger the bandy legged one said, "Here, mun, that's no golf!" "Weel," said the other, "if it's not golf it's croquet."—Scottish Referee.

### An Inch or So Below.

"It's funny," began the long winded bore, "but nobody ever seems glad to see me."

"Well, and have you never found out the cause of your unpopularity?"

"No, I can't discover it."

"That's strange, because it's right under your very nose."—Philadelphia Press.

### A Contingency.

"Haven't I a right to do as I like with my money?" inquired the multimillionaire.

"You have," answered the sardonic person, "if your lawyer is smart enough to draw up a will that can't be contested."—Washington Star.

### Well Supplied.

Singleton—I suppose your wife has a lot of will power. Wedderly—Yes, but she has a lot more won't power.—Chicago News.

An angry man is again angry with himself when he returns to reason.—Publius Syrus.

### Grumbling.

Grumbling is a potent cause of ill health. It keeps the sensitive nerves constantly vibrating with discordant emotions and not only hurts the grumbler, but every one who hears it. It really prepares the system of the grumbler for an attack of any malady that happens to be prevalent.

### Slight Mistake.

"Walter, what does this mean? Twenty-five francs for two hard boiled eggs?"

"Very sorry, sir. Slight mistake, sir. I've given you the bill intended for the American at the next table."—Pele Mele.

### An Air Brush.

Dottle was asked, "What is a fan." After a moment's thought Dot replied, "A fan is a thing to brush warm air away with."

But human bodies are sic fools, for as their colleges and schools, that when nae real ills perplex them they make enow themselves to vex them.—Burns.

Builders Hardware of every conceivable kind. Rathbun's Star Brand of Portland Cement, it pays to buy the best.

MADOLE & WILSON

# Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

### Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

MRS. A. TRAVIS, of Gringley, says:—"I got completely 'run down' in health, my strength went. I was constipated, had frequent headaches, and my skin became as yellow as a guinea. Food gave me pain and hours upon hours have I laid awake at night quite unable to get any sleep because of indigestion. I lost flesh and became quite wasted. Medicine did not seem to do me any good at all. One day bileans were recommended to me, and I decided to give them a trial. They did what other medicine had failed to do, and soon after I began to take them I felt an improvement. I persevered with them until they cured me, they cleared my skin, rid me of constipation, banished my headache, ended the indigestion, and made me well and hearty again."

**BILEANS ARE A CURE FOR:**  
headache, constipation, piles, liver trouble, indigestion,  
and all digestive troubles, female ailments, skin eruptions,  
biliousness, sick headache, nervousness, loss of appetite,

to death.  
But the wise man proved himself equal to the occasion and replied, "It is as you please."  
Each one holds within his or her grasp the fair bird of life. Which is it to be? A blessing or a bane? It is "as you please."

my own until on the opening of the door Mr. Smith entered and introduced the stranger to me as Mr. Jefferson.  
I felt my cheeks burn and my heart throb, and not a word more could I speak while he remained. Nay, such was my embarrassment I could scarcely listen to the conversation carried on between him and my husband. For several years he had been to me an object of peculiar interest—in fact, my destiny—for on his success in the pending presidential election, or rather the success of the Democratic party (their interests were identical, my condition in life, my union with the man I loved, depended—"Washington In Jefferson's Time," by Margaret Bayard Smith, in Scribner's Magazine.

**POINTED PARAGRAPHS.**

It's as difficult to find a friend as it is to lose an enemy.  
A luxury becomes a necessity after you get used to it.  
Unless you have money to burn don't try to keep the pot boiling in a poker game.  
It's difficult to convince a man that his money isn't on a sure thing until after the race.  
Don't worry over trifles. If you must worry, pick out something worth while, then get busy.  
When you have them they are opinions; when other people have them they are delusions.  
It's an easy matter to size up a man if his dog crawls under the house every time he sees him approaching.  
When a man tells you how you ought to run your business, just take a look at the way he is running his own.

The exhibition is to be opened on the evening of Tuesday November 6th, by Premier Whitney. There is reason to believe that in time this annual exhibition will become as noted in Canada as the Royal Horticultural Exhibition in London, England.

**Women Writers.**  
We know a number of women writers, and many of them are very good looking—much better looking, at any rate, than men writers, whose appearance is very seldom as attractive as their works.—Academy.

**Great Discovery.**  
The editor of a Kansas paper states that he once borrowed a Winchester rifle and started up the street a few days after to deliver the weapon to its owner. The delinquent subscribers got it into their heads that he was on the warpath, and every one he met insisted on paying what he owed him. One man wiped out a debt of ten years' standing. On his return to his office he found a load of hay, fifteen bushels of corn, ten bushels of potatoes, a load of wood and a barrel of turnips that had been brought in. We would like to borrow a Winchester for a day or two.—St. Louis Post-Dispatch.

**WOMEN WHO CHARM**  
**HEALTH IS THE FIRST ESSENTIAL**

**It Helps Women to Win and Hold Men's Admiration, Respect and Love.**

Woman's greatest gift is the power to inspire admiration, respect, and love. There is a beauty in health which is more attractive to men than mere regularity of feature.

To be a successful wife, to retain the love and admiration of her husband, should be a woman's constant study. At the first indication of ill-health, painful or irregular periods, headache or backache, secure Lydia E. Pinkham's Vegetable Compound and begin its use.

Mrs. T. E. Gillis, Windsor, N. S., describes her illness, and cures, in the following letter:

Dear Mrs. Pinkham:—  
"When I commenced to take Lydia E. Pinkham's Vegetable Compound I was suffering with weakness and womb trouble, headaches, backaches, and that worn-out, tired feeling. I have only taken the Vegetable Compound a few short weeks, and it has made me well, strong and robust. I believe that Lydia E. Pinkham's Vegetable Compound is without equal for female troubles."

Women who are troubled with painful or irregular periods, backache, bloating, (or flatulence), inflammation or ulceration, that "bearing-down" feeling, dizziness, faintness, indigestion, or nervous prostration may be restored to perfect health and strength by taking Lydia E. Pinkham's Vegetable Compound.

**A Flavor of Antiquity.**  
In the little town of Munsiedel, in Bavaria, there exists one of the most curious charitable foundations in the world. One of the burghers, Christopher Wanner, died in 1451 and left his fortune for the establishment of a home for aged poor. He attached, however, the condition that every old man who was taken in should wear his beard and the same cut of clothes and cap as he himself used to wear. Consequently, after the lapse of hundreds of years, the ancient pensioners are still to be seen wandering about the streets of Munsiedel in the costumes of the fifteenth century.

**His Only Occupation.**  
"Yes'm, but if I do youah laundry work, ma'am, I must have de undah-standin' dat my husban' collects de pay."  
"But why can't you collect it yourself, Manda?"  
"Well, you see, ma'am, I don't want to rob de ol' man of de only job he's evah likely to get."

**The Youth's Companion in 1907.**  
THE YOUTH'S COMPANION announces among the attractions of its 52 issues in 1907.

**TWO HUNDRED**  
practical papers, serviceable to young people who have their way to make in the world, helpful in their insistence on worthy ideals in every relation of life, useful in the home—particularly the regular series "Till the Doctor Comes."

**TWO HUNDRED AND FIFTY**  
capital stories—humorous stories, character stories, stories of life on the farm in the great cities, on the sea, in the wilderness. Among them will be Five Serial Stories by five COMPANION favorites: Hamlin Garland, Adeline Knapp, Ralph Barbour, Grace Richmond and Holman F. Day. There will be a series, also, based upon incidents in American History illustrative of life and times in America from the first colonial planting to the close of the Civil War.

**ONE THOUSAND**  
short notes giving concisely, clearly and accurately the important news of the times in public affairs, and in the fields of science and industry.

**THREE HUNDRED**  
contributors giving assurance that every need and every taste among COMPANION readers will be satisfied. Governor Folk of Missouri, Edward Everett Hale, Margaret Deland, Col. T. W. Higginson, Commander Eva Booth of the Salvation Army, Gen. A. W. Greely and Ion Perdicaris are among them.

**TWO THOUSAND**  
one-minute stories, anecdotes, bits of humor—sketches which take not more than a minute to read. They are always new, always well told, and in great quest by preachers and after-dinner speakers.

A full Announcement of the new volume will be sent with sample copies of the paper to any address on request. The new subscriber of 1907 who sends \$1.75 for the new volume at once will receive free all the remaining issues for 1906, including the Double Holiday Numbers; also THE COMPANION'S Four-Leaf Hanging Calendar for 1907, lithographed in twelve colors and gold.

Subscribers who get new subscriptions will receive \$16,200.00 in cash and many other special awards. Send for information.

#### NEWBURGH.

October 24th.

The annual convention of the Epworth Leagues of Napanee and Tamworth districts, was held in the Methodist church here, on Wednesday, October 17th. There was a large attendance of delegates and a very interesting convention was held. Rev S. F. Dixon, conference Epworth League president, and Rev. Mr. Norman returned missionary from Japan, were present, and gave excellent addresses. The following officers were elected: Honorary president, Rev. R. Duke, Selby; president, Rev. E. Farnsworth, Yarker; first vice-president, Miss Baker, Napanee; second vice-president Mrs. F. L. Hooper, Napanee; third vice-president, Delbert Sexsmith, Selby; fourth vice-president, Miss Jackson, Enterprise; fifth vice-president, Mrs. Edmunds, Deseronto; secretary, W. D. M. Shorey, Newburgh; treasurer, Miss Wood, Tamworth; representative on conference executive, Rev. R. A. Whittam, Wilton.

A very successful Sunday school and Christian Endeavor convention was held in the Presbyterian church, on the same day. Speakers from a dis-

#### FALL WORK AGAINST INSECTS.

The time of year has now arrived when most of our insect foes have ceased their active work and are withdrawn from observation and consequently most people come to the conclusion that the seasons fight is over and that nothing need at present be done. But this is very far from being the case. There are many destructive insects that can be more easily dealt with now than at any other time of the year.

First and foremost the Pea-weevil. The losses from this insect have been very much lessened during the last two seasons in Ontario, but this does not mean that we have got rid of the trouble. The insect is still with us, but being in greatly reduced numbers can the more easily be dealt with. If there is the least suspicion of the presence of the tiny beetle in the newly harvested peas, they, and in any case peas intended for seed should be at once treated with bisulphide of carbon which will kill every one that is exposed to its fumes. The method is familiar enough; put the peas in an air tight cask or bin, and place in an open pan on top of them one ounce of the bisulphide of to every 100 lbs. of peas (a bushel weighs about 60 lbs.) cover up tightly and leave for 48 hours. Then open up either out of doors or where there is a thorough draft of air; do not allow any fire or light to come near it, as the vapour is very inflammable and explosive; every weevil and other insect among the peas will be dead and non-infested seed will be available for next year. The same treatment should be used for the Bean-weevil, which is a serious pest in some parts of the province.

In addition of this treatment of the peas themselves, the pea-straw and rubbish should be cleared up and burnt and all refuse where threshing has been done should be similarly got rid of. This will destroy any weevils that have already come out and are hiding away for the winter. It will pay to do this whether the insect is known to be present or not.

This brings us to the next important matter, namely clean farming and gardening. All sorts of insects find their winter quarters in refuse. Many that infest grain take refuge in the stubble, others are sheltered by lost rubbish, others again hide in tufts of grass, among the woods in fence corners, under bark, where ever in fact there is shelter of any kind. Now is the time to turn them out and expose them to the frost and wet. Clean up and burn weeds of every kind, this will destroy many seeds as well as insects. Leave no heaps of rubbish anywhere. Gather up and add to the manure pile the leaves and stalks of roots, potatoes, &c. Plough up old pasture that are infested with white grubs or the larvae of Rose beetles. Scrape the rough bark off the trunks and limbs of fruit-trees, but this may be done later or in the winter. By keeping the farm, the orchard, and the garden clean, myriads of insects will be prevented from finding on the premises the shelter they need during the winter and will either perish or go somewhere else for a hiding place, and thousands more that are in the egg or chrysalis stage will be destroyed. Many, no doubt, will think all this too much trouble, but if they faithfully try it they will soon find that it pays

#### How's This.

We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly

## THE OLD FOLKS AT HOME

Are Never Without Pe-ru-na in the Home for Catarrhal Diseases.

**M**R. S. D. FOSS, 116 S. E. 6th street, Minneapolis, Minn., writes:

"I wish to congratulate you on your medicine, Peruna. I have been a sufferer with catarrh of the stomach for over two years, but since I have commenced to take your remedy I have been steadily improving until now I can safely say I feel no more of my old trouble, and as a matter of course, I will always have a good word for Peruna."

**A GOOD WORD FOR PE-RU-NA.**

"I recommend it to all my friends."  
Mrs. Magdalena Winkler, Route 4, Westminster, Md., writes:

"I thank you very much for your advice. I can safely say that Peruna and Manalin have saved my life."

"When I wrote to you the first time, asking your advice, my condition was so poor that I did not expect to live through the winter, but now I am perfectly healthy. I cannot praise your medicine enough and I recommend it to others."

**PRaise FOR PE-RU-NA.**

T. T. Markland, a well-known business man of Cincinnati, O., writes from 3100 Woodburn Ave., as follows:

"I find that in my case Peruna is a flesh builder. I am now at work every day, and have gained ten pounds. I took your Peruna according to directions, and the result was more

**GAINED 10 LBS. IN WEIGHT.**

than I expected.

"I can now breathe with ease, and also my cough is stopped. I had it for six months before I took down with the grip."

"I took no other medicine but Peruna and it accomplished all. You told me in your first letter that Peruna would cure me and it has."

"I am seventy-three years old and can attend to my work and business as usual."

Mrs. Theone Mikkelsen, Brigham City, Utah, writes:

"I wish to thank you for all the good Peruna has done me. I am entirely free from the cough which used to bother me so much every winter."

"My kidneys are also in good condition, and I feel stronger and better all over. For all these I give the credit to your excellent medicine, Peruna. I am pleased to recommend it to everybody."

**GIVES PE-RU-NA CREDIT.**

William Love is convalescent, after his illness.

Miss Florence Joyner is spending a week with friends in Colebrook.

George Joyner has gone to Sydenham to spend the winter.

Clarence Lapum has returned, after spending three months with his uncle.

Miss Florence Brown, Chicago, a guest of Mr. and Mrs. F. E. Brown, will go down to Kingston this week, where she will be the guest of Miss M. Graves.

James Dawson, Odessa

James Huff and B. Rose each raised from three acres of ground, five hundred bushels of potatoes.

Col. Clyde, Odessa, was in our midst a few days last week.

Mr. and Mrs. Sidney Bush spent Sunday with friends in Thompsonville.

Harold Huff, Camden East, was the guest on Sunday last, of his sister, Miss Jessie Huff.

The Czar has granted full religious freedom to the set of Old Believers.

Bandits have looted several villages in the neighborhood of Tangier, Morocco.

Negotiations are proceeding for the purchase of the Toronto Brewing & Malting Company by the Cosgrave Brewing Company, Limited.

#### Clearing Sale.

In order to clear out the following lines at the close of the season, we will offer at cost for cash during August and September, our entire stock of gas stoves, gasoline stoves.

**MADOLE & WILSON**

**Vapo-Cresolene**

conference executive, Rev. K. A. Whattam, Wilton.

A very successful Sunday school and Christian Endeavor convention was held in the Presbyterian church, on the same day. Speakers from a distance were present and the sessions were a great success. Delegates from each convention extended fraternal greetings to the other. Owing to the illness of Rev. J. Gandier, Rev. J. F. Mears preached the Thanksgiving sermon in the Methodist church on Thursday morning.

A very interesting game of football was played on the afternoon of Thanksgiving day between the high school team and a team from the town, the students winning 1 to 0. The game was closely contested, and the pace set was fast. The line up was: Town goal, Spinks; backs, Sutton, Harold Ryan; halfbacks, O. Sutton, Shails, Boyce; forwards, Dunn, Farley, Clancy Canway, Miette, N. H. S., goal, Wilson; backs, Hains, Clark; halfbacks, Patterson, Bradshaw, Dougan; forwards, Shorey, Nesbit, Shewley, F. Ryan, M. Conway. Referee, W. D. M. Shorey Umpires, Miller and Loucks.

Mrs. A. Madden, Mrs. Mears and Miss "Dot" Mears spent Thanksgiving in Toronto.

Percy Madden returned home on Saturday, after a two months' trip in the west.

Mrs. Watts and Mrs. Clark, Odessa, spent Wednesday of last week at Mrs. S. Shorey's.

Miss Edna Amey, Bicknell's Corners, spent Thanksgiving day with Miss Gertie Nesbit, Miss Birdie Hinch, Centreville, spent Thanksgiving day at Dr. Beeman's.

Miss Florence Thompson, Foxboro, spent Sunday with Miss Chant. Miss Thompson sang a solo in the Methodist church on Sunday evening.

C. H. Finkle was in Belleville at the last meeting of the Hastings county council in connection with his bill for damages. It will be remembered last summer the bridge at Lonsdale gave way and Mr. Finkle's load of carriages with its driver, were thrown into the river. The council paid Mr. Finkle's bill in full and made a satisfactory settlement with Mr. Barrett, the driver.

A great offer—The Napanee Express from now until January 1908 for \$1.00. Send your order early.

#### Considerate.

Mrs. Dove-Henry, I think you are positively cruel. Here I've tried so hard to cook you a nice dinner and you haven't had a word to say to me about it. Mr. Dove-Darling, I love you too much for that. If I said what I thought you'd never speak to me again.

#### Painfully Economical.

Husband—You are not economical. Wife—Well, if you don't call a woman economical who saves her wedding dress for a possible second marriage, I'd like to know what you think economy is?

#### The Truth of It.

Blusters—I dare say I do look mad. I understand Jigley says I'm the worst liar he ever saw. Wiseman—Oh, that's a gross libel! Blusters—Of course it is. Wiseman—Well, I should say. Why, everybody admits you're a pretty good liar.

#### Literary Clubs.

Literary clubs are a very harmless form of hero worship. They make just the same excuse for literary people to meet together as whist or bridge to a less bookish class.—Sphere.

#### Refrigerators and Hammocks

There is a lot of warm weather yet before us and it will pay you to improve this offer.

MADOLE & WILSON

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

Address F. J. CHENEY & CO, Toledo, O. We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm.

WALDING, KINNAN & MARVIN, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

#### LAPUM.

(For last week.)

The sermon given in the meeting house, here, on Thanksgiving day, by Rev. R. A. Whattam, was appreciated by a large congregation. Our Sunday school closes on Oct. 28th. We are very grateful to the superintendent, Wilbur Love, for the interest he has taken in the Sabbath School, and hope to see him in the same office the coming year.

Mr. and Mrs. Sidney Bush spent Sunday with friends in Thompsonville. Harold Huff, Camdan East, was the guest on Sunday last, of his sister, Miss Jessie Huff.

A good offer—The Napanee Express from now until January 1908 for \$1.00. Send your order early.

#### CASTORIA.

Bears the Signature of *Charles H. Fletcher*

Deseronto, Ont., Oct. 23 Albert Fields, an employee of the Standard Chemical company, while engaged in taking a valve off one of the boilers, neglected to shut off the steam, when the steam rushed through the aperture and quickly enveloped him. The unfortunate man was taken to his home as soon as possible. The skin, from over half of his body, is entirely gone, and he is in a very serious condition. The doctors hope to save his eyesight.

**Vapo-Cresolene**

Established 1879

Whooping Cough, Croup, Bronchitis, Cough, Grip, Asthma, Diphtheria

Cresolene is a boon to Asthmatics

Does it not seem more effective to breathe in a remedy to cure disease of the breathing organs than to take the remedy into the stomach?

It cures because the air rendered strongly antiseptic is carried over the diseased surface with every breath, giving prolonged and constant treatment. It is invaluable to mothers with small children.

Those of a consumptive tendency find immediate relief from coughs or inflamed conditions of the throat.

Sold by druggists. Send postal for booklet.

LEWIS, MILES CO., Limited, Agents, Montreal, Canada. 307

## HAS EASY INSIDES

IMPROVEMENT NUMBER TWELVE

Grinding, binding, blistering Insides

Foot-rite Easy Insides

The feet work harder than any part of the body. They must walk long distances behind the plow or on fatiguing city pavements stand many tedious hours behind counter or before bench, or endure irksome confinement under desk or machine.

Do they deserve kind treatment? Yes! Do they get it? No! Man is kind to horses' feet—cruel to his own. He shoes his horse with skill and care to insure perfect comfort, but shoes himself with any old shoes—shoes that squeeze, pinch, deform and blister his feet.

If you want to be kind to your faithful, burden-bearing, hard-toiling feet, we'll tell you how. Call on the Foot-rite retailer in your town. His name's below. Don't be timid. You'll find his door swinging inward but never outward to find a more welcome store. Let him fit you with a pair of Foot-rites. You'll find something unusual about their insides. You'll find your feet feeling almost as free, unconfined and comfortable as unshod feet. Why? Because Foot-rites are built with Easy Insides. And why have they Easy Insides? Ask the Foot-rite retailer. He'll explain how the Easy Insides are constructed—with supple Normal-Calfskin in the uppers to give the feet a soft, soothing covering. With wrinkleless uppers free from hard, stiff creases which rub and grind the foot's top surface with emery-like roughness. With an inside shape that's the precise shape of your foot, due to the Foot-sculptured Last over which the inside was molded. And with a lot of other easy inside devices such as Toe-Freedom Uncollapsible Box Toes, Heel-Comforting Counters, Hurtless Instep Seams, Ivory-like Insoles, and "Won't Blister" Hooks and Eyes.

Foot-rite Easy Insides deserve the name of Kind Insides. You'll be for them strong after a few days' wear. Anywhere in America, Canada or Great Britain—\$4.00 and \$5.00. Every Pair Goodyear Welted.

# SCORES HURLED TO DEATH

## Three Electric Coaches Plunged From Thoroughfare Bridge.

Atlantic City, N. J., Oct. 28.—A railroad accident even worse than the Meadow wreck of July 30, 1898, sent about 60 people to a sudden death this afternoon. The cars of the 1.30 o'clock train on the West Jersey & Seashore Railroad lines, due here at 2 o'clock, jumped the track on the trestle bridge over the Thoroughfare and before the passengers could escape they were hurled to a watery grave.

### A TURNED-IN RAIL.

The accident is due to a rail "turning in." It appears that this rail, which was an outside one, must have been out of plumb about an eighth of an inch. The sharp flange of the electric train caught this and twisted it inwards. Had it spread instead of twisting inwards the accident never would have happened. This twist threw the first car off the track and into the water. The result was that the second and the third cars were dragged with it. While the third car was descending the rear portion of it struck a piece of the abutment, hung there for a short time and then slid into the water. But this brief stop saved several lives. A number of men and a few women leaped out of windows and the rear door either into the water or caught hold of a post and were rescued. It is said that fully 80 or 100 passengers were aboard, mostly all in the first and second cars. These lost their lives.

### A MOMENT'S RESPITE.

When the rear car of the train caught on the abutment of the bridge, where it hung poised for a minute, there was a frantic rush of the passengers for the rear door. Probably a score or more got out and as the car plunged over the edge others leaped into the water. The car fell upon the others and slowly slid off into the water. The moment's respite, however, gave several passengers an opportunity to leap into the water before the car was altogether submerged.

### TRAINMEN'S HEROISM.

Motorman Scott stuck to his post and went down with his train. Conductor Curtis also perished. The third trainman, Brakeman Wood, proved himself a hero. When the train left the rails and was bumping over the ties Wood ran to the rear door of the last car, threw it wide open and held it for the passengers to escape. He held the door open until the car slid off the bridge and went into the water with it. He then swam to the shore. His action in holding the door open probably saved many lives.

### WORK OF RESCUE.

When the third car dropped into the

water Henry Roemer was in the act of crawling from a window. Freeing himself with an effort and being a strong swimmer, Roemer set about to help others. Swimming along the side of the fast-sinking car, he kicked out the glass and thus gave several passengers an opportunity to escape. One man was caught in a window and was drowned before he could extricate himself. The accident was witnessed by many people and rescue work was prompt. Strong swimmers endeavored to dive to the submerged cars in search of bodies, but so strong was the rushing tide that they were forced to desist. Professional divers were then called upon, who donned their armor and went down. But even then they were unable to do anything against the tide that swirled around the sunken coaches.

Among the passengers were twenty men of the Royal Artillery Band, who were on their way here from Philadelphia. One or two bodies of the bandmen were recovered early in the afternoon.

Chas. Kessler, a local merchant, was the first to arrive at the spot and displayed a cool head. He got an axe, jumped on the top of a submerged car and began to hack in the roof to liberate the imprisoned passengers. He did good work, but could not release many under the circumstances. It is believed, however, that he did get some of the women out. T. C. Smith of Newfield and A. R. Kelley of Jeffersonville, N. Y., who were passengers on the ill-fated train, got off at Pleasantville for no other reason than that something told them to change their minds about coming to Atlantic City. They heard of the accident afterwards and came over, thankful that they did change their minds.

### SCENES AT THE WRECK.

A sickening scene at the wreck was when one of the men at work on the top of a submerged car discovered a woman's jewelled hand sticking through the roof ventilator. He worked heroically to get her body out, and finally succeeded in drawing it through the aperture. It has not yet been identified.

J. S. De Ford, a railroad man, saw a man clinging to the trestle, crying for help, and succeeded by crawling along the edge in reaching down and pulling him up safely. He was cut and bruised, and declined to give his name.

An Italian named Mareo Bona was rescued from the third car, but died later from his injuries. Boats soon swarmed about the spot where the cars went down, their location being marked by the tops of the trolley poles. Although the cars get power from a third rail they also carried trolley poles to take power from above if necessary.

Cheese—Ontario, 12½¢ to 13¢; Quebec, 12½¢ to 12½¢.

### UNITED STATES MARKETS.

Milwaukee, Oct. 30.—Wheat—No. 1 Northern, 78 to 79¢; No. 2 Northern, 75 to 77½¢; December, 72½¢ bid. Rye—No. 1, 64½ to 65½¢. Barley—No. 2, 55 to 56¢; sample, 40 to 54½¢. Corn—No. 3 cash, 45½¢; December, 42½¢ bid. Minneapolis, Oct. 30.—Wheat—December, 72½¢; May, 76½ to 76½¢; July, 78 to 78½¢; No. 1 hard, 76½¢; No. 1 Northern, 75½¢; No. 2 Northern, 73½¢; No. 3 Northern, 72½ to 73½¢. Flour—First patents, \$4.20 to \$4.30; second patents, \$4.05 to \$4.15; first clears, \$3.25 to \$3.35. Bran in bulk, \$15.50 to \$15.75.

### LIVE STOCK MARKETS.

## Fashion Hints.

### REALLY "PICTURE HATS."

The millinery is full of historic models more or less easy to recognize. Has the chapeau a little round crown covered with tightly drawn velvet or satin, with two bunchy rosettes of the same material above the ears and with feathers curling over the back? Du Maurier. Don't you remember the many maidens in his illustrations who wore the duplicates of this piece of headgear perched on the top of waved hair incased in nets?

If you have the narrow brim in front and the widely rolling brim in the rear, and a deep bandeau, with the whole of the trimming, with the exception of a narrow band, encircling the crown, and if you wear it quite tip-tilted, you are "after Nattier." These models are copied or evolved—for they have gotten a little away from the original—from the dainty models of the eighteenth century.

If you choose chapeau turning well over on one side, with quantities of soft velvet, with coque feathers of the same shade, and with an antique paste buckle clipping the brim and holding the feathers in place, you have a Rose du Barri.

An extremely tiny hat with feathers waving backward in the Du Maurier style, only smaller, belongs to the King Charles period. Side by side with this is the Gainsborough, in black velvet and feathers or covered with fruit and flowers. The Polichinelle hat again is seen in velvet, with its garlands of tiny silk and velvet roses; the velvet toques are Henry Deux. There is the immense felt hat worn by La Grande Mademoiselle in the days of the Fronde, and the soft puffed velvet crowns are exactly like those in the portraits by Reynolds and Romney.

All of these models were shown at the openings in close proximity. Some large hats are shown in inexpensive girlish models of the early Victorian type, with downward broad brim, in dark and medium-colored felts, being trimmed with a narrow folded band of silk and two "cabbage rosettes" on either side in contrast or in a light shade of the same.

### CHIFFON LINGERIE.

Not many of us have yet fallen such helpless victims to the charms of the chiffon slips that silk slips are relegated hopelessly to the background. Instead, we are daily discovering new beauties in those very slips of silk, both the plain ones and those of as prettily flowered silk as ever graced a Pompadour.

But the craze for chiffon has had its influence upon them. The prettiest slips of all have flounces of chiffon set over the flounce of silk, and most of the flowered slips are practically drop-skirts to airy slips of chiffon which soften the flowers into misty, beautiful things.

Only the skirt is made separate from the outside. The silk, veiled with chiffon, is used as a lining for the waist, and, consequently, stitched into the seams with the outside. But the skirt is made entirely separate nine times out of ten—the tenth time joined only by being brought into the same waistband.

Fit they must, even more perfectly than they did a year ago, for the dress itself, if it is chiffon or some one of the other airy stuffs, is most probably full about the hips, and only a perfectly cut and fitted lining is possible with that. Even when cloth makes the dress, it is made upon circular lines, that show up every possible wrinkle in the slip underneath. Of course, with cloth there

## THE CULTIVATION OF BULBS.

Notes by Mr. Wm. Hunt, Ontario Agricultural Society.

At the request of the Guelph Horticultural Society the following short notes on "Bulb Culture," have been prepared by Mr. Wm. Hunt, Ontario Agricultural College. These notes are furnished with bulbs given to scholars of Guelph schools by the Society, as premiums in geranium growing competition:

**Dutch Hyacinths.**—These hyacinths are best adapted for pot or window culture, as they are scarcely hardy when planted out of doors. Use loamy potting soil, or good garden soil. If earth from the garden is used, mix about one-fifth part of fine sharp sand with the earth. Plant the bulb so that the top of the bulb is about half an inch below the top of the pot. Press the soil fairly firm around the bulbs. Water them well, once, so as to moisten all the soil in the pot or box. The top of the bulb should be only just below the surface of the soil when potted. The surface of the soil should be about half an inch below the rim of the pot to allow space for water. Place the pot or box in a cool place, either out of doors or in the cellar, and cover it with about two inches of coal ashes, sand or light soil. If put in a cool, damp place they will require no more water until they are taken out. If they are put out of doors some extra covering of leaves or straw should be given to prevent them from being frozen too severely. Keep them in this cool, dark position for five or six weeks, or longer, until the roots are rooted well, when they can be brought into the window. Water must be given now, whenever the soil appears dry. Keep the soil always moist but not soddened, until they have done flowering. If potted in September or October and treated as described they should be in flower at Christmas or New Year's. Dutch hyacinths are of little use to grow the second year, although if kept dry when they have done flowering they will sometimes flower again the following season if repotted in autumn or planted out in the garden the following summer.

**Narcissi and Tulips.**—Both of these can be grown in pots or boxes in the window for winter flowering, or they may be planted out in the garden for spring flowering. If grown in pots or boxes for the window treat them as recommended for the Dutch hyacinths, although they will be a few weeks later in flowering.

If you wish to grow them out of doors plant them early in October. Dig the ground well and rake it fine. Then plant the bulbs in clumps, rows, or singly in the border. Dutch hyacinths, narcissi or tulip bulbs should be planted so that the tops of the bulbs are two or three inches below the surface of the soil, and should be about eight or ten inches apart. The surface of the soil should be patted down firm after the bulbs are planted. Dutch hyacinths are not quite hardy out of doors and require winter protection.

Narcissi and tulip bulbs are quite hardy, and will need no protection during winter. They will continue to grow and flower every spring for years if left undisturbed in the border.

All bulbs, such as hyacinths, tulips, narcissi, etc., should be potted and planted as above. In planting out of doors, however, smaller bulbs, such as crocus, snowdrops, chionodoxa, scilla, etc., can be planted closer together, but at only about half the depth recommended for Dutch hyacinths, narcissi and tulips. Crocus do not grow well as a rule indoors, but make good border bulbs.

### CHANGES IN YUKON FORCE.

Several Mounted Police Posts Have Been Closed.

A despatch from Ottawa says: The Mounted Police Department is making sweeping changes in the Yukon with a view of reducing the force. In addition

## THE WORLD'S MARKETS

REPORTS FROM THE LEADING TRADE CENTRES.

Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home and Abroad.

Toronto, Oct. 30.—Flour—Ontario wheat 90 per cent, patents are quoted at \$2.72 to \$2.75 in buyers' sacks outside for export. Manitoba first patents, \$4.50; second patents, \$4, and strong bakers', \$3.40, Toronto.

Bran—The market is steady at \$15.50

Toronto, Oct. 30. — Flour — Ontario wheat 90 per cent. patents are quoted at \$2.72 to \$2.75 in buyers' sacks outside for export. Manitoba first patents, \$1.50; second patents, \$1, and strong bakers', \$3.00, Toronto.

Barley—The market is steady at \$15.50 to \$16 in bulk, outside. Shorts are quoted at \$18.50 outside.

Corn—No. 3 old American is quoted at 52½ to 53c on track, Toronto; New Canadian, 40c bid west.

Wheat—No. 2 white wanted at 70c outside, and at 71c at 70 per cent. points, without sellers. No. 2 mixed, 70c bid outside on G.T.R. or C.P.R. No. 1 Northern offered at 81c track, Point Edward, with 80c bid. No. 1 hard nominal at 82½c.

Barley—No. 2 was 50c bid east, and No. 3 extra, 47½c bid at 78 per cent. points on C.P.R. A car of No. 3 offered at 51c spot, Toronto, without bids.

Peas—No. 2 wanted at 78c on C.P.R. or G.T.R. west, but none offered.

Oats—No. 2 white wanted at 35½c on a 5c rate to Toronto, and a 4c offered at 35c on a 9c rate to New York, with 34c bid.

Buckwheat—No. 2 wanted at 54c on G.T.R. west, without sellers.

#### COUNTRY PRODUCE.

Beans—Hand-picked selling at \$1.75 to \$1.80, and primes at \$1.60 to \$1.70.

Honey—Strained quoted at 10 to 12c per lb. and combs at \$2 to \$2.50 per dozen.

Hops—New quoted at 18 to 22c.

Hay—No. 1 timothy scarce and quoted at \$11.50 on track here; No. 2 quoted at \$4 to \$8.50.

Straw—\$5.50 to \$6 per ton.

Potatoes—Ontarios, 55 to 60c per bag on track, and New Brunswicks, 65 to 70c per bag.

Poultry—Turkeys, fresh killed, 15 to 16c; chickens, dressed, 8 to 9c; alive, 7 to 8c per lb. Fowl, alive, 5 to 6c; ducks, dressed, 9 to 10c; do, alive, 7 to 8c per lb.

#### THE DAIRY MARKETS.

Butter—Bound rolls are quoted at 29 to 23c; tubs, 19 to 20c; large rolls, 18 to 20c. Creamery prints sold at 25 to 26c, and solids at 24 to 24½c.

Eggs—Quotations rule from 21 to 22c per dozen.

Cheese—Large cheese, 13¼ to 14c, and twins at 14¼ to 14½c.

#### HOG PRODUCTS.

Dressed hogs in car lots nominal. Bacon, long clear, 12½c per lb. in case lots; mess pork, \$21.50 to \$22; short cut, \$24.

Hams—Light to medium, 15½c; do, heavy, 15c; rolls, 12½c; shoulders, 11½ to 12c; backs, 11½ to 18c; breakfast bacon, 15 to 16c.

Lard—Towers, 12c; tubs, 12½c; pails, 12½c.

#### BUSINESS AT MONTREAL.

Montreal, Oct. 30.—Grain—There was some inquiry for Manitoba wheat from over the cable, but bids, though a fraction higher than yesterday, were about a cent a bushel out of line. Holders of oats on spot demand 39½c in store for No. 4, 40½c for No. 3, and 41½c for No. 2. Flour—Manitoba spring wheat, \$1.60; strong bakers', \$1.40; winter wheat patents, \$1.40 to \$1.25; straight rollers, \$3.75 to \$3.80; do, in bags, \$1.05 to \$1.75; extras, \$1.50 to \$1.60. Feed—Manitoba bran, in bags, \$29; shorts, \$23 per ton; Ontario bran, in bags, \$20 to \$20.50; shorts, \$22.50 to \$23; milled meal, \$21 to \$25 per ton; and straight rollers, \$28 to \$29. Provisions—Barrels short cut mess, \$22 to \$24; half bbls, \$11.75 to \$12.50; clear fat backs, \$23.50; long cut heavy mess, \$20.50; half bbls, do, \$10.75; dry salt long clear bacon, 12½ to 13½c; barrel plate beef, \$12 to \$13; half bbls do, \$6.50 to \$7; barrel heavy mess beef, \$11; half bbls do, \$6; compound lard, 8 to 9½c; pure lard, 12½ to 13c; kettle rendered, 13½ to 14c; hams, 14 to 15½c; breakfast bacon, 15 to 16c; Windsor bacon, 15 to 16½c; fresh killed abattoir dressed hogs, 89 to \$9.25; alive, \$6.25 to \$6.50. Eggs—Selects, 22 to 23c; No. 1 candled, 18 to 19c. Butter—Choicest creamery, 23½c; medium grades, 22½ to 23½c.

to 70c; No. 2 Northern, 73½c; No. 1 Northern, 75c; No. 2 Northern, 73½c; No. 3 Northern, 72½ to 73½c. Flour—First patents, \$4.20 to \$4.30; second patents, \$4.05 to \$4.15; first clears, \$3.25 to \$3.35. Bran in bulk, \$15.50 to \$15.75.

#### LIVE STOCK MARKETS.

Toronto, Oct. 30.—Weakness in prices was perceptible at the Western Market to-day.

A lower tendency was remarked in the market for exporters' cattle. The run of prices was from \$4 to \$4.65. The most of the cattle sold under \$4.50 per cwt.

Choice butchers', \$1.40 to \$1.50; medium heavy butchers', \$3.65 to \$4.20; fat cows, \$3.30 to \$3.50; common, \$2.25 to \$3.25; canners, \$1.50 up.

Feeders and stockers were wanted. Short-keeps, \$4 to \$4.15; feeders, 1,000 to 1,200 lbs, \$3.25 to \$3.70; stockers, \$2.75 to \$3.25; stock bulls, 1,000 to 1,200 lbs, \$2.25 to \$2.55 per cwt.

Export lambs, \$5.25 to \$6; export ewes, \$4.25 to \$4.75; export bucks, \$3 to \$3.50; calves, \$3.50 to \$6 per cwt.

Milch cows were steady to firm at \$25 to \$55 each.

Hogs were quoted at \$6.12½ for select, and \$5.87½ for lights and fats.

#### PROTEST FROM JAPAN.

Against Treatment of Japanese Children in California.

A despatch from Washington says: Viscount Aoki, the Japanese Ambassador, at a conference with Secretary Root on Thursday made the request on behalf of his Government that the United States see that Japanese subjects in California were accorded their full rights under the treaty of 1894, including the right of children freely to attend the public schools of San Francisco. Secretary Root will take the matter up with the President, and it is likely that representations will be made to the authorities. The Ambassador said the exclusion of Japanese children from San Francisco schools was the chief cause of the harsh criticisms of the United States. He was inclined to discount the other causes given for the sentiment against the United States.

The action against the Japanese\* is regarded as extremely serious by Viscount Aoki, and he made no attempt to discount its importance. "After the years of friendship between the two nations," said he, "it seems too bad that the poor innocent little Japanese school children should be subjected to such indignities."

#### PRISONERS ESCAPE.

Overpower Guards and Make Their Escape.

A despatch from London, England, says: When a warder in the jail at Gloucester noticed that the light was out in one of the cells between 8 and 9 o'clock on Thursday evening, he incautiously opened the door of the cell and a convict sprang upon him and knocked him down, rendering him unconscious. The convict then seized the warder's keys and released convicts from their cells. The governor of the jail was aroused by the tumult and hurried to the spot. But the convicts seized him and threw him into a cell with the unconscious warder and locked them in. The freed convicts then hurried to the main entrance, overthrew a warder who tried to stop them there and stripped him of his keys and money.

Five succeeded in escaping, the others being seized. The five rushed to the bank of the River Severn and demanded of a boatman that he row them across. He refused, and they then left the river and fled into the country.

#### NEW YORK'S BIG BUDGET.

Will Cost \$125,000,000 to Run City for a Year.

A despatch from New York says: The Board of Estimates has agreed upon a tentative budget. It will cost about \$125,000,000 to run the city Government of Greater New York next year.

other airy stuffs, is most probably full about the hips, and only a perfectly cut and fitted lining is possible with that. Even when cloth makes the dress, it is made upon circular lines, that show up every possible wrinkle in the slip underneath. Of course, with cloth there is no interlining of chiffon.

Yet the slips themselves are rarely made in circular styles, but are gored, the seams handled with exquisite care, so that they shall not show through as wrinkles.

Going to the other extreme, stockings, even those for winter, stay as chiffony as they were last summer. Silk stockings, by the way, are enjoying an almost unprecedented popularity. Where a woman used to indulge herself in an occasional pair, by way of an extra bit of daintiness, she's apt to have them by the half dozen.

#### COMING CRAZE FOR RED.

Evening dresses of brilliant red are to be worn this winter—a fad which may be happily affected by the pale type of women. Where one does not wear an entire red gown brilliant scarlet touches are combined with white, as, for instance, a coronet of vivid berries for the hair. This gay wreath was worn in England recently by an otherwise "white bride," and at many fall weddings red has been the contrasting color introduced in the bridesmaids' costumes.

One of the new winter costumes is the scarlet broadcloth with trimmings of black broadtail piped with scarlet velvet, finished with some huge black enamel buttons inlaid with gold. To go with this gown was a toque of white Astrakan trimmed with scarlet and white wings. The Princess Henry of Prussia has affected the red fad, and astonished everybody this year at Cowes by the vividness of her red and white costume, in which there was an open-throated blouse and a kind of Tam o' Shanter worn with yards of brilliant red veiling streaming from it.

#### BODY FOUND IN SLOUGH.

Supposed to be That of James Greenley, Forget, Sask.

A despatch from Moosomin, Sask., says: At an early hour on Friday morning James Kenan discovered the body of a man in a slough about a mile south of the town. The body was in an advanced stage of decomposition, having been in the water some five or six months. Apparently the unfortunate man had attempted to make his way across the slough, which is a large one, and, for some cause impossible at this late date to fathom, he fell where he was found. An envelope on the body addressed to James Greenley bears the business address of Dr. McDougall, at Forget, Sask. The register of the Hotel Grand, Moosomin, shows that one James Greenley registered there on June 4th last. The authorities at Forget have been communicated with in order if possible to fully identify the unfortunate man.

#### MATES CHOPPED HIS LEG OFF.

Remarkable Presence of Mind and Resolution of C. N. R. Engineer.

A despatch from Winnipeg says: Caught beneath his engine in the C.N.R. wreck at Eli, B. F. Unger coolly gave the directions by which his companions chopped off his leg to save his life. Steam was escaping from the shattered boiler, and the imprisoned man was being slowly roasted. He charged the fireman to tie a rope around the upper part of the limb that he might not bleed to death, then with one terrific blow of an axe the leg was chopped free and the engineer removed from the steam bath. He retained consciousness the entire time, and gave the orders that caused the appropriation of a hand-car on which he was brought to Winnipeg. For seven hours he sustained the awful pain, only to die in the St. Boniface Hospital on Wednesday morning.

#### Several Mounted Police Posts Have Been Closed.

A despatch from Ottawa says: The Mounted Police Department is making sweeping changes in the Yukon with a view of reducing the force. In addition to Major Cuthbert, two others of the commissioned officers, Capt. McDonnell and Dr. Fraser, are to be transferred to the prairie provinces. The district police posts at Mayo and Glacier have been closed for the winter, as well as the police hospitals at White Horse and Dawson. Police patients will be cared for in the other hospitals of these towns.

The patrol steamer Vidette, which alone occupied the services of eleven men during the summer, has been sold and it is the intention to dispose of a large number of horses and dogs kept at the Dawson post. About the only work to be carried on during the coming winter will be the sending of a patrol from Dawson to Fort Macpherson, at the mouth of the Mackenzie, as was successfully done last year. These changes will reduce the force in the Yukon to a considerable extent.

#### \$9,500 FIRE AT BARRIE.

Dymont Foundry and Cutting Sheds a Mile Apart Destroyed.

A despatch from Barrie says: Incendiaries are supposed to have been responsible for heavy losses sustained by the Dymonts here on Sunday morning. At 3 o'clock the cutting shed at Mickle Dymont and Son's woodyard was destroyed, with a loss of \$2,000, and shortly before 7 o'clock the Dymont foundry, a mile away, was seen in a blaze. It was totally destroyed with all its contents. The loss is \$9,500, with no insurance.

#### SHOT HIS WIFE.

Crime of an Aged Man on Esplanade at Quebec.

A despatch from Quebec says: On Saturday morning a man named George Lecouteur shot and instantly killed his wife on the Esplanade here. The pair, it seems, were sitting on one of the benches facing St. Louis Street, near the Garrison Club, when Lecouteur suddenly drew his revolver and fired, the bullet entering his wife's left cheek and passing through the brain, causing instant death. It is said the man has been acting strangely of late. Lecouteur was immediately arrested.

#### RUSSIA'S TRADE INCREASING.

Volume in Favor of the Empire in the Last Five Years.

A despatch from St. Petersburg says: The official returns of the Ministry up to the month of October place the exportations of the empire at 803,000,000 roubles; importations, 470,000,000 roubles. By comparison with the returns of the last five years the volume of trade in favor of Russia has increased 33 per cent.

The Government on Wednesday adopted the agrarian project drawn up by Gourko giving the peasants free disposal of the land purchased by the aid of the treasury.

#### ENLARGING POWER PLANT.

Lake Superior Corporation Will Spend a Million in Michigan.

A despatch from Sault Ste. Marie, Ont., says: Mr. Chas. D. Warren, President of the Lake Superior Corporation, says a contract for improving the power plant in the Michigan Soo will be let in a few days. The plans are now in the hands of contractors. The cost of the improvement will be near \$1,000,000, and it will take five months to complete the work. Mr. Warren intimates that negotiations are now on for the sale of power to large industrial concerns which will locate there.

## YOUNG FOLKS

### A REWARD OF HONOR.

Her name was Honor Elizabeth Capen, but grandpa always called her "Honor Bright." She loved reading better than anything else, and she was never so happy as when curled up in some cozy corner with a story book.

One vacation Honor went to visit her grandpa. He was a minister, and had a large library. The moment Honor saw that delightful, book-filled room, she gave a cry of joy and rushed toward the shelves. But grandpa was afraid she read too much.

"Honor Bright," said he that evening, "would you like a turquoise ring?"

"A turquoise ring! Oh, grandpa!" cried Honor.

"Yes," said grandpa, "I'll give you the very prettiest one I can find if you will not open a single book or magazine for a week."

"A week—not read for a whole week!" gasped Honor.

"Wouldn't you like the ring, Honor Bright?"

"Yes, grandpa."

"Then will you try to earn it?"

"Yes, grandpa," said Honor.

The first days of that long storyless week passed very slowly. Then at last it was Sunday again. "To-morrow I can read," said Honor, happily.

That afternoon a steady rain set in. Grandpa had a caller, and grandma went upstairs for a nap. Honor, left to herself, wandered into the library. The big room seemed very dreary, and she wished she could think of something perfectly splendid to do.

Suddenly a bit of something red caught her eye, wedged in between the wall and the shelf above. She gave a pull, and down came a book—a very old and ragged book—"Uncle Tom's Cabin"—and Honor had never read it.

Hour after hour flew by. The rain stopped, the fire died down, twilight shadows crept into the room, and still Honor Bright, deep in the story, read on and on and on.

"Honor! Honor!" called grandma at last. "Where are you? Grandpa has gone to the vesper service, but he left this for Honor Bright."

Honor opened the tiny box dreamily, and saw the little ring with the shining blue stones.

"Try it on, dear," said grandma. "I'm sure you deserve it—little Honor Bright."

But in a twinkling the little maid was out of the house and splashing through the puddles to the church across the street. "I would never be Honor Bright again if I kept it," she sobbed.

Grandpa was just entering the church when Honor overlooked him.

"Here's the ring, grandpa," she whispered. "I forgot and read all the afternoon, so I mustn't keep it a single minute." Then grandpa kissed her tenderly and said softly, "Of course not, my dear Honor Bright."

The next week Honor went home, and two months later, on her birthday, a little box came to her from grandpa. It contained the turquoise ring, inside of which, in tiny letters, was engraved, "Honor Bright."

### HOLD ON, BOYS.

"Let dogs delight to bark and bite,  
For God hath made them so."

Some boys, like some dogs, are contemptibly mean. They show their ugly natures every day. They pick quarrels with their schoolmates, and snarl and fight. They are overbearing and rude. They find unoffending good-natured boys, frighten them, threaten to strike them, step on their toes, and do other hateful things. Such boys make bad men. Thugs, and thieves, and "plug-uglies," and sharp criminals, all come from the ranks of bad boys. Some boys

## HEALTH

### VENTILATION IN WINTER.

It is beginning to be more generally realized that the overheating and faulty ventilation of dwellings is an important factor in pre-disposing to many forms of illness.

The custom of living in rooms habitually kept at a temperature above seventy degrees Fahrenheit, and with the atmosphere surcharged with noxious gases and deficient in the moisture necessary for the health of the delicate linings of the air-passages, renders the body much less able to resist the effects of exposure to cold and wet, and is one of the most important reasons why, in some families, coughs and colds are matters of everyday occurrence.

The stiffness of the air produced by the presence of numerous people in small rooms is due not only to the consumption of oxygen and the accumulation of carbon dioxide gas, but also to the formation in small quantities of a highly poisonous substance called "crowd-poison." In addition, noxious gases arise from the imperfect combustion of coal in stoves or furnaces and of gas or oil in other forms of heaters, while the air in steam-heated apartments is always abnormally dry unless special pains are taken to supply the necessary moisture.

Living in such rooms is productive of general depression, headache, inability to concentrate the thoughts and bad temper, and is particularly harmful for children, whose bodily and mental development is interfered with, and who are rendered very susceptible to diseases of the nose, throat and lungs.

Owing to the means of heating and the increased amount of artificial illumination, the frequent airing of rooms is even more essential in winter than in summer, and at least once a day fresh air from outdoors should be allowed to circulate through each room. If the apartment must be occupied while this is done, thorough ventilation is possible without danger by resort to an old and simple, but very effective, plan. A board about six inches wide is cut so that its length equals the width of the window, and is placed on the edge under the lower sash, which is shut down upon it. In this way air enters freely through the space between the two sashes, but the current is directed upward, and no draft is felt in the room.

It should not be forgotten that the ideal plan permits the escape of the stale air at the same time that fresh air is being admitted, and that an open fireplace in operation forms one of the most satisfactory means of household ventilation.—Youth's Companion.

### CARE OF THE TEETH.

Avoid all rough usage of the teeth, such as cracking nuts, biting thread, etc., as by so doing even good sound teeth may be injured.

If you think a tooth is beginning to decay, that is the time to have it attended to.

Small stoppings will last a long time, and large stoppings will make a tooth useless for years.

Children should be brought from time to time to have the first set of teeth examined, because then the second set of teeth is more likely to be good and strong.

Children should be taught to take care of the first set of teeth from the earliest age.

To give a child strong teeth and bones, good second flour is better than the very white flour for bread-making, and in winter porridge is very good, and fresh milk at all times.

### GREAT IRON ORE DEPOSIT.

Discovered Near Other Deposits at Bathurst, N. B.

## RUSSIAN CAMPAIGN METHODS

### December 30 Fixed as the Date For Election of New Duma.

A despatch from St. Petersburg says: As a result of recent conferences the Government has decided tentatively on December 30 as the date for holding the election of members to the new Parliament. As far as possible these elections will be held simultaneously throughout the empire. A circular has been sent to the various provincial Governors advising them of this decision and instructing them to bend all their efforts to procure the election of Government candidates.

The term "Government candidate" is defined to mean the Octobrists and their allies, but where there is no chance for the election of these candidates the influence of the Government will be thrown on the side of the Regenerationists in order to defeat the constitutional Democrats.

### CAMPAIGN METHODS.

The circular suggests a number of measures to hamper the campaign of the opposition parties, including the deportation and imprisonment of pernicious agitators. As practically the entire press favors the constitutional Democrats and the more radical parties the various Governors are directed to turn the official gazettes, published in the larger towns of each province, into campaign organs.

### NEED OF HASTE.

There is a strong desire to take advantage of the present tranquillity and conclude the elections before the Russian Christmas, hence the Government may disregard the six weeks' interval which, according to law, must elapse between the publication of the election lists and election day. If the lists of voters on the borderlands and elsewhere are delayed in coming in the ukase to make public announcement of the elections may not be issued.

### WHOLESALE ARRESTS.

A despatch from Lodz says: The police on Tuesday night searched 143 houses here. Doctors, lawyers and business men to the number of seventy were arrested.

A despatch from Warsaw says: Wholesale arrests and domiciliary searches continue here. The police, aided by troops, are vigorously running down all information obtained from former terrorists, who are now serving the Government as detectives. The situation is growing more serious. The authorities are preparing rigorously to stamp out the slightest disturbances.

Owing to the postponement of the ex-

ecution of certain terrorists, the Socialists have withdrawn their proclamation for a general strike.

### SOLDIERS ARRESTED.

A despatch from Constatd says: Two hundred or more soldiers of the garrison here have been arrested on the charge of being members of a revolutionary organization and, in addition, a large number of arrests have been made in connection with the mutiny here last August.

### CONVICTS ESCAPE.

A despatch from Irkutsk says: An attempt of the convicts here to break out of jail on Tuesday night led to a serious fight, during which nine convicts and the Governor of the prison were killed, and a number of persons were wounded. Seventeen convicts succeeded in making their escape.

### WORKMEN RECOVER FIREARMS.

A despatch from St. Petersburg says: At Tashkent, in Asiatic Russia, a detachment of gendarmes, who on Wednesday seized a shipment of 238 revolvers and 16,000 cartridges destined for the revolutionists, were later attacked and defeated by an armed party of workmen, who carried off the greater part of the revolvers and 8,000 cartridges.

Regarding the repeated rumors that the Government is contemplating the issue of another loan, it is authoritatively stated that no loan, foreign or domestic, was contemplated, except the internal loan to be issued about Dec. 1 in order to balance the budget on the new year. The amount of this loan has not been definitely fixed.

### REVENGE ON TRAITOR.

A despatch from Mitau, Courland, says: A man named Spragge, once a prominent revolutionary leader in the Baltic provinces, was killed here on Thursday, while on his way to America, because he had betrayed his party. He had just recovered from a wound inflicted on him by Revolutionists.

### HAD BOMBS IN HIS KEEPING.

A despatch from Kiev, European Russia, says: Lieut. Konovaloff, an artillery officer, has been sentenced to five years' imprisonment at hard labor for having bombs in his possession.

## CONDENSED NEWS ITEMS

#### CANADA.

Measles are epidemic in West London.

An epidemic of diphtheria prevails at La Salle, Man.

Brantford will vote on the local option by-law in January.

Col. Edwards is forming a city regiment in Edmonton.

British Columbia mills cut 473,713,986 feet of lumber last

has forbidden its clergy to marry divorced persons.

The largest flag in the world, a Star-Spangled banner, is to hang in the great court of the Post Office Building, Washington, as soon as the bunting can be sewn together. It will be 60 feet long by 35 wide, and the cost is to be about \$200.

President Roosevelt has determined to prevent the further simultaneous employment in Government service of husband and wife. One or the other must retire. He has requested the Civil Service Commission to furnish him a list of all such cases.

The Brotherhood of Railroad Trainmen, on behalf of its switchmen, have presented demands to all the railroads entering Chicago for an eight-hour day. The move is the most extensive attempted by the railroad organizations in many years. Every railroad west of Pittsburgh and Buffalo in the United States is involved.

They find unoffending good-natured boys, frighten them, threaten to strike them, step on their toes, and do other hateful things. Such boys make bad men. Thugs, and thieves, and "plug-uglies," and sharp criminals, all come from the ranks of bad boys. Some one has written good words, entitled, "Hold on, Boys":

Hold on to your tongues when you are just ready to swear, lie, or speak harshly.

Hold on to your hand when you are about to punch, scratch, steal, or do any improper act.

Hold on to your foot when you are on the point of kicking, running off from study, or pursuing the path of error, shame or crime.

Hold on to your temper when you are angry, excited or imposed upon, or others are angry with you.

Hold on to your heart when evil associates seek your company, and invite you to join in their mirth, games and revelry.

Hold on to your good name at all times, for it is of more value than gold, high places, or fashionable attire.

Hold on to truth, for it will serve you well, and do you good throughout eternity.

Hold on to your virtue—it is above all price to you at all times and places.

Hold on to your character, for it is, and ever will be, your best wealth.

### WORD FROM THE FAR NORTH.

#### Mounted Police Have Cut Trail Almost to Fort Graham.

A despatch from Ottawa says: The Mounted Police Department has been advised that Superintendent Constantine's detachment, which is engaged in cutting a trail from Edmonton to Dawson, has ceased work for the season. They have completed the trail from the Peace River to 20 miles west of Fort Graham. Men and horses will winter at the fort and recommence work early in the spring.

A much belated mail from Hudson Bay reached Ottawa on Thursday morning. Some of the letters were three years old, and had been held at various places on the great inland sea waiting to be picked up and forwarded.

Major Moodie has arranged for a winter parole from Fort Churchill. He hopes to be able himself to start in February for a trip by dog train to Oxford House, where he will meet a patrol sent from the North-West.

### SEVEN KILLED IN MINE.

#### Explosion of Gas Was Caused by Setting Off a Blast.

A despatch from Johnstown, Pa., says: By an explosion in the mine of the Cambria Steel Co. on Wednesday evening seven men are dead and two are painfully injured, but not fatally. The exact cause is not known, but it is supposed that the gas was fired by the setting off of a blast.

### MONEY TO THE INDIANS.

#### Commissioners Pay It Under the New Treaty.

A despatch from Toronto says: In connection with Indian Treaty No. 9 the commissioners have reported to the Provincial Treasurer's Department that last year 690 Indians were settled with, and this year 915, making a total of 1,605 Indians paid under the treaty north of the height of land. Under this treaty each Indian is entitled to \$8 the first year and \$4 a year afterward. Treaty No. 9 practically covers all the northern portion of Ontario. The commissioners have also paid 1,400 Indians in Keewatin, north of the Albany River, but this money comes out of the Dominion treasury. The commissioners have set aside certain reserves for the different tribes. These will have to be approved of by the Ontario Government before being definitely settled.

and in winter porridge is very good, and fresh milk at all times.

### GREAT IRON ORE DEPOSIT.

#### Discovered Near Other Deposits at Bathurst, N.B.

A despatch from Ottawa says: Mr. Einar Lindeman, who was sent by Superintendent of Mines Dr. Haanel to examine three promising iron ore deposits in the vicinity of Bathurst, New Brunswick, after completing his work discovered from the intensity lines of one of the deposits another ore deposit hitherto unknown of much larger extent than those he had been asked to examine. The first report is that the new deposit is 75 feet high, 80 to 100 feet wide, and extends 1,800 feet down to the Nipissiquit River, which it shows to cross. This discovery is a striking exemplification of the method of examining magnetic iron ore deposits which was inaugurated by the publication by Dr. Haanel of a report on the location and examination of magnetic iron ore deposits by magnetometric measurements.

### SPAIN'S REGENERATION.

#### Foreshadowed by Work of the Present Parliament.

A despatch from Madrid says: The budget proposals of the Government, which were read at the opening of Parliament on Tuesday, involve sweeping financial reforms, including the institution of the gold standard. The newspapers regard the legislative work of Parliament, especially the enactment of the law of associations and the suppression of the octroi dues (the tolls upon all goods entering all cities and towns) as the most important undertaking for years and as foreshadowing the moral and material regeneration of Spain.

### TO PUNISH ADULTERATION.

#### Justice Department Will Bring the Offenders to Book.

A despatch from Ottawa says: It has been a reproach for a long time that the Department of Inland Revenue has been inactive in the matter of prosecutions for adulterating food products. A recent departmental bulletin showed that maple syrup and maple sugars collected in all parts of the country had been greatly adulterated. Mr. Templeman has now placed the matter in the hands of the Department of Justice to prosecute the guilty parties.

### GREAT GROWTH OF WEST.

#### Shown by Census of the Three Prairie Provinces.

A despatch from Ottawa says: The returns of the quinquennial census of the three prairie provinces demonstrate that Manitoba's population has increased 40 per cent. in the five years, Alberta 65 per cent. and Saskatchewan 180 per cent. The figures are as follows:—

|                    | 1901.   | 1906.   |
|--------------------|---------|---------|
| Manitoba .....     | 225,211 | 364,000 |
| Alberta .....      | 72,841  | 184,000 |
| Saskatchewan ..... | 91,560  | 257,000 |

### GAMBLING IN NEW ZEALAND.

#### Drastic Bill to Suppress It Introduced into Parliament.

A despatch from Wellington, N. Z., says: Sir J. G. Ward, Premier of New Zealand, has introduced a drastic bill into Parliament for the suppression of gambling.

### GRAND TRUNK FLEET.

#### Orders About to be Placed for Vessels.

A despatch from London says: The Grand Trunk Pacific is about to place orders here for several large cargo and passenger boats for service on the Atlantic and Pacific.

at La Salle, Man.

Brantford will vote on the local option by-law in January.

Col. Edwards is forming a city regiment in Edmonton.

British Columbia mills cut 473,713,986 feet of lumber last year.

Smallpox is prevalent among Indians around Fort Saskatchewan.

Dr. Judson F. Clark, the Provincial Forester, has resigned.

The Ontario Government purposes to carry out systematically the deportation of alien lunatics.

Windsor's stone crusher has crushed 45,000 tons of cobblestones at a cost of 28c per ton.

A \$70 fine was put upon W. Bell of Weyburn, Sask., for scalping a Harvester's ticket to Penetanguishene.

The Grand Trunk Railway Company will apply to Parliament for power to establish a pension and superannuation fund for their employees.

Fourteen Grand Trunk conductors running between Toronto, Montreal and Portland have been discharged by the company.

John Erickson, a Fernie bar tender, threw himself in front of a moving train at Sentinel, B.C., and was cut to pieces.

It is estimated that the output of the Alberta coal mines this year, notwithstanding labor troubles, will be over 1,250,000 tons.

A serious outbreak of smallpox is reported at Middle Southampton, N. B. Seven families are afflicted, and there are twenty cases.

Saskatoon has given a flour mill company a fifteen years' exemption from taxation on condition of establishing a 500 barrel mill.

Brantford's population, as shown by Assessor Thorburn, has fallen off about 600, while the voters' list has an increase of 200 names.

Streets are now being laid out and within three months Prince Rupert, B.C., the terminal of the G. T. P., will be lighted by electricity.

The London Electric Light Company has been a heavy loser by the vandalism of hoodlums. Twelve arc lamps have been destroyed by stone throwing.

At Winnipeg, on Friday, Alphonse Marcotte, an ex-convict, was found guilty of robbing and assaulting a woman named Summers, and sentenced to seven years in the penitentiary.

The five-year-old son of Charles Stevenson, Calgary, drank a big potion of whiskey and died. The child got the stuff during the night from a bottle which the father had taken to bed with him.

Hon. L. J. Tweedie, of New Brunswick, announces that now the subsidy had been increased, salaries to teachers will probably be increased, and a fund founded for teachers who had served the public faithfully.

Mr. R. G. Reid, a Montreal capitalist, has contributed \$5,000 to Queen's University endowment fund.

The annual report of the Consumers' Gas Co., of Toronto, shows a balance of income over operating expenses of \$509,952.

McGillivray Bros., threshermen, of Blythfield, Man., have just finished a very successful season, having threshed 80,000 bushels in a 40-days' run. Some heavy yields resulted, but the average, it is expected, will be 22 bushels per acre.

### GREAT BRITAIN.

General Sir Redvers Buller has retired from the British army.

The Countess of Warwick predicts that England will become a Socialistic land. The British Admiralty has announced the formation of a home fleet of reserve ships.

The report that the Duke and Duchess of Marlborough have signed a deed of separation has been denied.

### UNITED STATES.

Knights of Pythias pass a statute excluding from membership all dealers in liquor.

The General Conference of the Union American Methodist Episcopal Churches

presented demands to all the railroads entering Chicago for an eight-hour day. The move is the most extensive attempted by the railroad organizations in many years. Every railroad west of Pittsburgh and Buffalo in the United States is involved.

### GENERAL.

A United States company has secured the right to experiment in rubber growing on the Congo River.

The French Cabinet has decided to sequester the property and revenues of the rebellious clergy on December 11th.

### CHINA'S SOLDIERS.

#### Army Manœuvres Almost Equal to Those of Europe.

A despatch from Changtiefu says: A notable feature of the Autumn manœuvres of the Chinese Imperial army, which began last Monday in the neighborhood of Changtiefu, has been the presence in the field of portable wireless telegraphy apparatus, carried upon light wagons and so adjusted that it can be erected in less than 30 minutes. These stations were operated by Chinese officers belonging to the telegraph corps.

The manœuvres came to an end on Wednesday with victory for the northern army. At a village five miles south of Changtiefu this army succeeded in checking the advance of the southern army. The manœuvres began with cavalry operations, followed on Wednesday by artillery practice. All arms displayed excellent discipline. Experienced military observers are of the opinion that with the exception of certain minor defects and making allowances for the fact that these operations were an experiment, the manœuvres were almost equal to those conducted in European countries.

The artillery and the principal equipment of the troops were manufactured in Japan. The northern army undoubtedly was better clothed and equipped than the southern. It also showed better organization, and had more efficient advisers.

Thursday the proceedings came to an end with a grand review of both armies, including all branches, at the conclusion of which Yuan Shi Ksi, commander-in-chief of the forces, invited the foreign observers to lunch.

It is estimated that the manœuvres cost \$500,000.

### MINES NEAR MONTREAL.

#### Uranium, Pitch-Blende and Graphite Discovered.

A despatch from Montreal says: Mr. L. O. Armstrong, C. P. R. colonization and industrial agent, has returned from the Laurentians with a report that two valuable discoveries of minerals have been made within a hundred miles of Montreal. One is extensive finds of uranium and pitch-blende, the mineral from which radium has been extracted, in association with the mica mines that are being worked in that region, and the other a large deposit of graphite some three miles from the railway. The graphite is scattered in the form of outcrop in such profusion and so loose that two men can easily pick up two tons of ore in a day without reverting to blasting.

### IMMIGRATION INCREASING.

#### Returns for July and August Show Great Advance.

A despatch from Ottawa says: The total immigration to Canada for July and August was 35,369. There arrived through ocean ports 26,070 and from the United States 9,299. The arrivals for the same period last year were 22,468, showing an increase of 12,901 for the same two months of the current year. This shows 57 per cent. of an increase or 59 per cent. on the ocean arrivals and 53 per cent. on those from the United States.

WHERE BOMBS ARE MADE CUSTOMS OF THE JAPS ANECDOTES ABOUT KINGS ENTOMBED FOR FIVE DAYS

LONDON POLICE ARE SEARCHING FOR A SECRET FACTORY.

About 10,000 Reds in the Metropolis—How They Secretly Prepare for Work.

There are probably 10,000 Anarchists—resolute, uncompromising enemies of rule—in London to-day. No other capital in the world has such an aggregation of scoundrels. Continental nations, with the possible exception of Switzerland, will not tolerate them, writes Vincent Wray in the London Express.

"An Anarchist is a madman." That is the opinion of Mr. John Sweeney, who for tireless years waged such war as the law permits in our tight little island upon bomb makers and bomb throwers.

There is nothing picturesque about the personality of the Anarchist. He is not the raven-haired, melancholy eyed, swarthy-skinned creature of the popular fancy, and the novelist's conceit. He is just simply a madman, and a madman of the most dangerous and revolting type. There are few Englishmen who associate themselves with aggressive anarchism. The majority are Italians; some are French, Spanish, German and Armenian.

It is a remarkable fact that the most eloquent and prolific speakers at anarchist councils are themselves the least to be feared. The tongue is an excellent safety valve. The sayer is rarely himself the doer. It is the gloomy, silent, morose man who strikes. He is the tool of the glib-tongued orator.

Early in the September of 1901, a woman declaimed vehemently in New York against the sins of Governors and poured invectives upon royal heads. A mild-eyed youth listened with anger that was sharply fanned by this whirlwind of abuse into hotter and unquenchable fire. Leon Czolgosz went from the meeting with murder in his heart. A few days later William McKinley, President of the United States, was assassinated by this same Czolgosz.

"Silence these speakers," says Mr. Sweeney, "and you have dealt a staggering blow at Anarchy. I would make it a patent offence for anyone to proclaim himself an Anarchist or to preach Anarchism. Till you do this, and till you do treat your Anarchist as a dangerous and irresponsible fellow, no measures can insure the safety of royalty and other highly placed personages."

The work of these madmen is constantly going on. Some of them are under the lynx eyes of a Scotland Yard man. Others have managed to keep their secret, and it will only be known when a terrible catastrophe startles the world.

HOME OF SEDITION.

In one of the by-streets of East London is a little stationer's shop. It looks innocent enough. The neighbors can buy their newspapers there or their notepaper or their bottle of ink. Little does the passer-by suspect that under the boards on which he stands to be served a small hand printing press is silently throwing off reams of seditious literature in every Continental language. Yet it is so, and what is more, the police know of it and are powerless to interfere.

It has been stated that bombs are not made in England. This, unfortunately, is not true. Scotland Yard is even now searching for a secret factory, the existence of which has been more than suspected. It is likely that a group of men, busily engaged in filling iron cartridges with picric acid and filling on fulminate of mercury detonators, will one day be surprised in the midst of their deadly work. The police are active and untiring.

THEY HAVE WORN HATS ONLY IN RECENT YEARS.

A Popular War Song Sounded Like a Dainty Lullaby for Babies.

It is only in recent years that Japanese men and women have worn hats, and there is consequently no head-piece of their own designing, such, for instance, as the remarkable affair worn by their neighbors the Koreans. It was in 1886 that the Empress and her court women first appeared in European costumes.

Until recently competition has been almost unknown in Japan. For example, except where private owners have hired jinrikisha men selected for their strength and their speed, no runner must attempt passing another going in the same direction. Among the public runners a young and active man must not pass an old and feeble one, nor even a slow and lazy one. To take advantage of one's superior energy is an offense against the calling, and resented accordingly.

COMPETITION UNKNOWN.

When you engage a good runner, he springs away and keeps up the pace until he overtakes a weak or lazy puller. Instead of bounding by, he drops in behind the slow one, and regulates his pace by the other. If he should undertake to go by, he would be told: "You are breaking the rule and taking advantage of your comrades."

If you want a house built, you apply to a carpenter, who is also architect, contractor and builder. He looks after everything. But it is a life contract. He must look after all repairs. If the roof leaks, you may not send for the nearest roofer, or if the plaster cracks, for the nearest plasterer. The man who built your house is responsible for its condition. If you overlook or oppose his right to repair it, you can get nobody to work for you on any terms.

The man who makes your garden for you represents a company, and you must always hire him to take care of it from season to season. You may complain to his guild if he does not do his work well, and the guild will provide you with some one who will give satisfaction; but you cannot dismiss him and hire some one else in his place.

THE MAID-SERVANT

is not responsible to her employers, but to her family, and terms must be arranged with those who guarantee her good behavior. As a rule a nice girl does not seek service for the sake of wages, but chiefly to prepare herself for marriage. It is desired as a preparation for household work, in the hope of doing credit to her own family and the family of her future husband. Parents are careful to put their daughters, if they can, into families where they will learn nice ways, and the girl expects to be treated as a helper rather than a hireling; to be kindly considered, trusted, and liked. The term agreed upon is generally from three to five years. Besides her wages, she is entitled to presents twice a year, and a certain number of holidays.

When she is called home to be married, she must go. The services of her family are also at the disposal of her employers, and her family expect to provide at intervals gifts of vegetables, fruits, and other country products. This is not a return for the gifts to the girl, but for the practical education she gets, and the care of her as a temporarily adopted child of the household. The employers in their turn are expected to contribute to the girl's wedding-outfit.

Miss Howe, a returned missionary from Japan has been giving a series of

FARMER'S WIFE DID NOT KNOW "LONG-NOSED ENGLISHMAN."

Incidents Concerning Subjects Who Failed to Recognize Their Sovereigns.

King Alfonso's latest amusing experience, when he had to produce a coin bearing his own presentment before he could satisfy a group of wayside washerwomen at Arqueta that he was really the King, reminds one of several similar stories in which a monarch has had like difficulties in proving his identity to his own subjects.

A story which was widely circulated at the time of the present Czar's coronation was to this effect. After the terrible catastrophe which cost so many lives of spectators on the Hodin skoye Field, his Majesty paid a visit to the hospital to which the injured had been carried. Standing by the bedside of a poor old woman who had been badly crushed in the melee, Nicholas asked, "Why were you in the crowd?" "Why, to see the Emperor, of course," was the not very gracious answer. "Then why don't you look at him now?" continued his Majesty; "he is standing by your side."

"DON'T TELL ME LIES,"

retorted the woman, indignantly; "as if I didn't know Emperors are not made like that!"

When the King of Italy a short time ago called for refreshment at a wayside inn and tendered a coin in payment, the lady of the hostelry looked first at the coin and then at her guest. "Why," she exclaimed, "you are like the King." "So people say," smilingly answered his Majesty. "But," the woman went on, after another comparison with the head of the coin. "You are not nearly as good looking." "No," said Victor Emmanuel; "the King is a much better looking man than I am."

Even more amusing is the story told of the King of the Belgians, which, although by no means unfamiliar, is good enough to repeat. One day, when Leopold II. was walking with a Scottish friend, he stopped at a farmhouse for a glass of milk. As he was chatting with his companion in English the woman turned to her husband and said:—"I wonder how much the long-nosed Englishman will pay?" "Permit me," said the King, as he handed her a coin, "to present you with a portrait of the long-nosed Englishman."

THE TORN DRESS.

In Paris, where Leopold is known even to the street urchins, such a mistake would have been less likely than in his own kingdom. Not long ago, it is said, a Paris gamin, seeing the tall figure of the King approaching, walked up to him and, without the slightest fear, greeted him with, "Oho, Leopold!"—a greeting which so delighted the unconventional monarch that he presented the lad with a five-franc piece.

When the King of Sweden, a few years since, visited a small town near Gothenburg, he joined the crowd which thronged the streets to catch a glimpse of himself. When the news passed round that the King was coming a shrill female voice at his back exclaimed, "Let me get in front! Do you think I've walked all this way and spoilt my best black dress for nothing? I want to see what the King is like; let me see where the King is." Turning round with a smile Oscar said to the pushing, perspiring dame, "Here is the King!" whereupon, after looking him up and down, she remarked: "Well, I'm glad to have seen you at last. I've been waiting here for hours, and just look at the hole they have made in my best black dress. I was not going to have that spoiled and then see nothing at

THE HORRIBLE EXPERIENCE OF WELSH MINERS.

Sufferings Affect Men's Minds — The Only Food They Had Was Wax Candles.

The two men who were rescued from the flooded Caradoc Vale Colliery, Wales, recently, had thrilling stories to tell of their experiences during the five days in the mine. The body of the last of the six men who were caught by the flood was recovered.

The men who were rescued were Richard Richards and David John Stephens. They had been in the mine for more than five days without food, and, considering the privations they had undergone their physical condition was remarkable. Richards was exhausted, and his mind was wandering, but Stephens was vigorous both physically and mentally, and only the peremptory order of the doctor that he should not exert himself prevented him from walking home.

When the news that the searching party had found two men in the old workings became known a great crowd gathered at the mouth of the shaft. It never occurred to those above ground that the men were alive, and two coffins were brought to receive the bodies, which it was expected would be brought to the surface.

VOLUNTEERS' RUSH.

When it was realized that the men were really alive the crowd went delirious with joy, and when Stephens announced that the third man, Ned Hathaway, was alive twenty-four hours before, the rush of volunteers to join the searching party was so great that there was almost a riot.

Stephens said that when they were cut off by the flood, he and his "buddy," (Richards) crawled through a small hole into some abandoned workings. In doing so, their lamps went out, their matches got wet, and their food was lost. They were joined a little later by Hathaway, and for four days the three men wandered about looking for an exit, and knocking and calling in the hope of attracting the attention of the searching parties. Several times they heard the searchers, but they failed to make themselves heard.

The only food they had was some wax candles, but, of course, there was plenty of water, and to this they owe their lives. On the fourth day Hathaway went mad and wandered away, and all Stephens' attention was devoted to looking after Richards, whose mind had also given way. When Hathaway's body was found later it was quite naked, and his legs were terribly scratched and lacerated from falling over the coal.

Stephens was seen at his home by a London Express representative, and he told the story of his terrible experience.

SURVIVOR'S STORY.

"When Hathaway left us he was quite mad," he said, "I managed to control him until my 'buddy' (Richards) got in to a similar state. I could not manage the two, and had to let Hathaway go. I had an awful time with my 'buddy' during the last ten hours. At times he was cross, and sometimes playful. At other times he became quite childish and would try to turn somersaults over me."

Mr. Howell Kelly, who led the rescue party, said:

"We thought we should find three dead bodies. We had gone about fifty yards into the old workings when I thought I heard some one culling. I shouted, and Stephens must have recognized my voice, for I heard him cry in a shrill tone, 'Howell! Howell!'" "We brought them back through the hole, and I placed Richards on my knee, and put some clothing around him, for he had divested himself of several ar-

with phoric acid and fitting on fulminate of mercury detonators, will one day be surprised in the midst of their deadly work.

The police are active and unfiring; but they are handicapped by the weakness of the law. When they suspect that treasonable intrigue is on the way and wish to keep in touch with the movements of aggressive Anarchists, they have to make irregular entry on a flimsy and convenient pretext. It was by some such means that the wholesale manufacture of bombs at Walsall was discovered.

The raid on these surreptitious workers was made under the direction of Mr. Sweeney, who secured the conviction of four or five desperate men, who afterwards served long terms of penal servitude.

An expert in explosives told me that Anarchists obtain posts in British explosive works. They are thus able to secure entrance into the "danger zones," and there are able to see some of the processes of manufacture.

"There are several methods of making bombs," he said. "Once nitro-glycerine was used exclusively as a charge. A mixture of nitric acid, sulphuric acid and glycerine makes a strong explosive, and when combined with wood fibre it is fairly safe. But there is always the danger of concussion and of explosion at high temperature."

"The high explosive generally used by Anarchists is picric acid. This is the principal ingredient of the English lyddite and the French melinite. It is also used in the manufacture of the Japanese shimosa, which was so effective during the Russo-Japanese War. Picric acid is a yellow crystal, and is a constituent of several dyes. It can easily be obtained and carried in an ordinary bottle."

"There are also compounds of ammonia, which, however, are very volatile and difficult to keep in condition."

"In any case, a very small vessel is necessary for a bomb. Some that were used in St. Petersburg were about the size of an ordinary ink bottle."

#### ACTION NEEDED.

"Something will have to be done to subdue these maniacs," said Mr. Sweeney, when discussing the matter the other day. "A declaration of Anarchist creed should be regarded as a crime, and the propagation of Anarchist doctrines should be punishable by law. When I first expressed this view, quite expected that my words would be quoted in Parliament. It would seem as though circumstances are hurrying matters on."

"Anarchists are a constant and deadly menace. What precaution, for instance, Mr. Sweeney walked over to be window of his office, and waved a hand in the direction of the street, could prevent a man who had made his way into this room flinging a bomb into the street?"

"The public gatherings of Anarchists in Hyde Park are responsible for much. The speakers inflame the listening crowds, and one of their number, with ill-considered judgment, goes forth to excite hastily-conceived designs."

"Anarchists are not drawn from the better classes. Some of them are half educated. The majority of them are the cum and refuse of the Continent. They do not work; they do exact money from enthusiastic people who are dissatisfied with the existing order of things. Will not something be done now?"

#### TANTALUM PENS.

A new pen has recently come into the market in Europe for which considerable success is predicted. These pens are made of tantalum in substitution for steel. They are more flexible than gold pens and more durable than those of steel, since they resist corrosion, and an with difficulty be spotted with ink. At the same time their points are exceedingly hard.

already adopted child of the household. The employers in their turn are expected to contribute to the girl's wedding-outfit.

Miss Howe, a returned missionary from Japan has been giving a series of talks to the women's clubs of America on "Japan, From a Resident's Viewpoint." Among her tales of the Japanese people were many

#### CONCERNING THE RECENT WAR.

"Shortly after the preparations for war with Russia had been made," she said, "the little Japanese Boys began singing the sweetest lullaby-like song I have ever heard. That song was heard everywhere, and remembering our own fondness for popular airs, I ventured to ask what this exquisite, crooning little 'hush-my-child' tune might be. It was 'Bring your warships over here, and we'll smash 'em!'"

In education, as in some other ways, the East is topsy-turvy land from the Eastern point of view; although, of course, to their vision it is we Westerners who are upside down.

Young Japanese children enjoy more liberty than Western children. They are permitted to do as they please, provided their conduct is not actually harmful. A boy is allowed to be so mischievous that, as a Japanese proverb says, "even the holes by the roadside hate a boy six or seven years old." Punishment is rare, and the entire household, servants and all, will intercede for the offender, the little brothers and sisters offering to take the punishment themselves.

Whipping is not common; but its substitute, the moxa, or burning, is more severe. But frightening a child by angry looks or harsh words is condemned. To slap about the head is proof of vulgarity and ignorance; nor are they punished by keeping them from play or depriving them of some special food or pleasure. Perfect patience with children is expected, and admonition is the chief restraint exercised.

#### UNTIL THEY GO TO SCHOOL.

Here the restraint is the common sentiment of the class under the direction of the teacher. Each class has two little captains, and one of these gives orders. In the higher classes this pressure is greater. Instead of restraint relaxing as it does among Western nations, as the child grows older, it increases. The power of public opinion of the class becomes formidable. Fighting and bullying is unknown, because the class discipline enforces a uniform behavior. The student who offends against it will find himself alone. No one will speak to him or notice him, even outside the school, until he publicly apologizes, and then a majority has to accept it. He may hear from it in his subsequent career. Even if he rises high in official life, the fact that his fellow-students once condemned him will be remembered as a disgrace.

Eccentricities and singularities are suppressed. There is much formal and serious demeanor. During recreation hours in the playground, and the gymnastic halls, there is to the foreigner an oppressive silence. The third of the foot on the ball is the only noise made at foot-ball. The rules of judo-jitsu require silence and the suppression of all visible interest in the spectator. But the Japanese student learns how to read minds and motives, to remain impassive under all circumstances, and even while most unamiable to be secretive and inscrutable. His outward acquirements are a small part of his real education. His real learning is his Japanese soul. Between his mind and the Western mind is a wide, deep gulf.

#### THE QUESTION.

Mr. Tollerly: "Could you marry a very old man with a good deal of money if he told you frankly how old he was and how much he was worth?"

Miss Timely: "How much is he worth?"

and down, she remarked: "Well, I'm glad to have seen you at last. I've been waiting here for hours, and just look at the hole they have made in my best black dress. I was not going to have that spoiled and then see nothing at all."

More startling was the adventure of the German Emperor when, at a late hour one evening, he decided to pay a surprise visit to his uncle at Kiel. On ringing, the door was opened by a maid, who, at sight of the Emperor, promptly slammed it in his august face, shouting out, "Himmell! it is the Kaiser!"

#### A FRENCH SHERLOCK HOLMES.

Makes an Arrest for the Murder of a Mummy.

An old gentleman at Ternee, France, was recently charged with murder under curious circumstances. A ragpicker rushed into the police station and threw down a bag of bones, declaring that they had been given to him to make away with, but he had discovered them to be human.

Scenting a terrible crime, the inspector had the man locked up, and then telephoned to a magistrate. Soon after the magistrate, inspector, and two policemen called at the house where the bag had been handed to the ragpicker and were received by an old gentleman in gold-rimmed spectacles.

The magistrate looked the door behind him, laid a calcined bone on the table, and said: "You gave this and other human remains to a ragpicker this morning?" "I did," said the old gentleman. "I arrest you for murder," said the magistrate solemnly; "who was your victim?"

In reply the old gentleman in the gold spectacles burst out laughing. "The victim," he said, "is the son of the Grand Priest Diophila, he died in Egypt more than 3,000 years before the birth of Christ. I bought him recently, but he did not keep well, so I preferred to get rid of him."

Exhaustive inquiries eventually led to the release of the ragpicker and an apology to the mummy purchaser.

#### EYESIGHT AND MARKSMANSHIP.

Some curious researches have recently been made by French army surgeons on the relationship between good eyesight and good target-practice. At first glance one would say that the two things must invariably depend the one upon the other. But the facts lead to a different conclusion. At least, they show that one may have very defective eyesight and yet be a very accurate marksman. Astigmatism, myopia and other defects of vision may exist in a marked degree without destroying the ability to aim and shoot straight. In the French and German armies soldiers are permitted to shoot from the right or the left shoulder, according to their own preference, which is often guided by the superiority of one eye over the other. Accuracy of judgment counts for as much as acuteness of vision with the good marksman.

#### DANGEROUS POSTAGE-STAMPS.

The English post-office authorities have recently ordered the withdrawal from circulation of the threepence stamp colored yellow and brown, for the reason that investigation has shown that the coloring matter employed on these stamps contains sufficient chromate of lead to produce injurious effects. It was shown during the investigation on which the order of withdrawal was based that 12 milligrams of this substance were sufficient to cause poisoning, and a single one of the objectionable stamps carries a milligram of it. The repeated application of these stamps to the lips in the act of moistening might result in the accumulation of a dangerous quantity of the poison in the mouth.

Only a wise man is competent to enjoy a competency.

shouted, and Stephens must have recognized my voice, for I heard him cry in a shrill tone, "Howell! Howell!"

"We brought them back through the hole, and I placed Richards on my knee, and put some clothing around him, for he had divested himself of several articles in his delirium."

A pathetic feature of the finding of Hathaway's body was that he was to have been married shortly. When the hope that he might still be alive was revived his sweetheart rushed to the shaft and declared that the wedding would take place as arranged. When his dead body was brought up she became hysterical and was taken home in a fainting condition.

#### KAISER WANDERS ALONE.

The Emperor Plays the Role of Haroun Alraschid.

Curious stories of the Kaiser's weakness for studying the problems of his capital and his people, after the fashion of Haroun al Raschid, the Bagdad Caliph, are going the round of German court circles now.

It is stated that in order to obtain impartial views of the Berliners concerning many innovations that he contemplates, the Kaiser has occasionally made use of private carriages at night to drive to some frequented spot, where he has alighted and mixed with the crowd. In spite of his characteristic and marked features, he has invariably escaped detection.

A few weeks ago he stood alone at the corner of Fockamer Platz for over an hour to study means and methods whereby the enormous and congested traffic there could be best dealt with. With the exception of a single occasion, when Prince Henry accompanied him, the Emperor sallies forth on these night tours of inspection alone, not even his gentleman-in-waiting being in attendance.

The reports which were current a few days ago that the Kaiser's health was again giving cause for alarm in consequence of the recurrence of throat troubles are belied by his remarkable performance in the hunting forests at Rominten, when in the course of a deer-stalking expedition lasting eight hours without a break, his Majesty brought down two magnificent stags with 16-pointed antlers.

The first stag, rather an old one, was shot shortly after breakfast. He was killed principally because of the annoyance he caused to younger and better animals. Meantime, a thoroughly high-grade stag, with irregular 16-pointed antlers, was reported to be roaming in another section of the forest.

The Kaiser jumped into his swiftest motor car, accompanied by Admirals von Tirpitz and Mueller, and a little after 2 o'clock in the afternoon got within range of his prey, and with a splendidly aimed shot through the vitals, brought the stag to earth. He weighed 359 pounds.

#### MOTORING IN THE AIR.

Remarkable Machine Invented by Frenchman and His Son.

Successful experiments with a new type of flying machine worked by a two horse-power motor have been made at Liseaux, France, by the inventor, M. Cornu, and his son. The inventors have been working in secret on the machine for some years.

Their apparatus consists of two helices, two and a half yards in diameter, which turn in different directions. The body is made of steel tube one and a half inches in diameter, bound with wires. The helices and the aerial planes are made of linen stretched across fine steel stays. The motor is fixed horizontally in order to lessen the vibration.

The experiments, which have been very successful, were directed by means of an arrangement which prevented the apparatus from rising more than three and a half yards above the ground, and drove it in a circle of thirty yards in circumference.

# S IN RUSSIAN LIVING TOMB

## MR. STARODVORSKY SPENT TWENTY-ONE YEARS.

### Terrible Experience of a Russian Prisoner — Three Years' Solitary Confinement.

Tall, broad-shouldered, with ample forehead crowned with a wealth of raven black hair, Mr. Starodvorsky has for over twenty-one years borne with fortitude the horrors of a Russian prison.

To a member of the London Daily News staff M. Starodvorsky gave the following summary of his history. On reaching manhood he had chosen for his profession that of a school teacher and was so successful that previous to his arrest he was the proprietor of two private schools. Before long his democratic sympathies led him to join the Narodnaya Vobyra (Will of the People), a political organization for the freeing of Russia.

In the spring of 1884 a fellow-member, who had been arrested and taken to Siberia, managed to make his escape, and M. Starodvorsky, with others, aided him to leave the country. For his share in this M. Starodvorsky and fourteen others were arrested and thrown into the dungeon of St. Peter and St. Paul. Three years were spent in solitary confinement awaiting trial.

### SENTENCED TO DEATH.

"I was not allowed to communicate with my friends," he said, "and, of course no food was allowed to be sent in to me. I was soon ill from scurvy. My trial came on in 1887, and with fourteen others I was sentenced to death. As, however, five men had been hanged a few days before, all our sentences were commuted to penal servitude for life. The first year of my sentence was served in the Alexis Ravellin of the fortress of St. Peter and St. Paul. It is very damp, and the conditions of life are simply abominable. It is the place where Peter I. killed his son. It lies below the level of the Neva, and here, out of 19 prisoners who were there at the time in the 12 months seven died and all of us were ill with scurvy. Then they sent us to Schlüsselberg, on Lake Ladoga. The prison stands on an island, and Peter the Great's wife was the first prisoner incarcerated within its walls. We were, of course, transported in chains. Of the eleven who went there with me eight died the same year."

### "And the treatment there?"

### FOOD ALWAYS BAD.

"For the first year nothing short of execrable. The food is bad always; the Government allows 23d. per day for each prisoner's food, and the officials have all to make something out of it for themselves. During the first few years we were kept in solitary confinement and not allowed to do anything. We had not even a book, and we never saw a soul beside our guards. A little exercise in a yard, where each one went separately, was our relaxation. After 1891, when M. Goremykin was made Minister of the Interior, we were allowed first to do some carpentry and afterwards bookbinding and gardening. When, however, M. Plehve became Minister things got worse again, and all the privileges of work and the use of books were withdrawn, one after the other. In 1901, fourteen other prisoners joined us, and most of us were released last November as a result of the amnesty of November 3.

"I should tell you," he continued, "that during the whole of that time I knew nothing of the outside world until, 1904, when a religious-minded lady, Princess Korsakoff, was allowed to visit us once or twice. No one else has been since. Schlüsselberg is now closed as a prison."

# "POVERTY AND PLENTY"

## RADICAL SPEECH OF MEMBER OF BRITISH GOVERNMENT.

### Some of the Direct Causes of Poverty — Drinking and Gambling the Most Fertile.

Some idea of the attitude of leaders of the present Government towards social questions is given by the striking speech of Mr. Lloyd George, M.P., at a meeting in Merionethshire, Wales, held under the auspices of the Society for Social Service of North Wales Wesleyans.

There were ten millions in this country (he said) enduring year after year the torture of living on, lacking a sufficiency of the bare necessities of life; and all this existed amid a splendid plenty, which poured into a land so wealthy that it could afford to lend out of its spare riches thousands of millions to less well endowed lands in other parts of the world.

### THE CAUSES OF POVERTY.

What are some of the direct causes of poverty? There was the fact that a man's earnings were not adequate to maintain himself and family. There was the inability to obtain employment for economic reasons. Thirdly, there was the inability of men to pursue their avocation, owing to sickness, old age, or inherent lack of physical stamina or virility. And then there was the most fertile cause of all, a man's own improvident or imprudent habits, such as drink and gambling. The drink problem was the most urgent problem of the hour for our rulers to grapple with.

Next year the Government meant to wrestle with it in earnest. They would require all the aid all organizations for the elevation and improvement of the lot of humanity could give them. There were potent forces in existence which profited hugely by this degradation. How powerful these bodies were, those who recollected the abject way in which the late Government surrendered to their menaces could well understand.

### FAIRER DISTRIBUTION NEEDED.

Reverting to the fact that drink was not the only cause of poverty, Mr. Lloyd George went on to say that there was plenty of wealth in this country to provide for all and to spare. What was wanted was a fairer distribution. He would give a local illustration. There was a good deal of temporary depression in the slate industry in this part of the world, which he trusted would soon pass away. (Hear hear.) Yet there were two men in the county of Carnarvon whose combined incomes were equal to the aggregate earnings of half the quarrymen of the country. The latter working at a skilled trade requiring years of apprenticeship to master it, risking life in its pursuit—thousands of them together could only earn just as much as two men who did not contribute a single stone to the common stock. (Applause.)

He did not suggest that there should be a compulsory equal distribution of the wealth of this country between its inhabitants, but he did say this—that the law which protected these men in the enjoyment of their great possessions should first of all see that those whose labor alone produced their wealth were amply protected from actual need where they were unable, owing to the circumstances over which they had no control, to earn enough to purchase the necessities of life.

### THE LAND LAWS.

Then there was our absurdly unjust land system. Drink and the land laws between them were responsible for nine-tenths of the slumminess of the towns, and our system of land ownership was responsible for the labor conditions in the country which drove men in thousands away from the villages

# TRAVELLING IN SPAIN

## A LADY WRITES A MOST INTERESTING DESCRIPTION.

### Leisurely Railway Travelling — The Burial Place of Spanish Kings.

A vivid picture of the drawbacks of travelling in Spain is given by Mrs. Alec Tweedie in the pages of the "Queen." She says:

It was a cold wintry evening. I took off my jewellery, hid my watch, and said good-bye to a charming Spanish home and its kind inmates, and left Madrid by the Sud express for the Escorial, the tomb of the Kings of Spain. The distance is exactly thirty-two miles, and this express train from Madrid with its sleeping cars and restaurants, took one hour and twenty minutes for the journey. What a desolate waste surrounds Madrid. Those weird glacial rocks looked even more weird than usual in the moonlight, and the few dark shrubs cast still darker shadows on the granite.

The train stopped at Escorial. "Eight minutes' halt," and I was the only passenger to get in or out. In fact, the beggars and several louts seemed quite surprised to see anyone on such a wintry evening, and hung on to my fur coat with even more than usual vehemence. The exit from the station was locked, and a bunch of keys had to be found to let me out. There stood the hotel bus, as my Senator-host had kindly wired to the hotel for a fire in my room, so as to let the people know a lady was arriving late.

The bus drew up at the door of the hostelry. The landlord arrived from a long room where men were drinking,

### PLAYING CARDS AND DOMINOES.

Joy—he could speak French? He escorted me upstairs to a charming little room, all white and clean in spite of its simplicity, and there in the middle of the floor stood an enormous brasero. The charcoal was covered by a wire netting to keep it safely within bounds, and the wide brass rim was well polished.

In the night I woke hearing a strange sound in my ears, and feeling oppressed. Suddenly my thoughts wandered to that brazier and to Zola's death, and I jumped out of bed to open the window. A flood of moonlight entered the room; but the brasero had gone, so my fears went too.

Ah—but what was that sad cry? It rose and fell upon the night air. How strange it sounded, as of lost souls moaning. Yes—it was human—and men's voices. I looked at my watch: it was still very early, but presumably this was the first mass of the priests yonder. Armed with an introduction to the Father Superior of the monastery from a Senator friend—written on official paper—I felt pretty sure of seeing Escorial under favorable circumstances. Escorial is the burial-place of kings. In a small chamber of Spanish marble, reached by a narrow staircase, lie the Kings of Spain, each in a marble coffin on his own shelf. They are embalmed and buried, and after about ten years are laid upon a shelf.

### EACH IN HIS COLD GREY BOX.

There are twenty-six such tombs, four on top of one another, all of gray marble with brass feet and mountings, and the last king, Alfonso XII., is now interred therein. It is a dreary place, with small windows so high up they admit little light, and everything is marble except the brass fittings on the sarcophagi.

Boys belonging to the high families of Spain were playing football outside in long grey topcoats and blue cloth Scotch caps. They had not the slightest idea of the game—but they kicked the ball about and apparently enjoyed themselves. The French-speaking landlord was not about when I left the box.

# WAITING UPON ROYALTY

## WHILE A GREAT HONOR IT HAS ITS DRAWBACKS.

### Many Duties Which the Ladies-in-Waiting Are Called Upon to Fill.

There are two qualifications without which no woman need hope to become a lady-in-waiting, writes one who has herself attended upon royalty. The first is the power to make herself agreeable at all times, both to her employer and to the royal household.

The second qualification, the possession of strong legs, may appear an easy matter at first sight, but, according to this confession in the Ladies' Realm, when carried into practice it is very trying. The woman who has been accustomed to seat herself whenever she feels tired of standing is apt to become nervous and strained when she knows that she may not, except under the plea of illness, seat herself for at least a couple of hours to come. When royalty braces her muscles subjects must not dream of relaxing theirs.

Some women can stand; there are others who cannot. Among the former is Queen Alexandra. At the giving away of war medals two years ago she was observed and timed by an on-looker.

Without showing the faintest signs of fatigue she stood, with practically no change of position, for two hours and twenty-five minutes. Though her Majesty now sits during a portion of the time a court is being held the ladies in waiting remain standing, and this function lasts

### AT LEAST TWO HOURS.

The writer once asked a lady of the bedchamber who was never robust how she had managed the standing during the late Queen's drawing rooms. Queen Victoria in her latter years always used a small chair, which supported her, yet was practically invisible to those who passed before her. The lady of the bedchamber's reply was:

"Old and roomy slippers. I always kept an old pair, two sizes too large, which did duty year after year, and were useless for anything else."

While on duty the lady in waiting has to be always with her mistress, unless the latter desires to be alone, which is very rare. Royalties are apt to feel dull when left to the monotony of their own thoughts and get accustomed to constant companionship. She must not leave the precincts of the palace, as at any moment she may be summoned. Yet that summons may not come for many hours—nay, many days, if the court happens to be sojourning in the country.

There is no possibility of mapping out her day and settling to her own occupations, and no matter what the news may be from home, no matter how alarming or saddening, she must never appear ruffled or unhappy.

### IN THE ROYAL PRESENCE.

It is treason to disturb the equanimity of queen or princess.

There are a variety of duties which fall to the lot of the lady in waiting. There are many letters to be answered, sometimes of a begging character, or sometimes accepting or rejecting appeals to open hospital wards, lay foundation stones, to open bazars and charity fetes.

Sometimes the royal lady desires to offer a visit to one of her subjects, or to accept their invitation to honor them with her presence; in such cases the lady in waiting has to write to the intended hostess, stating any little desires for her comfort and happiness which her royal Highness is known to possess, the names of certain friends whom she desires to meet, which are added to the list of guests submitted for the royal approval.

...a religious-minded lady, Princess Korsakoff, was allowed to visit us once or twice. No one else has been since. Schlusberg is now closed as a prison."

## THE COST OF TRAVEL.

### How Railway Fares in Europe and America Compare.

Most writers in comparing the cost of passenger travel in Europe and America, says a correspondent who knows, claim cheaper fares for the former, although, strange enough, a writer declares that European fares are about one-third higher than on this continent.

There is an element of truth in both statements, but both leave out of sight important considerations. If the average rate in Germany were three cents a mile, travel there would be much more expensive than here, because wages and the general cost of living is much lower, therefore any comparison that leaves this consideration out of sight is unscientific and comparatively valueless. The average of Great Britain, France and Germany is lower than that of America in so much gold, i.e., a person can travel farther in Europe—omitting Russia—second class, which about corresponds to our first, for the same amount of gold coins, but the average workman in America on account of higher wages feels able to spend more on travel than his European counterpart, without feeling the cost as much as he. In Japan a person can get a tourist berth for the night at a cost of only twenty sen (ten cents) for a top berth and forty for a lower.

Second-class from Bremen to Paris, about 500 miles, costs \$12.50; from Paris to Solsons, 65 miles, \$1.50. In England the rate averages a penny a mile—the line with the short haul always setting the rate for the line with long haul and on this basis. It is always difficult to compare things that are so dissimilar as the European and American modes of travel, but dollar for dollar Europe has America beat; Germany has even a fourth-class (dummler zug), the passengers having no seats at all, but are required to stand in something like a line Lox freight car. The charge for this class is two pfennig per kilometre or about 23 cents for 31 miles. Provided the tourist has a good trunk on which to sit, this mode of travel is not inconvenient.

Free baggage allowance varies in Europe with the country, although in general it is less than in America. Passengers from the ocean steamers destined for London are allowed 240 pounds free, for other points in England only 120 pounds. On the continent free allowance is sometimes limited to 25 pounds, an absurdly low amount.

### A KING AS GUIDE.

German tourists in Denmark paid a visit to Charlottenburg with the object of seeing the summer palace of King Frederick. They met a gentleman walking alone of whom they inquired whether it would be possible for them to obtain access to the gardens. "Certainly," he replied, "I happen to have a key" and for half an hour he led the party about the grounds, pointing out their beauties and entertaining the strangers with lively conversation. At last he took his leave with the words, "If you care to see the stables, just say that you have the King's permission." It was the King himself. He shook hands with each member of the party and bade them farewell.

Reporter: "Thanks very much for your information. I shall describe your bridal dresses and those of your maids, as well as the house decorations and the presents. But, naturally, the public will be interested in the bridegroom. What shall I say about him?" Bride-Elect: "Well, I suppose his name must go in; you might say that he was among those present."

between them were responsible for nine-tenths of the slumminess of the towns, and our system of land ownership was responsible for the labor conditions in the country which drove men in thousands away from the villages into the towns. Who could expect anything else? Most of the landlords of Wales extorted annually as much for the mere license to till the land as the man who actually did the work extracted from his labor and thought upon it the whole year round. Even then from year to year he lived at the caprice of the landlords. How long did they think this would last? It had broken down hopelessly in Ireland, and were it not that Britain was an exceptionally prosperous manufacturing country, it would long ago have ended in revolution here.

## TIPS IN JAPAN.

### There the Innkeeper Is Not Forgotten When the Guest Goes.

"If our hotelkeepers should ever be told of the Japanese method of tipping we would all have to take to the woods," said a Far Eastern traveller. "In a Japanese hotel you give the proprietor the biggest tip of all when leaving and grade the other tips accordingly."

"When your bill is handed to you it is customary to wrap up in a separate piece of paper an amount approximating about one-fifth of the whole account and give that to the worthy innkeeper, together with the regular amount required of you by his account, which you enclose in the folded bill. Then you wrap up smaller sums in smaller pieces of paper and parcel these Christmas packages out among the servants who have waited on you."

"This tip to the boniface is called chodai, or tea money, and the Japanese explain its usage after this manner of reasoning."

"All hotel charges in Japan are forced by law to be very low, so that even the very poor man who finds himself on the road at night can get food and shelter for a nominal sum. The rich man has to pay no more than the beggar."

"Since the hotel man could not make a living if this order of things were allowed to exist, without some saving grace, some recompense must be made to the hotelkeeper for his enforced generosity. Therefore, if a guest can well afford to give the host something more than he asks, he not only provides for less fortunate than himself, but he fends himself against the evil day when he may have to ask a beggar's board and bed. It is not charity to the innkeeper, but merely provision against possible hard times."

"But if a man whom the worthy host believes to be even able to afford a generous chodai leaves the hotel without paying the same, woe befall him should he ever return to that hostelry again. He will get last chance at the communal bathtub, will get the most draughty room in the house and in a hundred ways be made to feel that he is the most miserable of men."

### AUTOMOBILE ARTILLERY.

More and more the attention of the military authorities of the great nations is concentrated on the means of adapting the automobile to the transportation of field-artillery. A French writer points out that the idea of self-moving carriages for field-guns was suggested by the engineer Cugnot as early as 1769. At present, efforts are directed to the perfection of a form of automobile suitable to take the place of horses in drawing the artillery wagons. Many different forms of iron-clad automobiles, carrying light guns, have already been invented and tested, with more or less success; but the main problem is to adapt the automobile to the transportation of guns mounted, as at present, on their own carriages. In other words, it concerns the abolition of artillery horses.

or Spain were playing footbal outside in long grey topcoats and blue cloth Scotch caps. They had not the slightest idea of the game—but they kicked the ball about and apparently enjoyed themselves. The French-speaking landlord was not about when I left the hotel at 9 p.m., so I could not pay him for the bus. Arriving five minutes later at the dreary station, where there was no more sign of life than there had been the night before, I asked the driver what I owed him.

"Six francs," was the reply. "Six francs!" I exclaimed. "Nonsense! how can it possibly be six francs?"

He insisted on his claim. I repudiated it, for I knew it was an imposition. He saw I was a woman—and alone—he knew there was no one about, and he seized the opportunity to rob me, for such it was, of three or four francs. He became most abusive. My heart almost stood still. But with a brave face, and the best Spanish I knew, I determinedly refused his demands. At last a man passed. "Do you speak English, French or German, sir?" I asked. "French—a little, madam," replied the commercial traveller, for such he proved to be.

### I TOLD HIM MY STORY.

"The fee is half a franc per person and thirty cents for luggage, total 80 cents, not even one franc, as you only have a travelling bag," was his reply, "and that is all you owe."

"I've offered him three francs several times, and he refuses, and has been most impudent and abusive," I replied.

The little commercial traveller, over whose head I towered, offered to do his best. They argued, they got angry, and the train arrived. That bus man held on to my bag and refused to hand it over. The train rang its bell, it was about to start, and I had to hand over those six francs to that veritable thief after all, so as to get my bag, which was naturally worth far more. The Spanish driver laughed wildly at his success and my discomfiture.

## ON THE ROAD TO MECCA.

### The Steam Locomotive Will Soon Enter the Holy City.

The latest invasion of sacred ground by the steel rail is the building of the steam road to the holy city of Mecca. With the coming of the engine will pass one of the most unique and picturesque sights of the East, the great caravans which cross yearly the desert between Cairo and Damascus and Mecca.

It is the highest religious duty of every Moslem to make at least one pilgrimage to Mecca, the "mother of towns." He puts off his ordinary clothes, shaves his head, arrays himself in white garments and starts on his journey. He may wear sandals, but no shoes, and no head covering, until the end of his pilgrimage.

What is time of fasting for one people is often time of feasting for another. There are many who profit through the Moslem's sins. To insure the safety of the thousands of the faithful, the government pays the desert sheiks tribute for not molesting the pilgrims. These nomad chiefs will not welcome the railroad which is to invade their premises.

Another class reaps financial benefit from the pilgrims. Even on his journey to Mecca the Moslem heaps up sins which have to be atoned. Every tiny transgression has to be paid for by the slaughter of a sheep. Thousands and thousands of sheep are thus sacrificed, and the shepherds of Arabia drive a profitable trade. One of their fervent prayers is that the sins of others may be increased.

### IT IS.

An aching tooth,  
I rise to shout,  
Is just about  
The best thing out.

sires for her comfort and happiness which her Royal Highness is known to possess, the names of certain friends whom she desires to meet, which are added to the list of guests submitted for the royal approval.

Queen Victoria often disliked fires in her bedroom and in warm weather had blocks of ice placed in her apartments. All such little personal fancies must be stated by the lady in waiting to the hostess; that life may, for the time being, be made as agreeable as possible to so honored a guest.

Sometimes the lady in waiting has to do some shopping of too delicate a nature to be intrusted—to one of lesser standing; sometimes there are private charities to be inquired into.

Then there is frequently the dressing of the stall which her Highness has signified her intention to sell at, and the remaining on after the royal patroness has left, to see that all the goods are disposed of and the profits safely transferred to the proper quarter. She must also finish any articles of needlework which her mistress has begun and tired of.

### SHE MUST BE ABLE TO PLAY.

If not sing, and be competent to touch up any painting or drawing, possibly half execute both, abandoned by their employer.

Many royal ladies are inveterate and unwearying sightseers. Some are confirmed burners of the midnight oil. They keep their attendants with them till the early hours of the morning, either playing cards, listening to music, or plying the needle; but no fatigue must be exhibited.

Dress forms an important part in the life of the lady in waiting. She must be provided against all emergencies. Mourning she must always have ready to don at any moment. She requires a couple of court trains, which can be worn over different dresses. Some ladies in waiting, like their private sisters, borrow a court train from a friend. The writer once possessed a court train that passed through eight different hands in two years; it attended nearly every drawing room during that period.

The pay is small, but with strict regard to economy it covers personal expenses. It is a servile position, morally considered. Still, after the glamor and gloss of court life has worn off the groan of slavery is succeeded by a hugging of the chains.

There is a morbid taste in the whole matter—a glamor which enthusiasts at first, satiate later, but which in time comes to be the most binding tie which can be forged.

## REAL CITY OF THE DEAD.

### Indian Graveyard at Hazelton, B. C., Most Interesting.

"It is really a city of the dead, for every grave lot has a house built on it and, by looking through the window of this house, you see what the deceased loved best on earth. It may be a chair, or a table, a bench, or a suit of clothes. One house had laid out on a table all the toilet articles which the lady in the grave beneath used while alive, even the tooth brush being there. It is supposed the spirit of the lady will come back and use these. It was most interesting to go from one house to another and see the different things in them."

So writes W. J. Lukens, an American traveller from Chicago, who has been visiting Central British Columbia and who inspected the Indian graveyard at Hazelton which, situated on the highest point in the town, is quite a curiosity. It goes on:

"Up to the last two years this was an Indian village with only the Hudson's Bay Company men and a few prospectors and hunters representing the whites. Now, on account of the coming of the Grand Trunk Pacific Railway and the finding of rich mineral deposits, a large number of whites are coming and going all the time."

## THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.  
 When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.  
 A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

### Rummage Sale.

The W. C. T. U. will hold their annual Rummage Sale on Friday and Saturday November 16th and 17th in the store lately occupied by Neilson and Robinson next door to Rikley's bakery. A committee of ladies will be in the store on Wednesday and Thursday of the same week to receive contributions. Parcels will be called for if so desired.

### Died in Chicago.

Patrick Hunt, a former resident of Napanee, and son of the late Patrick Hunt, died very suddenly, in Chicago, on Friday evening last. Deceased was in his usual health in the morning but succumbed to an attack of heart failure. The late Mr. Hunt was a blacksmith by trade, having learned his trade years ago with Mr. John Lowry. The remains were brought to Napanee and services were conducted in St. Patrick's church on Wednesday morning after which the remains were placed in the R. C. Cemetery. Deceased's brother Mr. Ed. Hunt, and deceased's wife and two children accompanied the remains to Napanee.

### The New County Council Act.

It may be as well to remind the electorate that the act respecting County Councils passed at the last session of the Legislature provided that the county councils shall consist of reeves and deputy reeves of the municipalities. Each town not separated from the county for municipal purposes, each village and township shall send a reeve; and if the names of the last revised voters' list number over 1000, one deputy-reeve; if over 2000, two; and if over 3000, three deputy-reeves. No name of same person to be counted more than once, no matter how often it appears on the list. This will not increase the number of councillors in villages and townships, as instead of, as now having a reeve and four councillors, there will be a reeve, a deputy-reeve and three councillors; or two deputy-reeves and two councillors. But in towns, the reeve and deputy-reeve, if any, will be added to present number of members of the council.

### Meeting of the Ladies.

The ladies of the town with commendable zeal have called a meeting of all those interested in Hospital work, for Thursday afternoon next, 8th November, at the hour of three o'clock. At this meeting Mrs. Dr. Connell, president of the Hospital league in Kingston, will explain the scope of work done by the Kingston Hospital. Mrs. Connell wishes it understood that she is not coming to solicit subscriptions. The ways in which every lady can help in this good work are very numerous. To know that each year many go from our midst to receive treatment and care in this institution is to feel for the afflicted and hope for the success of the treatment. As all the ladies spoken to have expressed themselves in favor of doing something, it is fully expected that there will be a splendid meeting in the Public Library on Thursday afternoon next.

There is a real treat in store for the theatregoers of Napanee when "The Wayward Son" Neil Twomy's highly sensational comedy drama is presented at the opera house on the evening of November 10th. A drama of every day life, the scenes of which are being daily depicted in almost every community and which is now being presented for the first time at popular prices. Every man, woman and child will want to see this play as it appeals to the young as well as the old. A play of heart interest, yet with just enough rich comedy in it to relieve it from becoming uninteresting or tiresome. The supporting company is a good one, each member being especially selected for the character that they are to portray and each one a recognized artist in their line of work. Be sure and see this play and you will come away satisfied that your evening has been well spent. Don't forget the date.

All kinds of heating apparatus, properly installed, and satisfaction guaranteed.

**MADOLE & WILSON.**

Last Monday at one o'clock was the occasion of a very happy event when Dr. Herbert A. McKim, of Port Rowan Ont., and late of Newburgh, was united in marriage to Miss Georgina E. Wilson, of Stayner, Ont. The ceremony was performed at Wesley Church, Toronto, the Rev. C. O. Johnston officiating. The bride looked charming in cream edelweiss and a white veil with orange blossoms and white roses. The bridesmaid was Miss Wilson, sister of the bride, with Miss Frank McKim, as maid of honor. The groom was ably supported by Mr. Wm. Ketchum, of Brighton. After receiving the congratulations from a crowd of admiring relatives and friends the happy couple left for a short wedding trip, soon to take up their abode at Port Rowan. We understand that Dr. McKim has already made a lucrative practise and found many friends at Port Rowan.

A young Englishman working in the kitchen of the Paisley House, recently hired a bicycle from Mr. Normile and borrowed a pair of boots from a fellow employee, stating that he was going out to the Union Cheese Factory at Fredericksburgh station to see a fellow Englishman. About two miles from town he punctured a tire, so left the bicycle at a house on the York Road, and proceeded on foot. He stayed there all night and the next day being wet he delayed his return to town. At 5 p.m. that day he was arrested for theft. He was urged to plead guilty, and be let out on suspended sentence but this he stoutly refused to do, protesting his innocence of any intention to steal. The P. M. found him guilty on both charges, and after reserving sentence for a week, committed him to jail for 30 days. The matter was referred to the Minister of Justice with the result that on a review of the evidence, the prisoner's immediate release was ordered by the Governor General. The boy who is only 19 was immediately taken back by Mr. Pratt, who gives him an excellent character.

E. LOYST has large stock of flour, Royal Household and all other grades, all kinds of feed, large quantities at the lowest prices. He wishes to sell out in the next month. Salt, Coal Oil Groceries. Highest price for eggs cash or trade. A call solicited,

for quality.

**MADOLE & WILSON**

**Opera House To-Night.**

As the name indicates "The Bonnie Brier Bush" is a Scotch rural play and it tells how the son of an Earl, Lord Donald Hay wins the heart of the old Shepherd's daughter Flora Campbell, and weds her in the Scotch fashion before being taken off by his father. Lachlan Campbell, the shepherd, finds that his daughter is writing to Lord Donald, and not believing in the marriage story, he casts her from the house with bitter reproaches, afterwards erasing her name from the family Bible. But his old heart is sore troubled, and he is on the verge of breaking down with wretchedness and the reproaches of his friends when the daughter returns as well as Lord Donald to claim his wife. The legality of the Scotch marriage is established by Archibald McKittrick, a tipping postman who, as he expresses it, "Was behind the haystack wi' a bottle," and saw the wedding.

## In Aid of St. Patrick's Church

Tramping Over 15,000 Miles.

A young married couple aged 21 and 22 years respectively, Mr. and Mrs. R. C. Worth, hailing from Philadelphia, Pa., were at the Royal Hotel, on Tuesday, and remained until 5 a.m. on Wednesday, when they left for Montreal, Quebec and Halifax, N. S., thence to London, Eng. They have covered a distance of 1400 miles with a wheelbarrow and have now to cover a distance of 14,000 miles on foot making their own expenses as they go along, to win a wager deposited in New York Both are under bonds for \$8,500, which they lose if they are caught riding. They would also lose the wager for which they are taking this long tramp. Should their health continue they expect to reach Halifax about Dec. 25th. On Tuesday they walked from Belleville, 25 miles. They carry a book in which the postmasters of the various towns stamp the date of their arrival. Mr. and Mrs. Worth recommend walking as the best health giving tonic known.

## A Notable Event.

For some time past the Odd Fellows of this city have been endeavoring to secure a strong high-class attraction which would prove something new and novel in the way of an entertainment to be given under their auspices in the near future. With this in view they finally closed negotiations whereby they are to secure Mr. Newton Beers, the well known impersonator, in his highly interesting characterization of the dramatic personae in his popular dramatic divertissement entitled "David and Jonathan." This event is booked by Argyll Lodge, No 212, I. O. O. F., at Brisco Opera House Wednesday, November 21st, and ample preparations are being used to make this affair a notable event. Mr. Beers has been so long before the public in Shakespearean and other roles that he needs but little introduction to the amusement loving public. He comes direct from Boston engagements to his appearance in this city. Mr. Beers deserves, and no doubt will be greeted by a large audience. Recital at 8 p.m.

## Opening Evening Nov. 5th

Continuing each day and evening until Nov. 8th. The ladies of the church will serve dinner on Wednesday, November 7th. Come and join them in a good dinner on that day.

Farmers say too much rain has fallen for good ploughing which is not nearly completed yet.

Owing to the heavy windstorm on Saturday and Sunday, the steamer Aletha had to lay over here until Monday morning.

Two hay presses are at work here, seven dollars per ton is being paid.

B. Wemp has bought the Patterson farm, and R. Filson takes the farm occupied by B. Wemp, D. T. Finlay has purchased the Rothwell farm on the Bath road.

Captain H. Saunders has purchased a house in the village, and is about to retire from the farm.

A. Howard has his cement wall ready for his new barn, which will be raised in a few days; it is 110 feet long, by thirty-eight feet wide, with a sixteen-foot post on top of an eight foot wall with cement floor.

A. Filson and Frederick Richards have arrived home from the west.

Mrs. J. Howard and Miss Annie McDonald also arrived from the west.

Visitors: Mrs. E. Allen, Picton, visiting friends here: Captain H. A. Bolton, Kiasno Mills, visiting W. H. Mout-rap, Mr. and Mrs. A. Reid, Kingston, visiting friends.

A great offer—The Napanee Express from now until January 1908 for \$1.00. Send your order early.

## A Disadvantage of Health.

A visitor among the poor of the east end of London found unexpected testimony to the disadvantages of health in one of his calls. Mrs. B. had a family of a dozen children, and, like most of her class, she had her tale of woe to tell. "How are the children, Mrs. B.?" inquired the caller. "All very well, indeed, sir; very well, indeed," was the answer. "You ought to be thankful, I'm sure, with so much sickness about." "Yes, sir; I suppose I ought to be thankful; but, I tell you, when they're well they eat an awful lot."

The Stock of the late Robt. Denison is now being sold at a bargain, at the Store.

**DOG DON'TS.**

Don't take the dog calling on a friend who owns a cat.

Don't make his life a miserable burden by taking him shopping.

Don't permit him to jump on a caller, wiping his dirty paws over her best gown.

Don't take him calling at all, to have him run around a friend's house chewing up rubbers, etc.

Don't permit him to salute you with his tongue and then say rapturously, "See how he kisses me."

Don't let him hop up on the chairs, so that the next person who sits there will acquire a coat of dog hairs.

Don't tie him up and go off for the day in order that he may make the neighbors miserable with his howling.

Don't expect outsiders to have the same admiration for him and accord him the same indulgent treatment you do.—Exchange.

**Beyond Him.**

In the staging of one of his earlier plays Joseph Jefferson, accompanied by a friend, attended a rehearsal, at which a lively disagreement arose between two of the actresses as to the possession of the center of the stage during a certain scene. While the manager poured oil upon the troubled waters Jefferson sat carelessly swinging his feet from the rail of an adjoining box. The friend could stand it no longer.

"Good gracious, Jefferson," he exclaimed, "this will ruin your play. Why don't you settle matters? You could if you only would!"

Jefferson shook his head gravely, but with a twinkle in his eye. "No, George," he replied, "the Lord only made one man who could ever manage the sun and moon, and you remember even he let the stars alone."

**One Cause of Eye Disease.**

A Scotch surgeon recently called attention to the connection between an uncared for mouth with carious teeth and a form of eye disease. He describes three cases, in each of which the teeth were in very bad condition. The gums were soft and spongy, bleeding easily, while tiny drops of pus could be pressed out from their margins. The breath had a sour smell, and the complexion was of a muddy, sallow tint. In caring for these cases the first step

the teeth were in very bad condition. The gums were soft and spongy, bleeding easily, while tiny drops of pus could be pressed out from their margins. The breath had a sour smell, and the complexion was of a muddy, sallow tint. In caring for these cases the first step was to purify the mouth and put the teeth into good condition. Such procedure, together with suitable tonics and local eye treatment, brought about a perfect recovery. This is only one example of the serious nature of dental diseases.

### DEATHS.

HUNT—At Chicago on Friday Oct. 26 1906, Patrick Hunt, aged 42 years.

**Classical and Romantic Music.**  
Classical composers are those of the first rank who have developed music to the highest pitch of perfection on its formal side, and, in obedience to generally accepted laws, preferring aesthetic beauty, pure and simple, over emotional content, refusing to sacrifice form to characteristic expression. Romantic composers are those who have sought their ideals in other regions and striven to give expression to them, irrespective of the restrictions and limitations of form and the conventions of law—composers with whom, in brief, content outweighs manner.—"How to Listen to Music," Krehbiel.

Mitts and Gloves for fall and winter, men and boys' sizes. We have some snaps in them.

W. M. CAMBRIDGE

Especially For Women

FRUIT-A-TIVES are the finest medicine in the world for women.

As a mild and gentle laxative—as a positive and speedy cure for Constipation and Biliousness—as the only cure for weak and irritated kidneys and especially for "that pain in the back"—as a positive cure for headaches—as a general tonic to build up and invigorate the whole system—FRUIT-A-TIVES stand supreme.

In cases of irritated Ovaries, Ovarian Pains, Vaginal Catarrh, Excessive and Scanty Menstruation, Ulcerations, Bearing Down Pains—and all those troubles peculiar to women—

**Fruit-a-tives**  
OR "FRUIT LIVER TABLETS"

have the most remarkable effect.

Ninety-nine cases out of a hundred of Female Troubles are due to neglect. Bowels become constipated—kidneys irregular—skin neglected—and the poisons of the body, which should be carried off by these important organs, are taken up by the blood carried to the female organs and poison them, thus starting up a train of troubles.

FRUIT-A-TIVES are made from fruits and by their remarkable action on bowels, kidneys and skin, rid the system of poisons, purify the blood, and restore the delicate organs of generation to new vigor and health.

No woman, who suffers, should ever be without them. 50¢ a box—6 for \$2.50, at your druggist's or sent postpaid by

FRUIT-A-TIVES LIMITED - OTTAWA.

Saved by a Fish.

The preservation of life through the curative properties of pure Cod Liver Oil in throat and lung trouble, has long been attested to, by most eminent physicians. The highest quality of this valuable remedy is that obtained from the healthy livers of the cod, native to the waters of the Lofoten Islands off the coast of Norway. You get it fresh at The Medical Hall—Fred L. Hooper.

## A SAVING ARGUMENT.

We are told that to be a benefactor to the human race one has to "make two blades of grass grow where one grew before," or what is practically the same thing, to make one dollar go as far as two went before, to do the latter is our business aim. The success of it is in the savings. Saturday as our special sale day, we offer savings definite enough to double our sales, with every consideration for our many customers. To confront bona-fide bargains is the surest way to qualify for your friendship as well as your patronage. Saturday, Oct. 10th there are two money saving propositions.

## LACE CURTAINS

50 pairs in all—Nottingham Curtains 54 inch x 3½ yards long, very neat and dainty design over-locked edge, very appropriate for dining or bedroom rooms. Now housecleaning time, this is a money saving opportunity. **69c. pair**  
 Worth \$1.00 per pair regular. SATURDAY, at 10 a.m. ....  
 (CARPET SECTION.)

## Housekeepers Economies.

APPLIQUE SHAMS, RUNNERS AND SCARFS.

Women of experience in household matters will readily realize the significance of this special offering, to take advantage of which would certainly be exercising good judgment and showing the existence of a good business-like housekeeping policy—**Shams 32 x 32, Runners 18 x 36, Scarfs 18 x 54**—in the lot are a goodly assortment of neat pretty and dainty designs all new and different to anything heretofore shown. **43c each**  
 SATURDAY at 10 a.m. ....  
 (STAPLE SECTION.)

## Xmas Season close at Hand.

We are considering the gift giving proposition in regard to hand embroidered and drawn work, d'cylics, centre pieces, shams, lunch clothes, runners and scarfs. It may seem early to talk Xmas but now the stocks are complete and you will find no trouble in making a selection. Pick 'em out, we will have same put away for you.

D'cylics from 50c dozen up.  
 Centre Pieces from 30c each up.

There are new Plaid and Dresden Ribbons, Embroidered Elastic Waist lengths and fronts, Kid Cashmere and Wool Gloves, Infants', Boys' and Girls and Ladies' Hosiery.

Hose Supporters for children and ladies

### TOWN COUNCIL.

Council Chamber  
 November 5th, 1906.

Council met in regular session, Mayor Lowry presiding.

Councillors present—Williams, Graham, Kimmerly, Meng.

The minutes of the last regular session were read and confirmed.

Councillor Simpson entered.

A communication was read from W. S. Herrington, stating that the Public Library Board was in urgent need of money for the purpose of buying a certain number of books, which they have to purchase yearly, or forfeit a certain amount of their government grant. The Library had received no grants from the town this year, and he asked that \$250 be paid to R. A. Crockery, as soon as convenient. Laid on the table until later in the evening.

A communication was read from Messrs. John T. Grange and A. Alexander, auditors, which is as follows: "Having expended two days checking vouchers, we come to a stand still as the items are not carried into the cash book and Mr. Mill, owing to his recent injury, is ill fitted to proceed, we find at present 214 amounts still to be posted. This must be done and the cash balanced before we can properly proceed with our work. We would advise purchase at once of new cash book and voucher book, and further payments of accounts be made by incoming treasurer, all payments, even of small amounts, should be made by check." Laid on table until later in the evening.

Mr. P. Bristol and other residents of west Dundas street petitioned the council asking that an arc lamp be placed at the corner of West and Dundas streets, instead of incandescent lamp now in use. Laid on table.

The Finance Committee asked for further time to report re grant to Hay Bay ferry. Granted. They also reported having received the bonds of E. S. Lapun, as town treasurer, and Wm. Rankin, as tax collector. They had been submitted to the town solicitor who pronounced them satisfactory. Report of committee adopted.

The Fire Water and Light Committee reported the accounts of R. J. Wales, \$13.95, and Madole & Wilson, \$12.00, correct. Report adopted.

A By-law as follows was passed: "That notwithstanding the provisions of section Three of by-law No. 499, passed the 21st day of August, 1893, a discount of one per cent, shall be allowed upon all taxes for the year 1906, voluntarily paid to the Collector of taxes on or before 15th day of November, 1906.

Moved by Councillor Simpson, seconded by Councillor Williams, that the Street Committee prepare an estimate of the proposed cost of extension of canning factory sewer to Dundas street, and report to the Finance Committee, and that the Finance Committee consult solicitor and have a by-law prepared and submit same to council at its next regular session. Also that a by-law to raise \$5000 to pay for sewer on Dundas and West street, already put in, be prepared and submitted at the same time. Carried.

Moved by Councillor Kimmerly, seconded by Councillor Meng, that the ratepayers using electric light be charged at the rate of twenty-five cents per 16 c. p. lamp per month. Carried.

This is only a temporary arrangement until meters are put in. On motion of Councillors Williams and Simpson the clerk was instructed to write the Grand Trunk authorities

D'Oylies from 50c dozen up.  
 Centre Pieces from 30c each up.  
 Shams, size 30 x 30, \$1.40, 1.50, 2.00, 2.50 and 3.00 each.  
 Lunch Cloths, size 36 x 36 up to \$3.75 each.  
 Runners and Scarfs size 18 x 27, 18 x 36, and 18 x 51 up to \$2.50 each.

There are new Plaid and Dresden Ribbons, Embroidered Linen Waist lengths and fronts, Kid Cashmere and Wool Gloves, Infants', Boys' and Girls and Ladies' Hosiery.  
 Hose Supporters for children and ladies  
 Belts, Collars, etc., etc.

charged at the rate of twenty-five cents per 10 c. p. lamp per month. Carried.  
 This is only a temporary arrangement until meters are put in.  
 On motion of Councillors Williams and Simpson the clerk was instructed to write the Grand Trunk authorities and instruct them to have well on Dundas street, near railway bridge, filled in, so as to avoid all accidents.  
 On motion the Public Library Board was granted the sum of \$250.  
 On motion the Finance Committee was instructed to secure the services of Mr. John T. Grange to assist the treasurer in posting up his books, also that they be empowered to purchase whatever new books are needed.  
 On motion the council accepted the bonds furnished by the treasurer and tax collector.

# LADIES' DRESS SKIRTS

Every garment fresh and new. Just from the hands of its makers the new tweed effect dress skirts, made in the new circular effect, with pleated front & back, with seam on hip, a preventative from sagging. See them in the ready-to-fit-on department—the prices are reasonable—as low as \$2.50 and as high as \$10.00 each.

## Children's and Misses Coats.

It the leading styles, cloths, and shades, strappings, pleated back with velvet piping, tucked sleeve and turned back cuff, suited for children of all ages—colors of grey, green, navy, and tweed effects, sizes 25 to 51—prices as high as \$7.50 and as low as \$1.50 each.

# "Furs"

A problem worthy of your earnest consideration.  
 City stores are apparently making big inducements to get you to buy your Furs there, offering a refund of your railway fare for a purchase of so much. What inducement is a few dollars on a \$150.00 or \$200.00 Jacket? What about your other expenses and time lost, and going amongst strangers on a Fur proposition when you can do just as well and better, and know who you are dealing with in regard to Furs of quality. Make your purchases here, we have one price and the same to all, with no railway fares deducted and added too. Come to-day and see our extensive stock, we are Fur people and consider your valuable interests.  
 Men's Fur Coats from \$30.00 to \$75.00.  
 Ladies' Fur Jackets from \$35.00 to \$175.00.  
 Stoles, Ruffs, Muffs—all kinds of Children's and Misses' Furs.

In reference to petition of P. Bristol and others, the matter was referred to the Fire, Water and Light Committee to report at next meeting.  
 The following accounts were ordered paid:—S. Howard, work at Harvey Warner Park, \$49.35; Chas. Pollard, poundage, \$5.50; Geo. Hinch, constable at Court of Revision, \$2.00; Napanee Express, \$7.50; J. F. Smith & Son, supplies to poor, \$96.00; Madole & Wilson, \$102.64; R. J. Wales, \$13.95; Jas. Richardson, carting, 65c; E. B. Perry, nightwatch, \$20.00; Chas. Anderson, \$3.25; E. Kelly, carting, \$2.50; J. Graham, 29.67.  
 The following accounts were referred: Dr. Leonard examining three insane people, \$15.00, Poor and Sanitary Committee to report; Madole & Wilson \$237.84, Street Committee with power to act; John Wilson, damages, flooding cellar about October 15th, Street Committee to report. Council adjourned.

International Stock Food, Heave Cure and other remedies.  
**MADOLE & WILSON.**

### NEWBURGH.

The concert here in aid of the Public Hall was a great success. A large crowd in attendance the hall being packed full, proceeds \$100.00, over and above expenses.  
 Miss Madeleine Thompson, of Toronto sang a solo, in the Methodist church, Sunday evening.  
 Rev. H. J. Chant preached in the Methodist church Sunday evening.  
 Miss Minnie Vanalstine and Miss Nellie Richards, Napanee, attended the concert in Finkle's Hall, Friday evening.  
 Mr. and Mrs. Wm. A. Boyce spent Sunday the guests of Mr. and Mrs. Daly Boyce, Viole.  
 Miss Clara Shorley spent Saturday in Napanee.  
 Miss Mamie Foster, of Syracuse, arrived home on Tuesday for a visit with her parents, Mr. and Mrs. John Foster.  
 Miss Young, organist of the Methodist church, has tendered her resignation to the trustee board. It was a great surprise to all of her friends.  
 Miss Mabel Limbert formerly of Saby, will take her place.  
 Miss Minnie Nesbit, Wesplain, attended the concert in Finkle's Hall, Friday evening.  
 A great offer—The Napanee Express from now until January 1908 for \$1.00. Send your order early.

Genuine American and Canadian Coal Oil.  
**MADOLE & WILSON.**

Mr. Chas. McGill, former Manager of the Ontario Bank, as a result of the evidence on Tuesday, was charged with theft from the bank, and committed to jail without bail. The case against Mr. G. R. R. Cockburn was adjourned.

**That Night has Passed.**  
 When one is obliged to sit by a smoked lamp chimney, and do their reading or sewing. The high grade American Coal Oil sold at The Medical Hall will give you light without the smoke. Try one Gallon. Fred L. Hooper.

# MADILL BROS.

**Gettin' Wisdom**  
 is a comparatively easy task if you start it while you are young. Don't allow your children's eyes to be ruined for all time because "they look too 'ded' with glasses on."  
 We'll tell you the truth as to whether they need glasses or not, and charge you nothing for the telling.  
 Headaches in children are suspicious.  
 We are also the best people to guarantee the quality of our frames, it being part of our jewelry business to acquire that ability and knowledge.

It is not generally known that the only chocolates served on the railway car during Prince Arthur of Connaught's recent visit to Canada, were McConkey's fresh hand-made chocolates. The Medical Hall-Fred L. Hooper, sole agent for Napanee.

**TESTING ELECTRIC LIGHT METERS.**

After the council adjourned Monday evening, on the invitation of Mr. Johnson, of Belleville, government inspector of electric light meters, the members of the council visited the electric light power house and witnessed Mr. Johnson test some of the meters. The meters are made by Westinghouse Electrical Co and are guaranteed to test within two per cent of perfection, and as was shown there that night some of them test within one-half per cent of perfection. They are a very small affair, not being much larger than the opening of a five quart pail, all the mechanical work being enclosed in a class case. Mr. Johnson informed the members of the council that he had already tested some fifty-two meters and had only found one that did not test up to the standard. The idea is prevalent in some instances that the meters do not register correctly, and although the current may be shut off, the meter will still register. This idea cannot be entertained for a moment, especially with these meters, as the mechanical work can all be plainly seen through the glass case, and if the disc which registers the current, was revolving it could be readily seen. Mr. Johnson demonstrated the effect on the meter when a few lights were being used and when several were being used. The first light turned on was one of two candle power, and the disc in the meter began to slowly revolve. Then an eight candle power lamp was turned on and you could notice the disc move a little faster, and so on until a number of lights were all burning at once. He then shut them all off and the registering disc stopped. These meters are tested every five years, and Mr. Johnson, who has had some ten years experience, says that after five years service, he finds that they test about ninety five per cent, all right, and the other five per cent is in favor of the consumer, as in almost every case those that do not test right, the fault with them is that they run slow and do not register the amount of current used. When a meter is found to be not working correctly, they are returned to the firm who made them to be made right. The demonstration was watched with considerable interest by those present, especially as extra lights were added the effect could be noted on the meter.

**CASTORIA**  
For Infants and Children.  
The Kind You Have Always Bought  
Bears the Signature of *Charles H. Fletcher*

Plans and specifications can be seen and forms of tender obtained at this department.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to 10 per cent (10 p. c.) of the amount of the tender, which will be forfeited if the party tendering declines to enter into a contract when called upon to do so, or if he fails to complete the work contracted for. If the tender is not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,  
FRED GELINAS,  
Secretary.

Department of Public Works,  
Ottawa, November 2nd, 1906.

M. Clemenceau, Prime Minister of France, has declared that a part of his policy is to maintain the peace of Europe.

President Roosevelt has dismissed in disgrace a battalion of colored troops because they refused to disclose the identity of a murderer among them.

ITCH, Mange, Prairie Scratiches and every form of contagious Itch on human or animals cured in 30 minutes by Wolford's Sanitary Lotion. It never fails. Sold by F. L. HOOPER.

An Indian named Woolly Bear, who shot and killed another Indian named Wombadiska, was found guilty of murder at Brandon and sentenced to be hanged December 21.

Belleville Ont., Nov. 3.—At the opening of the High Court this morning Ferdinand Kleingbell, who was brought in guilty on the charge of manslaughter, came up for sentence by Mr. Justice Britton. There was a large crowd present.

When asked if he had anything to say why sentence should not be passed the prisoner replied in a low voice "no" and then wept bitterly. His Honor said that owing to his age and the fact that the jury made a recommendation for mercy, he would sentence the prisoner to four years in the Kingston Penitentiary.

The sentence caused a big surprise, and the prisoner sat down with a satisfied look.

It was generally thought the sentence was very light.

**The Best Christmas Present for a Little Money**

When your Christmas present is a year's subscription to THE YOUTH'S COMPANION you give as much in good reading as would fill twenty 400-page novels or books of history or travel or biography ordinarily costing \$1.50 a volume. Nor do you give quantity at the cost of quality. For more than half a century the wisest, most renowned, most entertaining of writers have been contributors to THE COMPANION. You need never fear that THE COMPANION will be inappropriate or unwelcome. The boy, the girl—every other member,—will insist upon a share in it. There is no other present costing so little that goes so far.

On receipt of \$1.75, the yearly subscription price, the publishers send to the new subscriber THE COMPANION'S Four-Leaf Hanging Calendar for 1907, lithographed in twelve colors and gold and subscription certificate for the fifty-issues of the year's volume.

Full illustrated announcement of THE COMPANION for 1907 will be sent with sample copies of the paper to any address free.

Subscribers who get new subscriptions will receive \$16,200.00 in cash and many other special awards. Send for information.

THE YOUTH'S COMPANION  
444 Berkeley Street Boston, Mass.

# THE BREAD OF LIFE

## Many People With Shelves and Larders Filled Are Yet Pitiably Poor.

Man shall not live by bread alone, but by every word that proceedeth out of the mouth of God.—Matt. iv., 4.

There are lives that have bread in abundance and yet are starved; with barns and warehouses filled, with shelves and larders laden they are empty and hungry. No man need envy them; their feverish, restless whirl is but the search for a satisfaction never to be found in things. Called rich in a word where no others are more truly, pitiably poor, having all, yet lacking because they have neglected the things within.

The abundance of bread is the cause of many a man's deeper hunger. Having known nothing of the discipline that develops life's hidden sources of satisfaction, nothing of the struggle in which deep calls unto deep and the true life finds itself, he spends his days seeking to satisfy his soul with furniture, with houses and lands, with yachts and merchandise, seeking to feed his heart on things, a process of less promise and reason than feeding a snapping turtle on thoughts.

If the heart be empty the life cannot be filled. The flow must cease at the faucet if the fountains go dry. The prime, the elemental necessities of our being are for the life rather than the body, its house. But, alas, how often out of the marble effluence issues the poor emaciated inmate, how out of the life having many things comes that which amounts to nothing.

### THE ESSENTIAL THINGS.

are not often those which most readily strike our blunt senses. We see the shell first. To the undeveloped mind the material is all there is. But looking deeper into life there comes an awakening to the fact and the significance of the spiritual, the feeling that the reason, the emotions, the joys and pains that have nothing to do with things, the ties that knit one to the infinite, all constitute the permanent elements of life.

Because man is a spirit his life never can consist wholly in things; he must come into his heritage of the soul wealth of all the ages; he must reach out, though often as in the dark, until

across the void there comes voices, the sages and the sneers, the prophets and the poets speaking the language of the soul. In these he finds his food nor can his deeper hunger be assuaged until it thus is fed.

Because man is a spirit and gradually is coming into the dominant spirit life in which things shall count for less and thought and character for more, he seeks after his own kind. The depths of life have their relationships. The spirit of man cries out after the father of spirits. By whatever name men have called the most high they ever have sought after him the eternal who would be one with them in soul, in all that is essential and abiding in being.

Every religion, every philosophy, every endeavor after character and truth is but the cry of humanity for word with God. Hearing his word on any lip the heart of man

### ANSWERS WITH JOY.

The words of eternal truth have been the food of the great in all ages. Fainting in the fight the message from the unseen, the echo of everlasting verities has revived their spirits; they have fought the fight that despises things and seeks truth.

Who would not exchange a mess of pottage for the benediction from a father's lips? Who is so dead he no longer finds more satisfaction in truth and love and beauty than in food or furniture? And why are we so foolish as still to seek to satisfy ourselves with things that perish, while down to the least blade of creation earth is laden with unfading riches. God is everywhere, and every open heart may hear his voice?

If we might but learn this lesson, we people of the laden hand and the empty heart, that since life is more than digestion and man more than beast or machine, since determining all is the spiritual world, they only are wise who set first things first, who use the garnered experience of the past and the opportunities of the present to the enriching of the soul, who listen among all the voices of time for the words that proceed from the lips of him who inhabiteth eternally.

# THE S. S. LESSON

## INTERNATIONAL LESSON,

NOV. 11.

### Lesson VI. Jesus in Gethsemane.

Golden Text: Luke 22:42.

#### THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Intervening Events.—It is Luke who records the fact that even during the solemn hour of the Last Supper there had arisen among the disciples a contention concerning which of them was to be accounted the greatest (Luke 22:24-30). The answer of Jesus was given in a wonderful example of humility and service when, girding himself with a towel, he washed the disciples' feet. John, the only one of the evangelists who was an eye witness of the events connected with the Last Supper and the subsequent passion of our Lord, has recorded for us in his fuller narrative, some of the longer farewell discourses of Jesus delivered after the Supper before leaving the upper chamber and on

the appropriateness of the exhortation for Christians at all times has it come to be applied in its present more general usage.

The spirit indeed is willing, but the flesh is weak.—Note the touch of clemency mingled with the words of rebuke so characteristic of the gentleness of Jesus.

45. Sleep on now, and take your rest.—Perhaps the marginal reading of the Revised Version better conveys the intended meaning. Do ye sleep on, then, and take your rest?

47. Judas . . . and with him a great multitude with swords and staves, from the chief priests and elders of the people.—At this point also John's narrative is more explicit in details. "Judas then, having received the band of soldiers, and officers" from the chief priests and the Pharisees cometh thither with lanterns and torches and weapons."

49. Kissed him.—The expression in the original signifies to kiss with fervor or repeatedly.

50. Friend.—Perhaps comrade would be a better word, since the Greek denotes not friendship in our sense, but companionship.

## STORIES OF STRANGE FISH

# HAS EARTH FOUNDATION

## SCIENTIST WHO SAYS THAT THE SUN DOES MOVE.

Does Not Believe We Are Whirling About in Space Without Anything to Rest Upon.

"To get from London to New York in three hours' time is a possibility according to present day science."

That is the statement M. K. Ryan, editor of Civil Engineering, the big London monthly, made to a correspondent. I asked him how it could be done?

"Scientists, both of the present and the past," he answered, "tell us that the earth revolves at the rate of seventeen miles a minute. If this is a fact, all a man needs to do is to go up in a balloon in London, keep it stationary in the air, and let the earth revolve for, roughly, 183 minutes, and then come down—in New York."

Mr. Ryan has startled the British Scientific world with a harmless looking little editorial paragraph in the October number of Civil Engineering. It reads as follows:

"It is not generally known, even to the engineering public, the developments which have taken place during the last few months in airships of various kinds, and space does not permit me to enter into details. Suffice to say that arrangements have been made to manufacture them in large quantities during the coming winter, and next season

### BALLOONING TRIPS

will be nothing unusual. The explorer who first arrives at the North Pole will, I expect, do so in some form of airship, and will probably discover the foundations of the earth and dispose once and for all of that ridiculous and absurd theory that the world is revolving in space."

Mr. Ryan was asked on what he based his theories. He counter-queried—"On what proven facts do astronomers and other scientists base their present day theories? I have as much right to put forth a theory as they have. I have studied the sciences, and particularly astronomy, for years. I contend that the world is on a solid foundation. If it is moving there must be a force to make it move. Then that force should be the force of gravity and that would be the force of gravity outside the earth. Therefore, the force of gravity outside the earth would be greater than the force inside."

"Astronomers tell us that a point in the equator is revolving at the rate of seventeen miles a minute, but that we are going so fast that we don't appreciate it or are not sensible of it. They tell us that we are kept on this earth by the force of gravitation. If a man is then standing on the equator, could he be held there by force of gravitation if there was a greater force of gravity outside the earth? We are also told the reason we do not feel ourselves

### PASSING THROUGH SPACE

is because the atmosphere is carried around with the earth. If you go up a few thousand feet in a balloon where the centrifugal force of the earth would have no effect on the atmosphere, you need only wait there until New York came around to you and then descend."

"Giving astronomers the advantage of their arguments that we are held on this world by the force of gravity the centrifugal force of the earth would yet be much greater and we would be thrown at once into space."

"The foundations of the earth, I contend, are situated at North and South Poles. Nature has never allowed us finally to explore these regions. The first person that comes within range with a telescope will see the solid foundations. It may perhaps be a foundation of rock, and if followed up might lead to the discovery of other hemi-

# EMPRESS' NERVES BREAK

## RUSSIAN DOWAGER AT LAST YIELDS TO TERRIBLE STRAIN.

Her Name Is On the List of Individuals to be Exterminated by the Terrorists.

At last the Russian terror has broken down the steel nerves and the iron constitution of one who has been described as the most high-spirited and calmly courageous woman that the present generation has seen. This is the Dowager Empress of Russia, sister to the Kings of Denmark and Greece and the Queen of England, and mother of Czar Nicholas II. Her husband was the late Alexander III., one of the few Russian Emperors who have been allowed to die decently in bed.

While the Empress is 59 and has lived since she was a girl in the health-destroying Russian court, she was until two years ago a person of remarkably youthful appearance, slim figure and buoyantly hopeful disposition. She even rivaled her sister, Alexandra of England, who is only three years her senior, in the exquisite preservation of all her charms.

Though never at any time has she boasted the beauty of the English Queen, she has always rejoiced in the possession of an intellectual vivacity that was inherited from her mother, Queen Louise of Denmark, and like old Queen Louise, Dagmar, as she has always been called in spite of her change of name on entering the Russian Church, was deeply and

### DETERMINEDLY AMBITIOUS.

Moreover, she was her shrewd mother's favorite daughter, and to her marriage the consort of the good and mild old King Christian devoted the great diplomatic skill she possessed. Nothing indeed in all her long and successful life gave Queen Louise the satisfaction that she derived from the union of her second daughter in 1866 with the then Czarévitch of Russia, who later became Emperor Alexander III.

Fortunately the mother-in-law of Europe, as Queen Louise was sometimes called, died before troubles thick and fast began to fall in the path of her child. For all gossip to the contrary, and in spite of the severe etiquette of the Russian court, as well as the very gloomy temperament of Emperor Alexander and the daily peril in which Russian rulers have lived since the rise of Nihilism, Dagmar was for years one of the happiest women on thrones in Europe.

Some of the old Viking spirit if her ancestors was in the blood of tall, slim, Dagmar; it shone in her big, brilliant sea-blue eyes, and it is declared by those who helped to guard her and were with her in moments of surprise and danger that she never seemed to understand the meaning of the word fear. Not once or twice but frequently in her career as wife of the heir and then of the occupant of the Russian throne did she look death in the face as it threatened herself, her husband and her children, and never once was she known to blanch or shiver or lose her presence of mind. She knew that poison, the knife, a bullet or a bomb might at any instant hurl her into eternity or snatch one of her loved ones from her; always her giant husband brooded over the possibility of a quick and terrible end, but she kept ever a

### LIGHT AND CONFIDENT HEART.

Her superb health and the zest with which she could endure the severest round, not only of court entertainments, but still more exhausting religious ceremonies, were also recommendations to popularity. How much the Empress prized her popularity and the authority that came from it is indicated by the grief she now suffers because it has vanished, and she has been

who was an eye witness of the events connected with the Last Supper and the subsequent passion of our Lord, has recorded for us in his fuller narrative, some of the longer farewell discourses of Jesus delivered after the Supper before leaving the upper chamber and on the way to Gethsemane. The synoptic Gospels have no parallel account of these discourses the substance of which consists of words of comfort and encouragement to the disciples, who were so soon to bear the responsibility of spreading among men the gospel message. These discourses contain some of the most beautiful and valuable recorded utterances of our Lord. Somewhere after leaving the upper chamber and before crossing the brook Kidron beyond the city walls Jesus offered the fervent prayer recorded in John 17. Referring to the words of the prayer just spoken the fourth evangelist continues John 18. B. "When Jesus had spoken these words he went forth with his disciples over the brook Kidron, where was a garden, into which he entered, himself and his disciples." The verses intervening between our last lesson and this one in Matthew's account record the bold avowal of Peter that he would not forsake Jesus even though all others would flee. Following the answer of Jesus, in which he points out to Peter his own weakness and the denial that weakness will result in, the words of our lesson text continue the narrative.

26. A place—Gr. An enclosed piece of ground; John, "a garden."  
 Called Gethsemane—Meaning literally oil-press, and so called, without doubt, because of the presence of olive trees and an olive press in the garden. Gethsemane was somewhere on the western slope of the Mount of Olives, just across the valley of the Kidron to the east of the city and temple walls. The traditional site is about fifty yards beyond the bridge that spans the Kidron, and here, within a walled enclosure, could very ancient olive trees are still to be found. It is not to be supposed, however, that these trees can take from the time of Jesus, which would make them almost two thousand years old. The Jewish historian Josephus, moreover, records that during the siege of Jerusalem by Titus 70 A.D., very few trees in the neighborhood of Jerusalem were left standing. The accuracy of the tradition which locates Gethsemane at this particular spot has often been called in question but since the garden has never been anywhere in this immediate vicinity and no other site seems to have so much in its favor, the accuracy of the tradition cannot be doubted. The strongest objection urged against the tradition is that the site is so near the city.  
 27. The two sons of Zebedee—John, the author of the fourth gospel, and James, his brother. These, with Peter, and perhaps Andrew, formed what may be called the inner circle of the apostolic group, to whom Jesus at times revealed himself more fully than to the others.  
 28. Watch with me—The words of Jesus recorded in this verse give us a deep insight into his perfect humanity. It is a man that he craves human companionship in the agony of his great sorrow.  
 29. Let this cup pass away from me—His destiny which is in store for me, compare the use of the word "cup" in Isaiah 51. 17. "The cup of his wrath; thou hast drunken the bowl of the cup of staggering, and drained it."  
 30. Cometh unto the disciples—Still he three only.  
 31. Watch with me—Who has been the spokesman in the previous profession of loyalty and willingness to share his fate.  
 32. Watch (Or, watch ye) and pray, that ye enter not into temptation—This was special counsel for the special emergency at hand. Only because of

who was an eye witness of the events connected with the Last Supper and the subsequent passion of our Lord, has recorded for us in his fuller narrative, some of the longer farewell discourses of Jesus delivered after the Supper before leaving the upper chamber and on the way to Gethsemane. Following the answer of Jesus, in which he points out to Peter his own weakness and the denial that weakness will result in, the words of our lesson text continue the narrative.

## STORIES OF STRANGE FISH

### COD OF IMMENSE SIZE IN THE NORTH ATLANTIC.

#### Supposed That Submarine Earthquake Drives Large Cod to Land.

"Dwellers inland have little, if any, idea of the size to which edible fishes grow in the North Atlantic and the men who catch these fish are themselves often surprised at the immense size of some of the specimens captured," writes P. T. McGrath. "During the last year or two, for some unknown reason, cod of enormous size have been taken all along the coast from Massachusetts to Labrador, some weighing as high as 100 pounds, while the majority run from fifty to seventy pounds, though an ordinary sized cod rarely exceeds ten or fifteen pounds. The larger specimens were perfectly normal in their make-up, fat and meaty all the way through, exhibited on signs of being 'freaks' and were found by repeated trials, to be as succulent as the smaller ones. Photographs taken by Dr. Grenfell and others show cod five to six feet long and weighing seventy or eighty pounds. The number of these secured annually is increasing steadily.

#### OF GREAT SIZE.

"Scientific investigation by the Fisheries Bureaus of the different countries concerned and the statistics kept by the fishing organizations show that the cod and other good fishes are growing smaller and harder to secure every year. Lately the United States fish commission has made energetic efforts to restock the ocean with cod and other fish, but this fact could not account for the great number of huge fish taken of late, as most of these must be at least a dozen years of age, judging from their size and the known rate of the cod's growth.  
 "The most reasonable supposition with regard to the coming of these large cod is that they are fish which resorted to some mid-ocean banks or shallows, but have recently been driven to land by some submarine convulsion like an earthquake. This supposition is confirmed by the fact that about fifteen years ago the United States fish commission's steamer Fishhawk, while cruising in mid-Atlantic, discovered millions of fish of a new species, large plump and very palatable.

#### SUBMARINE EARTHQUAKE.

"As they are found in boundless shoals, the fishery experts on board believed they had discovered a new and perpetual food-fish supply. The species was named the 'file fish' and was figured and described in the official reports. But when the steamer returned a year later no live ones could be found, though millions of decomposed bodies were floating on the surface.  
 "For some time it was feared that all the fish of the breed had perished from some unknown and terrible malady, but a few survivors were found later on, though not enough to warrant the prospect of the fish being hunted as an article of food for many years. No cause is known for the virtual extermination of the species, and the explanation arrived at was that some earthquake must have created such a submarine disturbance as destroyed them en masse. It is probable that some such circumstance is now driving the big cod to the seaboard, and the hope of every fisherman is that they will remain there."

A man isn't necessarily crooked because he follows his natural bent.

Poles." Nature has, never allowed us finally to explore these regions. The first person that comes within range with a telescope will see the solid foundations. It may perhaps be a foundation of rock, and if followed up might lead to the discovery of other hemispheres. Who knows? We can merely theorize as we have done for ages dead and gone.

"My theory also is that the movement of the sun is not an optical delusion, but that it revolves around the earth once in 24 sidereal hours. I also claim that if we have been moving through space for thousands of years, we would have arrived at some destination or have received some evidence of motion. It can also easily be shown that the centrifugal force of the earth does not carry around the atmosphere with it as the wind blows in all directions.

"If the earth revolves, it is absolutely certain that there is a force which makes it revolve."

### LAND IN WEST MUCH TOO DEAR.

#### Annie S. Swan Says It is no Place for Man of Small Means.

In the London Chronicle, Annie S. Swan, writing of the Canadian Northwest, says:  
 "The land here, being one of the richest grain-producing sections of Manitoba, is no longer cheap, as understood in the old days, when land could be had for the asking. There is no more homesteading—viz., free grants of land—it has to be bought, at any price from fifteen to forty dollars per acre, in English money from three to eight pounds, which price includes house and farm-buildings, which really constitute an estate. For £2,000 or £3,000 one of the very best farms, with suitable dwelling and buildings, can be bought, which, with skilled management, will return 10 per cent. of the investment, with the added satisfaction that the place is increasing in value every day. This for the moderate capitalist.

"But for the man of small means, or no means, there is another opening. He may rent a farm by the year, from one who possesses several, paying him half the value of the crop. He has the use of the stock and implements by this arrangement, and is spared the killing work of the pioneer, struggling to haul in his farm acre by acre, often handicapped through lack of money to buy proper horses and implements to work the land. This system prevails very much here, and has excellent results, most men who rent the farm succeeding in buying it through course of time. Then life is pleasant in a well-settled country. The pioneer struggles are only for the young and buoyant of heart. Labor is scarce and dear; but as the need is only pressing for a few months in the year there should be discrimination shown in urging laboring men to come here. Certainly for four or five months in the year a skilled farm laborer may earn ten or twelve shillings a day, with board.

"But in the winter he is not required. Then he drifts back to the cities, to help create the problems he had thought perhaps to have left behind forever. I do not see that anything can be done to better such conditions meanwhile. A thermometer registering from 20 to 40 degrees below zero forbids the idea of much outdoor labor. Thus the present system of bringing hundreds of men, at cheap rates, from the Eastern Provinces, to help through the press of the harvest would seem to be the best. It is a fine, free, open life this, full of neighborly kindness and simplicity. To the small agriculturist, who, by reason of many burdens, cannot wrest a living from his meager acres at home, it offers not only ample remuneration for his toil, but that fine feeling of independence which is the true zest of life. Here, beyond a doubt, it is possible for him to realize what he has hitherto beheld only in his dreams."

tainments, but still more exhausting religious ceremonies, were also recommendations to popularity. How much the Empress prized her popularity and the authority that came from it is indicated by the grief she now suffers because it has vanished, and she has been hunted out of the country in which once she was so esteemed.

But how much that popularity rested on the good advice and affectionate control exercised by her husband can only be measured by the fact that from the moment of his death it began to wane.

Twenty-eight years of lofty position as the wife of the most powerful monarch in the world had not fitted the still youthful Dagmar for dowagerhood, which in Russia is usually no position at all so far as influence is concerned. She was only 46 when Alexander died, and immediately after his death the Russian people fairly wept like children at her knees.

They knew the story of those heavy months when she had tenderly and with her two strong white hands nursed her husband; they saw her go through the ordeal of his funeral without flinching or excusing herself from one of the duties of it, and they were not at all inclined to like the new Empress.

Some good people just at this time drew a pretty picture of the Dowager in retirement and cultivating the art of being a grandmother, but the vigorous Dagmar had no notion at all of doing that. Though as a wife and mother she had been a thorough success, as a mother-in-law she made haste to display another side of her character, and, seeing that Nicholas was no such man as his father, and thinking that his wife, pretty Alix of Hesse, a weakling too, she decided to remain in Russia and take a strong hand in

#### DIRECTING BIG AFFAIRS.

Though her husband, dying in many things as he had been, had never shared with her his State cares, Dagmar was ever a good friend of most of his brothers and his uncles, and the Grand Dukes courted her aid and influence in managing Nicholas II. It was thus indeed and unfortunately that this woman was brought into the snare of politics and quickly down to her ruin.

She hated to give up her crown to her daughter-in-law, to get out of her rooms in the palaces; and though Alexander had left her tremendously rich in money and jewels, she passionately resented giving up the use of the great regalia and the lesser crown gems that only an Empress consort is privileged to wear. Notorious at the time was the struggle that went on for months between daughter and mother-in-law over a certain set of marvelous pearls that the Dowager all but refused to resign. And so, from bad to worse, went the domestic situation, until the contest between the two women was extended from the question of pearls to the right to influence the son and husband.

For some years the Dowager held her power over her son. It is probable that she advised him to follow his father's policy, and she still held one of the trump cards in her game with her daughter-in-law, because lacking the birth of a son to Nicholas the Grand Duke George was heir to the throne.

But somehow with the death of her husband Dagmar's long run of luck came to an abrupt end. Grand Duke George died miserably of lung trouble, and at his death his mother not only suffered, but the loss seemed to harden her. At court she formed a party devoted to her interests, she invested

#### GREAT SUMS OF MONEY

in vague mismanaged Manchurian enterprises, she dabbled in dangerous politics, and so from being the most loved she came to be the most detested woman in Eastern Europe.

Violent accusations of extravagance, of keeping in her pay an army of spies, whose business it was to ferret out the names of plotters against her life and that of the Grand Duke Michael, the only son save Nicholas now left, were brought

against her by enemies. They even went further and accused her of advising the Grand Duke Sergius to some of his worst acts of oppression, of counseling Nicholas to wholesale murder of his subjects.

In the present inflamed state of the Russian people a word of the revolutionists against the Dowager Empress was enough to incite the unkindest beliefs, and two years ago her name appeared in the list of individuals to be exterminated by the Terrorists. Not only was her name included on the list, but formal warning, as is usual, was sent her.

At first she refused to believe it. She even laughed at it as she had been wont to laugh years ago when death came near her. Nevertheless her children, and chief among them the Czar, urged her to place herself beyond the reach of her enemies. Whispers blew about to the effect that the Czar would give into his mother's hands his heir and only son and that the two would retire to Denmark to wait for fairer skies to shine on troubled Russia.

## GOOD DONE BY STEALTH

### MULTI-MILLIONAIRES WHO ACTTIE GOOD SAMARITAN.

Russel Sage Will be Mourned by Many  
—Jay Gould Did Many Good Deeds.

One reads much of the more than regal munificence of the multi-millionaire who writes cheques in six figures for charitable and philanthropic objects, "while all the world wonders"; but one hears little of the many small deeds of kindness, of the good "done by stealth," to which the modern Croesus is just as prone as his less-gilded brother. Occasionally, as in the obituary notices of the late Mr. Beit, these untrumpeted acts of charity come to light; but for the most part they are known to none but the doer.

Sometimes, however, one gets a glimpse behind the curtain of concealment, and what one sees proves that the often-maligned and misunderstood man of millions may be very human after all, and very modest in his humanity. The late Mr. Russell Sage, for example, who, in spite of his \$100,000,000, never paid more than a few dollars a year to his tailor, and as often as not carried his frugal lunch in his pocket, will be mourned by many to whom he has proved

### A FRIEND INDEED.

While he himself travelled in crowded trains to Wall Street in the company of his clerks, his carriages and horses, among the costliest in New York, were taking out poor invalids and cripples for an airing; for forty years he maintained in comfort a man and his family who had fallen on evil days, because they had been kind to him in his time of obscurity; and many a gift of gold has found its way anonymously from him to the houses of the poor and the sick.

Jay Gould, perhaps the most abused millionaire who ever lived, a man who hoarded his gold to the last gasp, also had a tender heart and generous hand which he exercised by stealth. When a man who had shown him kindness in those early days of struggle, when the future millionaire went to New York with a mouse-trap as his sole capital, failed in business, Gould not only paid every penny of his debts, amounting to thousands of dollars, but set him on his feet again. The widow and children of another old friend he made a life provision for, and, thanks to his guidance, one of her sons is a millionaire himself to-day; while countless stories have been told since his death of similar

GOOD SAMARITAN DEEDS.

## About the House

### SOME DAINY DISHES.

**Pastry Fingers.**—When next you are making pastry, save some to make into fingers. Roll out into a piece about the size of a Yorkshire pudding tin. Take a sharp knife, dip it into flour, and cut the pastry into lengths about one-inch wide. Bake in a sharp oven till done. Spread one piece with raspberry or apricot jam, lay another piece on it and sift fine white sugar over. Pile these sandwiches neatly on a doyley, and you have a pretty dish for tea or dinner.

**For a Plain Suet Pudding.**—Take three-quarters of a pound of flour, add to it a pinch of salt, a teaspoonful of baking powder, and a quarter of a pound of very finely-chopped suet. When these ingredients are mixed, add sufficient milk to make all into a stiff dough. Put into a greased mould, and boil at a gallop for two hours and a half and longer if time permits. Serve with jam, treacle, or sauce, and you will have a delicious pudding. Long boiling is most important.

**Potatoes and Cheese.**—This is a tasty dish, and the materials required for it are often thrown away, as the cook doesn't know how to utilize them. Well grease a pie-dish with dripping, scatter breadcrumbs over it and some grated cheese. Take some cold mashed potatoes, add a little milk to moisten, and some more cheese. Place this in the dish, scatter grated cheese on the top, mixed with breadcrumbs. Dab little bits of dripping or butter on the top. Brown before the fire or in the oven and serve hot.

**Stewed Mutton and Macaroni.**—Cut one pound of breast of mutton into small pieces. Slice one onion, one turnip, two carrots, and a stick of celery. Put a layer of the vegetables in a saucepan, then a layer of meat, then season, all with pepper and salt. Next have a layer of meat, then season all, and add the rest of the vegetables. Pour over three pints of water, bring to the boil, and cook all gently for an hour. Put in half a pound of macaroni, and simmer till all is tender. Turn into a deep dish, scatter chopped parsley over and serve.

A spice plaster is a very useful application in cases of severe colic in children. To prepare this, take one part even of cinnamon, allspice, cloves and ground ginger, with or without a very little cayenne pepper, according as the plaster is to be strong or weak. Mix well together and put it in a flannel bag, spread evenly and quilt the bag to prevent the spices getting into lumps. Before applying this plaster wet it with a little warm whisky, or water. The same bag may be used repeatedly until it begins to lose its strength.

For a cheese soufflé take a teaspoonful of grated cheese, the same quantity of fine white breadcrumbs and milk, a piece of butter the size of a walnut, two whites of eggs and one yolk, cayenne pepper and salt. Place the milk, breadcrumbs, and cheese in a saucepan and let all heat very slowly till the cheese is dissolved. Add the butter, and season nicely. Whip the whites of egg very stiffly and beat the yolk separately. Take the milk, cheese, etc., off the fire and let it cool, then add the yolk of an egg; season to taste. Butter a pie-dish lightly, add the white of an egg to the mixture, pour into the dish, and bake for twenty minutes in a quick oven. Serve at once, or the soufflé will go down and be spoilt.

Medicated prunes are an old world remedy which bid fair in modern nurseries to become popular again. Take a quarter of an ounce of senna and mian (as obtained from a druggist), and pour over it one pint of boiling water.

and thirty parts of water. Mix well. Paint this on to the floor two or three times until the right shade is produced. Afterwards polish well.

**Biscuits** are a wholesome form of food, if not too rich. All plain biscuits may be considered more nourishing than bread. At any rate they are for stout people, who should always select rusks and cracknels in preference to toast.

## SUPERSTITIONS OF CZAR

### RUSSIA'S EMPEROR HAS DONE MANY RIDICULOUS THINGS.

Carries Coin and Charms on His Person to Preserve Him From Harm.

Curious stories are told about the whims and peculiarities of the Emperor of Russia, which would be amusing if they did not involve the happiness and welfare of 144,000,000 of people. He is a mystic; all mysteries appeal to him. He believes in miracles and all sorts of occult things. He is a spiritualist; he believes in clairvoyance, amulets and various other superstitions. For example, he carries a coin in his pocket which he believes is necessary for the protection of his life, and will go nowhere without. He is confident of its power as a talisman.

Three years ago or so Bernard Tunnauer, a Jewish shoemaker at Radautz, Austria, gave supper and lodging to a mysterious wandering rabbi from the Orient. In the morning the departing guest handed his host two antique coins, saying that they were all he had to give in payment for his entertainment, but they had much greater value than modern currency, because they possessed the power of protecting people who carry them from unseen dangers.

The shoemaker put the coins away with other trinkets and forgot all about them until a year ago he had a dream, in which Alexander III., the late Czar, appeared at his bedside and besought him to send the coins to his son, Nicholas II., in order that he might have the benefit of their protection against the terrorists and other perils to which he is exposed. Radautz is nearer to Vienna than to St. Petersburg. Hence Tunnauer sent the coins to the Russian ambassador at the Austrian capital, with

### A DETAILED ACCOUNT

of their history, which was written for him by the Jewish schoolmaster of the town. The ambassador forwarded them to Count Lamsdorff, then Minister of Foreign Affairs, at St. Petersburg, and the latter, after having them thoroughly washed and tested at the Imperial laboratory, in order to remove all danger of poison, presented them with the greatest eagerness to the Emperor and sent a gift of several thousand roubles to the Austrian shoemaker. Since then he has always carried them on his person, with other charms, in a little bag that hangs round his neck.

Many doubtless remember the terrible tumult which occurred at Moscow on his coronation day, when nearly 10,000 people were killed and wounded. This disaster was foretold to his Majesty in a dream several nights before it occurred, and in the morning upon awakening, he described in graphic language the heaps of dead bodies which he had seen on the commons outside of the city, where a free feast was spread for the people. The eagerness of the multitudes to reach the tables caused a struggle and a stampede in which several thousand were trampled to death.

The superstition of the Czar, being well known in the Empire, naturally attracts to him all sorts of prophets, clairvoyants and other impostors, and he has been imposed upon repeatedly.

## ON THE FARM.

### ADVANTAGES OF A HAND SEPARATOR.

The hand separator has greatly reduced the expense of hauling raw product to the factory. Not only does cream require less space, but also less time, for as milk is delivered six times a week it is not necessary to deliver cream as often, and the load being so much lighter it is transported more rapidly and at less cost. This, I believe, is a very important item to consider in connection with the hand separator problem, writes Prof. A. L. Haecker.

Going on the basis that a man and team on the farm or a man and horse have a value respecting labor, it is not difficult to figure or ascertain the expense of transporting milk or cream to market, and it often happens that the time taken out for this delivering is most valuable time, as in cases where certain important work is in progress on the farm, such as harvesting, planting, haying, etc. It often happens that a farmer's time can really not be estimated by the hour, for there are rush seasons, when his time becomes very valuable. It is therefore fair to figure that his time throughout the year, whether rushed or not, has at least a certain value and that this value is not by any means small.

Secondly, the value of fresh skim-milk on the farm is often underestimated. By the use of a hand separator night and morning at milking time, the by-product skim milk can be brought to its highest possible value. This should not be lost sight of, and by a careful calculation, may be figured to be worth all the way from 15 to 40 cents per 100 pounds.

The third and last important item under the advantage of the hand separator may be considered as, independence of the producer. As cream is a marketable product it may be sold to any buyer or it may be made into butter on the farm.

Considering all the advantages that are here stated, it is not more than fair that the producer be somewhat independent in his decision as to whether or not he finds the hand separator a practical machine for him to use. There are many sections of the country where creameries are close together and the short haul makes the hand separator less necessary.

### SCIENCE OF MILKING COWS CLEAN.

It is well known that the average milker gets less milk than he who does a thorough job, that incomplete milking means not only direct but indirect loss, not only an immediate lessening of the fat yield, but tends toward drying the cow. A Danish scientist has recently developed a special system of udder manipulation, a sort of massage of the mammary gland, as it were, which it is claimed augments the flow. The Hegeland method, as it is called, involves three manipulations, each three repeated, or until no milk is obtained. First, the pressure of the quarter on each side against each other three repeated, followed by removal of the milk; second, the pressure of the glands together on each side, the fore quarter being first manipulated and then the hind quarters, followed by removal of the milk; and third, the fore quarters are pressed between hand and body, the hands holding the teats loosely, then the hind quarters also, followed by milking.

Trials of the scheme made at the Wisconsin and New York stations afforded a daily average increase per cow of a pound of milk and two ounces of butter. The after milk was very rich

lar for, and, thanks to his guidance, one of her sons is a millionaire himself to-day; while countless stories have been told since his death of similar

#### GOOD SAMARITAN DEEDS.

For many years Mr. Armour gave away thousands of dollars in unobtrusive acts of charity. He employed agents whose sole duty it was to find out deserving cases of need and to act as his almoners, with strict instructions never to mention his name; and it is said that Mr. J. D. Rockefeller has dispensed hundreds of thousands of dollars in the same unostentatious way.

No doubt similar stories could be told without number of other men of colossal wealth, from the Cressus who, not long ago, sent a cheque for \$10,000 to a man whose dinner he had once purchased in an impulse of hunger, to the Russian millionaire and Count who paraded the streets of St. Petersburg as a beggar, and when any seemingly poor person gave him alms would follow him or her home, and within a few hours would send an anonymous present of gold, perhaps a thousand times the value of the dole he had received.

There are even, strange as it may seem, some millionaires who devote their whole life and money to such splendid if obscure uses. Such a man is Mr. Phelps Stokes, whose romantic marriage with an ex-cigar maker caused a great sensation about a year ago. Mr. Stokes and his brave wife are living in the darkest, most sordid slums of New York, giving themselves and their millions absolutely to the submerged people among whom

#### THEY HAVE MADE THEIR HOME.

In one of the most wretched quarters of St. Louis a miserable network of narrow streets and dark alleys, where the scum of Russia and other foreign countries swarm and shelter, another millionaire, Mr. J. Eads How, has for years spent his life and gold in works of unrecorded charity. He occupies one room, uncarpeted and poorly furnished, cooks his own meals, and lives decently on two dollars a week, while all the rest of his wealth is devoted to the colony he has founded.

He supports a house for waifs, has cooking classes for men and women, sewing classes, and kindergarten, and into a score of similar channels he pours his money and his energy; and he declares—and who shall doubt it?—that he is infinitely happier in his "Little Russia" slum than if he were flinging about thousands in the gay capitals of Europe.

#### TO WATCH BOTH.

The directors of a bank had engaged the services of a watchman, who came well recommended, but did not seem over-experienced. The chairman, therefore, sent for him to post him up a bit, and began:

"James, this is your first job of this kind, isn't it?"

"Yes, sir."

"Your duty must be to exercise vigilance."

"Yes, sir."

"Be careful how strangers approach you."

"I will, sir."

"No strangers must be allowed to enter the bank at night under any pretext whatever."

"No, sir."

"And our manager—he is a good man, honest, reliable, and trustworthy; but it will be your duty to keep your eye on him."

"But it will be hard to watch two men and the bank at the same time."

"Two men—how?"

"Why, sir, it was only yesterday that the manager called me in for a talk, and he said you were one of the best men in London, but it would be just as well to keep both eyes on you, and let the directors know if you hung around after hours."

"That Mrs. Sawbones always alludes to her husband as 'the dear doctor.'"

"Well, that's the kind of doctor he is."

Medicated prunes are an old world remedy which bid fair in modern nurseries to become popular again. Take a quarter of an ounce of senna and manna (as obtained from a druggist), and pour over it one pint of boiling water. Cover and place by the side of the fire to infuse for an hour, covered tightly, then strain the liquor into a china lined saucepan and stir in a wineglassful of really good treacle. Add half a pound of the best prunes, putting in sufficient to absorb all the liquid while cooking. Then cover the vessel tightly and let the whole simmer for an hour, or till the stones of the prunes are loose. If cooked too long, the fruit will taste weak and insipid. When done, place in a dish to cool and pick out all the stones. These prunes are so good that children often enjoy them for their supper.

#### OMELETS.

Omelets are helpful in solving the problem of getting a sufficient number of dishes for the light breakfast, as there is an almost unlimited variety. To be successful the pan should be clean and smooth, they must be eaten immediately; the omelets should be small, four eggs being better than six, and the eggs must not be beaten too much.

**Plain Omelet.**—Beat the yolks of four eggs, add four tablespoonfuls of water, first mixing one-half teaspoonful of flour in a tablespoonful of the water; put in one-half teaspoonful of salt and a dash of pepper, then gently fold in the beaten whites. Drop one-half tablespoonful of butter into a hot frying pan, tipping the pan so that the sides and bottom will be thoroughly covered. Turn in the omelet quickly, and when the centre looks dry run a knife around the edge, then under the half nearest the handle and fold over. Slide carefully onto a warm platter and garnish with parsley. Serve immediately.

**Chicken Omelet.**—Make a plain omelet, but just before folding spread creamed chicken, well seasoned, over the top. Fold and serve. Creamed fish, asparagus and cauliflower can be used in this way.

**Spanish Omelet.**—Chop fine one green pepper from which the seeds and stems have been removed, two medium-sized tomatoes, one small onion, a sprig of parsley, three thin slices of fried bacon, and five mushrooms; add a tablespoonful of butter, season with salt and simmer for fifteen minutes. Have a plain omelet made, spread this hot dressing over the top, and fold, then pour the remainder around the omelet before serving.

**Ham Omelet.**—To the yolks of four eggs add four tablespoonfuls of water, a small teaspoonful of finely chopped ham, and a few sprigs of parsley, and beat vigorously. Beat whites stiff, and gently stir them into the mixture. Have a tablespoonful of butter treated in a spider, pour in the omelet and stir with a fork till it becomes quite thick. Cook five minutes over a brisk fire, fold and serve garnished with parsley.

#### HINTS FOR THE HOME.

To polish kitchen knives thoroughly mix a little carbonate of soda with the brickdust, and rub them thoroughly.

Table linen that has been stained with ink should be at once soaked in milk and then the stains will come out with washing.

To Clean Black Cloth.—Mix one part of liquid ammonia with three parts of boiling water. Apply with a sponge and rinse off with boiling water.

To keep your fowls healthy they should have all the vegetables left from the house, either boiled or raw. Give them also any scraps of meat and bones to pick.

If boiled water is used for drinking purposes, care should be taken that the water boils for ten or fifteen minutes before it is poured out. We are informed by a doctor that this time is necessary to kill the germs.

A walnut stain is made thus. Take two parts of permanganate of potash

The superstition of the Czar, being well known in the Empire, naturally attracts to him all sorts of prophets, clairvoyants and other impostors, and he has been imposed upon repeatedly. All prophets are welcome, provided their predictions are favorable, but those who bring bad tidings

#### ARE OFTEN PUNISHED.

There is at Moscow a well-known crazy priest, who from time to time makes some rather surprising predictions, and who is generally believed by the people to have the gift of prophecy. Nicholas sent for him and asked to have his fortune told. The priest, whose name is Mijika Bosoj, went into a trance according to his custom, and while his spirit was in communication with the unseen, made the ghastly prediction that wherever he went during all his life, his Majesty would tread on dead bodies, and that his reign would see a continuous weeping of the nations. His Majesty was greatly distressed and indignant. At first he suspected that Mijika Bosoj had been coached to make this prophecy by the revolutionaries and ordered him sent to prison, but upon reflection and inquiry he became convinced that the man was honest, and ordered his release a few days later.

Every one doubtless remembers the story about the hysterical manner in which he consulted John of Cronstadt, the miracle-working priest, and how the latter undertook to use his influence with forces of nature to give the Czar a son. After the failure of John of Cronstadt to perform that important duty the Czar lost faith in him for a time, but it is understood that the miracle worker has since been restored to favor and is now in the habit of advising his Majesty concerning his religious duties.

The anxiety of his Majesty to secure an heir caused him to do many ridiculous things. One of them was his incognito pilgrimage to the tomb of a holy priest called Seraphime, where the peasant women who are denied motherhood go to pray.

#### THE CZAR AND CZARINA

made the pilgrimage by the advice of Vladimir, the metropolitan patriarch of the Greek Church—the highest ecclesiastical authority in the country—who told them that such an act of veneration would undoubtedly be rewarded by the birth of a son. How the Czarina, who was brought up a Protestant, and is regarded as a very sensible woman, could have been induced to go through this performance is difficult to explain. The public were not aware of the facts at the time. The imperial couple were supposed to be resting in one of their country retreats, while, disguised in the garb of pilgrims, they were actually making their way on foot to the shrine of the holy man, a distance of more than a hundred miles. Both of them remained there for a week or so, praying for a boy baby and receiving the sacrament at mass every morning with other pilgrims.

Upon their return to the capital the Czar ordered the monk Seraphime to be canonized, and the latter's name now appears at the end of the list of saints recognized by the orthodox Greek Church. A few months later, Alexis, heir to the throne of Russia, was born. He is now a lusty youngster nearly two years old.

#### THAT SETTLED IT.

Mr. Sproggins: "And if I decline to let you have my daughter, what do you propose to do?"

Mr. Wibblesen: "I warn you that in that case we are prepared to act. Even now, beloved Aurelia has her best clothes on, and awaits me near a railway station. If you decide against us, we will flee together and never come back."

Mr. Sproggins (without a moment's hesitation): "Then I refuse."

"Your money or your life?" said the robber. "Take my life," responded the victim. "I'm saving me money for me old age!"

followed by making.

Trials of the scheme made at the Wisconsin and New York stations afforded a daily average increase per cow of a pound of milk and two ounces of butter. The after milk was very rich in fat, testing above 10 per cent. This after milking takes not to exceed five minutes' time, often only two or three minutes. The two ounces of butter may be held at a low estimate to be worth 2 cents. This would be a fair pay for five minutes' work, 24 cents an hour and the skim milk thrown in. Not only is more milk and butter made, but the secretion is stimulated and the lactation period prolonged. It may be remarked, however, that the differences in milk and butter yields between this method and careful stripping are not great. This Danish method emphasizes more perhaps than has hitherto been done, the actual and potential losses due to incomplete milking.

#### CORN, CATTLE, SWINE AND GRASS.

Corn, cattle, swine and grass, make a grand combination. It is exhilarating to ride through the corn belt and to note the luxuriance of the corn crops where this system of farming prevails. The farms are also cleaner. The grass and clover roots, together with the fertilizer put upon the land, explain both. But the fields would be much cleaner than they are if the farmers would use the mower on the ragged places in the pasture fields, and in some instances would supplement it with the scythe.

There can be no question but this system of farming is one of the most profitable that can be adopted. It turns the corn to good account, especially where it is all harvested, and the swine following the cattle greatly reduce the waste that would otherwise result.

Even when the corn is grown mainly for fodder, as in the wheat-growing areas of the northwest, this combination is an excellent one. There is always some corn in the fodder, which means, of course, that a reduced number of hogs is necessary to follow.

Even where dairying is practiced the combination cannot be improved upon. This plan involves more labor than growing beef, but it also probably brings with it more profit.

#### A VALUABLE SETTING.

A Samoan's Petition to the Captain of a Man-of-War.

Queen Victoria was always a kindly and a home-loving body, and it is possible that if it had been left to her to decide she would have hesitated to sacrifice a setting of eggs for the sake of a birthday salute. It was on the twenty-third of May, says the author of "My South Sea Log," as an English man-of-war lay in Apia harbor in the Samoan Islands, that a native came aboard with a note for the captain. It was from one of the district chiefs.

"To the Captain of the English Man-of-War," it read. "I, Tittle-tan, send you my greetings and love, and the love of my family; and send also my love to Queen Victoria. We Samopans have much love for England."

"Most noble sir, to-morrow will be the day of the Queen's birth, and I have learned that at the hour of noon all the great cannon on your ship will be fired and the earth will quake with the noise thereof."

"Great sir, I cast myself at your feet. I have much love to you, but I beseech you not to fire great guns to-morrow. Do not fire them for two days more, and my heart will be big with gratitude, because my wife has a hen sitting on nine duck eggs, and to-morrow is the day for them to break their shells."

"Noble sir, if the great guns are fired they will all perish and grief enter my house. But in three days it will not matter if they hear the guns. I beseech you to do me this favor."

# A WONDERFUL WOMAN CHIMNEY-CORNER CURES HUNTED LOVERS' FLIGHT GLASGOW'S CIVIC SPIRIT

**THOUGH SHE HAS NO FINGERS, ELBOWS OR KNEES,**

**She Sews, Writes and Does Things Which Others Think Hands are Necessary to Do.**

Miss Kleinginne is one of the most respected women in Mohnsville, Pennsylvania, where she was born 38 years ago. She was born without hands or knees, though her sisters and brothers are all perfectly formed. Still, she says, she never missed her hands. All there is of her arms are stumps, about eight inches long, the right arm being the longer of the two. She neither has elbows nor knees. Her feet are attached to the legs where the knees ought to be, and each foot has but three toes.

She resides in a pretty little home, which is situated on a hill surrounded by enchanting farming scenery; and here she has lived a wonderfully comfortable home life, having made the very best of her misfortune.

After her parents had decided that they would relinquish farming, they moved to this little townhouse, which was afterwards bequeathed to Miss Kleinginne. She then remained here with a brother for a time, until he moved away. Then she decided that she was able to keep the place in good repair, and that even though her physical condition was, perhaps without a parallel, she would be able to support herself. She has been alone for nearly a year, and her efforts have been successful and she enjoys the comforts of life, and the friendship of every person in her town.

Charitable people help her along in many ways; but she sells lots of fancy work from her needle, which she uses

**WITH HER TEETH AND TOES.**

She has hundreds of photos of herself, also which bring a quarter of a dollar from every visitor, and with some other assistance from kind neighbors she is able to live in comfort and keep her home in good repair, a perfect model of neatness.

She believes in the old Pennsylvania German saying, "Early to bed and early to rise," and is always downstairs before 6 a. m., and dresses herself. How does a person dress herself without hands? is the question thousands have asked. It is a simple matter. Her dresses are buttoned on the back and with the stump-like arms she slips a gown over her head, the open side front. She then raises it to her mouth with the stumps, and with the teeth the dress is buttoned. Next she slips the dress around her body to the desired position and slips her stumps into the sleeves.

With the short stumps and her teeth she puts on her stockings, and in like manner laces her shoes. Her toilet complete, she comes downstairs, carrying a large coal oil lamp, which she snugly holds between her breast and one of the stumps. She takes great care in handling the lamp, and never has had an accident. In lighting it she simply takes the lamp globe with one of her stumps, places a match between her teeth and strikes it, and the next moment the wick is burning a nice light. She has never burned her lips, though she lights a lamp with exceptional speed. As the town has electric lights, her friends are thinking of installing them in her home to avoid all danger.

**COMBS HER OWN HAIR.**

Miss Kleinginne wears her hair short and combs it herself daily. She fastens the comb to one of the inside shutters of her house between the lower edge of the shutter and the window sill in such a manner that the teeth of the comb protrude. She then places her head against the comb in various quick-dodging poses, and in a short time she has her hair parted and combed as

**AROMATIC FUEL WILL KILL DISEASE SO 'TIS SAID.**

**Picture Postcards of Peat Will Cure Your Friend of the Asthma.**

The latest panacea is to be found in the chimney corner.

Physicians are recommending aromatic woods and fragrant peat, which, when thrown on the fire, send up a healing smoke.

A firm in Bayswater, England, is exhibiting these novelties for the grate. Mossy slabs of peat are stacked in the shop windows, and are considered an excellent fuel for lung complaints. Picture postcards of peat can be sent to a friend suffering from asthma. The postcard is read and burnt, and the sufferer draws his chair up beside the grate, to inhale the medicinal odor.

Aromatic fire-lighters, cut in trellis fashion, are steeped in turpentine, and their warm glow and balmy fumes will relieve a gasping bronchial patient.

**CURING A COLD.**

Fire revivers are an antiseptic and will keep away influenza. They are in the shape of small bricks, and will revive a dying fire and perfume the whole house.

Pine logs send out a tonic vapor, oak and elm are stimulating, sandal wood will relieve a nervous headache.

Tiny blocks of wood steeped in eucalyptus oil, are recommended for a bad cold. Lavender water pellets or eau de Cologne globules, sizzling merrily on the hob, will freshen up the overtired visitor, while a few drops of attar of violets on a hot shovel will cure insomnia and produce refreshing sleep.

A teaspoonful of ammonia, added to a saucepan of boiling water, will revive a fainting patient. It has even been suggested by a well-known specialist that a tablespoonful of tea, thrown in the kettle and inhaled, will benefit the weary housewife far more than if she sipped her favorite beverage.

A nerve specialist, who was consulted on the new cure, considers that

**THERE IS A FUTURE BEFORE IT.**

"There is no doubt," he said, "that there should be more intimate knowledge of the need for healthy inhalations."

"Not only flowers or jars of potpourri should be used to scent a room, but scented logs should be thrown on the grate instead of the usual faggots.

"Perfume, in any form, is a stimulant, a narcotic, or a sedative, as the case may be, but no perfume is so healing and subtle in its effect as that which rises warm and balmy from the fire.

"A little scent, sprinkled on a block of wood, will save women from many an acute attack of neuralgia or congested headache."

## DOCTOR'S GHOST STORY

**A MOST REMARKABLE NARRATIVE, IF TRUE.**

**An American Physician Led to Woman's Bedside by a Child's Spirit.**

A remarkable story comes from New York, brought by one of the Cowley Fathers who has recently been in that city. He is personally acquainted with a very well known physician, who has for many years been a general practitioner, but lately has become a consulting physician. The doctor in question

**ENRAGED AND BETRAYED HUSBAND IN HOT PURSUIT.**

**Has Sworn to Continue the Hunt Until He Confronts Capt. Essipoff and Kills Him.**

Tracked by spies at every turn, harried over Europe, and driven by dread from America, the two Russian lovers, Captain Gabriel Essipoff and Madame Ouchakoff, are still fleeing from the wrath of the pursuing husband, General Ouchakoff. General Ouchakoff makes no secret of his intentions. It is a chase for life. He has sworn to continue the pursuit until he confronts Captain Essipoff and kills him.

For four months now this hunt has been in progress, and there are no signs of the keenness of it slackening. On Thursday General Ouchakoff sailed for New York on board La Provence. He cannot arrive at Havre before next Wednesday night. By then his wife and her lover will, at any rate, for the time being, be beyond his reach, on the high seas.

**ARRIVE IN LONDON.**

The fugitives reached Havre on Thursday, and Friday spent part of the day in London in an effort to throw the pursuing general off the scent.

The interviews reported to have taken place in Paris on Thursday with the couple are now asserted to have been with impersonators of the lovers hired by Captain Essipoff from among the passengers on the liner La Savoie. The lovers instead travelled straight from Havre to England. Their first and only day in London was one just as full of anxiety as any during their long flight. All day long their hotel was watched. A youth stood on the pavement opposite, in a position in which he could clearly be seen from the window. Detectives from the Russian Embassy haunted every street corner near the hotel, never leaving their posts, and always alert.

A tall man had followed the couple from Havre. At Newhaven he was still dogging their footsteps, and at Victoria his cab followed closely that in which the lovers were driven. When they left their luggage in the booking office another spy was waiting to take up his post there until they came to claim it.

**DETECTIVES OUTWITTED.**

In the evening when Mme Ouchakoff left the hotel in the company of a friend to make a few purchases at a shop close by, a boy opposite waved the handkerchief which had been waiting in his hands all day. Then he ran along after the pair, and the tall man followed. From every corner the spies came out and dogged her until she returned.

An hour later, a motor car drove up, the luggage was hastily flung in, the lovers took their seats, and before the spies had realized what was happening, the car was out of sight. As darkness fell another motor car arrived at Victoria. The luggage left at the station was put hurriedly into the car, which disappeared in the bustle of London's streets. Two detectives called a cab and hastily followed, but were soon outdistanced. The luggage arrived safely later in the evening at the country hotel at which the fugitives passed the night.

**DOESN'T BLAME HUBBY.**

"Nothing would delight me more than to meet the general in fair fight," said the captain in an interview. "I am as good a shot and swordsman, and the chances would be about equal. But I know that he seeks to kill me, anyhow and anywhere, and then to immure his wife in an asylum. It is to save her that I am striving. We are all in all to each other, and had rather take our lives together than be separated."

**SEVENTY-TWO COUNCILMEN WORK WITHOUT ANY SALARY.**

**The City Flourishes by the Exercise of a High Standard of Citizenship.**

Much nonsense has been spoken about the municipal government of Glasgow. The assertion that "the citizens pay no taxes, there is no extreme poverty, and everything is free because owned by the city," is as fabulous as foolish. But municipal ownership exists in a large measure, its responsibilities are met most creditably, and the beneficent results are fully shared and appreciated by the citizens. The expenses of city government and the taxes therefor are reduced to a minimum; and are much lower than such are in any city which owns much less in America. The general tax is about \$7 per \$1,000 on the assessed property valuation, which approximates as near as possible to the real value of the property. Gas costs consumers forty-eight cents per 1,000 cubic feet. Water costs the consumer ten cents per \$5 rental and owner two cents per \$5 on assessed valuation of property. What strikes an American most in investigating municipal affairs in the city of Glasgow is the strong civic spirit which pervades everyone and everything connected with it from the lord provost to the pildriver in the new plant of the drainage department. They do not sing "My Country, 'tis of Thee." But the atmosphere seems to breathe the words "My city, 'tis for thee."

**WITHOUT SALARY.**

"Let Glasgow flourish by the preaching of the word," is the city's motto. And let Glasgow flourish by the exercise of a high standard of citizenship. is the practice of the city corporation. There are seventy-two councilmen elected by the various wards of the city, and with the lord provost these form the city government, magistrates, and minor justices of the city. They are all men of high intelligence, many of them university men, most of them holding high positions in the commercial world and in the church; but in all work without any salary from the city. Even the representatives of labor on the council do not expect any emolument for services rendered to the city, but all esteem it a high privilege and great honor to serve the people without pecuniary reward. This civic spirit is the finest example of Christian socialism, as it is free from modern socialistic vagaries.

The writer asked the lord provost Sir John Ure Primrose, "How many days per week, and how many hours daily do you give to the service of the city?" His reply was, "Ten hours daily and six days a week," moreover one may travel and make inquiries as I did among the critics of the government but he would not hear a suspicion of dishonesty against any member of it. They all seem to be, though serving without remuneration, like Caesar's wife, "above suspicion."

**MODEL LODGING HOUSES.**

This high civic spirit is the secret of the success of municipal ownership in the city. It simply means, we shall do our best for our city because it is ours we shall give of our time and talent freely, and teach others so to do, for the welfare of our fellow-citizens. And it is remarkable what this spirit is doing for all the citizens, but especially for the poor in the city. Interest in the man with the dinner pail and his family, is in evidence everywhere. The city owns property which it either remodelled or built into 2,000 laborers' dwellings. This, in itself, has had far-reaching influences upon better housing a reasonable rents for the workman

age of the shutter and the window sill in such a manner that the teeth of the comb protrude. She then places her head against the comb in various quick-dodging poses, and in a short time she has her hair parted and combed as snugly as any woman could do with two hands.

She is now ready to prepare her breakfast. Usually for this meal she prepares eggs by bailing or frying. When she fries them she places the eggs between her right stump and her cheek, and cracks the shell by pressure until the yolk drops out into the pan over which she leans. She is soon ready to eat, and this she does in a most remarkable manner. She cuts her meat and bread by holding the knife between the right stump and cheeks. Afterward she balances the knife on the stump, and on this balanced knife carries the food to her mouth.

Sweeping, she takes her broom handle and places it between her right cheek and right stump, and thus cleans her kitchen floor with ease. When she scrubs the porch with the broom, the top of the broom handle rests on her right stump and the left stump bears upon the broom handle farther down. When she scrubs the floor with a brush she has the latter fastened to one of her feet, and in the same way

#### SHE BLACKENS HER STOVE.

Miss Kleinglue is a good scholar and has many friends with whom she corresponds. "Write letters," you say. Certainly, and easily, too. She opens her own letters and if a reply has to be made she procures a sheet of paper, places a lead pencil between the stump of her right arm and the cheek and proceeds to write almost as rapidly as any other person would do with the right hand. She can also write by holding the pencil with her toes, but she is using the first method mostly.

She makes her own garments, and is especially adept with scissors. The part of the scissors intended for the thumb she places between her teeth, and with the right stump she works the part intended for the fingers, and in a short time is able to cut out a pattern for a dress. The cutting accomplished, she starts to haste the dress. She procures thread and placing one end in her mouth, makes a knot with her tongue. The needle is fastened into the table cover, and the thread in her teeth is inserted. When it peeps through the eye of the needle she grasps it with her teeth and pulls it through. She also occasionally holds the needle between her toes, and sews either with these or her teeth. With wonderful rapidity she also operates the sewing machine. She makes dresses, fancy-work and crazy patch-work, for days at a time, without getting tired, knowing that by so doing she is able to earn her living.

She does not spend all her time in doors, as she delights to be among the flowers, birds and nature. She keeps her own yard in a neat condition. She has

#### REMARKABLE FLOWERBEDS

and potted plants, and her Mohnsville neighbors say she has finer ones than any other woman in the town. They claim she has a secret of her own to make the flowers grow and bloom.

In her home stands a nice organ. Hundreds of visitors have wondered who plays upon it, and when the question is asked of Miss Kleinglue she answers it by going to the instrument to play a tune herself, which she does by taking two pieces of prong-shaped wood, held in her feet, and then the keys are touched with it, and the melody comes.

She seems to do things by intuition, and when she is asked how, she often feels that she is unable to answer. She says God has given her gifts that others know nothing about.

She is three feet and eleven inches tall, enjoys good health, is a good cook, is famous for baking good custards, and a good entertainer. She devotes a good deal of her time in reading—the daily papers, the Bible and magazines. She speaks both the Pennsylvania German and English languages.

rainers who has recently been in that city. He is personally acquainted with a very well known physician, who has for many years been a general practitioner, but lately has become a consulting physician. The doctor in question is a practical man, free from superstition of all kinds.

One evening not so very long ago he was sitting in his drawing room with his wife when a servant entered and told him that a little girl was in the hall and wished to see him. The doctor replied that he could not be worried at that time of the evening and requested the child to state her errand. The servant returned, saying that the child's mother was very ill, and would he come and see her at once. The physician said that he was unable to grant her request, and wrote down the name and address of another medical man to whom she might apply.

#### MOTHER WAS DYING.

Once more the servant returned, and said that the little girl would not leave until she had seen the great doctor. So he went out and saw the child, and in a few minutes returned and told his wife that the child had strangely impressed him, and that he felt he must go, and see her mother.

The carriage was ordered, and, accompanied by the girl, the doctor drove as directed to one of the poorest quarters in New York. The child pointed out the house and got out of the carriage, conducting him up the stairs to the room where she said her mother was lying. He entered the room—a poor, squalid apartment—and found, as the child had stated, the woman lying on a pallet in one corner of the room. The little girl, however, did not enter the room. An examination was made of the sick woman, who was found to be suffering from a severe attack of diphtheria.

#### BEEN DEAD HOURS.

The doctor said to her: "You are very ill with diphtheria, and ought to be removed to a proper hospital. Think of the danger your daughter is running."

The woman burst into tears and said she had no daughter. "But," said the physician, "your little girl has just been to see me, and insisted upon my coming to you." The poor woman again said, "I have no child—the only one I had, a little girl, died yesterday morning from diphtheria, and is lying in the next room."

The doctor opened the door, and there to his astonishment found the dead body of the child who had brought him to the house, and, as the mother had stated, had evidently been dead many hours.

#### TESTING DIAMONDS.

##### Plan by Which Spurious May be Picked Out.

Prick a needle hole through a card, and look at it through the doubtful stone. If the stone is spurious, two holes will be seen on the card; if it is a diamond, only one hole will be visible, for every other stone at all resembling the diamond gives a double reflection.

This method is also made use of for determining an uncertain stone. If the finger is placed behind it and looked at through the stone with a magnifier, the grain of the skin will be plainly visible if the stone is not a diamond, but otherwise it will not be distinguishable at all.

A diamond in a solid setting may be identified in the same way; if genuine, the setting at the back cannot be distinguished, but of a false stone, either the foil or the setting may be plainly seen.

Mrs. Whoopler: "You tell me, Herr Vogleschnitzel, that my daughter can never become a singer! Is there no hope for her?" Herr Vogleschnitzel: "Vell, matam, you might put her on a diet of canary-seed alretty, undt see vat dot vill do mit her!"

know that he seeks to kill me, anyhow and anywhere, and then to immure his wife in an asylum. It is to save her that I am striving. We are all in all to each other, and had rather take our own lives together than be separated. We are as determined as he."

Mme. Ouchakoff admitted she had grievously wronged her husband. Though worn with anxiety, she remains a handsome woman of refinement and distinction.

"I have resigned my private fortune of \$50,000," she said, in excellent English. "I have given my husband the right to divorce me. I do not blame him for what has happened. But surely he has tenfold increased his shame and disgrace by this mad pursuit. I will never return to him. I will kill myself first. And I am not mad as he knows, unless he regards the love I feel for Gabriel as a kind of madness."

"I was a rich woman when I gave up all for Gabriel. I would not live a dishonest life in my husband's house; I preferred to efface myself, and to go right away. And the captain agreed. He, too, has sacrificed everything for me."

#### SPY AT DINNER TABLE.

The spies who have shadowed the couple have been innumerable, and their watchfulness has been untiring.

"These men, if they merely do their duty, are not to blame," said Mme Ouchakoff. "But if they once overstep the bounds of prudence, let them look out. At Amelie-les-Bains in the Pyrenees district, where we spent a month, a man with a decoration, who gave himself out to be a merchant from Perpignan, and spent money lavishly at our hotel, was betrayed by a maid. He was one of the general's agents."

"I was so indignant that I rose as he sat down near me, and said—I do not eat with spies." The rest of the guests expected a violent scene, but the man merely smiled, and the next day when the captain approached him in the garden, he hurriedly disappeared and we saw him no more.

#### GREEN SPY.

"At Barcelona, Lisbon, Alcazar, Gibraltar, Algieras, Valencia, we were dogged day and night. Once we alighted at a wayside station at midnight to rest matters, and a youth of twenty, who was our watcher just then, was taken aback that he blushed and stammered, and finally actually asked me in a panic, 'Where are you going to?'"

It is stated that the fugitives will sail from a northern port next week for a destination which is kept secret.

#### WEAK WITH YEARS.

##### Man Useless for Emergencies Between 55 and 62.

At some time between the age of 55 and 62 men lose their will-power, their judgment in a moment of crisis. The loss is only temporary, marking a psychological change between the meridian and the commencement of age.

Dr. Dabbas, in Argus, contributes the above explanation of the Grantham (England) disaster, citing the parallel case at Stroud some years ago. He says he has collected data to substantiate his point, and asks the ages of the Salisbury and Grantham drivers to see whether they fit in with his theory. He is inclined to rule that no man between 55 and 62 should be allowed to drive on express engine, as not "master of that unclouded will which makes the greatest emergency his obedient slave."

Grave errors of commanders in the field and of captains at sea he explains in the same way, hinting at a recent national experience—apparently the South African war. Business men show similar signs of weakness, irresolution, suspicion and irritability at a certain time of middle life. A little older, and they again become reliable, tractable, and wiser in counsel. With rest and

ly, is in evidence everywhere. The city owns property which it either remodelled or built into 2,000 laborers' dwellings. This, in itself, has had far-reaching influences upon better housing at reasonable rents for the working man. It also constructed and equipped seven model lodging-houses, which naturally destroyed the success and existence of many common lodging houses conducted by private enterprise, which were hotbeds of vice and crime, and also centres for propagating disease. The seven houses give accommodation nightly to 2,430 persons. Each house is provided with a common dining-room, a kitchen with utensils and fire available for cooking at any hour of the day; and a provision store is attached to each house, excepting one, where uncooked food can be purchased at market prices. A large recreation room and ample bathing conveniences are also provided, and each lodger has a separate bed, with spring, mattress, pillow, sheets, blanket and bed mat, at a charge varying from seven cents to twelve cents per night. And what seems strange is, the enterprise is successful from a financial viewpoint.

#### FAMILY HOME.

The city also owns and operates a "Family Home," conducted on what is commonly known as the self-supporting and social settlement plan. It was originally designed and equipped for the use of widows or widowers, belonging to the deserving working classes, who had children with no one to properly care for them. The "Home" contains 160 bedrooms plainly but comfortably furnished, each capable of accommodating one adult and three children. The rent of a bedroom, including light, heat, water, hot and cold, with the use of recreation room, dining-room and kitchen, is \$1.25 per week, and a bed for each additional child is found in another room at 16 cents per week. Regular meals are supplied at the lowest possible charges, which may be guessed when we mention that each child is boarded at an average cost of 36 cents per week. Fifteen thousand people are thus helped daily to live independent, clean, healthful lives, who otherwise would be crowded to the wall in life's race, and trampled into absolute poverty, misery and worse than death. There are also saved to the city, money, morals and men.

#### GOOD HOSPITAL SERVICE.

The city also provides excellent hospital accommodation and treatment, free of charge to all its citizens who desire to avail themselves of it. The beds available in hospitals for infectious diseases alone number 1,265, and all are equipped with the latest modern appliances, and managed on the most approved methods and principles. Fourteen public parks, comprising 1,031½ acres, are also owned by the city, some of which contain beautiful flower gardens and others bowling greens, where games may be played at the low cost of four cents per hour. In one—the Queen's Park—there is a nursery and conservatory of flowers which would grace a millionaire's estate; and how justly proud the common people feel as they walk through it and say, "We own this."

#### ONLY TEMPORARY.

"To be so unreasonable and so resolutely hopeless is unwise," said a lady. "It reminds me of an old woman I used to know who was always ill, always ailing. Her various diseases were to her the most interesting topic in the world, and she must have thought them most interesting to others also, for she always talked of them—she talked of nothing else."

"One day I found her eating a hearty meal, and asked her how she was. She sighed and answered:

"I feel very well, ma'am, but I always feel bad when I feel well, because I know I am going to feel worse afterwards."

# NO HEADSMAN IN FRANCE THE DRAMA OF REAL LIFE FROM MIDDY TO MARSHAL IN MERRY OLD ENGLAND

## THE DEIBLER FAMILY WILL LOSE ITS POSITION.

### First Step Towards the Abolition of Capital Punishment in France.

The French Budget Commission has cut off the Paris executioner, M. Anatole Deibler, in his prime—not physically, but metaphorically. This is suggested as the first step towards the abolition of capital punishment in France. The commission has suppressed the credit for Deibler's salary, and ever since the ex-executioner has been mobbed by journalists anxious to hear from his own lips what he intends to do about it.

Interviewing M. Deibler is no easy matter. He lives in constant terror of his life, for there are a good many people in a certain class of Paris society who naturally have a grudge against him.

M. de Parie, as he is often called lives in a pretty town in the outskirts. The house is surrounded by a garden, and the garden is hemmed in by a high wall and bullet-proof palings.

When a visitor rings the bell all the windows of the house are automatically protected by iron curtains, which close over them as the bell-pull is touched. Then a little wicket opens in the iron door, and a boy asks, "Whom do you want to see?" If the answer be not the password, "M. Anatole," the wicket is promptly closed, and no admission is possible.

### DESCENDANT OF HANGMEN.

M. Deibler is the descendant of hereditary executioners. His grandfather was famous as the executioner of eight sailors at one time at Brest.

His father, M. Louis Deibler, died in September, 1904, after having executed 47 people of both sexes.

The present M. Deibler has only been responsible for the execution of four people, but he acted for a long time as his father's chief assistant. His last execution was that of Pozzi on October 6, 1905.

M. Deibler's regular salary was £240 a year, but he was allowed a further £320 for the maintenance of the guillotine. He had four assistants, two of whom are paid £160 a year each and two £120.

It is estimated that the office of public executioner, taking into consideration everything in the way of perquisites that falls to the holder, is worth over £1,000 a year.

The action of the Budget Commission will have to be ratified by the French Chamber of Deputies and the Senate before it becomes law. If this is done it is believed that the abolition of capital punishment will follow in due course.

## CHRIST WAS A RUSSIAN.

### Russian Bishop Delivers Amazing Address to His Congregation.

An amazing address recently delivered by a Russian bishop to a congregation is such a travesty of Christian teaching, with incitements to "cut down" the agitating students, and also the Jews, that a Russian gentleman, a member of the congregation, has sent the substance of it to the Stettiner Generalanzeiger. It ran as follows, according to the translation:—

"In the name of the Father, the Son and the Holy Ghost, amen! My dear congregants! We have prayed this day for the Czar and our Holy Russia, having asked God to free our holy country from evil men. As you know, our Fatherland is passing through a time of sorrow and suffering. Devils have appeared in her midst, and vipers in human shape have come up out of the

## TALES FROM THE WORLD'S FOUR CORNERS.

### Some Interesting Incidents and Happenings That Have Recently Occurred.

A new rule has just come into force on the Bavarian railway system. On the "ladies only" compartments, notices appear to the effect that smoking is strictly prohibited. It has become necessary, says a circular from the Minister of Railways, to forbid smoking in such compartments, even with the consent of fellow-passengers, as complaints have become increasingly frequent of ladies smoking cigarettes and cigars (1) in the compartments set apart for their use. Ladies objecting to this were in consequence compelled to seek refuge in non-smoking carriages, where they had preference to put up with the presence of the other sex. Hence lady smokers who wish to indulge in a weed, must now travel in a smoking carriage, while the ladies' compartments proper must remain the sole refuge of the non-smoking sisterhood.

### CONVICT AGED 99.

The case of a convict being released from jail at the ripe age of nearly a century has occurred at Cilli, Syria. In 1804, a woman named Maria Jamnikar, then 97 years old, was convicted of a premeditated attempt to poison, by means or arsenic, her daughter-in-law, with whom she lived in continual enmity. In view of the woman's great age, the court entertained doubts as to her mental responsibility, but experts having pronounced her quite sane, there was no choice but let the law take its course. Maria Jamnikar was sentenced to five years' imprisonment, but after serving two years the rest of her sentence has now been remitted by Imperial pardon. Frau Jamnikar's mental faculties have given way during the past twelvemonth, and she had been under the impression that she was being treated in a nursing home. After being released she told her friends that she had been at last discharged cured. Her mind, apparently, is a perfect blank as regards her past misdeed, and the legal proceedings that led up to her incarceration.

### HERCULES DEAD.

At the comparatively early age of 57, there has died at Munich, of diabetes, a strong man named Hans Steyer, known as "the Bavarian Hercules," whose name was familiar to music hall goers in the early eighties. After retiring from the stage Herr Steyer became the popular host of a flourishing beer garden in the suburbs of Giesing, where he occasionally amazed customers, especially newcomers, with his prodigious muscular power. Very often he nonchalantly twirled a walking-stick and great was the astonishment to the uninitiated on being permitted to feel its weight, 30 lbs. A ten-gallon cask of beer he could easily lift with two fingers. In his garden, there lay a piece of rock weighing 4 cwt., which he often tipped up with one finger.

At the annual October fair, Steyer's bulky form always excited much curiosity, and he was frequently fined "for causing a crowd to assemble"; but this fine was as regularly remitted owing to the genial innkeeper's popularity.

### CATTLE FOR JAPAN.

The never-resting energy of the Japanese where improvements are concerned, has lately found a practical outlet in strenuous endeavors to ameliorate the native breed of cattle. A number of Japanese experts are just now in Europe, with the object of purchasing prize animals for shipment to Japan. According to a Swiss paper, the following incident occurred the other

## FASCINATING STORY OF THE LIFE OF SIR EVELYN WOOD.

### Pays Tribute to Lord Wolseley, and Relates Gossip About Gen. Buller.

Sir Evelyn Wood's story of his life, "From Midshipman to Field Marshal," has just been published in London. It is a book full of interest, and it shows the kindly feelings that exist between British officers and the absence of professional jealousy. Thus, writing of a fellow field-marshal, Sir Evelyn says:

"The successful result of the Ashanti campaign was due primarily to Sir Garnet Wolseley. His mind it was that animated all, for to his other great qualities he added the fire, the spirit, the courage which gave vigor of direction to his subordinates, bearing down all resistance. Everyone acknowledged his superior military genius, and when, on coming home, I was asked by the Adjutant-General and the Military Secretary what my brother officers and I thought of Sir Garnet, I replied: 'If he had gone down, I doubt whether there was any man big enough to have entered Coomassie with only one day's rations.'"

### BULLER'S AFFECTION FOR HIM.

But Sir Evelyn himself could also inspire admiration and affection:

"I never knew until that day the depth of regard which Buller felt for me. I was sitting on the summit of the Zunguini range when he climbed up it, and seeing me suddenly uttered so fervent a 'Thank God' that I asked for what he was thankful, and he explained that he thought I had been cut off at the eastern end of the mountain."

This had reference to the Zulu War of 1878-79, when Colonel Wood was entrusted with one of the four columns under Lord Chelmsford for crushing the power of Cetewayo. It was then that Buller, serving under Wood, distinguished himself by saving life in such a gallant manner that it enabled his superior "to put forward a strong recommendation that his name should be considered for the Victoria Cross. A day or two later, on his return from another raid, in which he had been unsuccessful, I said as he was leaving the tent after making his report, 'I think you may be interested in something I have written,' and I handed him the letter-book. He was very tired, and observed somewhat ungraciously, 'Some nonsense, I suppose' to which I replied, 'Yes, I think I have been rather eulogistic.' When he handed me back the book his face was a study."

### GOOD FOR KITCHENER!

The book throws fresh light on many matters, among others on his reported offer to serve under Lord Kitchener in South Africa, although the latter was only a Lieutenant when Sir Evelyn was a major-general and Sirdar of the Egyptian army. Such a suggestion did not emanate from him, but from the Military Secretary, who had sounded him on the subject, and Sir Evelyn patriotically expressed his readiness to serve under his old subordinate on certain conditions, though Kitchener himself telegraphed that:

While he would be delighted to serve under Sir Evelyn Wood, if he were sent out, he felt he ought not to have him under his command.

Sir Evelyn could not thank him at the time, but did so eight months later on being relieved from his position as Adjutant-General.

### AFTER MAJUBA HILL.

After Majuba Sir Evelyn strongly urged Mr. Gladstone's Government to treat with the Boers only after they had been taught to feel the weight of British power.

"The happiest results will be after a successful action which I hope to fight

## NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

### Occurrences in the Land That Reigns Supreme in the Commercial World.

The death is announced of the Dowager Countess of Selson, at the age of ninety-two.

Plans are being discussed for a great Welsh national pageant to be held at Cardiff in 1908.

To prevent poison being taken unintentionally the latest bottle is one in the shape of a coffin.

Mushrooms are so plentiful in Berkshire that large quantities have been sold at a penny a pound.

Two memorial tablets have been placed on the house in which Charles Lamb lived at Chase Side, Enfield.

Armstrong, Whitworth, and Co. are now constructing at their Elswick yard a berth with a length of 650 ft. for war-ships.

The five-year-old daughter of a Tooting motor-driver has died from the effects of swallowing two half-pennies.

A notice-board which has just been erected on some nursery ground at Bishop Stortford reads: "Trespassers will be executed."

There has just died at Broadmoor, from heart disease, John Saunders, the man who, in 1882, threatened to murder Mr. Gladstone.

The King and Queen of Norway have accepted the invitation of the City of London Corporation to go to the Guildhall on November 14.

This year 955 boys and girls have left Dr. Barnardo's Homes for Canada, making a total of 18,429 since the emigration work commenced.

A well of pure water has been found under the floor of the Baptist chapel at Coggeshall, Essex, where water was being sold recently at 3d. a pail.

Sir John Puleston, Constable of Carnarvon Castle, says there is no foundation for the statement that the castle is to become a royal residence.

At the funeral of a tramcar conductor at Tottenham the most striking wreath was one from his old comrades in the shape of a punched tram-ticket.

A valuable Persian cat has just undergone an operation for the double purpose of saving its life and removing a diamond ring which it had swallowed.

Mr. John Japp, head of Messrs. Japp and Kirby, owners has been nominated for the Lord Mayoralty of Liverpool. No opposition is expected.

By grafting a tomato branch on a potato shoot, Mr. Ernest Morel, of Chiswick, has produced a plant which grows tomatoes above the ground and potatoes under it.

At Bristol the Lord Mayor has opened the new swing-bridge across the River Avon, which opens up important railway communication from the city dock to the main Great Western line.

The license of the Castle Hotel, Preston, which has been in existence since 1623, has now elapsed. The property has been purchased by a local newspaper firm for business purposes.

Sixty children were entertained to tea at Hughenden (Bucks) on the bottom of a large public pond to commemorate the fact that it was dry for the first time for nearly a hundred years.

Alfred Hamilton, an inmate of the Essex and Colchester Hospital, while eating an egg supplied for his breakfast found a sixpenny piece embedded in the yolk. The coin had turned quite black.

When pursuing a thief at Scarborough a policeman mounted a bicycle four on route, and when he returned to the police-station he met the owner who had come to lodge a complaint of the

for the Czar and our Holy Russia, having asked God to free our holy country from evil men. As you know, our Fatherland is passing through a time of sorrow and suffering. Devils have appeared in her midst, and vipers in human shape have come up out of the earth to suck dry our precious, holy Russian blood.

"Now, as your spiritual guide, I feel it my duty to tell you who these foes are. They are the students, the so-called cultured classes, and the Jews. And, as the representative of God on earth, I say unto you—Cut down these heathens; kill them; wipe them out. God Almighty will in His good time give you His paradise, if you do; and the Czar, our little Father, will present you with much land. Then there will be peace and plenty in Russia, for there will then be no one wanting to suck dry our precious Russian blood.

"I hear your sighs. I see that you are moved by my words. I hope you will do as I bid you. Let Jesus Christ the Son of God, to whom our holy church is dedicated. For Jesus Christ also belonged to our holy orthodox faith and was a good Russian, just as you all are. He was born in the province of Kursk, in the very heart of Russia. And what was most important to notice. He was an obedient subject of the Government. And He was amply rewarded for this. For you must know that when He died He was a Privy Councillor and a Knight of many Russian Orders.

"So, my beloved congregants, you who are all good and true Russians, remember that we live in a holy country, and act upon my advice. Again I call on you to take up arms against the foe of our fatherland. And to-day to begin the coming salvation, go, every one of you, and drink as much wudky as you can, for wudky is under Government control, and by so doing you will be showing your great love for the Czar. And, now, my children, bless you in the name of the Father, the Son and the Holy Ghost. Amen."

## 52 YEARS IN JAIL.

### Death in Geelong Prison of a Prison Record Holder.

Death has just remitted a portion of the last sentence inflicted on a criminal named Clark, a prisoner in Geelong jail, Victoria, writes a Sydney correspondent. He is believed to have held the record for length of imprisonment.

He was transported to Tasmania between 40 and 50 years ago for an offence committed in England. In due course he got his ticket-of-leave, and after that he earned a series of sentences totalling 51 years. The following was the order, the figures representing years: 7, 7, 2, 5, 3, 3, 3, 5, 10, 6. In addition, there were two Police Court sentences of six months each. His offences ranged from burglary to passing spurious coin.

A friend of Clark's, one Williams, an expert in "ringing the changes," has recently been sent to Pentridge jail again, after a six months' spell of liberty. This is the longest period of individual responsibility that he has enjoyed since he was first sentenced in 1867. His sentences aggregate 42 years. Both he and Clark were models of good conduct in prison, and invariably claimed the maximum amount of remission.

## DISAGREEABLE CANDOR.

"Your friend prides himself on being very candid."

"Yes. But a very candid friend is something like an alarm clock. You know his announcements are for your good, but you don't like them."

## SMOKED HIM OUT.

Mrs. Flubb: "Did you have a hard job making your husband give up smoking?"

Mrs. Dubb: "Not so hard as I had making him give up \$80 for a tailor-made suit."

let in strenuous endeavors to ameliorate the native breed of cattle. A number of Japanese experts are just now in Europe, with the object of purchasing prize animals for shipment to Japan. According to a Swiss paper, the following incident occurred the other day at a farm in the Bernese Oberland, which was being visited by some of our allies with a view to purchasing some bulls. The Japanese were much astonished at finding plates affixed above the animals' mangers bearing the name Togo, Kuroki, Oku, and Oyama. To a question addressed to the owner, why the names of illustrious Japanese had been given to mere animals, the sturdy Swiss farmer proudly replied: "I called them that because they are four of the best and can't be beaten."

## CHINESE EXTORTION.

According to the Shanghai Mercury, the beggars and the magistrates' servants in Canton enjoy a prescriptive right to exact money from every tradesman who opens a new shop, especially a pawnbroker's shop, as pawnbrokers are regarded by the people as Chinese Shylocks. Recently, when a pawnbroker named Fu Shang opened a new establishment near the Ching Fu bridge, a vast number of these beggars and magistrates' servants were there demanding exorbitant sums from the owner. As Mr. Fu Shang had paid his license fee to the Government, he refused to pay the sum demanded, and reported the matter to the police, who arrested 21 of them and brought them before the Nam Hoi magistrate for trial. Four of the extortioners were discharged, but two ringleaders were sentenced to be beheaded, notwithstanding the fact that they were the Nam Hoi magistrate's own servants, and the rest of them were sentenced to be put in the stocks in front of the pawnshop for a period of three months.

## LION TAMER'S FIGHT FOR LIFE.

### An Exciting Scene in a Menagerie in Germany.

A sensational struggle between the lion tamer Albert Schenkut and a savage lioness took place recently in Fisher's Menagerie, at Halberstadt, Central Germany.

Schenkut entered a cage containing three lions and a lioness named Flora, and put them through their usual tricks. All the animals showed signs of irritation, and several exciting incidents interrupted the first part of the performance.

The final feature of the performance consisted in an exhibition of fireworks inside the cage. Schenkut was occupied in lighting the fireworks when the lioness crouched to spring on him. Perceiving his extreme danger, he struck at the lioness with his riding whip, which was his only means of defence. At the same moment the lioness sprang on him, and he fell heavily to the ground with the lioness over him.

Schenkut continued the struggle, and repeatedly struck the lioness with his right hand to prevent the animal seizing him by the throat. All the while the three lions remained passive spectators of the contest.

Finally Schenkut succeeded in regaining his riding whip, and fought desperately for his life. The lioness bit his right arm, tearing off the flesh from shoulder to wrist, and severing the thumb from his hand.

At this critical juncture keepers outside the cage drove off the lioness with hot iron bars, and Schenkut, with great presence of mind, succeeded in getting out of the cage.

No sooner was he outside than he fainted from exhaustion and loss of blood. His clothes were torn to shreds. Subsequently Schenkut declared that he would repeat the same performance as soon as the doctors allowed him to resume his dangerous profession.

Locomotives use a third of the coal mined in England.

After Majuba Sir Evelyn strongly urged Mr. Gladstone's Government to treat with the Boers only after they had been taught to feel the weight of British power.

"The happiest results will be after a successful action, which I hope to fight in about fourteen days. . . . and, humanly speaking, I can promise victory."

The advice was not taken. Sir Evelyn wrote to his wife on May 31:

"In a few years we shall have to take over the country."

## OPINION OF KAISER.

"Finally, let us take a story of the German Emperor from Sir Evelyn's pages: On August 7, 1889, the German Emperor reviewed the division at Aldershot. He is bright, with a decided, direct manner; a good horseman. His quick and very intelligent mind takes in every detail at a glance, and he possesses a marvelous memory. In speaking of our soldiers' boxing, the Emperor asked, 'How do you manage to prevent the men of a defeated boxer's regiment quarreling in the canteens?' I said, 'Your Majesty, nearly all Britons are true sportsmen by instinct, and accept the umpire's decision. Moreover, the championship is an honor which never induces bad feeling.'"

## FRANCE'S OLDEST RECRUIT.

### Man of the Hour in the Republic is Leon Felendier.

It matters not how old a man may be, he may even be a centenarian, but if he becomes a naturalized Frenchman, he must serve his time in the army just as if he were the veriest recruit in its teens.

It is a conscripted army, the French one, and all over eighteen must put in thirteen days military service with some regiment or corps either in the field or in the barracks. The born citizen does his service before he is 21, but the other day the queer case of the brothers Felendier came before the war minister. They have just become naturalized. One is 48, the other 40. The minister looked up the law. He decided they must do their service, for, as he announced, there is nothing in the conscript law mentioning the age of naturalized citizens. Even if the Felendiers were 100 years old, they still would have to serve.

So Leon Felendier, nearly two score and ten is the man of the moment, for he is the oldest recruit in the French army. The batch of recruits with whom he is learning the goose-step are not out of their teens. The grey-beard has been photographed in the midst of his company and looks strangely out of place. Hugo Felendier, his brother, 40 years old, has just finished his thirteen compulsory days with the colors.

The Felendiers were born in Poland, but while they were still young children their parents emigrated to France. Both Leon and Hugo married French girls and have families of grown-up children.

The other day, Leon went to enter his son, aged seventeen, at one of the government's technical colleges. But when it was found that the pupil's father was not born in France, the son was refused until Leon had taken out naturalization papers. So soon as the Felendiers became naturalized Frenchmen they were immediately conscripted.

And that is how Leon Felendier has broken the record in conscripts. Two of his sons performed their service last year and, therefore, are senior to their father on the war department's lists.

## HIS VACATION.

Visitor (to Convict): "I suppose you find your life here very tiresome, my friend, do you not?"

Convict: "Oh, no, sir. I have been a burglar for a good many years and have worked hard and conscientiously at the business, and as I'm only in for three years I feel that the rest is doing me good."

the yolk. The coin had turned quite black.

When pursuing a thief at Scarborough a policeman mounted a bicycle he found on route, and when he returned to the police-station he met the owner who had come to lodge a complaint of theft.

A "Lancet" correspondent states that a young woman, aged twenty, whom he attended gave birth to twin girls on October 16, 1905, and to twin boys on September 25, 1906, so that she has four babies under twelve months old.

The list of new cotton spinning mills at Manchester, shows that twenty-eight factories, containing 2,400,000 spindles, have been started during the last twelve months, thirteen with 1,000,000 spindles partly started, and thirty-seven being erected with a spindleage of 3,100,000.

At the end of August there were 752,175 persons in receipt of poor-law relief (£36,829 indoor, 515,346 outdoor.) Numerically this figure is the highest since 1873, when the total number was 757,754, but the ratio of pauperism to population has fallen in that time from 32.4 per 1,000 inhabitants to 22.8 per 1,000.

A walk may be taken through 14 parishes consecutively from Norwich without meeting a single tavern. The villages are Bixley, Arminghall, Caistor, Merghall, Dunston, Keswick, Intwood, East Carlton, Braconash Hethel, Ketteringham Cringleford, Colney and Bowthorpe.

At a certain London suburban railway station lampers are placed upon the platforms each morning, and passengers by the trains are invited to put flowers into them. Before noon the flowers are sent to the City, and distributed to working women and girls during the dinner hour.

A Yarmouth train had just passed Berney Arms when a little boy, who had been standing on a seat leaning out of the window, overbalanced himself and fell out. The train was stopped, and the boy found seated in the permanent way a little frightened, but apparently without a scratch or a bruise.

Lady Frances Cecil is giving up Stocken Hall, her beautiful residence on the great North-road, about midway between Stamford and Grantham. This will be a serious loss to tramps, for everyone who called at the hall was given a small loaf of bread, a thick slice of cheese, and a pint of beer. As many as fifty a day have been known to call.

A wedding at Ripley, Surrey, was delayed, first, because when the wedding party was assembled at the church it was discovered that the clergyman had forgotten his appointment and had to be sent for. When he arrived it was learned that the bridegroom had forgotten the ring, and then the certificate of publication of the banns had been forgotten.

At Wiswick, a tiny village between Barrow and Uxerston, necessity having arisen for extension of the village churchyard, the whole able-bodied population turned out, under the guidance of their vicar, removed the old walls, levelled the ground, and constructed a new road, the excavation work being done by miners after their day's work in the pit.

A record number of Essex ploughmen assembled at Witham recently for a ploughing competition organized under the county council scheme. There were no entries in the boys' classes, and the Hon. C. H. Strutt, chairman of the committee, said the absence of young ploughmen marked a new phase in agricultural life, and meant that the ploughman would soon become extinct.

## WANING AFFECTION.

Angelina: "I don't believe you love me as much as you did, Edwin."

Edwin: "Pooh! nonsense! What makes you think that?"

Angelina: "Well, it's several days now since you called me a vain and heartless little flirt, and I know I haven't changed."

# Help! Help! I'm Falling

Thus cried the hair. And a kind neighbor came to the rescue with a bottle of Ayer's Hair Vigor. The hair was saved! This was because Ayer's Hair Vigor is a regular hair medicine. Falling hair is caused by a germ, and this medicine completely destroys these germs. Then the healthy scalp gives rich, healthy hair.

LEAVE—Prinyer's Cove at 5:30 a. m. for Napanee and all way places. Leave Pictou at 8 a. m. Deseronto at 9:30 arriving in Napanee at 10:40, connecting with G.T.R. noon trains going East and West.

RETURNING—will leave Napanee at 1:00 p. m. connecting at Deseronto with Steamer "Varuna" for Belleville and Trenton. Leave Deseronto at 2:30 p. m., Pictou at 4:30 p. m. for down the bay.

## WHAT OTHER PAPERS SAY

Ottawa Journal.

If conservatives here cannot agree with the Nova Scotia estimate of Mr. Fielding, they can at least comfort themselves with the thought that it is an honest admiration, that it is unbought, and that it involves no condonation of corruption.

Montreal Gazette

Within a few months Glasgow has abandoned its telephone enterprise, a couple of small towns have sold out their electric undertaking, and now London has voted that the county council shall no further extend its operations in this direction.

Hamilton Times.

Kingston liberals are not desirous of introducing politics into the militia, but they vigorously protest against liberals being discriminated against in appointments made. Sir Frederick Borden should not go out of his way to give them the worst of it.

Walkerton Times.

If a poor man steals a loaf of bread to keep himself and family from starving, the officers of the law will give him a sentence of from one to thirty days, with hard labor. If a rich man robs a bank or steals thousands from the public purse, he is allowed his liberty and has countless friends ready to applaud his action. The rich man is designated as a sharper, while the poor man is called a thief. Surely Shakespeare was right when he said, "Through tattered clothes small vices do appear; robes and furred gowns hide all."

## TAMWORTH PUBLIC SCHOOL

Names in order of merit.

### SENIOR DEPARTMENT

# CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of

*Chas. H. Fletcher*

and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

## What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

## GENUINE CASTORIA ALWAYS

Bears the Signature of

*Chas. H. Fletcher*

## The Kind You Have Always Bought

In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY

## Trust to Nature.

A great many Americans, both men and women, are thin, pale and puny, with poor circulation, because they have ill-treated their stomachs by hasty eating or too much eating, by consuming alcoholic beverages, or by too close confinement to home, office or factory, and in consequence the stomach must be treated in a natural way before they can rectify their earlier mistakes. The muscles in many such people, in fact in every weary, thin and thin-blooded person, do their work with great difficulty. As a result fatigue comes early, is extreme and lasts long. The demand for nutritive aid is ahead of the supply. To insure perfect health every tissue, bone, nerve and muscle should take from the blood certain materials and return to it certain others. It is necessary to prepare the stomach for the work of taking up from the food what is necessary to make good, rich, red blood. We must go to Nature for the remedy. There were certain roots known to the Indians of this country before the advent of the whites which later came to the knowledge of the settlers and which are now growing rapidly in professional favor for the cure of obstinate stomach and liver troubles. These are found to be safe and yet certain in their cleansing and invigorating effect upon the stomach, liver and blood. These are: Golden Seal root, Queen's root, Stone root, Bloodroot, Mandrake root. Then there is Black Cherrybark. The medicinal principles residing in these native roots when extracted with glycerine as a solvent make the most reliable and efficient stomach tonic and liver invigorator, when combined in just the right proportions, as in Dr. Pierce's Golden Medical Discovery. Where there is bankrupt vitality—such as nervous exhaustion, bad nutrition—and thin blood, the body acquires vigor and the nerves, blood and all the tissues feel the favorable effect of this sovereign remedy.

Although some physicians have been aware of the high medicinal value of the above mentioned plants, yet few have

to him. General Tacon went further and allowed him the privilege of the use of forty convicts who were then confined in Morro castle to assist him in the work, each convict receiving the sum of 20 cents a day. In 1838 the theater was finished, and Marty, as a proof of the gratitude he felt toward General Tacon for sparing his life, named it El Teatro Tacon. During the insurrection in Cuba many exciting incidents took place here. In one instance a regiment of Cuban insurgents barricaded themselves in the theater and held it against the Spaniards for three days. Finally they were starved out and as they were making their escape all were shot.

The theater is built of white stone with decorations of marble, and faces Central park, being in the center of the fashionable district of Havana. It is one of the largest theaters in the world seating over 3,000 persons.

## The Range of Apples.

"Pineapple" and "love apple" (tomato) are instances of the manner in which the apple has been habitually taken as the typical fruit, the name of which is naturally borrowed in naming all sorts of fruits and vegetables that only remotely resemble it. Dr. Murray's dictionary gives an imposing list of them—Jew's apple, devil's apple, kangaroo apple, and so on. A writer of the seventeenth century speaks of "the fruit or apples of palm trees," and a fourteenth century man says that "all manere aples that ben cloyed in harde skynne, rynde, other shale, ber

**MADOLE & WILSON**

**The Secret of the Maple.**  
No thoughtful person who has ever visited a maple grove in the early spring while snow banks are yet lingering in sheltered hollows and has seen painful after painful of sweet sap drawn from the anger holes in the shapely trunks can have failed to wonder what forces govern the flow of the sap. When the warm sun touches the treetops the flow increases. A rise of a few degrees in temperature often causes a great increase of flow. If the rise passes the zero point on the centigrade scale—that is, the freezing point of water. But a considerable change of temperature in which the fluctuations do not cross the zero line causes no marked change in the flow of sap. Dr. K. M. Wiegand, discussing these and other related facts in the American Naturalist, reaches the conclusion that neither expansion of gas in the wood nor expansion of water nor expansion of wood itself is the underlying cause of the pressure which produces the flow, but that this pressure arises from the effects of temperature in altering the osmotic permeability of the pith ray cells.

**Nothing New Under the Sun.**  
I remember the surprise with which I heard a cornet solo first recorded and then reproduced by a Scott graphophone, the construction of which, if I am not mistaken, antedated the birth of Edison. The record was made upon a sheet of tin foil wrapped around a brass cylinder which was actuated by means of a weight, a train of wheels and a butterfly regulator. In this connection—to show the antiquity of the germs of another modern invention—one day when looking through the files of the Journal des Savans I came across the account of a machine which was presented to the Academy of Sciences of Paris somewhere around the early years of the eighteenth century. This machine was nothing else but a typewriter; the description was very summary, but I remember that it had individual type bars, the keys of which were made of ivory. It was the work of M. Leroy of Versailles, who was styled Horlogeur du Roy, the reigning king being Louis XIV.—Alfred Saug in Engineering Magazine.

favorable effect of this sovereign remedy. Although some physicians have been aware of the high medicinal value of the above mentioned plants, yet few have used pure glycerine as a solvent and usually the doctors' prescriptions called for the ingredients in varying amounts, with alcohol.  
The "Golden Medical Discovery" is a scientific preparation compounded of the glyceric extracts of the above mentioned vegetable ingredients and contains no alcohol or harmful habit-forming drugs.

**BOLIVIAN PETTICOATS.**  
They Are Numerous and of All the Colors of the Rainbow.

The prized possession of the Bolivian Indian woman and her chief pride also, whether she is pure Indian or chola, is her petticoat. Her dowry is in this garment. Like the Dutchwoman of tradition, she carries her wealth about with her. These petticoats are of all colors of the rainbow and divers other hues not found therein. I first noticed them at Nazarene and remarked the love of color, which must be inborn, for the garments were of yellow, purple, violet, fiery red, crimson, scarlet, subdued orange, glaring saffron, blue and green. They were short, reaching barely below the knee, and no difference was observed between childhood, maidenhood, matronly middle life and wrinkled old age. Glancing from my window in Tupiza, I thought it was a parade of perambulating balloons.

These women have a habit which the bashful traveler does not at first understand. When he sees one of them calmly removing a petticoat he is apt to turn away, but he need not do so. It may be that the advancing heat of the day has caused the wearer to discard the outer skirt, but more likely it is the vanity of her sex and the desire to make her sisters envious by showing what is beneath, for each new vesture disclosed is more brilliant than the one which overlapped it. I sat in the plaza at Tupiza and watched two Indian women try to make each other envious. The first one removed the outer petticoat, which was of purple. This divestment disclosed another garment of blazing red, and after that came a brilliant yellow. The other woman started with a green petticoat and gradually got down to a mixture of blue and yellow. By that time I had begun to fear for the consequences and made a pretense of turning my back by strolling to the Hotel—National Geographic Magazine.

## THE TACON THEATER.

Havana's Famous Playhouse Has an Interesting History.

The history of the Tacon theater of Havana is very interesting. In the year 1835 Francisco Marty, who was then the leader of a band of pirates which infested the island of Cuba and who had a price of \$10,000 on his head, was captured and ordered to be put to death. Seeing there was no hope for him, he asked leave to see General Tacon, who was then governor general of Havana, and told him if his life was spared he would denounce his entire band and assist him in ridding the island of the number of pirates which infested it at that period. Accordingly General Tacon gave him a two weeks' parole, and inside of a week Marty had denounced his fellow pirates and turned them over to the government. For this service he was pardoned.

In 1830 Marty asked for the concession to build a national theater on the site of Parque Central. It was granted

**CASTORIA.**

The Kind You Have Always Bought

teenth century man says that "all manere aples that ben cloyd in an harde skinne, rynde, other shale, ben callyd Noces" (nuts). In the year 1000, apparently, "earth apples" meant not potatoes, but cucumbers. And even Eve's "apple" is belleged to have been a citron.

**The Metaphor of the Spider.**  
Better than most metaphors that have been drawn from the spider's way of life is the delightfully human one of Alphonse Karr's in his "Voyage autour de mon Jardin." The spider, he says, is more truthful than man. When man says, "If my wife does not love me I shall die," he does not die. But when the spider says so he knows he is speaking the truth, for if his wife does not love him she kills him.—London Saturday Review.

**Great Expectations.**  
Mrs. Mark—Gracious! I never saw so many soiled faces in my life. Why don't you use some soap and water? Tommy Tuff—We are waitin' fer de angel, mum. Mrs. Mark—What angel? Tommy Tuff—Why, de lady dat come fru here last week and give one of de kids a nickel to wash his face.

Some people will never learn anything for this reason: Because they understand everything too soon.—Pope.

**The Sea Horse.**  
This fish is found in the Atlantic ocean around the coast of Spain, the south of France, in the Mediterranean and in the Indian ocean. Sea horses are very small and have been found often curled up in oyster shells. The head is much like that of a horse, and the rings around the body and tail resemble those of some caterpillars. The habits of these fishes are singular and interesting. They swim with a waving motion, and frequently wind their tails around the weeds and rushes. They have fins to sustain them in the water, and even in the air. They live on worms, fishes, eggs and substances found in the bottom of the sea.

It takes more than modern machinery to produce good flour. It is the care used in selecting the wheat before it is ground and the searching tests of expert chemists afterwards that give

## Royal Household Flour

its nutritious qualities, its purity and its uniform goodness. In its preparation no process tending to improve its quality is omitted or slighted. Tell your grocer that you want Royal Household because the makers guarantee it.

**Ogilvie Flour Mills Co., Ltd.**  
137 Montreal.

Most people know that if they have been sick they need **Scott's Emulsion** to bring back health and strength.

But the strongest point about **Scott's Emulsion** is that you don't have to be sick to get results from it.

It keeps up the athlete's strength, puts fat on thin people, makes a fretful baby happy, brings color to a pale girl's cheeks, and prevents coughs, colds and consumption.

Food in concentrated form for sick and well, young and old, rich and poor.

And it contains no drugs and no alcohol.

ALL DRUGGISTS; 50c. AND \$1.00.

## HANDLING MEN.

**Directing Others In Business Demands Tact and Ability.**

Business men often fail because they do not know how to handle men. They can do their own work all right, but they are failures when it comes to directing others. They lack tact, diplomacy.

Many men antagonize others; they lack patience, lose temper, fly to pieces over little things. And no man is a good leader who cannot control himself.

A great many business men seem to think that it takes a deal of driving, scolding, fault finding, to get the best out of others. It is, however, just the opposite. Employees never give up their best in response to forcing methods.

I know a young man who promises to be a leader in his line who is as quiet and gentlemanly in his methods as a modest woman. He never raises his voice, never gets angry. When an employee needs correcting, instead of scolding or nagging he sits right down and shows him or her just how to do the thing. He tries to help them out of their difficulty, not to confuse them. He does not need to scold, because everybody respects him, admires him and knows that he is always trying to do the fair thing, to give a square deal, that he wants only what is just right and there is nothing arbitrary in his methods.

The result is he does not need to storm around his establishment and use abusive, profane language. He knows there is a stronger force, a better way than that. The result is that he has perfect discipline.

Not one would think of taking advantage of him or trying to deceive him, because he is so kind, square, true.

I know another man in business near by him who adopts just the opposite method. He storms and swears, scolds, nags, goes through his establishment like a bull through a china shop, making everybody feel mean and disagreeable. Nobody respects him. He rules by brute force, keeping everybody cowed and afraid of him. They obey him and let him impose upon them in order to avoid a scene or for fear they will lose their positions. If an office boy or stenographer makes a little mistake he will go all to pieces, fly into a rage and make it very uncomfortable for everybody about him.

People waiting in the outer office often hear loud talking and most abusive language in his private office. But he is not nearly as successful as his quiet, unobtrusive neighbor.

He never thinks of recognizing one of his employees on the street.

The other man always lifts his hat to the humblest girl in his employ and has a pleasant smile for everybody, because he feels an interest in everybody and they all love him.—Success.

## The Vision of Insects.

A notable fact about the vision of insects and one which it may be supposed must largely influence their view of the external world is the number of facets or lenses in compound eyes. A German naturalist, K. Leinemann, has been painstaking enough to count the number of facets in the eyes of no fewer than 150 species of beetle. He finds that in the same species and sex the number increases with the size of the body. There is usually no permanent difference between the sexes as to the number of facets. Occasionally, however, the difference is marked, as in the case of *Lampyrus splendidula*, in which the male has 2,500 and the female 300. One species is noted which has the extraordinary number of 24,000 facets in its eye. The number of facets

## WEBSTER AND MONEY

**THE GREAT DANIEL WAS CARELESS IN FINANCIAL AFFAIRS.**

**He Troubled Himself Little About What He Owed or About What Others Owed Him—The Way the Famous Orator Charmed His Creditors.**

As often as nature makes a demigod out of a man she tacks on to him some badge of infirmity, some sign or token by which the less favored of the race may know that he is not absolutely removed from them, but is, in certain ways, co-heir with them in common humanity.

The "godlike Daniel," "expounder of the constitution" and father of the sentiment of American nationality, whose eloquence the "applause of listening senators" did command, was mighty careless about his financial obligations, seldom troubling himself about what he owed or about what others owed him.

The late Erastus Corning and Webster were warm friends, and thereby is explained the fact that once upon a time Mr. Corning indorsed Mr. Webster's note for a considerable amount.

As things go in this world notes must sooner or later come due, and when this particular note reached maturity it went to protest. But Webster was the "great expounder," and the firm, not wishing to embarrass him, paid it.

Time passed, and when it was supposed that Webster's financial condition was improved Mr. Corning was prevailed upon by the firm to ask Webster if he could make it convenient to liquidate the claim.

In answer to Corning's letter Webster sent a note abounding in apologies for the trouble he had put his friend to, and wound up with a most cordial invitation to the gentleman to visit him, when he would probably be in a position to pay him, or, at least, to give him some sort of satisfactory security.

Corning accepted the invitation and went to see the expounder.

In due time Corning returned home, delighted and charmed with his visit to Marshfield.

Entertaining his partners with enthusiastic accounts of the great statesman's hospitality and with descriptions of the various incidents of his visit, Corning forgot to say a word about the main object of the visit.

Finally, after Corning had exhausted himself in describing the good time he had had, a member of the firm broke in with the remark, "Well, I suppose Mr. Webster was highly pleased to be able to pay the note."

"Highly pleased to pay the note?" responded Corning. "He didn't pay any note. He not only did not pay the note, but he so charmed and delighted me that he got me to sign another note for him for \$5,000, and I am thankful that he did not ask me to make it \$10,000, for I don't think I could have refused to grant his request."

An old Bostonian who knew Webster well told me some years ago the following story:

A Portsmouth (N. H.) tailor had a bill against Webster for several hundred dollars. When Webster was elected United States senator, the tailor went down to the "Hub" to see him about his bill, thinking that he was then in a fair frame of mind to pay it.

When the Portsmouth man got to Boston, Webster was holding a levee, at which were gathered the most distinguished men of the nation.

Presenting himself at the door, the tailor was denied admission on the ground that Mr. Webster was engaged

## A FRIEND'S ADVICE

**SAVED SUFFERING AND BROUGHT BACK HEALTH —DR. AGNEW'S GREAT HEART CURE AND CATARRHAL POWDER DEFY DISEASE AND NEVER FAIL IN THEIR MISSION OF HEALING**

"I feel so thankful at the restored health of my daughter that if any use can be made of this I shall be pleased." This is what Mr. George Weels, of Elora, Ont., says in giving his testimony to the wonderful curative qualities of Dr. Agnew's Cure for the Heart. Mr. Weels' daughter was a great sufferer from heart disease and nervousness. She was unable to lie on her left side. She ran down in health and her recovery was a source of anxiety. Induced by friends, who had proved its worth, she obtained Dr. Agnew's Cure for the Heart and before one bottle had been taken was able to lie in any position she desired, and when two bottles had been taken, an absolute cure was pronounced. Yes, this great remedy is a cure for all ailments of the heart, stomach and nerves, and the instantaneous relief given by it has snatched thousands from death's jaws. Don't trifle a minute if you have the slightest evidence of heart disorders, such as palpitation, fluttering or uneasiness. This remedy will relieve such trouble immediately and will cure the stomach and nerves.

"When I know a thing is worthy of a recommendation I consider it my duty to tell of it." The Rev. James Murdock, of Harrisburg, Pa., says this after having been cured of a very malignant form of catarrh by Dr. Agnew's Catarrhal Powders. What he can say of its healing powers thousands of others have said and can say of it. Don't neglect "only a little cold" in the head. It may lead to chronic catarrh. Dr. Agnew's Catarrhal Powder relieves in 10 minutes and is easily applied. Keep it near you if you are a "cold in the head" subject.

**DR. AGNEW'S OINTMENT** cures all skin troubles

**Removed the Growth**

has the extraordinary number of 23,000 facets in its eye. The number of facets is greater in the rapidly moving active forms than in the more sluggish species.

#### Preserving Leather.

Leather goods, if their appearance is to be preserved, should not be kept in places that are too dry, as the heat will cause the leather to crack. Nor in damp places that will make it moldy. To freshen leather chair seats, traveling bags, book covers, etc., that have become shabby or spotted, rub them with the well beaten white of an egg. Sole leather bags are best cleaned by using ordinary russet shoe polish, cleaning them in the same way that shoes are cleaned.

#### The Social Whirl.

Fair Hostess—I want you to take that lady over there by the door in to dinner. My husband says she is a bit of an old frump, but as she has money one of his greatest friends has just married her for it, and we must be nice to her. Guest—I am sorry, but, you see, I am the particular friend who married her.

#### A Rival's Opinion.

Mrs. Style—Mrs. Cashe has a great deal of embonpoint. Mrs. Parvenu—Then if she has a good deal of it, I know she got it cheap.

Life insurance was invented by Pascal, whose "theory of probabilities" and "law of averages" still govern the business.

#### Bileans a "Woman's Medicine."

#### GRATEFUL WIVES AND MOTHERS TESTIFY TO THEIR VALUE

Bileans have been called "a woman's medicine" because of their exceptional fitness for the various ailments peculiar to the sex, as well as for liver disorders and stomach medicines, Bileans contain no bismuth, mercury or any mineral whatever. From coating to kernal they are purely vegetable.

Mrs. J. Whitefield, of Swan Lake, (Man.), says:—"Bileans have done me a wonderful amount of good. I can hardly describe how bad I felt before I took them. I could not eat but that it caused pain. There was a constant sensation of tightness in my side, and my liver was entirely out of order. I could not sleep at nights, suffered also from kidney trouble, and was altogether in a rundown and very serious condition. I had been ailing in this way for years, and it is gratifying to find that Bileans were equal to my case."

Mrs. Wm. Hall, of Dean Lake, says:—"I have proved Bileans very good for constipation, from which I suffered a great deal. They cured me."

Mrs. J. H. Thompson, of Cleveland Park, says:—"For irregularities and painful periods I can highly recommend Bileans. They proved a great blessing to me and restored me to health when I had become very ill and very despondent."

Bileans are absolutely unequalled for female ailments and irregularities, constipation, piles, anaemia, debility, rheumatism, blood impurities, etc. They tone up the system and enable it to throw off colds and chills, strengthen girls just emerging into womanhood, and speedily restore energy and strength to those who are rundown.

Of all druggists at 50c a box, or post free from the Bilean Co., Toronto, on receipt of price. 6 boxes for \$2.50.

ground that Mr. Webster was engaged with affairs of state and could not be disturbed.

The tailor sent up his card, which Webster no sooner saw than he ordered the gentleman to be ushered into his presence.

Receiving the man with a cordial hand shake and a look of supreme benignity, Mr. Webster introduced him, one by one, to the illustrious company, dined him and wined him, and in the course of time the guests, including the Portsmouth man, departed.

Upon reaching home the tailor was asked if he got the money for his bill.

"Money for my bill, the mischief!" he replied. "Mr. Webster treated me like a lord, introduced me to more big folks than I ever saw before in all my life, and do you suppose I could have the heart to mention that bill to him?"

#### A Punctual Artist.

One well known and decidedly inartistic quality of Lord Leighton was his punctuality. He was once in Damascus and was urged to remain there, but he declined. His reason was that he had to be in London on a certain day because he had made an engagement with his model. A friend was anxious to learn whether Lord Leighton had actually kept this engagement, and he found that when the artist was ascending the staircase straight from Damascus the model was knocking at the door of the studio.

#### His Weakness.

"Alas!" confessed the penitent man, "In a moment of weakness I stole a carload of brass fittings."

"In a moment of weakness!" exclaimed the judge. "Goodness, man! What would you have taken if you had yielded in a moment when you felt strong?"

#### Corrective.

Jack—You should have seen Miss Waldo. Her eyes flashed fire, and—Arthur—That's funny. You said a moment ago that she froze you with a glance.

Judge thyself with a judgment of sincerity and thou wilt judge others with a judgment of charity.—Mason.

#### Easy Answer.

A Liverpool paper tells the pathetic story of one A., who is compelled to grow a beard to ward off pneumonia and other ills. The woman with whom he has fallen in love, however, declines to marry him unless he will shave. "What," asks our contemporary, "should A. do?" The answer seems easy: Keep the beard and cut the woman.

#### Friendship.

There is a certain development of love in which the covetous longing of two people for one another has yielded to a higher mutual thirst for an ideal above them both. But who has found such love, who has experienced it? Its true name is friendship.

#### On the Safe Side.

Schroeder (to his neighbor, a widower)—Why did you send your housekeeper away, since she was such a good cook? The Widower—She made such splendid puddings I was afraid I should marry her.

A cubic foot of distilled water weighs very nearly 1,000 ounces.

Builders' Hardware of almost every description, Paints, Oils and Glass; Cement.

MADOLE & WILSON.

# Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

#### Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

# SCALP SORES

## Eczema, Ulcers and Skin Diseases.

Don't you believe in nature? Don't you think that skin and blood diseases such as the above, can best be cured by applying nature's own herbal extracts? From Bible times the "herbs of the field" have been commended to mankind for this purpose. Zam-Buk is a combination of the finest medicinal herbal essences, concentrated, purified, and rendered highly antiseptic. Zam-Buk eases pain, stops suppuration, and heals all sores and skin diseases. A natural herbal balm, operating in nature's own way. Note well following cases.

### PROOF OF ZAM-BUK'S POWER.

Mr. Montague Jones, of Tavistock, Ont., says:—"About four years ago sores started to break out on my skin. I used salves to check them, but to no effect. I then burned them with Iodine, and that took them away for a time, but only for a time, and they caused me great pain. Sores then started to break out on my head. I went to the doctor, who told me that it was scalp eczema and that I should need to give it very careful attention. He gave me some salve which I rubbed on, but notwithstanding all my care I continued to get worse. I then tried several advertised remedies, but to the same end. One day I read a report about Zam-Buk, and I thought that what it had done for other people it could do for me, so sent for a sample box. The result of the use of so small a quantity was so satisfactory that I at once obtained a full supply. I also obtained a few boxes of Bileans for internal use. Within a very short time there was a marked improvement. I applied ZAM-BUK in accordance with the directions and very soon the scales were all gone and the sores completely healed. They show no trace of returning, and I feel that I am cured to stay cured."

"Mrs. L. Finch, of Camberwell, says:—"Our little girl, May, had eczema on the scalp. It spread all over the head and the pain was so bad at times that the poor child screamed aloud. Her hair came out in patches. Hospital treatment failed. The first application of Zam-Buk eased the agony and by the time we had used a few boxes the disease was cured. It is the finest balm ever brought into a house for all skin injuries and diseases."

### USE ZAM-BUK IF YOU SUFFER FROM:—

Eczema or any skin disease, Ulcers, Abscesses, running sores, blood poison, eruptions, chronic sores, etc. It also cures chilblains, chapped hands, cold sores, cuts, burns and bruises. It eases the pain of piles, and cures the ailment by softening the hard veins and removing the congestion. Also good as an emollient. Used by Sherring, the Marathon winner; Lannon, ex-champion wrestler, and leading athletes the world over. All Druggists, 50 cents a box, or from the ZAM-BUK CO., TORONTO, upon receipt of price. 6 boxes for \$2.50.

# ZAM-BUK.

#### One of Them.

Struggling Artist! No use trying to compete with the picture factories, which are crushing out cheap dainties by the million. The trouble is, the people are not educated. Lots of buyers can't tell the difference between those pictures and mine. Frank Friend—I presume that's true. I can't myself.

#### Open to the Warning.

Old Quiverful! And so you want to take our picture from us? You want to take her from us suddenly, without a word of warning? Young Coslow—Not at all. If there is anything to be done, we want to warn the artist.

#### Ants as Guests of Plants.

The ants which are really protective to plants are not those which obtain their food indirectly for the most part through the aphides, from the vegetable kingdom, but those which are really carnivorous. These are numerous in temperate climates, and their usefulness to agriculture and sylviculture is incontestable. Thus the field ant is a great insect destroyer. A nest of this species is capable of destroying as many as twenty-eight caterpillars and grasshoppers a minute, or 1,600 an hour, and such a colony is at work day and night during the pleasant season. In the arid plains of America the beneficent work of ants is revealed in the isles of verdure around their hills. There are plants hospitable to ants, which furnish them shelter and often food, within the cavities of which the instincts of the ants prompt them to take their abode. This is the case with several ferns, among them the *Polypodium nectariferum*, the sterile fronds of which bear nectaries on their lower face and are, moreover, of a shape favorable to sheltering the insect.

#### Sign of a Trained Nurse.

"I used to wonder why it was that I noticed so many young women lugging suit cases all over town," said the man on the street corner. "At first I thought perhaps they were independent young persons who were on their way to the Grand Central station or to the ferry-boats, to take trains, but then I noticed them in parts of the town where they couldn't possibly be making for a railroad station, since they were going in the wrong directions. Now I have learned who these women are. Most of them are trained nurses. When they leave the hospitals or their homes to attend a case they pack their uniforms and other necessities in these suit cases, which they carry with them. So when you see a young woman carrying a suit case and bound in a direction away from a boat or railroad station it's very likely she's a trained nurse and is either starting out to attend a case or is returning from one."

#### Colors of the Bluebird.

Of the male Bluebird Thoreau said, "He carries the sky on his back." To this John Burroughs added, "and the earth on his breast." The bird's back, sides and tail are blue and throat and

#### LABRADOR.

Its Fascinating Procession of Colossal, Fantastic Icebergs.

It is the icebergs that make Labrador fascinating. They greet you when you steam out of the strait of Belle Isle, the northern gateway of the gulf of St. Lawrence, and head northward up the coast of Labrador. They come floating from the north, an endless procession, all shapes, fantastic, colossal, statuesque, even grotesque—a magnificent assemblage of crystal domes and turrets and marble fortresses. Your steamer picks its way carefully among them lest they be jealous of her intrusion and fall over upon her. And in the midst of this glorious company you come to Battle Harbor.

The settlement is on an island perhaps 200 yards in diameter, which is the outpost of a larger island, and plows the waves of the ocean like the prow of some gigantic ocean liner. In storms the spray leaps almost across its ledgy surface. A cove hides behind the bluff sea wall, and on its rim nestles a tiny village of whitewashed cottages. You climb the hill to the lookout. Away to the north and south spreads out the vast procession of the icebergs. They come out of the north, the fog surrounding their tops and streaming like smoke from their pinacles. They move slowly southward, perhaps three or four miles a day. Some go directly south down the Newfoundland coast, some turn west as they approach the strait and are swept by the tide into the gulf of St. Lawrence.

Day by day from the hilltop you note their slow progress. Each day sees new forms emerging on the northern horizon, while old, familiar bulks are lost to view in the south. Each month's icebergs are natives of a more northern region. Hence the bergs of the late summer, though fewer in number, are individually larger than those of the earlier part of the season, because they have been longer in the making, coming from farther north.

June's icebergs are Labrador's own product and have broken off from the ice field that has tilled the bays and extended far into the ocean in the previous winter. July's bergs come from Baffin Land, while the huge bulks of August are natives of Kane bay and the far north, in rim of Greenland, where man has never been.—W. B. Conant in Boston Transcript.

#### An Old Meat Bill.

The state historian of New York in compiling some records brought to light some amendments to laws confirmed at the General Court of assizes held in New York, beginning on ye 5th & ending on ye 8th day of October, 1670. The following catches the eye:

"Whereas, divers Complaints have been made of the great abuse of bringing dead hogs & Pork into this city & it not being discernible how long they have been killed by reason they are too often brought frozen, so not capable of being preserved by salt which tends much to ye disreputacion of that commodity when sent abroad, and ye Merchants who Export it into Warner Climates, for ye reasons aforesaid it is Ordered, That henceforth no hog or hoggs shall be brought dead to this place either for sale or payment of debts, except it shall be in cask well salted & packed according to ye Law, otherwise smok't or dryed of which all persons are to take Notice, as they will answer ye contrary at their Perills."

## CURED HIS WIFE of LA GRIPPE

Quebec Man tells how the Great Consumptive Preventative was an all-round Benefit

"My wife took La Grippe when she was in Ottawa," says R. N. Duford of Northfield Farm, Que., in an interview. "She got a bottle of Psychine and after using it for a few days she was quite well. I took a cold and am using it and am getting all right. I think Psychine is one of the best tonics on the market to-day."

There you have the whole matter in a nutshell. La Grippe and colds are among the forerunners of consumption.

This man had one, his wife had the other. Psychine not only cured both but it built them up so that their bodies are strong enough to resist disease. All seeds of consumption are killed by

## NURSES DID HEROIC WORK.

With that modesty which is as rare as is their heroism, three Boston nurses who ministered to more than a score of the injured in a railway accident in France, and by their courage and skill in a great emergency saved many from bleeding to death, have kept the French government and the grateful people of Paris, ignorant of their identity. For five hours and a half, after a wreck in which they miraculously escaped injury, these three nurses worked over the wounded. Only one doctor was available for four hours, and the task of saving the lives of the maimed men, women and children was undertaken and accomplished by these three young women.

Not for a second did they suspend the work of rescue. When the last of the sufferers was on the special train on the way to Paris these three young women went on board and nursed the wounded until doctors and nurses from the hospitals of Paris met the train in that city. When they left the train thousands of Parisians at the station who had heard of their heroism cheered them as the three American women their work done, hurried away.

Their train was late and was sidetracked at Eprenon, a small town about 50 miles from Paris, to allow an express to pass. Just as the train was taking the main line an engine and a car crashed into the rear end at the speed of 50 miles an hour. The locomotive ploughed through four cars, splintering the flimsily constructed coaches and came to a stop within a few inches of the partition of the compartment in which Miss Coleman, Miss Hogle and Miss Munroe were seated. The three young women were thrown back against the wall and a flying splinter wounded Miss Coleman's cheek.

Though the train had not stopped, the swaying of the car and crash of timber and cries of wounded behind them warned the Boston nurses of their work. Before the train came to a standstill Miss Coleman had climbed out of the compartment and assisted her two companions to alight.

Miss Coleman had in her hand her emergency case with stimulants and a hypodermic syringe. Without stopping to ascertain the extent of their own injuries, the three women went to the rescue of a man and woman who were pinned down by the roof of the car in which the nurses had been riding. They extricated them unassisted. Then the appalling task was before them. Ten had been killed and more than 20 seriously injured.

Miss Coleman speaks French and she was able to give directions to the railway employees and men of the village who came to the relief. She sent men searching for an emergency outfit of bandages which she knew must be in one of the cars, dispatched others for cushions to lay on the wet ground where the injured were being brought, and instructed more to collect all the blankets and rugs they could find. For 15 minutes no doctor appeared and during that time the three Americans were in complete charge of the relief work. Under their direction the injured were brought into the station and there the nurses worked, making tourniquets to stop hemorrhages and giving first aid to the injured. When the trainmen found the emergency chest with splints and bandages, the nurses were able to dress the wounds. They went from one patient to another, and as quickly as an injured person was brought in one of the nurses examined him at once to ascertain whether his case required immediate attention or he could await his turn.

The young women converted two rooms in the railway station and a cafe nearby into hospitals, and from 5 until 10.30 p. m. they worked incessantly to relieve the suffering, not pausing for any nourishment though they were suffering from the shock of the collision.

Miss Elizabeth Hogle is a daughter of the late W. A. Hogle, of Elmstown where her mother still resides.

## Catarrh of the Kidneys Not Always Recognized.

A Cold Settled in Kidneys.  
Causing Serious Trouble.  
Pe-ru-na Restores Health.

CATARRH of the kidneys is a very much neglected disease.

It is not until the disease has a firm hold upon the kidneys that the patient begins to realize that there is some derangement of these organs.

The slight backaches, the feelings of lassitude, and other warning symptoms of kidney disease are overlooked.

They are not serious enough to detain the patient from his regular work.

Even when he discovers that the kidneys are affected, he does not recognize the difficulty as being caused by catarrh.

Catarrh is sometimes so very gradual in its approach and its earlier symptoms cause such slight discomfort that it is not noticed.

However, when it is once firmly seated in the kidneys it becomes a difficult disease to exterminate.

Indeed, catarrh of the kidneys is more serious than catarrh affecting some of the other organs of the body.

In the kidneys it is liable to terminate in Bright's Disease or diabetes, both of which are recognized as very serious ailments, if not fatal.

The thing to be done, when catarrh of the kidneys is discovered, is to take some internal, systemic catarrh remedy, one that reaches the very source of the catarrh and removes the cause of the difficulty.

Such a remedy has been found in Peru-na. It reaches catarrh, no matter where it may be located in the body—whether in the more exposed membranes of the nose and throat, or whether in the remotest part of the kidneys.

That Peru-na is at once the safest and most reliable remedy for catarrh of the kidneys is proven by the many testimonials written by those who have experienced its benefits.

The testimonials given here are only specimens of the many testimonials on our records, pertaining to the relief afforded by Peru-na in severe cases of kidney trouble.

### Kidney Disease of Long Standing.

Mr. Samuel A. Paxton, 118 Third Ave., Kansas City, Mo., member I. O. O. F., and National Annuity Association, writes: "I am a well man today, thanks to Peru-na. I was troubled with catarrh and kidney disease of long standing when I first began using Peru-na."

### Widows.

Widows exist in all countries, thus counterbalancing the matrimonial decadence which might otherwise result from timid men. Widows are clinging by temperament and attach themselves readily to any object that can't help itself. It is generally considered unlucky to meet a widow on a dark piazza by the light of the moon. In many countries to be kissed by a widow means endless trouble. Widows are frequently accompanied by children, whose number is constantly liable to increase. They roam at large over the principal sections, and no man is safe when they are near. All the perfect men now dead have married widows, thus forming a continuous contrast to the miserable specimens who still live. It has been said "Beware of widows," but this is unnecessary, for no man can really help himself.—Life.

MR. ISAAC ROSENZWEIG.

Mr. Isaac Rosenzweig, 9 Dumarais street, Montreal, Can., writes:

"About three years ago, I suffered with a bad cold. It settled in the bladder and kidneys, causing serious trouble."

"I tried several advertised remedies, but it was Peru-na which finally cured me, and I had taken only a few bottles."

"I feel that it saved me, and it certainly restored me to such perfect health as I had not known in years."

"I have good reason to give your remedy my highest endorsement."

"I took it, and I was getting better and continued taking it for four months. It cleaned out the system leaving me well and strong and feeling better than I have in years."

### Rubbish Heaps.

In a thousand miles of Europe I saw but one rubbish heap—some old metal cans at Karlsruhe. Everywhere else was a complete absence of all waste or carelessness and, above all, of defacement and roadside uncleanness. The foul vacant lots and dirty dumps that abound in and about American towns are not to be found anywhere.—Exchange.

50c. Per Bottle

Larger sizes \$1 and \$2—all druggists.  
DR. T. A. SLOCUM, Limited, Toronto.

### Flexible Stone.

The stone looked like a piece of dark gray granite. It was a foot long and several inches thick. Lifted, it bent this way and that, like rubber. "It is bicolumite or flexible sandstone," said the owner. "It is found in California, Georgia and several other states. Besides bending, it will stretch. Look at it closely and you will see that it is formed of a number of small pieces of stone of various tints all dovetailed together loosely, so as to allow of a slight movement. This movement is what causes the stone to bend. See how it bends! Like rubber precisely, eh? But if I bend it too far it will break."

### His Specialties.

Captain Spencer of the Church army once asked a convict what he did for a living when he left prison. "Well, in spring I does a bit o' pea picking and in summer I does a bit o' fruit picking and in the autumn I does a bit o' 'op picking." "Yes," said the captain, "and what do you do in the winter?" "Well, mister, I may as well be honest with yer. In the winter I does a bit o' pocket picking!" Captain Spencer next asked, "And what happens then?" The convict replied, "Why, I comes 'ere and does a bit o' oakum picking!"—London News.

### Homestead Spencer.

When Herbert Spencer was a boy his father sent him away from home to school. The youngster became homestead and, with 2 shillings in his pocket, made his way home, over 120 miles, in three days, walking most of the way. He did forty-eight miles the first day and forty-seven on the second. On the third day a friendly coach driver took him most of the way for nothing.

### Mistook His Destination.

An editor of a western exchange recently began worrying about how he would get his shirt on over his wings after reaching paradise. An envious contemporary sarcastically observed that his difficulty would likely be in finding out how he could get his hat on over his home. (Gambler.)

after reaching paradise. An envious contemporary sarcastically observed that his difficulty would likely be in finding out how he could get his hat on over his horns.—Gayman (Kan.) Herald.

#### Relief at Last.

Housekeeper I hear your brother, who died in California, left you \$1,000, Dinah. That will be a great help to you. Washday! Doodie it will, miss! Ah! been needin' a plumb 'n' a phonograph an' a oil painted oil painting in a gilt frame for your room, bress de good Lord. Ah! kin help 'em!

Every man will do his own private affairs more difficult to control than any other affairs in which he may be engaged. Lord Melbourne.

Mr. Edward Sharpe and wife spent Saturday at Kingston.

Mr. Edward Smith and wife is spending a week at Maclean, visiting at Mr. Foster's.

Mrs. J. Dator is spending a few days at Tamworth visiting her parents, Mr. and Mrs. John Lott.

A great offer—The Napanee Express from now until January 1908 for \$1.00. Send your order early.

#### A Disadvantage of Health.

A visitor among the poor of the east end of London found unexpected testimony to the disadvantages of health in one of his calls. Mrs. B. had a family of a dozen children, and, like most of her class, she had her tale of woe to tell. "How are the children, Mrs. B.?" inquired the caller. "All very well, indeed, sir; very well, indeed," was the answer. "You ought to be thankful, I'm sure, with so much sickness about." "Yes, sir; I suppose I ought to be thankful; but, I tell you, when they're well they eat an awful lot."

Horse Blankets, a complete line of first-class blankets at right prices.

ows, thus forming a continuous contrast to the miserable specimens who still live. It has been said "Beware of widows," but this is unnecessary, for no man can really help himself.—Life.

#### Iron.

In an article on prehistoric iron the Industrial World states that during Roman occupation, from the middle of the first century to 411, England had a commercial iron industry, which has been continuous to the present time. The Spanish industry has been continuous from the thirteenth century or earlier. In the American colonies the first successful attempt at iron making was at Lynn, Mass., in 1645.

Established 1879

#### Whooping Cough, Croup, Bronchitis Cough, Grip, Asthma, Diphtheria

Cresolene is a boon to Asthmatics

Does it not seem more effective to breathe in a remedy to cure disease of the breathing organs than to take the remedy into the stomach? It cures because the air rendered strongly antiseptic is carried over the diseased surface with every breath, giving prolonged and constant treatment. It is invaluable to mothers with small children.

It cures a consumptive tendency and immediate relief from coughs or inflamed conditions of the throat.

Sold by druggists. Send postal for booklet. LEWIS & CLARK CO., Limited, Agents, Montreal, Canada.

Two Feet in Stockings

## SHAPE GIVING

ONE OF THE 14

A homely foot can be made handsome by clever dressing. This is true of the face and the figure; why not of the foot?

Being copies of Perfect Feminine Feet the Dolly Varden is a shape giving shoe. It will not succeed in giving to every foot all of the delicate shape and smartness of the perfect Human Foot from which it was copied. We could not claim so much as that. But we do claim that in seven cases out of ten the Dolly Varden shoe will give the foot of its wearer most of the clever lines and exquisite form of the original chef d'oeuvre from which it is a replica.

Is it worth while trying on a few pairs to ascertain what effect they may have on the appearance of your feet? Is it worth while to gamble a little time which may perhaps convert foot homeliness to foot smartness? Purchasers or investigators equally welcome. In both Canada and the States—\$3.50 and \$4.00. Every pair Goodyear Welted.

Exclusive Agency,

FRED. CURRY, Napanee's Leading Boot Shop.

## IS AVOIDED

from Women Who Avoided  
—Many Women Suffering  
s Will Be Interested.

pleased that I did so, for it restored me to perfect health, saving me the pain of an operation and the immense bills attending the same. Pray accept my hearty thanks and best wishes.

Miss Margaret Merkley of 275 3d Street, Milwaukee, Wis., writes:

Dear Mrs. Pinkham:—

"Loss of strength, extreme nervousness, severe shooting pains through the pelvic organs, cramps, bearing down pains, and an irritable disposition compelled me to seek medical advice. The doctor, after making an examination, said that I had a serious female trouble and ulceration, and advised an operation as my only hope. To this I strongly objected, and I decided as a last resort to try Lydia E. Pinkham's Vegetable Compound.

"To my surprise the ulceration healed, all the bad symptoms disappeared, and I am once more strong, vigorous and well; and I cannot express my thanks for what it has done for me."

Serious female troubles are steadily on the increase among women, and before submitting to an operation every woman should try Lydia E. Pinkham's Vegetable Compound, and write Mrs. Pinkham, at Lynn, Mass., for advice.

For thirty years Lydia E. Pinkham's Vegetable Compound has been curing the worst forms of female complaints, all functional troubles, inflammation, ulceration, falling and displacement, weakness, irregularities, indigestion and nervous prostration. Any woman who could read the many grateful letters on file in Mrs. Pinkham's office would be convinced of the efficiency of her advice and Lydia E. Pinkham's Vegetable Compound.

Woman Best Understands a Woman's Ills.

# A LEADER

This is what **COLTSFOOTE EXPECTORANT** is among cough remedies.  
**"It leads, others follow."**  
 A safe and permanent cure for Colds, Coughs, Croup, Whooping Cough, Asthma, Throat and Lung troubles.  
 This famous remedy has been produced by the highest medical knowledge and is the result of years of careful experimenting.  
 Your druggist not only keeps it, but recommends it.

Price, 25 cents.

## COLTSFOOTE EXPECTORANT

### WHAT LIFE IS COMING TO.

"Darling, can I have a new dress?"  
 As she spoke, the head of the house, who was playing the part of her lord and master, looked at his wife reproachfully.

"Did you not," he observed severely, "take the fashion pill I left for you this morning?"

"N-no," she faltered, "I forgot it."  
 "Then take it at once, and be cured of the new dress habit. I'm going down to the club."

It was her turn now.  
 "To the club," she repeated triumphantly. "And so, dear, you, too, have been remiss. Did not the doctor when he called last week order you to take an anti-club capsule after each meal?"

Her husband avoided her gaze.  
 "Forgive me, darling, he murmured, as he went obediently to the medicine-chest, and did as she desired.

"By the way," he continued, presently, "is that young man calling upon our daughter Penelope yet?"

"Yes; she expects him to-night."  
 "Then tell her to take those anti-spooning tablets. And how is the baby?"

"Splendid. Since the doctor gave him the non-destructive drops, I have kept him in the drawing-room. The cook was going to leave this morning, and I gave her a big dose of staying solution, and she swears now she'll never leave me."

There was a sudden ring at the door. The maid came up.

"A man to collect this bill, sir."  
 Husband and wife smiled serenely.

"Here, Jane," she said, "tell him to take one of these pills every hour until the impulse to collect that bill has left him entirely."

### MINING IN ROSSLAND.

The Rossland Miner says: "Le Roi 2 has just declared an interim dividend of two shillings a share on its issued capital stock, amounting to \$60,000. The virgin ground," says The Miner, "owned by the company, and particularly the 'Annie,' is believed to carry at least one of the Le Roi ledges, and is valuable. There is," it adds, "a lot of unexplored ground which is thought to be rich, and when exploited should yield good results." Commenting on the above, a prominent local mining man points out that the Annie Mine and White Bear Mine adjoin, and are surrounded by the California Giant and Novelty on one side, with Le Roi 1 and Black Bear on the other; the latter now being the property of Le Roi. He expresses the opinion that this locality contains rich ore, and will yet produce some startling mining sensations, as the richest ore ever taken out has been from this section.

The grandmother of a well-known financier, having reached the age of ninety-nine years and eight months,

### FULFILLMENT OF A DREAM.

#### Lost Child's Body Found After Twelve Months.

The skeleton of Edwin Pincott, the 3-year-old boy who disappeared from his home at Abertillery, North Wales, on August 25, 1905, was found on the mountain side between Abertillery and Blaenavon recently.

A farmer named Parker was riding in search of some sheep by a clump of gorse which he had passed repeatedly before, and in which he had noticed what he took to be a bundle of rags, when the conduct of his dog induced him to make a closer examination.

Among the gorse he found the skeleton of the boy, with some fragments of clothes adhering to it. Only the boots were perfectly preserved.

Mr. Parker informed the police, who removed the skeleton to the police station, and told the parents of the discovery. They immediately identified what was left of the clothes.

Mrs. Pincott had dreamed several times lately that her boy was brought to her in a bath, and strangely enough, it was in a bath that the police removed the skeleton from the mountain to the police station.

The child had been given to wandering before his disappearance. He went to school as usual on the afternoon of August 25, but from the time he left he was never seen alive again.

Search parties scoured the neighborhood for days. On one occasion more than 6,000 miners gave up their work to look for the missing child, but no trace of him could be found.

Eventually bloodhounds were employed, and one of them started off in the direction of the spot where the skeleton was found, but after a time he refused to work.

The search was abandoned after many days, and the opinion prevailed in the district either that the child had fallen down a fissure in the mountains or a disused mine shaft, or that he had been kidnapped by gypsies.

## LACK OF ENERGY.

### A Common Trouble Among Growing

Boys—A New Blood Supply is

Needed—Dr. Williams' Pink

Pills Actually Make New

Blood.

There are thousands of young men just approaching manhood who have no energy, who tire out at the least exertion, and who feel by the time they have done their day's work as though the day was a week long. In some of these cases there is a further sign of warning in the pimples and disfiguring eruptions which break out on the

# DARE HE?

## OR, A SAD LIFE STORY

### CHAPTER IV.

In a ripe civilization such as ours there are formulas provided to meet the requirements of every exigency that may possibly arise; but amongst them there is not one which teaches us how to greet a person come back from the dead, because it is held impossible that such a contingency can occur. Perhaps this is the reason why Jim Burgoyne, usually a docile and obedient member of the society to which he belongs, now flies in the face of all the precepts instilled into him by that society's code. At sight of Elizabeth Le Marchant entering the room, clad in a very neat tailor gown, instead of the winding-sheet with which he had credited her, he at first stands transfixed, staring at her with a hardness of intensity which is allowed to us in the case of Titian's "Bella," or Botticelli's "Spring," but has never been accounted permissible in the case of a more living loveliness. Then, before he can control, or even question the impulse that drives him, it has carried him to her.

"Elizabeth!" he says, in that sort of awed semi-whisper with which one would salute a being plainly returned from the other side, fearing that the fullness of a living voice might strike too strongly on his disused ear—"is it really Elizabeth?"

Had Burgoyne been quite sure, even now, of the fact; if he had his wits well about him, he would certainly not have addressed her by her Christian name. But from the dead the small pomps and ceremonies of earth fall off. We think of them by their naked names—must we not then appeal to them by the same when they reappear before us?

The girl—for she does not look much more—thus rudely and startlingly bombarded, drops her Baedeker out of her slim gloved hand, and with a positive jump at the suddenness of the address, looks back apprehensively at her interlocutor. In her eyes is, at first, only the coldly frightened expression of one discourteously assailed by an insolent stranger, but in a space of time as short as had served him to note the same metamorphosis in the case of her parents, he sees the look of half-three-quarters—whole recognition down in her eyes, followed—alas! there can be no mistake about it—by the same aspiration after flight. There is no reason why she should not recognize him again at once. He has fallen a prey neither to hair nor fat—the two main disguisers and disfigurements of humanity. His face is as smooth and his figure as spare as when, ten years ago, he had given the pretty tomboy of sixteen lessons in jumping the Ha! Ha! And as to her identity, no shadow of doubt any longer lingered in his mind.

The violence and shock of his attack have made her crimson, have matched her cheeks with those long-withered damasks in the Moat garden, with which they used to vie in bloomy vividness. But even yet he does not treat her quite as if she were really and veritably living; he has not yet got back his conventional manners.

"I thought you were dead," he says, his voice not even yet raised to its ordinary key, some vague awe still subduing it.

It must be a trick of his excited

advent he had hailed so joyfully, had vanished out of Mrs. Le Marchant's voice, or, at least, is overlaid with a species of stiffness, as she answers distantly, "we do not intend to go out at all in Florence—I mean into society."

"But I am not society," replies he chilled, yet resolute. "I wish"—glancing rather wistfully from one to the other—"that I could give you a little of my memory. If I could, you would see that, after being so infinitely good to me at the Moat, you cannot expect me to meet you as total strangers now."

In the sense of ill-usage that fills his breast the fact of how almost entirely oblivious he had been of the persons before him, during the greater part of the long interval that had parted them, has such a human nature—quite slips his recollection. It is brought back to him in some degree with a twinge by Mrs. Le Marchant saying in a relunctant tone, and with an accent of remorse "and you have remembered us all these years."

He cannot, upon reflection, conscientiously say that he has; but is yet disinclined enough to allow a speaking silence to imply acquiescence.

"And you are on your way to Florence, too?" continues she, mistaking the cause of his dumbness; the tide of compunction evidently settling more strongly towards him, in her womanly heart, at the thought of the entire want of interest she has manifested in the case of one whose long faithfulness to her and her family had deserved a better treatment.

"Yes."  
 His face clouds so perceptibly as he pronounces this monosyllable, that his interlocutor inquires, with a growing kindness—

"Not on any unpleasant errand, hope?"

He laughs the uneasy laugh of an Anglo-Saxon obliged to tell, or at all events telling, some intimate detail about himself.

"I am going to see my young woman—the girl I am engaged to."

"Well, that is a pleasant errand surely?" (smiling).

"C'est selon," replies Jim, gloomily. "I have a piece of ill-news to tell her; then, with a half-shy effort to escape into generalities, 'which way do you think that ill-news reads best—on paper or viva voce?'"

She shivers a little.  
 "I do not know. I do not like it either way."

Then, taking out her watch, with the evident determination to be surprised at the lateness of the hour, she cries, "I am actually a quarter to two! Are no you famished, Elizabeth? I am!"

There is such apparent and imminent departure in her eye that Burgoyne feels that there is no time to be lost.

"Have you decided upon your hotel in Florence?" he asks precipitately.

"We have decided against them all," is her answer. "We have taken a little apartment—a poor little entresol; but it is such a poor little one, that I should be ashamed to ask any of my friends to come and see me there."

She accompanies the last words, as if to take the sting out of them, with a sweet and friendly a smile as any he remembers in the days of his youth.

section.

The grandmother of a well-known financier, having reached the age of ninety-nine years and eight months, feeling very weak one morning, sent for her doctor, and asked him if he thought she would attain the age of one hundred. "Well, madam," he replied, "you may depend upon my doing my best." "Oh, do," replied the old lady; "I should so like to reach par."

Do Not Delay.—When through debilitated digestive organs, poison finds its way into the blood, the prime consideration is to get the poison out as rapidly and as thoroughly as possible. Delay may mean disaster. Parmelee's Vegetable Pills will be found a most valuable and effective medicine to assuage the intruder with. They never fail. They go at once to the seat of the trouble and work a permanent cure.

"Will you grant me one last favor before I go?" asked the rejected suitor. "Yes, George, I will," she said, dropping her eyelashes and getting her lips into shape. "What is the favor I can grant you?" "Only a little song at the piano, please, I am afraid there is a dog outside waiting for me, and I want you to scare him away."

A FIRE SPREADS in dry grass, so does an inflammation in the throat grow down into the lungs. Deal promptly with a cold as with a fire, and when you begin to cough use Allen's Lung Balm.

If, as the newspaper reports would have us believe, all brides are beautiful, where do all the homely married women come from?

Is there anything more annoying than having your corn stepped upon? Is there anything more delightful than getting rid of it? Hickey's Corn Cure will do it. Try it and be convinced.

It generally makes a man read to have people compliment him upon his success, and then add that they cannot understand it.

NO SUBSTITUTE for "The D & L. Menthol Plaster, although some unscrupulous dealers may say there is. Recommended by doctors, hospitals, clergy and everybody, for stiffness, pleurisy, etc.

A Time for Everything.—The time for Dr. Thomas' Electric Oil is when crampy symptoms appear in the child; when rheumatic pains beset the adult; when lambrago, asthma, coughs, croup, colds or canker attack either young or old; when burns, scalds, abrasions, contusions or sprains come to any member of the family. In any of these ailments it will give relief and work a cure.

A wife judge, whose personal appearance was as unimpressive as his legal knowledge was profound and his intellect keen, interrupted a female witness. "Humbugged you, my good woman! What do you mean by that?" said he, sternly. "Well, my lord," replied the woman. "I don't know how to explain it exactly, but if a girl called your worship a handsome man she would be humbugging you."

exertion, and who feel the time they have done their day's work as though the day was a week long. In some of these cases there is a further sign of warning in the pimples and disfiguring eruptions which break out on the face. These are certain signs that the blood is out of order, and unless it is promptly enriched, a complete breakdown, or perhaps consumption may be the result. All these young men should take Dr. Williams' Pink Pills. These pills actually make rich, red blood, clear the skin of pimples and eruptions and bring health, strength and energy. Here is a bit of proof. Adolphe Rolland, St. Jerome, Que., is a young man of 19 years, who says: "For more than a year I suffered from general weakness, and I gradually grew so weak that I was forced to abandon my work as a clerk. My appetite failed me, I had occasional violent headaches, and I began to suffer from indigestion. I was failing so rapidly that I began to fear that consumption was fastening itself upon me. Our family doctor treated me, but I did not gain under his care. I was in a very discouraged state when a friend from Montreal came to see me. He strongly advised me to try Dr. Williams' Pink Pills. I did so and inside of three weeks I began to feel better, my appetite began to improve and I seemed to have a feeling of new courage. I continued the pills until I had taken ten boxes and I am now enjoying the best of health I ever had. My cure surprised many of my friends who began to regard me as incurable, and I strongly advise other young men who are weak to follow my example and give Dr. Williams' Pink Pills a fair trial."

There is no mystery about the cures Dr. Williams' Pink Pills make. These pills actually make rich, red blood, which braces and strengthens every organ and every nerve in the body. That is why these pills cure all common ailments like anaemia, rheumatism, indigestion, neuralgia, St. Vitus dance, headaches and backaches and the special ailments of women and growing girls. You can get these pills from any dealer in medicine or from The Dr. Williams' Medicine Co., Brockville, Ont., at 50 cents a box or six boxes for \$2.50.

#### CHARACTER AND THE EYES.

Character reading from the features is a very fascinating study, and the eyes are, perhaps, the most interesting subject of all. Large clear blue eyes denote a ready and great capacity, also sensibility of character, but their owner is difficult to manage, jealous, inquisitive, and fond of enjoyment. Deep-set eyes receive impressions accurately, definitely and deeply. Round-eyed persons live much in the senses, but are not great thinkers, although they see much. Narrow-eyed people see less but think more, and feel with greater intensity. Now, as to color. "The hazel-eyed woman never tells too much or too little, never descends to scandal, prefers her husband's comfort to her own, and is shrewd, intellectual and loving. Great thinkers have grey eyes, for grey is the color of talent and shrewdness, but these generally indicate a better head than heart. Green eyes betoken courage, pride, and energy. Black eyes show a peppery disposition, and may be, sometimes though not always, treacherous. Men have light eyes oftener than women, but the percentage of brown and hazel eyes, neither pure light nor genuine dark, is very nearly the same in both sexes.

#### JAPANESE "PENS."

The pens used by the children of Japan consist of bamboo and rabbits' hair. The pen itself is a tiny brush of hair tied to the end of a bamboo stick. It does not seem possible that writing under such circumstances could be good, but Japanese children really write very well indeed.

his conventional manner. "I thought you were dead," he says, his voice not even yet raised to its ordinary key, some vague awe still subduing it.

It must be a trick of his excited imagination that makes it seem to him as if she said under her breath, "So I am!"

But before he has time to do more than distrust the testimony of his ears, Mrs. Le Marchant strikes in quickly—

"We cannot help what Mr. Burgoyne thinks," says she, with a constrained laugh; "but you are not dead, are you, Elizabeth? We are neither of us dead; on the contrary, we are very much alive. Who can help being alive in this heavenly place? And you? When did you come? What hotel are you at? Have you been here long? Do you make a long stay?"

She pours out her questions with such torrent-force and rapidly, as gives to her auditor the conviction that it is her aim to have a monopoly of them.

After one look of unbounded astonishment at his companion's onslaught, Byng has withdrawn to a discreet distance.

"You never mentioned her when I met you in Oxford," says Burgoyne, disregarding her trivial and conventional questions; and turning his eyes away with difficulty from his old playfellow. Mrs. Le Marchant laughs again, still constrainedly.

"Probably you never asked after her."

"I was afraid," he says, solemnly; "after ten years one is afraid; and as you did not mention her—you know you mentioned all the others—I thought you had lost her!"

A sort of slight shiver passes over the woman's frame.

"No, thank God! No!"

During the foregoing little dialogue about herself, Elizabeth has stood with her eyes on the ground; but at the end of it she lifts them to smile lovingly at her mother. They are very pretty eyes still, but surely they seem to have cried a good deal, and now that the hurrying blood has left her cheek again, Burgoyne sees that she looks more nearly her age than he had imagined at the first glance. He has not heard her voice yet; she has not spoken, unless that first shaken whisper—so much more likely to be the freak of his own heated fancy—could sound for speech. He must hear her tones. Do they keep an echo of the other world, as he still imagines that he sees a shade from it lying lingeringly across her face?

"Do you ever climb apple-trees now?" he asks abruptly. She starts slightly, and again, though with a weaker red wave, her rather thin cheek grows tinged.

"Did I ever climb them?" she says, with a bewildered look, and speaking in a somewhat tremulous voice. "Yes,—slowly, as with an effort of memory—" "I believe I did."

"You have forgotten all about it," cries Jim, in an accent of absurdly disproportionate disappointment. "Have you forgotten the kangaroo, too? Have you forgotten everything?"

Perhaps she is putting her memory to the same strain as he had done his in the case of her mother's name on the occasion of their Oxford meeting. At all events, she leaves the question unanswered, and the elder woman again hurries to her help against this persistent claimant of reminiscences.

"You must not expect us all to have such memories as you have," she says, with a touch of friendliness in her look. "I must own that I too had quite forgotten the kangaroo; and so I fear had Robert, until you reminded us of it in Mesopotamia."

"How is Mr. Le Marchant?" inquires Jim, thus reminded to put his tardy query—"is he with you?"

"No, he is not very fond of being abroad; it is not"—smiling—"dear abroad" to him, but I think he will very likely come out to Florence to fetch us."

"You are going to Florence?" cries the young man eagerly. "So am I! Oh, hurrah! then we shall often meet."

But the touch of friendliness, whose

be ashamed to ask any of my friends to come and see me there."

She accompanies the last words, as if to take the sting out of them, with as sweet and friendly a smile as any he remembers in the Devonshire days. But the sting is not taken out all the same; it lingers, pricking and burning still, after both the tall, thin, black figure, and the slim, little grey one have disappeared.

The moment that this is the case, Byng rejoins his friend, a curiosity and alert interest in his young eyes, which his companion feels no desire to gratify. He is unable, however, to maintain the entire silence he had intended upon the subject, since Byng, after waiting for what, to his impatience, appears a more than decent interval, is constrained to remark—

"Did I hear you tell that lady, when first you spoke to her, that she was dead?"

"I thought she was."

"Had you heard it?"

"No."

"Did you see it in the papers?"

"No."

A pause.

"I wonder why you thought she was dead?"

The other makes a rather impatient movement.

"I had no reason—none whatever. It was an idiotic inference."

Byng draws long breath of satisfaction.

"Well, at all events, I am very glad that she is not."

Jim turns upon him with something of the expression of face worn by Mrs. Sarah Gamp on hearing Mrs. Prigg express her belief that it was not by Mrs. Harris that her services would be required. "Why should you be glad of that, Betsy? She is unbeknown to you except by hearing. Why should you be glad?"

As Byng's case is a more aggravated one than Mrs. Prigg's, seeing that Elizabeth Le Marchant is unbeknown to him even by hearing, so is the warmth, or rather coldness, with which his friend receives his remark not inferior to that of "Sairey."

"I do not quite see how it affects you. Why are you glad?"

"Why am I glad?" replies the younger man, with a lightning eye. "For the same reason that I am glad that Vandeyke painted that picture"—pointing to it—"or that Shakespeare wrote 'As You Like It.' The world is the richer by them all three."

But to this poetic and flattering analogy, Jim's only answer is a surly "Humph!"

### BROWN GOT HIS RISE.

In a certain large business house the chief is a very busy man indeed, and at the same time a very peppery individual. So large is his concern that it is quite impossible for him to keep in touch with the many details of his business, and one of the departments he leaves to his manager is the payment of his clerks.

But about a month ago one of his young men bearded him in his den and broached the subject of an increase in salary. His wages had stood at \$750 a year too long to please him.

"All my clerks are paid what they are worth to me," snapped the old man, "and I look upon your application as a piece of impertinence! What salary are you getting now?"

A happy thought struck the clerk. "Twelve hundred and fifty a year, sir," he said.

"Um!" replied the old man. "Well, that is all I have to say to you. Send in the manager!"

The manager entered shortly afterwards.

"Make Brown's salary \$1,000 a year," said the "governor." The manager was about to offer an explanation. "Do as I tell you!" thundered the old man. "I'll teach the young upstart to dictate to me what salary to pay my people!"

### TATTOOED LADY THIEF.

Lady Burglars Provide Gay Paroe With New Sensation.

Paris has enjoyed a new sensation in the capture of two female burglars who have recently been making good hauls in the wealthy parts of the city. Plain clothes officers told off to watch had their suspicions aroused at the sight of two creatures in long workmen's blouses, with black caps pulled well down to hide the face as much as possible, slinking out of a house. They were carrying odd-looking bundles, and when questioned one threw aside a set of burglar's tools and made a dash for it. After a lively struggle they were secured, and the police were dumfounded to discover they had captured two women. One was a big strapping lass, and her body was tattooed all over with emblems of love, such as hearts pierced with arrows. She was armed with an ugly looking dagger and a revolver loaded with chewed bullets, a favorite device of the expert French criminal, as the bullet causes a nasty, jagged wound. She had buried her teeth in the neck of one of the detectives before she was finally overpowered. These two viragoes found shelter in a discarded travelling van on the outskirts of the fortifications, and on its being ransacked a great deal of stolen property was discovered and about \$25 in money. Their object was to obtain money for two male friends undergoing ten years' penal servitude.

### WEEPING WEDDINGS.

A Chinese marriage is all ceremony—no talk, no levity, and much crying. The solemnity of a funeral prevails. After the exchange of presents the bride is dressed with much care in a red gown, brocade or silk. If she can get it; her eyelashes are painted a deep black, and she wears a heavy red veil attached to a scarlet head-dress, from which imitation pearls are pendant over the forehead. A feast is spread upon a table, to which the blushing bride is led by five of her best lady friends. The utmost silence prevails, when finally the mother leads off in a cry, the maids follow, and the bride echoes in the chorus. Then all the bridesmaids leave the table, and the disconsolate mother takes a seat beside the chair of state where the bride sits. The bridegroom now enters, with four of his best men. The men pick up the throne on which the bride sits and, preceded by the bridegroom, form in procession and walk round the room or into an adjoining one, signifying that he is carrying her away to his own home. The guests then throw rice at the couple—a custom we have borrowed—and the ceremony is over.

### WHITE BEAR'S PROGRESS.

In its issue of the 15th inst. The Rossland Miner says: "Two cars have been spotted at White Bear Mine, and these will be loaded to-day or to-morrow for shipment to the Granby. The ore is that taken out in the course of development. The work of developing and making available the ore shoots found on the 700, 850 and 1000 foot levels continues. The shoot on the 1000-foot level is the largest yet found."

### PRAISING THE DEAD.

"Why is a great man more appreciated after he is dead?"

"He is not more appreciated," answered Senator Sorghum. "He is more freely complimented because he is less feared by envious rivals."

### ♦ BABY'S GOOD DAYS. ♦

One of baby's good days means that your child is thriving and well. Baby's Own Tablets brings all good days into your child's life, for they make little ones well, and keep them well. Mrs. Jos. Ferland, St. Tile des Caps, Que., says:—"Since giving my little one Baby's Own Tablets she has been in splendid health, is growing plumper every day and has beautiful rosy cheeks." These Tablets cure indigestion, colic, constipation, simple fevers, teething troubles, and all the minor ailments of little ones. They do not contain one particle of the poisonous opiates found in all soothing medicines and most liquid preparations. The Tablets can be given with absolute safety to the babe just born, as well as the child of advanced years. Sold by all medicine dealers or sent by mail at 25 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

### ♦ NO OLD MAIDS IN RUSSIA. ♦

The idea is still allowed to prevail in Russia that single life is a disgrace to women, for there are no old maids except in the religious orders. If the parents cannot arrange a marriage for the daughter she makes a journey, and is thus lost to the gossiping community. Soon reports are circulated of her marriage to a foreigner. Long absence brings forgetfulness, so that when the story is told of the death of the foreign husband in a strange land there are few who care to inquire further. Indeed, it is a breach of etiquette to suggest doubts under such circumstances, and the woman finally returns as a broken-hearted widow. She has met the conditions of the country, and she is no longer a single person in society. Thus the fiction of "no unmarried women" is preserved in the domain of the Tsar.

Unless washed with great care, black stockings soon turn a greenish color. They should be washed with soap that is free from soda and rinsed in water to which a teaspoonful of vinegar has been added. When damp, press them into shape, but do not iron, as the heat tends to destroy the color.

Prevent Disorder.—At the first symptoms of internal disorder, Parmelee's Vegetable Pills should be resorted to immediately. Two or three of these salutary pellets, taken before going to bed, followed by doses of one or two pills for two or three nights in succession, will serve as a preventive of attacks of dyspepsia and all the discomforts which follow in the train of that fell disorder. The means are simple when the way is known.

"I don't think I'll let my daughter marry you, young man." "Why not, sir?" "Well, you have somewhat expensive tastes." "How do you know that?" "Why, you want to marry my daughter."

A LITTLE QUIET is the best of all diet, yet it will not make bone and muscle but "Ferrovin" will. Try it. All drug and general stores. \$1 bottles.

"That new farm-hand of yours used to be a clerk." "What makes you think so?" "Every time he stops work for a minute he tries to put the pitchfork behind his ear."

Worms cause feverishness, moaning and restlessness during sleep. Mother Graves' Worm Exterminator is pleasant, sure and effectual. If your drug-gist has none in stock, get him to procure it for you.

"Your mother-in-law accuses you of stealing her trunk." "What have you to say?" "Your honor, I simply hid her trunk; I was so afraid she'd leave us." He was given eighteen months—six for stealing and twelve for lying.

ONE OF THE BEST old time remedies for all skin affections, such as Eczema, Ringworm, Scald-head and similar affections is Weaver's Cerate. It is an ointment that has brought relief to thousands.

She: "Has your health improved since you've been abroad?" He: "Oh, yes, thanks. I'm quite a different man." She: "I'm sure your friends will be glad to hear it."

Do not let a cold settle on your lungs. Resort to Bickle's Anti-Consumptive Syrup at the first intimation of irritation in the throat and prevent disease from lodging in the pulmonary organs. Neglected colds are the cause of untold suffering throughout the country all of which could have been prevented by the application of this simple but powerful medicine. The price, 25 cents, brings it within the reach of all.

The hungry individual entered the restaurant and ordered a lamb-chop. After a long delay the waiter returned, with a chop of microscopic proportions. "I say," called the customer, "I ordered a chop." "Yes, sir; there it is." "Ah, so it is," replied the diner, peering at it closely. "I thought it was a crack in the plate."

## A THERAPEUTIC ADJUNCT

### SLEEPERS OPERATED UPON WHILE HYPNOTIZED.

### Woman Has Abscess Taken From Her Breast During Hypnotic Sleep.

Remarkable instances of the use of hypnotism in ordinary medical practice by Mr. Douglas Bryan, M.R.C.S., of Leicester, England, are described by him in the "Medical Times and Hospital Gazette."

The success attained leads him to believe that hypnotism and hypnotic suggestion, so little recognized by the greater number of medical men, are a thoroughly legitimate and valuable therapeutic adjunct.

In each case, of course, the patient consented to be hypnotized. One instance was that of an operation performed on a lady, aged thirty, for an abscess of the breast while she was in the hypnotic sleep. On being awakened she asserted she had felt no pain and remembered nothing of the operation. Healing was effected quite normally in about a week.

### REMARKABLE CURE.

A case of extreme interest was that of a married woman, aged twenty-four, who proved an excellent subject for hypnotic suggestion, and was brought safely through the ordeal of confinement while in a deep hypnotic sleep. Once, after about a quarter of an hour, the patient roused, but Mr. Bryan again induced sleep easily, and now took the precaution, which he had before neglected, of suggesting at intervals that she should keep asleep and feel no pain.

She so remained for a considerable time, and was not awakened by the medical man until twenty minutes after

## A SNAP IN A WHEAT FARM

### NEAR WINNIPEG.

1,066 acres of clean unbroken prairie the finest wheat land on earth, on the banks of the Red River, 45 miles from Winnipeg, four miles from two railway stations. \$15 an acre takes it, \$5,000 cash, balance easy. No better farm, no better investment.

**WAUGH & BEATTIE,**  
12 Merchants Bank Building,  
Winnipeg, Man.

the child's birth. She roused immediately, said she felt quite comfortable and remembered nothing subsequent to the induction of sleep except the circumstances that happened during her momentary awakening. Her cataleptic condition was most useful, Mr. Bryar records, and facilitated his duties.

PULSE AT 120.

A man aged forty was brought to him for treatment by hypnotic suggestion for dipsomania. He was just getting over a three days drinking debauch and was in an extremely nervous and trembling condition. His pulse was beating at the rate of 120 per minute. He complained of excessive discomfort about the cardiac region and palpitation.

"I told him he would soon feel better, and succeeded in getting him into a light sleep. I made suggestion: regarding the cardiac discomfort, etc., and that the pulse should become slower. He roused of his own accord in about one and a half minutes, waking with a start. I immediately took his pulse again, and found it beating 88 to the minute. All feelings of discomfort had disappeared and did not return, his astonishment at the result being marked."

"I have good hopes," the writer adds "of eventually curing him of dipsomania."

Insomnia was another malady which the writer treated in the case of a woman by hypnotic suggestion.

### TWO PECULIAR ACCIDENTS.

### Falls That Destroy and Restore Woman's Power of Seeing.

A strange case of sight which was destroyed by one accident being restored by another is reported from Leeds, England. One day twenty-two years ago, when Maria Louisa Good year of Headingly was employed as a machinist, her stool was pulled from under her by a fellow worker, and when she fell she struck on her head. The force of the blow caused pressure of the skull on the optic nerves and she lost her sight.

Twelve years later she fell down a flight of steps. A medical man who was called in said she had shaken the optic nerve and declared that if he could give her a blow on the head her sight might be restored. He dared not try the experiment, however, as it might jeopardize her reason.

Now Miss Goodyear has fallen down a flight of stairs again. The fall was followed by severe pains in her head and the sudden return of her sight. Her sight is now excellent.

## YOUNG FOLKS

### A USEFUL GOWN.

All the shop windows in town are full Of silk, and cotton, and gingham, and wool, But none of them shows a gown so gay As Mrs. Humming Bird wears to-day: The very same fashion her grandmother wore, It has not a seam, or a pucker, or gore; The sun will not fade it, the rain will not spot, It is just the thing, chilly weather or hot. A perfect fit, and it will not wear out, But will last as long as she lives, no doubt.

### THE COW'S TAIL.

A few pale beams from the morning sun filtered through the shutter of the room where Tommy slept, and hovered over his eyelids.

He dimly heard Mary saying to his little cousins in the next room, "Come, children! Time to get up! Nobody wants to be the 'cow's tail' this morning!"

Then there was a rush and a scramble to see who could get dressed first, and very once in a while some one would call "Cow's tail! always behind!" to a little brother or sister who could not "button up" quite so quickly.

I cannot tell you how much Tommy heard of their merry chatter, for he had been very tired from his long journey to his uncle's country home the night before, and felt as though he could sleep forever.

So after the first call he muttered a drowsy "Ye-es," and—then turned over. But the words he had heard kept running through his head in the oddest way—"Cow's tail—cow—cow—that-jumped-over-the-moon—!" And behold! There she lay in front of him in the middle of a large green meadow.

"Why, how big she is!" he said, as he walked nearer.

"Of course! What else did you expect of a cow that can jump over the moon?"

He looked for the owner of the little tinkling voice that said this; and there, in the middle of a large red poppy that was part of a garland round the cow's neck, sat the daintiest little flower fairy imaginable.

"Does—does she do it yet?" asked Tom, astonished.

"Yes, indeed! It's her favorite pastime. I wouldn't be here if it weren't. You see, it's this way," he went on—"you've often heard of the little moon fairies that come sliding down on the moonbeams every night to pay us a visit. Of course we're always glad to see them, and do our best to give them just as good a time as we can in our earth world."

"But you will acknowledge that it was hardly fair for them to visit us, and then for us not to be able to return their visits. But so it was, until Mistress Cow here offered her services, providing we kept her decorated with flowers. For—just turn this way" and he actually lit on Tom's shoulder and whispered into his ear—"she's very proud of her appearance—Mistress Cow is."

"The only trouble is," he said, as he nimbly hopped back again, "we can't stay any time, for she won't stop, but just sails right over; so it's 'How-do-you-do' and 'Good-by' all at once. But come along and see for yourself. Just jump right up here near her neck. As long as you're not afraid you can't fall. That's the rule in Fairyland."

While Tom stood looking at him, with wide-open eyes of wonderment, the cow suddenly gave a spring, and he only had time to grasp her tail before she rose up, and up, into the blue sky.

"Cow's tail! always behind!" a taunting voice came faintly back to him.

## BRITISH SAILORS MUTINY.

Scenes of Violence at Barracks at Portsmouth.

A despatch from London says: Insubordination among the naval stokers quartered at Portsmouth barracks led to stormy scenes on Sunday night, but nothing serious happened, and the trouble seemed to be over. It broke out again late on Monday night. The stokers, reinforced by hundreds of others, stormed the officers' quarters, smashed windows and did other damage, meanwhile cursing the officers. Armed marines and constables were hastily called out. They surrounded and hastily penned the rioters in the barracks square, where hundreds of them were arrested. Some officers were assaulted, and a number of constables were wounded by stones. Only the fact that the rioters were without weapons prevented a bloody fight. An ugly spirit is still abroad.

The outbreak was due to the following cause. The men had assembled in the gymnasium. When the senior officer, a man of short stature, wishing to administer a reprimand for breach of discipline, ordered the front ranks to kneel so that he could see the men in the rear, the order was resented, and some of the sailors who refused to obey were arrested. Their comrades, aggrieved, ran amuck, wrecked the canteen and other premises, started to break out of barracks with the intention of wrecking the quarters of the obnoxious officer, and were only prevented from so doing by the fixed bayonets of an overwhelming force. A number of the men who attempted to break out of barracks also were arrested.

## A NEW SILVER FIELD.

An Important Discovery in the Temagami District.

A despatch from Toronto says: A new silver field district and at a considerable distance from that of the Cobalt district is the possibility opened up by the finding of silver in the Temagami forest reserve. The discovery was made at a point in the southwest angle of the township of Auld, where twelve claims have been already staked, all but one of them on discoveries of cobalt. The exception is a claim held by the White Brothers of Muskoka, and it is reported to contain large quantities of native silver, similar in quality to that of the La Rose and Nipissing properties in the cobalt area. The White Brothers broke several specimens from a thirty-pound lump of ore on top of a silver vein, and these were found to contain a large percentage of native silver. If the unofficial reports as to this new body of ore are correct, it is the first discovery of native silver made outside of the cobalt area this year. The new field is reached from a point on the Montreal River, about twenty miles from Latchford, thence overland fifteen miles. As all the smaller lakes in the district are now frozen over it will be a difficult matter to get into the new field before next spring.

Owing to the danger of destruction of the timber of the reserve by fire and otherwise, great care is exercised in the granting of the right to prospect thereon. This can only be done on special permits granted to reputable persons who are not only subjected to the mining regulations, but also to those governing forest reserves. The opening up of claims must be carried out under the supervision of the superintendent of the reserve.

## THE WHEAT MOVEMENT.

Over Forty-One Million Bushels Have Been Marketed.

A despatch from Winnipeg says: Grain receipts along the Canadian Pacific Railway on Saturday amounted to 451,000 bushels. Of this amount 411,000 was

## THE WORLD'S MARKETS

REPORTS FROM THE LEADING TRADE CENTRES.

Prices of Cattle, Grain, Cheese and Other Dairy Products at Home and Abroad.

Toronto, Nov. 6. — Flour — Ontario wheat 90 per cent. patents are quoted at \$2.70 in buyers' sacks outside for export. Manitoba first patents, \$4.50; second patents, \$4, and strong bakers', \$3.90, Toronto.

Bran—The market is steady at \$16 in bulk, outside. Shorts are quoted at \$18.50 outside.

Corn—No. 3 old American is quoted at 53½¢ on track, Toronto, and at 54½¢ outside. New Canadian, 47¢ bid, Chatham freight.

Bran—Buyers at \$15.50 outside, but none offered.

Wheat—No. 2 mixed, 70¢ bid outside on C.P.R. or G.T.R., without offerings. No. 1 Northern, 80¢ bid track, Point Edward, but none offered.

Barley—No. 3 extra, 48¢ bid at 78 per cent. points, without sellers.

Peas—No. 2 wanted at 78¢ outside.

Oats—No. 2 wanted at 35½¢ outside, while 35¢ was bid on main line, or at 5¢ or 6¢ freight rates to Toronto.

Rye—No. 2 offered at 75¢ outside, with 71¢ bid.

Buckwheat—No. 2 wanted at 54¢ on G.T.R., without offerings.

## COUNTRY PRODUCE.

Beans—Hand-picked selling at \$1.75 to \$1.80, and primes at \$1.60 to \$1.70.

Honey—Strained quoted at 10 to 12¢ per lb, and combs at \$2 to \$2.50 per dozen.

Hops—New quoted at 18 to 22¢.

Hay—No. 1 timothy scarce, and quoted at \$11 to \$11.50 on track here; No. 2 quoted at \$8 to \$8.50.

Straw—\$5.50 to \$6 per ton.

Potatoes—Ontarios, 55 to 60¢ per bag on track, and New Brunswicks, 65 to 70¢ per bag.

Poultry—Turkeys, fresh killed, 15 to 16¢; chickens, dressed, 9 to 10¢; alive, 7 to 8¢ per lb. Fowl, alive, 5 to 6¢; ducks, dressed, 10¢; do., alive, 7 to 8¢ per lb.

## THE DAIRY MARKETS.

Butter—Pound rolls are quoted at 22 to 23¢; tubs, 20 to 22¢; large rolls, 19 to 22¢. Creamery prints sell at 25 to 26¢, and solids at 24 to 24½¢.

Eggs—21 to 22¢ per dozen.

Cheese—Large cheese, 13½ to 14¢, and twins, 14½ to 14½¢.

## HOG PRODUCTS.

Dressed hogs in car lots nominal. Bacon, long clear, 12½¢ per lb in case lots; mess pork, \$21 to \$21.50; short-cut, \$23.50.

Hams—Light to medium, 15½¢; do, heavy, 15¢; rolls, 12 to 12½¢; shoulders, 11½ to 12¢; backs, 16 to 17¢; breakfast bacon, 15½ to 16¢.

Lard—Tierces, 12½¢; tubs, 12½¢; pails, 13¢.

## BUSINESS AT MONTREAL.

Montreal, Nov. 6.—(Special).—Grain—Business continues quiet in the local Grain Market. There was some inquiry from over the cable, but bids showed little or no improvement. The market for oats continued to show the easier feeling, and sales were made at rather less than recent quotations; the range to-day would be 38½ to 39¢ for No. 4 oats in store, 39½ to 40¢ for No. 3, and 40½ to 41¢ for No. 2. Flour—Manitoba spring wheat, \$4.60; strong bakers', \$4.10; winter wheat patents, \$4.10 to \$4.25; straight rollers, \$3.75 to \$3.80; do, in bags, \$1.65 to \$1.75; extras, \$1.50 to \$1.60. Feed—There was no change in millfeed, for which there continues to be a steady demand, and supplies are kept well sold up; Manitoba bran, in bags, \$20; shorts, \$23 per ton; Ontario bran, in bags, \$20 to \$20.50; shorts, \$22.50 to \$23; milled mouillie, \$21 to \$25.

## THE BUCKINGHAM TRAGEDY.

Detectives, Strikers and Mill Owners Held to be Guilty.

A despatch from Ottawa says: The jury in the Buckingham inquest reached a verdict shortly before eight o'clock on Wednesday night. Eighty-six witnesses had been examined in the five days that the inquiry was in progress. The chief witnesses to-day were Mayor Valle and the two MacLarens, Albert MacLaren, who it was alleged was in the thick of the fight with a revolver, sworn positively that he had no weapon. Hal an hour before the strikers came up he swore he had handed his revolver to Detective O'Neill.

Coroner McMahon made a lengthy address to the jury, who then retired. They were out for nearly four hours the chief bone of contention being the action of Dr. Rodrigue, the local coroner, who rode in the strikers' vehicle containing the guns, and covered them up when attention was drawn to them. Eventually the jury brought in the following verdict:—

"We, the undersigned jurors, declare that we find that Thomas Belanger, and Francois Theriault came to their death in the Town of Buckingham, in the district of Ottawa, on the 8th October, 1906 being killed in the course of a riot by Frank Kiernan and John C. Cummings both of the Town of Buckingham; Pierre Picard, of the City of Montreal; Roy Engram, presently of the Town of Buckingham; F. W. Warner, presently dead, and the other constables shooting at them, in such circumstances that they should be sent before a criminal court."

"We find that Albert MacLaren and Alexander MacLaren, both of the Town of Buckingham, are guilty of their deaths in bringing in those men, and should go before a criminal court."

"We also find that Adelard Hamelin, Hilaire Charette, John Baptiste Clement, Culbert Bastien, George Robin son Croteau, all of Buckingham, and many others, are guilty in that they accompanied those men in this riotous assault, in which they met their deaths and should be sent before the criminal court."

"We also find that Dr. Alex. Rodrigue, of Buckingham, is more guilty than any other of the magistrates of the town, in that he anticipated serious trouble and neglected to do his duty and that he too should go before the criminal court."

Two jurors, Moise Goulet and Janvie Hamelin, both of whom are related to strikers, dissented from this verdict.

## TWELVE ARRESTS MADE.

A despatch from Ottawa says: Twelve men at Buckingham named in the verdict of the Coroner's jury as being guilty of murder or accessory thereto in connection with the strike riots were formally arrested on Saturday afternoon. Pleas of not guilty were entered in each case, and the parole was continued until next Friday without bail. A guarantee was given by the lawyers that all would appear next Friday. On that day Judge Choquette will be present and arrange for the preliminary hearings.

## FARTHEST NORTH RECORD.

Arctic Explorer Peary Reaches Latitude of 87 Degrees 6 Minutes.

A despatch from New York says: H. L. Bridgeman, of the Peary Arctic Club, an associate of Lieut. Robt. E. Peary, on Friday, at his home here, received a telegram from Peary which showed that the explorer had achieved 87 degrees 6 minutes, north latitude, the farthest north and two degrees 54 minutes from the North Pole. Translated into statute miles that means 200.36 miles from the point that has been the goal of Arctic explorers for years without end. Peary has been after this ever since 1891.

The telegram reads:— "Hopdale, Labrador (Via Twilling gate, Newfoundland), Nov. 2.

"To Herbert L. Bridgeman: "Roosevelt wintered north coast-Grant

the cow suddenly gave a spring, and he only had time to grasp her tail before she rose up, and up, into the blue sky. "Cow's tail! always behind!" a taunting voice came faintly back to him.

Remembering the fairy voice—not to be afraid—he just kept a tight grasp, and, with the end of the tail under him, felt as comfortable as though he were sitting in the easy chair at home.

The only trouble was that, though he could hear the merry voices of the flower fairies laughing and chattering somewhere in front of him, he could not see them for the cow's back, nor could he see what it was they were making merry about. Everything seemed to have just faded away by the time he came up to it.

Now and then he caught a glimpse of a beautiful, bright star world as they glided past, and he knew when they came to the moon from the lovely, shining, pale green that was all about them. He managed to see a moon fairy flitting by, too, dressed in something that shone like the opals in his mother's ring.

But "Cow's tail! always behind!" kept running through his head, and he thought, "Oh, dear! why didn't I jump on when the fairy first told me to. Then I could see everything. I am sure that must have been the place of the man in the moon that we just passed; if I could only see it plainer. I wonder if he isn't the king of the moon fairies?"

"Listen! What was that the flower fairy was saying? 'Won't the picnic be just lovely!' Picnic! Did fairies have picnics? Why—he was to go to a picnic! When was it? Where was he? How fast the cow was going! Down—down—down—"

"Of!" And there he was in bed with all the little cousins dancing around him and crying, "Cow's tail! Tommy's the cow's tail!"

"I won't be the cow's tail!" cried Tommy! and out he jumped, and washed and dressed so quickly he was ready with the first of them.

After breakfast, when they were on their way to the woods for their picnic, they all had a good laugh over his wonderful dream. And Tommy, remembering how vexing it was to miss the best part of everything by being "always behind," took good care never again to be the "cow's tail."

### SIX PEOPLE DROWNED.

**An Indian Canoe Upset in Black River, Quebec.**

A despatch from Bryson, Que., says: Miss Pearl Bertrand, a girl of seventeen, who, after an arduous journey of 50 miles on horseback, arrived here to give evidence in the Bertrand incendiary case at the Assizes, relates having been an eye-witness to the drowning of six people in the Black River, near Hop's Farm, on J. R. Booth's limit, about 50 miles above Des Jochims, some days ago. A canoe containing Norton Brown of Toronto, an Indian, two squaws and two Indian children, was crossing the Black River above a dangerous chute, when a paddle of the Indian broke, and in the swift current the canoe, with all its occupants, was carried over the chute and all drowned. The Indians residing in the neighborhood instituted a search for the bodies, not ceasing day or night until all the bodies were recovered. The body of Brown was found the day after the accident, and the other bodies two or three days later.

### CUSTOMS RECEIPTS GROW.

**Increase in Four Months Totals Over Two Millions.**

A despatch from Ottawa says: The customs receipts of the Dominion show another large increase for October. The revenue from this source was \$4,656,531, compared with \$3,986,158, an increase of \$670,373 over same time last year. Receipts for four months of fiscal year show an increase of \$2,176,445 over 1905.

### Been Marketed.

A despatch from Winnipeg says: Grain receipts along the Canadian Pacific Railway on Saturday amounted to 451,000 bushels. Of this amount 411,000 was wheat and 40,000 bushels other grain. On the corresponding day of last year the receipts were as follows:—Wheat, 610,000 bushels; other grains, 18,000 bushels. Total grain receipts to date this year have been as follows:—Wheat, 29,600,000 bushels; other grains, 2,393,000 bushels. In the corresponding period of last year the receipts were as follows:—Wheat, 27,568,000 bushels; other grains 1,254,000 bushels.

At points on the Canadian Northern Railway the receipts on Saturday were as follows:—Wheat, 117,000 bushels; other grains, 9,000 bushels. The total grain receipts to the close of the month at points on the Canadian Northern Railway were 9,089,000 bushels, making the total volume of grain marketed in western Canada to date 41,142,000.

### SHOT DEAD HUNTING DEER.

**Two Young Men Killed in Wright County.**

A despatch from Ottawa says: There were two shooting fatalities last week in the bush back of Kuzuabazua, and both happened under somewhat similar circumstances. On Monday, David Junkin, a young farmer, of Eileen Township, was following deer with a party. He was walking ahead of a companion named Armstrong, when in some manner the gun the latter was carrying was accidentally discharged, and Junkin was shot in the side. He died in a few minutes.

The second victim was Edward Wilson, aged 21, son of Mrs. James Wilson, of Aylwin Township. On Thursday afternoon he and his younger brother, aged 15, were in the bush looking for deer. Edward was walking ahead when the younger lad slipped, and the rifle which he was carrying cocked went off. The bullet struck Edward in the back, and he was killed instantly.

### BRITISH ARMY'S MEAT.

**A Large Quantity of Canned Goods on Hand.**

A despatch from London says: War Secretary Haldane, replying in the House of Commons on Thursday to John Henniker Heaton, Progressive Conservative, said the Government did not intend to publish the report of Lieut.-Col. Hobbs, who went to the United States to inspect meat supplies for the British army shortly after the packing scandal, and he (the Secretary) could not make a statement on the subject until a final decision regarding future contracts had been arrived at. The British army still held about three-quarters of a million pounds of American canned meat, costing \$400,000, and there was no present intention of sending an officer to investigate the question of supplying the army from Australian sources.

### POURED WATER ON CROWD.

**Texas Firemen Disperse an Excited Mob.**

A despatch from El Paso, Texas, says: Three bodies are in the morgue and two wounded persons in a hospital as the result of a murder here on Wednesday, followed by an exchange of shots between the murderer and a policeman. Manuel Rodriguez killed his wife when she returned home and found him in company with another woman. Rodriguez and Chana Ramiera, the woman with him, were killed, and City Detective George Harold and Jack Glover, a negro, wounded in the fight that ensued. The fire department was called out and dispersed the excited crowd that had collected by pouring water on it from a hose.

by a steady demand, and supplies are kept well sold up; Manitoba bran, in bags, \$20; shorts, \$23 per ton; Ontario bran, in bags, \$20 to \$20.50; shorts, \$22.50 to \$23; milled moullie, \$21 to \$25 per ton, and straight grain, \$28 to \$29. Provisions—Barrels, short cut mess, \$22 to \$24; half bbls, \$11.75 to \$12.50; clear fat backs, \$23.50; long cut heavy mess, \$20.50; half bbls, do, \$10.75; dry salt long clear bacon, 12½ to 12¾c; bbls plate beef, \$12 to \$13; half bbls, do, \$6.50 to \$7; bbls heavy mess beef, \$11; half bbls, do, \$6; compound lard, 8 to 9½c; pure lard, 12½ to 13c; kettle rendered, 13½ to 14c; hams, 14 to 15½c; breakfast bacon, 15 to 16c; Windsor bacon, 15 to 16½c; fresh killed abattoir dressed hogs, \$9; alive, \$6 to \$6.25. Eggs—Selects, 23c; No. 1 candled, 19 to 20c. Butter—Choicest creamery, 24c; medium grades, 23 to 23½c. Cheese—Ontario, 12½ to 12¾c; Quebec, 11½ to 12c.

### UNITED STATES MARKETS.

Milwaukee, Nov. 6.—Wheat—No. 1 Northern, 79 to 80½c; No. 2 Northern, 75 to 77½c; December, 74½c asked. Rye—No. 1, 66 to 68½c. Barley—No. 2, 55½c; sample, 40 to 55c. Corn—No. 3 cash, 46 to 46½c; December, 43½c asked.

Minneapolis, Minn., Nov. 6.—Wheat—December, 74½c; May, 78½c; July, 79½c; No. 1 hard, 78½c; No. 1 Northern, 73½c; No. 2 Northern, 70½c; No. 3 Northern, 74 to 75c. Flour—First patents, \$4.20 to \$4.30; second patents, \$4.05 to \$4.15; first clears, \$3.25 to \$3.35; second clears, \$2.40 to \$2.60. Bran—\$15.50 to \$15.75.

### LIVE STOCK MARKET.

Toronto, Nov. 6.—Trade conditions at the City Cattle Market this morning showed very little change. Export Cattle—Choice, \$1.50 to \$1.75; medium, \$1 to \$1.25; bulls, \$3.50 to \$4; cows, \$3.50 to \$3.75. Butcher Cattle—Choice, \$1.25 to \$1.50; medium, \$3.50 to \$4; common, \$2.75 to \$3.25; cows, \$2.50 to \$2.75; bulls firm at \$2.50 to \$3. Stockers and Feeders—Choice, \$3.25 to \$3.40; common, \$2.50 to \$2.75; bulls, \$2 to \$2.25; heavy feeders, \$3.00 to \$3.70; short-keepers, \$3.75 to \$3.85. Milch Cows—Choice, \$4 to \$50; common, \$25 to \$35; springers, \$25 to \$40. Calves—Trade in calves was slow and quotations easier at 2½c to 6c per lb. Sheep and Lambs—Export ewes, \$4.50 to \$4.90; bucks and culls, \$3 to \$3.50; lambs, \$5.50 to \$6.15. Hogs—Quotations are 25c lower on a heavy run. Choice selects are now \$5.75 per cwt. and lights and fats \$5.50.

### EPIDEMIC IS SPREADING.

**Further Outbreaks of Smallpox in New Brunswick Districts.**

A despatch from St. John, N. B., says: Though provincial authorities continue to issue reassuring reports, the smallpox epidemic is undoubtedly spreading and considerable alarm is felt. In addition to the 75 cases in Kent County, which have now been firmly quarantined, there are about half a hundred cases of the most virulent type of the disease in Southampton, York County, and one case has developed in this city. The Village of Salisbury, in Albert County, has been placed in danger of infection from Kent County, through four men, who have been exposed to the disease, returning to their homes there. The postal authorities have closed all post-offices in the infected district.

### WHALEBONE £3,000 PER TON.

**Failure of the Davis Strait and Greenland Whale Fisheries.**

A despatch from London says: Whalebone at £3,000 per ton is the prospective result of the failure of the Davis Strait and Greenland whale fisheries. Dundee whalers have just returned almost empty. They report that hurricanes, which packed the narrow seas with ice, prevented them from reaching the fishing grounds.

The telegram reads:—"Hopedale, Labrador (Via Twillingate, Newfoundland), Nov. 2. "To Herbert L. Bridgeman: "Roosevelt wintered north coast Grantland, somewhat north Alert winter quarters. Went north with sledges February via Heckla and Columbia. Delayed by open water between 84 and 85 degrees. Beyond 85 six days. Gale disrupted ice destroyed caches, cut off communication with supporting bodies and drifted due east. Reached 87 degrees 6 minutes north latitude over ice, drifting steadily eastward. Returning ate eight dogs. Drifted eastward, delayed by open water, reached north coast Greenland in straitened conditions. Killed musk oxen and returned along Greenland coast to ship. Two supporting parties driven on north coast Greenland. One rescued by me in starving condition. After one week recuperation on Roosevelt sledged west, completing north coast Grantland and reached other land, near 100th meridian. "Homeward voyage incessant battle with ice, storms and head winds. Roosevelt magnificent ice-fighter and sea boat. No deaths or illness in expedition. (Signed) "PEARY."

### ASK MINISTER'S MEDIATION.

**Hon. Mr. Montieth Hears Complaint of Beet Growers.**

A despatch from Toronto says: Two deputations called upon Hon. Nelson Montieth, Minister of Agriculture, on Wednesday. As a result of a petition from the producers of beets, chiefly farmers of York County, representatives of the Berlin Sugar Company were in consultation with the Minister. According to the contract between the manufacturers and the growers, the former were to supply railway cars to carry the beets to the factory. For some reason this was not done, and now the producers are expressing a desire that the arrangement be carried into effect and the delivery of the roots be facilitated. As the Government still pays a bounty in connection with the beet sugar industry, it is in a position to speak with some authority. However, Hon. Mr. Montieth advised the two parties to confer together and endeavor to reach some basis of agreement. In the event of failure they will have to renew their application to the Government.

### GREAT FLOODS IN ITALY.

**Sea Rushed Like Tidal Wave — Nine Torpedo Boats Damaged.**

A despatch from Paris says: A great storm has done much damage on the northern Mediterranean coast. The sea rushed into Toulon like a tidal wave, on Thursday. The quays were flooded, and several vessels were swept from their moorings and stranded. Nine torpedo boats were damaged. The famous Promenade des Anglais at Nice was flooded, the public gardens were washed out, and the streets inundated. Serious damage was done at Cannes and elsewhere.

### SAVED BY A DOG.

**Family Awakened in Time to Leave Burning House.**

A despatch from Chippewa Falls, Wisconsin, says: John Dolan, his wife, two daughters and a son were saved from burning to death on Wednesday morning by their dog. When the animal finally awakened Dolan their home was a mass of flames, and it was with difficulty that they made their escape.

### BOARDING HIGHER IN OTTAWA.

**Prices Advanced a Dollar a Week Owing to Increased Cost of Provisions.**

A despatch from Ottawa says: Ottawa boarding-house keepers are increasing their charges by \$1 a week on account of the advance in the price of provisions and other necessities.

Charles N. Whitney has been arrested in Chicago on a charge of swindling to the extent of \$3,000,000.

The employees in the office of the late

### AERONAUT'S ADVENTURE.

Defective Valve Began to Leak at a Height of 5,000 Feet.

A despatch from Augusta, Georgia, says: Dr. Julian P. Thomas of New York made a most daring ascension in his balloon, Nirvana, here on Wednesday. Owing to the location of the Fair grounds some distance from the city, the bag had to be inflated some miles away, and it was intended to tow it to the grounds up the canal. The stream proved too narrow, and the bag frequently caught in trees and was more or less damaged. When about a mile from the grounds Dr. Thomas decided to try no longer, and mounting into the network, he seated himself on the concentric ring and cut away the entangled basket. The balloon rose like a shot and travelled in a southwesterly direction to an estimated height of 5,000 feet. When about seven miles from Augusta the valve, which had been damaged Monday, and had been patched with surgeon's adhesive plaster, began leaking rapidly, and the aeronaut shot downward too rapidly for comfort. Not having any ballast, he endeavored to lighten the ship by cutting off his shoes and heavy leather leggings, and also threw away his coat and the contents of his pockets. The descent was but little checked, and he plumped down in the middle of a cotton field. Owing to his location in the rigging, Dr. Thomas was unable to get from under, and was caught in the folds of the balloon when it struck. It then started across the field, dragging Dr. Thomas nearly a quarter of a mile before he could extricate himself. He was badly scratched and lacerated, but not seriously injured.

### ESCAPED IN WATER CASK.

Famous Russian Terrorist Gets Away From Siberia.

A despatch from St. Petersburg says: Gerschunin, one of the most famous terrorists and head of their fighting organization during the Sipiaguine and Von Plehve regimes, has escaped from Siberia, concealed in a water cask. His disappearance is a serious menace to personages whose lives the terrorists are now seeking, as he is a skilled organizer and one of the most remarkable men the revolution has produced. Gerschunin, who is a Jew, was condemned to perpetual imprisonment for complicity in the assassination of M. Sipiaguine, late Minister of the Interior, and the attempt on the life of M. Pobedonostzeff, ex-Procurator-General of the Holy Synod. He was sent to the silver mines at Akatul, on the Mongolian frontier of Siberia, when the Schlussemburg fortress was closed as a prison for political offenders, February 13. One of Gerschunin's comrades, a man named Melnikoff, escaped from the mines two months ago, and the Governor of Akatul says he cannot guarantee the safe-keeping of Sassonoff and Sikorsky, the other terrorists implicated in the assassination of Von Plehve, because the revolutionary agents who arranged the escapes of Gerschunin and Melnikoff are lavishly supplied with money, and have the sympathy of the whole population.

Lieut. Dalgeiff of the Kushka Regiment has been sentenced to twelve years' imprisonment in the mines for organizing a mutiny at the fortress of Kushka.

### GREAT BUILDING BOOM.

Toronto is Seventh in the List of Prosperous Cities.

A despatch from Toronto says: The building permits issued from the City Architect's offices show that Toronto is the seventh most prosperous city on this continent so far as building is concerned. Two records have been broken, as shown by the returns just issued. The permits for October represent \$1,523,575, against \$1,009,005 for October, 1905. The only previous months which have come anything near this total was last May, which reached \$1,502,160, and

### VERDICT OF MANSLAUGHTER.

Belleville Jury Finds Kleingbell Killed His Wife.

A despatch from Belleville says: The court-room was crowded on Friday morning, when the court opened at 9 o'clock. Justice Britton addressed the jury about an hour in summing up the Kleingbell murder trial. His Lordship reviewed at length the evidence submitted, and dwelt upon the fact that the prisoner had repeatedly stated that he did it with his fists. The ground for insanity, his Lordship stated, could not be considered, as there was no evidence adduced to show that he was insane. The charge was rather strongly against the prisoner. The jury retired at 10 o'clock, and, after deliberating for nearly five hours, returned a verdict of manslaughter, with a strong recommendation of mercy. Mr. Justice Britton stated that he would consider the matter before passing sentence, and the old man was removed to the cells below.

### PRISONER GETS FOUR YEARS.

At the opening of the assizes on Saturday Ferdinand Kleingbell, who was found guilty of manslaughter, was brought up before Mr. Justice Britton for sentence. The prisoner had nothing to say. His Lordship, in pronouncing sentence, referred to the advanced age of the prisoner, and the fact that the jury had strongly recommended mercy. These two factors he had considered and would be taken in mitigation of the sentence. His Lordship then sentenced him to four years in the penitentiary. The prisoner, from appearance, was much pleased at the light sentence which he received.

### FACED MANY PERILS.

Surveyors on Yukon Boundary Had a Hard Time.

A despatch from Ottawa says: Mr. A. J. Brabazon, D.L.S., and party of surveyors, who have been engaged all summer on topographical work in the Yukon, have returned home. Their particular work was to make observations for the object of accurately delimiting the boundary between Canada and Alaska. A number of engineers and surveyors from the Geodetic Survey of the United States worked in conjunction with the Canadian party.

Mr. Brabazon and his associates encountered many perils, especially the canyon of the Aisek River. At this point the walls rose perpendicularly 2,000 feet, and rock slides were frequent all season. On the other side was a glacier, two miles long, which discharged thousands of tons of ice every day. It was weary work waiting for the water to rise in the tidal rivers, and persevering in face of the fact that never before had any voyager been able to make his way in at that season of the year. The party penetrated some ten or twelve miles above the boundary.

### TWO KILLED ON A HAND-CAR.

Fatal Accident on Michigan Central a Few Miles From St. Thomas.

A despatch from St. Thomas says: A fatal accident took place on the M. C. R. track 9 miles west of this city on Saturday evening, when three section men going from St. Thomas on a handcar to Shelden were run into by a freight train and two of the men were killed instantly. The dead men are W. Bucke, fifty years of age, whose home is in Hawesville, and J. Jones a young unmarried man from Tilbury, the third man, a son of Bucke, was thrown a long distance, but escaped injury.

### LAND IN THE WEST.

The Demand is Increasing and Prices Advancing.

A despatch from Montreal says: Mr. F. T. Griffin, C. P. R. Land Commissioner at Winnipeg, who is in Montreal just now, in an interview on

## HEALTH

### WHOOPIING-COUGH.

This common affection of childhood—pertussis, the doctor calls it—is usually regarded as one of the things a child has to have, and it is supposed that the only thing to do is to put up with it, as with all unavoidable ills, the best one can. The philosophy of this state of mind of mothers is good, but the indifference it sometimes engenders is distinctly bad, so far as it causes the parents to neglect treatment.

Whooping-cough is often a trivial affair, but it is sometimes fatal; and even when not so, it may pave the way for serious ills by weakening the resisting power of the child to other germs, diseases, such as scarlet fever, measles, and especially pneumonia; or the strain of the cough and of the forced holding of the breath may cause a blood-vessel in the brain or in the eye to break, with resulting paralysis or blindness, or it may produce a rupture.

Fortunately these troubles are rare, but the possibility of their occurrence should be borne in mind.

Whooping-cough is a contagious disease, occurring with greatest frequency in the winter and spring. No age is exempt from its attacks, but about half of the sufferers are babies under two years of age. One attack usually insures safety against any subsequent ones. Owing to its great contagiousness, a child with whooping-cough should be kept away from other children, and should never be carried out in street-cars and other crowded places to give the disease to every susceptible child or even adult in its vicinity.

The patient must be well wrapped up when outdoors or when getting air by an open window, and the living-room should be warm, although well ventilated. The diet should be simple, and food should be given frequently but in small quantities.

During the entire course of the disease, even in the mildest cases, the child should be under the constant supervision of the doctor, for the disease may take a bad turn when least expected, and the best way to prevent an evil outcome is to be always on the watch for it.

Children with whooping-cough often go through it with but few signs of illness, but care should not be relaxed for this reason, and the mother, nurse, or some adult should be present always to do what little can be done to ease the paroxysms.—Youth's Companion.

### ONE THING WE MUST HAVE.

We can live without food for thirty days or more, we can live without water for about seven days; we cannot live without air, however, for five minutes.

Consequently as much or more attention should be paid to our water and air supplies as to our food. There should be vigilant inspection of school rooms, factories, theatres, public buildings, etc., to insure perfect ventilation.

We spend about one-third of our lives in bed. We must breathe regularly, however, during our sojourn in slumberland, and if we breathe pure air all night, we will certainly arise in the morning greatly refreshed.

### FINGER PRINTS TOLD.

Escaped British Murderer Found in U. S. Prison.

A despatch from Washington says: A curious result of the recent adoption by the United States army of the system of identification by finger prints has just been reported to the War Department, in the discovery in the person of a soldier at Fort Leavenworth of a British murderer, for whom the Scotland Yard authorities have long been

Y. N. I.  
The National W. C. T. U. convention at Hartford passed a resolution deprecating mob law and lynching.  
Charles N. Whitney has been arrested in Chicago on a charge of swindling to the extent of \$3,000,000.

The employees in the office of the late Russell Sage have received, in addition to their regular October salary from the estate, checks from Mrs. Russell Sage for an equal amount.

With her infant brother in her arms, Jennie Donato, aged 13 years, was struck by a trolley car on Friday in Philadelphia. She was dragged 60 feet and both were dead when the car was stopped.

Patrick Hurley, a Rochester policeman, shot himself in the head on Friday. He walked into the morgue, and after a brief conversation with the man in charge placed a revolver to his head and pulled the trigger. Death was instantaneous. Ill-health is given as the cause of his deed.

Officials of the United States railroads who have been conferring with their employees regarding the demands made by the latter for increased pay and shorter hours have announced that the conference has been satisfactory. An attempt will be made to introduce a uniform system of pay by the mile.

A Grand Jury at Burlington, Vt., on Tuesday returned eight indictments against two companies in connection with the sale and exportation of diseased beef and cattle in the State. Two members of the Cattle Commission were also indicted for selling diseased cattle to the two companies.

#### GENERAL.

Civil war is said to be imminent in Venezuela.

French doctors have discovered a cure for the sleeping sickness.

Japanese are leaving Hawaii in large numbers for the United States.

Jews not belonging to the University of St. Petersburg have been forbidden to attend lectures.

Bandits have looted several villages in the neighborhood of Tangier, Morocco. The Czar has granted full religious freedom to the sect of Old Believers.

Southern France has been swept by a terrible hurricane.

General Picquart has instituted a campaign against unpatriotic Socialists in France.

Fourteen persons were shot recently at Cronstadt because no hangman could be procured.

Baron Von Hagen, a German sportsman, stayed one month in the Cassiar country in British Columbia on a hunting trip, and came back with two moose, three caribou, three mountain sheep, a black bear and a silver fox.

#### SAW THE FAMOUS CHARGE.

**Death of Leonard Lucas, a Crimean Veteran, at Winnipeg.**

A despatch from Winnipeg says: Leonard Lucas, an old Crimean veteran, who was at the battle of Balaklava, and saw the charge of the Light Brigade, died in the General Hospital on Thursday night. It is about eighteen years since he entered the hospital as a patient, and he has been there almost continuously since. A Hudson's Bay official years ago is said to have arranged with the hospital for his maintenance, and left a sum of money for this purpose. He was ninety years of age.

#### AVALANCHES OF MUD.

**Are Pouring Down From the Sides of Vesuvius.**

A despatch from Naples says: The eruption of Vesuvius of April last is still causing devastating effects. A heavy storm which prevailed here during the last 24 hours has caused large avalanches of mud to fall from the sides of the volcano carrying off part of the Vesuvian railway, blocking trains along the seacoast and burying large sections of ground in the vicinity of Vesuvius. The inhabitants of the villages were greatly alarmed, especially as the storm was accompanied by earthquake shocks.

cerned. Two records have been broken, as shown by the returns just issued. The permits for October represent \$1,533,575, against \$1,009,005 for October, 1905. The only previous months which have come anything near this total was last May, which reached \$1,502,160, and August of 1906, which totalled \$1,417,155. The total values represented by permits issued for the ten months of this year reaches \$11,102,905, against \$8,954,789 for the same ten months of 1905. The total values of last year were \$10,347,910, so that the ten months of 1906 already exceeds the totals of the whole of last year by \$754,993. The buildings erected this year so far total 4,035, as compared with 2,695 for the same ten months of last year.

#### MARRIAGE CENSORSHIP.

**Plan Proposed to Prevent the Unfit From Wedding.**

A despatch from Chicago, Ill., says: Wedding bells will ring only for those happy young persons who succeed in passing a State inspection test if the ideas of the American Stock Breeders' Association are carried out. The association has turned for the moment from the consideration of cattle, sheep and hogs to the culture of humans, and it will be the ultimate business of the Committee of Eugenics, just appointed, to keep an eye out for ill-mated pairs. A marriage censorship may result if the inspection idea proves practicable. Professor Charles R. Henderson of the University of Chicago Sociology Department, is a member of the committee, of which Dr. Alexander Graham Bell is chairman. The immediate object of the committee is to spread information in regard to the ill effects of the marriage of defective persons. Insane persons, confirmed drunkards and moral degenerates are to be restrained in colonies and kept from marrying.

#### CROP IS 90,824,141 BUSHELS.

**Increase of Nearly 7,000,000 Over Western Yield Last Year.**

A despatch from Ottawa says: From enquiries made by the Department of the Interior and from threshing returns already received, the wheat crop of the three prairie provinces for this year is placed at 90,824,141 bushels, as compared with 84,175,220 bushels last year. The figures for 1906 are given as follows—

|              | Busheles.  |
|--------------|------------|
| Manitoba     | 58,689,293 |
| Saskatchewan | 29,296,278 |
| Alberta      | 2,838,569  |

These figures differ materially from the estimate made by Dr. Saunders, Director of Experimental Farms, who thinks the yield will not exceed 80,000,000 bushels, while Mr. Parmelee, Deputy Minister of Trade and Commerce, places it at from 82,000,000 to 85,000,000 bushels.

#### LOST HIS LIFE IN THE FIRE.

**Commercial Traveller of St. John Attempted to Save Office Books.**

A despatch from St. John, N.B., says: A fire, which was undoubtedly of incendiary origin, on Saturday night caused the death of James W. King, a well-known commercial man, Maritime traveller for W. H. Thorne, and destroyed property to the value of about \$25,000. King lost his life in an effort to save the books from the office of his brother's brush factory, which was badly gutted. He was overcome by smoke, and before he could be rescued was burned beyond recognition.

The fire broke out almost simultaneously in the rear of W. F. and J. M. Myers' machine shop and under the floor of William King's brush factory, both on Waterloo Street, in the middle of a wooden block, through which the flames made great headway. Those two places and Ungar's laundry, together with several small buildings, were destroyed before the blaze was checked.

#### The Demand Is Increasing and Prices Advancing.

A despatch from Montreal says: Mr. F. T. Griffin, C. P. R. Land Commissioner at Winnipeg, who is in Montreal just now, in an interview on Thursday said: "The demand for land is greater to-day than it has ever been before, and prices are bound to go higher. I do not attach great importance to such purchases as that of the Western Canada Land Company, which bought half a million acres from us, and are dividing it up and disposing of it again at a profit. It is to the practical work that has been done by families who buy their homesteads and cultivate their holdings that I attach value. These are the people who are making the Northwest."

#### EXILE IN SIBERIA.

**Fifteen Labor Leaders Sentenced, With Loss of Civil Rights.**

A despatch from St. Petersburg says: M. Krustaleff, who was President of the Executive Committee of the workmen's council, and fourteen leaders of the council who have been on trial here for a month past, were on Thursday sentenced to exile in Siberia and the loss of all civil rights. Two others were sentenced to imprisonment in a fortress and the rest of the accused were acquitted.

#### WILL SUE GRAND TRUNK.

**To Compel Two-cent-a-mile Passenger Rate.**

A Lansing, Mich., despatch says: Railroad Commissioner Atwood is preparing to begin suit against the Grand Trunk System to compel the reduction of passenger fares to two cents a mile on the Detroit & Port Huron division. The company has failed to comply with the order of the commissioner made some time ago.

#### TEN MILLION STARVING.

**Severe Famine is Reported in Kiangsu Province.**

A despatch from Shanghai says: Missionaries report a most severe famine in the northern part of Kiangsu Province, Central China. It is estimated that 10,000,000 people face starvation. Local magistrates are preventing people from leaving the region, but are taking no steps to provide them with food supplies.

#### HEAD TORN FROM BODY.

**Steamship Engineer Rashly Put it Out of a Porthole.**

A despatch from Windsor says: To call a good-bye to his sisters on the wharf, C. H. Dyke, an engineer on the lake steamship Mack, thrust his head through a porthole and was instantly killed as the vessel veered into the abutments of the Ninety-second Street bridge, in Chicago River on Saturday night. His head was completely torn from his body and fell into the river as his body dropped back into the engine-room.

#### FARMERS FROM GERMANY.

**Party of Fifty to One Hundred Strong Coming Next Spring.**

A despatch from Toronto says: Mr. Thomas Southworth, Director of Colonization, has received a letter from a farmer resident in the vicinity of Hanau, Germany, who is coming to Ontario in the spring to engage in agriculture here. He says that he will bring with him 50 to 100 young farmers, all with more or less capital, and all anxious to take up farming locations. They want to get land together in the Thunder Bay, Itany River, Nipissing or the Algoma district. Mr. Southworth is answering the communication by giving as much information as possible in respect to the part of the Province mentioned, the settlers' regulations, etc.

A curious result of the recent adoption by the United States army of the system of identification by finger prints has just been reported to the War Department, in the discovery in the person of a soldier at Fort Leavenworth of a British murderer, for whom the Scotland Yard authorities have long been looking. The man was a prisoner in the United States penitentiary, serving a five-year sentence for a military crime. In prison he was well behaved and liked, but when the warden, following the general order to take the finger print records of all soldiers, attempted to secure an impression of this man's digits he met with violent resistance, and was knocked down and roughly handled. Suspecting that this resistance was based upon the man's previous knowledge of the use to which these finger prints might be put, and that his record was bad, the warden sent copies of the prints to the police authorities in a number of cities. Within a comparatively short time Scotland Yard reported that the man had committed an atrocious murder in Mortu; that he had been sentenced to life imprisonment, and had escaped to America.

#### CREMER A FRAUD.

**Montreal Teamster Posed as a Man of Fortune.**

A despatch from Montreal says: R. M. Cremer, who posed as heir to a fortune of half a million, and which was on its way from Germany, has confessed to the fraud and a warrant was issued on Wednesday. He managed to get money advanced him and purchased real estate and personal property to the value of \$20,000. For the past week he has been driving the best horses and rigs in the city, with footmen and groom in elaborate livery. He bought \$5,000 worth of jewellery for a young lady, \$1,200 for clothes, \$3,000 for horses, and \$2,000 for harness. He confessed the fraud, but still insists he has a large estate in Germany. He has lived here for ten years, and was well known as a steady man.

#### FIRE IN SPRINGHILL MINE.

**Number Three Colliery May Have to be Sealed.**

A despatch from Halifax, N. S., says: There is no doubt now as to the nature of the trouble in No. 3 mine at the Spring Hill collieries. The location of the disturbances was discovered on Thursday, and the unmistakable presence of smoke told of the fire which must be there, although up to now unseen. Stoppings were at once put in and the inspector of mines again sent for. Dr. Gilpin and General Manager Cowans visited the mine on Friday afternoon, but the result of their inspection is not yet made known. The general opinion is that the only safe remedy is to seal this section, and it may be several days before work can be resumed.

#### "MISSING LINK" FOUND.

**Woman With Feet Like Hands Discovered in Australia.**

A despatch from London says: The missing link has again been found. According to the Melbourne correspondent of the Chronicle, Prof. Klaatsch has discovered an aboriginal woman at Port Darwin with feet like hands. The professor regards his discovery as being of tremendous biological importance.

#### STATE OF SIEGE.

**Again Proclaimed in Russian Baltic Provinces.**

A despatch from St. Petersburg says: A state of siege has again been proclaimed in the Baltic provinces on account of the continuance of revolutionary terrorism. The inhabitants have been forbidden to leave their houses after o'clock in the evening under a penalty of a fine of \$75.

## THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.  
 When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

**CHOICE CORN MEAL and BUCK-WHEAT FLOUR** always on hand.

**FEED GRINDING** a specialty, with the best feed mills known to the trade.

A full stock of the best **ANTHRACITE COAL**. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

A Public meeting of those interested in horse breeding will be held in Council Chamber, Napanee, on Tuesday, November 13th, at 7:30 p. m. Dr. Sinclair and Mr. Arthur Thow, two Government Horse Inspectors will be present to hear the views of Local horsemen and discuss the horse business in general.

Concert at Deseronto this evening.

The Royal Scots Concert party, Miss Flora Donaldson, the Queen of Scottish song, Mr. Geo. Neil, Scotland's greatest tenor, and Fred Howard the soldier ventriloquist and musical entertainer, will appear in Naylor's theatre, Deseronto, on Friday evening Nov. 9th. From the lengthly press notices coming under our observation the above concert should be a rare treat of Scottish song, and music lovers will be amply repaid by going to Deseronto this evening to hear the Royal Scots Party.

Choral Club.

At a business meeting of the Ladies Musical Club Monday evening, it was decided to form a Choral Club in connection with it for ladies voices, to study choruses and part songs during the coming winter, the practices to be held every Tuesday evening at eight o'clock in the Town Hall under the able directorship of Mrs. Vanluven, with the intention of joining recitals later in the season, the membership fee to be one dollar. All ladies and young girls over fifteen wishing to become members of this Club are requested to attend the first meeting on Tuesday evening next at eight o'clock.

MRS. MACNAUGHTON  
Sec. Pres.

The Bazaar.

The Bazaar held in the town hall this week by the ladies of St. Patrick's church, in aid of the improvement fund was a striking success, financially and otherwise. The entertainments on Tuesday and Wednesday evenings were well patronized, the town hall being crowded on both evenings. The illustrated lecture by Rev. Father Kehoe was very interesting indeed and the illustrations were of a very high order. The concert on Wednesday evening was given by some of the best local talent and Prof. Millner, of Kingston, who comes as a stranger to Napanee audiences, but all who had the pleasure of listening to the Professor, would again welcome him here. Rev. Father O'Connor wishes to express his thanks to all who assisted in making the Bazaar a success, and to the general public for their generous patronage. The Receipts of the bazaar will realize about \$1200.

Died Suddenly.

Another sudden death occurred on Tuesday morning when Mrs. Vanluven beloved wife of Mr. Z. A. Vanluven, governor of the Napanee gaol, passed away to the better land. Deceased was ill but a week and her sudden demise came as a shock to her many friends and relatives. Deceased was the eldest daughter of Mr. Jacob Clancy, of Albion, Mich., formerly a resident of the Township of Camden, and her death is the first break in the family of eleven children. Deceased was a member of the Methodist church and took a deep interest in every part of the church work. She was deeply interested in the foreign mission work and in church and Sunday school work her bright and cheerful manner and deep zeal made her loved by all. A husband, but no family is left. The funeral took place on Thursday from her late residence to the family plot at Moscow. A number of her relatives from Michigan were present to attend the funeral.

Mr. J. J. Teller, Model School Inspector, will deliver a lecture at the Model School on the New Education Act, on Wednesday November 14th at 2 p. m.

Poultry Association to be held on January 9, 10, 11 and 12, 1907, promises to surpass the efforts of the association last year. A large number of special prizes are being offered by parties interested in poultry, and the entries promise to be much larger than last year. The prize lists will be issued about December 1st.

A. S. KIMMERLY pays highest price for choice Timothy Seed. Plenty of Bran and Shorts in stock, Liverpool Sax Salt, and fine barrel salt on hand. Cheap Sugars bought before advance. Five Roses Flour has no equal. Try our celebrated 25c Tea.

ENGLISH SPAVIN LINIMENT removes all hard, soft or calloused lumps and blemishes from horses, blood spavin, curbs, splints, ringbone, sweeties, stifles, sprains, sore and swollen throat, coughs, etc. Save \$50 by use of one bottle. Warranted the most wonderful Blemish Cure ever known. Sold by F. L. HOOPER.

Miss Sarah McKillop, who had been the late Robt. Denison's housekeeper, for a number of years and to whom Mr. Denison bequeathed his property passed away on Saturday morning last, aged sixty-five years surviving Mr. Denison but five weeks. The funeral took place on Sunday to the R. C. Cemetery vault.

Montreal, Nov. 3.—James Marrigan Deseronto, Ont., in charge of a steam shovel attached to a construction train at work on the Grand Trunk, operating near St. Bruno, Que., died, early this morning, at the general hospital, as the result of injuries sustained in a rear and collision with another construction train. Marrigan had both legs cut off. Lorenzo Dansereau, Point St. Charles, was also seriously injured and has since died.

The two trains were backing into each other, unknown to the engineers of either train, and Marrigan and Dansereau were standing on the platform of the caboose when the trains came together. The impact forced the end of a flat car on to the caboose platform and the two men were terribly crushed.

In a runaway accident, which occurred at Kingston, at one o'clock on Monday afternoon, Mrs. Lowry, wife of William Lowry, farmer, Latimer, had a miraculous escape from receiving injuries of a serious nature. Mr. Lowry was delivering some meat at Ald. Millan's store corner Princess and Ontario streets, and Mrs. Lowry was seated in the rig which was left in a yard at the rear of the shop. Just as Mr. Lowry was coming out of the store, the horse took fright at an engine, which was doing some shunting in the yards close by, and made a mad dash out of the yard. The horse went so suddenly that Mrs. Lowry was unable to get it under control, and the animal ran straight across the road, the rig smashing up against a telephone pole and throwing Mrs. Lowry against the concrete sidewalk. It was at first thought that she had been seriously injured, but luckily this was not the case. She received severe bruises and a bad shaking up. She was assisted to a nearby house, and a doctor who was summoned found that no bones had been broken.

E. LOYST has large stock of flour, Royal Household and all other grades, all kinds of feed, large quantities at the lowest prices. He wishes to sell out in the next month. Salt, Coal Oil Groceries. Highest price for eggs cash or trade. A call solicited.

## A HANDY HOME BOOK

A book with the above title has just been issued by the Family Herald and Weekly Star, of Montreal. It certainly is well named, being an encyclopaedia, family doctor and cook book all in one. It contains the thousand and one things every one imagines they know and yet few people do know. It will settle arguments on any subject. It will save doctor's bills, make it easy for the housewife who wants to prepare nice meals. It must be seen to realize what a valuable work it really is. The Family Herald offers it as a free premium on certain easy conditions and every person should write for one. The Family Herald and Weekly Star certainly gives a big dollar's worth in a year.

day, November 13th, at 7.30 p. m. Dr. Sinclair and Mr. Arthur Thow, two Government Horse Inspectors will be present to hear the views of Local horsemen and discuss the horse business in general.

**Died in Scranton.**

Sad indeed was the death of Mrs. Lawrence Fowler, nee George Herring who passed away at her home in Scranton, Pa., on Saturday morning. Deceased was dearly loved by her friends for her sunny disposition and lovable traits. A little daughter twenty months old, and another just two days old, are left to mourn forever the tender care of a mother. Besides her mother, Mrs. A. F. Holmes, who was at her daughter's bedside when she passed away, there are left to mourn three loving sisters, Mrs. Dr. Ward, Mrs. J. W. Robinson, Miss Nellie Herring and one brother, Jack Herring, also sister Freda Holmes and brother Alfred Holmes. Her sorrowing relatives have the heartfelt sympathy of a very large circle of friends in their trouble. The remains were brought to Napanee on Monday and the funeral took place on Tuesday afternoon at St. Mary Magdalene church.

Lined and unlined Mitts and Gloves, Boy's Mitts.

MADOLE & WILSON

**Opera House Saturday Night.**

The chief merit in any play is in the story that it tells. A book may have a rich cover and be handsomely bound but when you open it if the story is tiresome and uninteresting, you forget about the pretty binding. So it is with a play; no matter how capable the company may be that is presenting it; no matter how rich the scenery; no matter how well it is staged, unless the story that it tells is clever and absorbing enough to hold your attention, the chief merit of it is lost, and that is the very reason why Neil Twomy's highly sensational comedy drama "The Wayward Son," which comes to the Opera House, Saturday night, is and has been so successful because its story is good and holds your attention in spite of yourself until the curtain drops on the final act. "The Wayward Son" has been successfully produced in all the large cities for several seasons past and is about to be represented here for the first time by a strong acting company of capable people. Don't fail to see it on Saturday evening.

**Died Suddenly in Toronto.**

On Sunday morning a telegram was received by Mr. Dennis Daly summoning Mrs. Daly to Toronto, and containing the bad news that their son, Mr. Harry Daly was seriously ill. A couple of hours later a second telegram arrived announcing his sudden death, after but a few hours illness. Deceased was a student at the University of Toronto a graduate in arts, and a third year medical student. Death was due to hemorrhage of the brain, brought on by Bright's disease. The young man had dinner on Saturday evening with a number of students, and later visited some friends at 185 Seaton street, where he was taken ill. Dr. Hutcheson of Sherbourne street saw him, and about 6 o'clock Sunday morning it was decided to remove him to St. Michael's Hospital. Death resulted about 10 o'clock. The body was taken to Millard's undertaking rooms and from there brought to Napanee on Monday morning. The funeral took place Wednesday morning at 10 o'clock Rev. W. H. Emsley conducting the services. Deceased was twenty-two years of age, the eldest son of Mr. and Mrs. Dennis Daly and one of the brightest and most popular young men in Napanee. The sympathy of the community goes out to the sorrowing parents, in this their sad bereavement.

**For the Mayor's Chair.**

But a short time intervenes between now and the time of the municipal elections. We have been credibly informed that Mr. Herman Meng, a worthy gentleman who has occupied a seat at the council board for the past four years, is in the field for the Mayor's chair, with an excellent chance of being Napanee's Chief Magistrate for 1907. Councilor Meng has had quite a lengthy experience in municipal affairs having served in the County Council, as well as being reeve of North Fredericksburgh, and is eminently qualified, as well as having earned, the honorable position of Mayor of Napanee for 1907. His course at the council board has been always straightforward and to the point, and has endeavored to assist in conducting the affairs of the town in an economical manner as is consistent with good business principles.

A few good Second Hand Stoves on hand

MADOLE & WILSON

**Newton Beers.**

The impersonator herein announced to appear in the Brisco Opera House, on Wednesday, Nov. 21st., has been so long associated with the foremost lights of the American stage, and is himself so thoroughly established in the hearts of two generations of theatre-goers, that but for his present remarkable work in the lyceum field, this introduction would seem superfluous. Mr. Beers, early in his dramatic career, by his ability, soon grew to be prominently associated with the greatest actors of the past decade of which Mr. Jefferson was the last living representative. From the thorough training received with these men and women of the highest dramatic attainment, Mr. Beers himself soon developed into a strong stellar favorite, and as such appeared for several years in "Lost in London" and other powerful plays. His long list of distinct dramatic successes Mr. Beers is now duplicating on the lyceum platform as an individual interpreter of the masterpieces of literature. Mr. Beers in his new sphere is demonstrating the highest form of the actor's art. The glare of the lime-light, use of mask, or the "make-up box" do not enter into the proposition. All hackneyed methods are discarded; the artist relying solely on his mimetic powers, ability to differentiate the characters he impersonates, and his superb skill in pantomime, all of which gives to his performances a realism that renders his characters at once visible and life-like. Herein lies the great charm of Mr. Beers' impersonations. Mr. Elwyn Barron, the London playwright and special writer for the American press, places Mr. Beers—"As head and shoulders above many who ranked him as great." Mr. Beers appears in Napanee under the auspices of Argyle Lodge, No. 412, I. O. O. F.

The Stock of the late Robt. Denison is now being sold at a bargain, at the Store.

## When the Liver is out of Order

calomel, cascara, salts, strong liver pills and purging mineral waters won't do any permanent good.

When a person is bilious, the liver is not giving up enough bile to move the bowels regularly, and some of the bile is being absorbed by the blood. In other words, the liver is in a weakened, unhealthy condition.

Now, purgatives don't act on the liver at all. They merely irritate the bowels, and afford only temporary relief. But **FRUIT-A-TIVES** are the one true LIVER TONIC. They act directly on the liver—strengthen and invigorate this vital organ—and put it in a normal, healthy condition.

**FRUIT-A-TIVES** also stimulate the glands of the skin—and regulate the kidneys and sweeten the stomach. When skin, liver and kidneys are normally healthy, there can be no biliousness, no constipation, no kidney trouble, no impure blood, no headaches.

No other medicine known to science is so reliable and so effective in curing Biliousness as these fruit liver tablets.

**FRUIT-A-TIVES** are fruit juices with tonics added—and are free from alcohol and dangerous drugs. 50c. a box or 6 for \$2.50. Sent on receipt of price, if your druggist does not handle them.

**FRUIT-A-TIVES  
LIMITED,

Children's fleece lined Sleepers, all sizes 50c each  
Children's black Esquerian Tights 40c to 75c each

#### Street Car Rules of Rio.

There are first and second class street cars, writes Albert Hale in the Reader, and I, with a package in my arms, had taken a first class bond, as a street car is called in Rio de Janeiro. Scarcely had I done so when the conductor requested me to transfer to a second class car whenever it might come along, because no one is allowed to carry anything greater than a lap satchel first class. So I humbly descended and had either to mix with market women and sweaty laborers or to take a tilbury. A tilbury, named after the English maker who years ago introduced it, is a curious two wheeled, light springed cab, like an old fashioned gig, and resembles a hansom without the attachment for the driver. He sits inside the tilbury. A person without a necktie is no more allowed first class on the street cars than was I with my parcel. They are decidedly particular in Brazil and inherit many fastidious ways from the time of the empire, when dress and manners were the mark separating the aristocracy from the working classes.

#### Peculiarities of Napoleon.

Napoleon's father was a toper, a man utterly lacking in moral sensibility, and his sisters were immodest and hysterical. According to Dr. Cabanas, Pauline was particularly so. Napoleon himself was exceedingly sensitive to atmospheric changes, was headachey and had auditory illusions. He had twitchings of the arms, the shoulders and the lips. He was at times the most irritable of men, often being unapproachable. His mania for destruction was such that he whittled pieces of furniture, broke articles presented to him, pinched babies while pretending to caress them and took keen delight in shooting Josephine's rarest birds. The slightest opposition threw him into a paroxysm of rage. But in a campaign all weaknesses vanished. His pulse ranged ordinarily between thirty and thirty-five beats a minute and never went above fifty-five. The usual pulse rate is about seventy-two a minute.

#### The Eyes of the Eagle.

That the eagle has a most wonderful power of vision is shown from the fact that it flies in almost a straight line for any object which it desires to secure. Baby eagles also possess this farsightedness. Long before human eyes can discern them their gaze is fixed on distance, and their cries of welcome to their parents are shrill and continuous. The structure of their eyes makes them peculiarly strong. The brightest glare of sunlight does not affect them. Eagles do not fly as high in the air as some other birds, but their flight is very long and steady. A peculiarity about eagles is that they are constant to their mates, not changing every season, as most birds do. Sometimes the same pair of eagles will return to the same nest year after year. They seem to become acquainted with the locality, and if they are not disturbed are regular tenants.

#### Could Take His Choice.

At a recent inquest in a Pennsylvania

\$4.75 per garment. Ladies' Esquarian Tights (black) from 50c to \$1.00 pair.

Children's fleece lined Waists, all sizes 25c each. Children's fleece lined Sleepers, all sizes 50c each. Children's black Esquarian Tights 40c to 75c each

same pair of eagles will return to the same nest year after year. They seem to become acquainted with the locality, and if they are not disturbed are regular tenants.

Hand Bags, Mitts, Hosiery.

**Could Take His Choice.**  
At a recent inquest in a Pennsylvania town one of the jurors, after the usual swearing in, arose and with much dignity protested against service, alleging that he was the general manager of an important concern and was wasting valuable time by sitting as a juror at an inquest. The coroner, turning to his clerk, said: "Mr. Morgan, kindly hand me 'Jervis' (the authority on juries)." Then, after consulting the book, the coroner observed to the unwilling juror:  
"Upon reference to 'Jervis,' I find, sir, that no persons are exempt from service as jurors except Idiots, Imbeciles and Lunatics. Now, under which heading do you claim exemption?"

**Feminine Amenities.**  
"Yes, dear, I was married last month. I'd like you to call on me and see the pretty little flat I have."  
"I've seen him, my dear!"

Every being that can live can do something. This let him do.—Carlyle.

**The English of England.**  
The London Daily Chronicle gives these eccentric pronunciations of a few of the curious place names that dot the map of England: Rhudbaxton is Ribson, Woodmancote is Uddenmuckat, Sawbridgeworth is Sapsier, Churchdown is Chosen, Sandiacre is Senjiker, Little Urswick is Llosik, Aspatira is Spethy, St. Osith is Toosy, Chaddenwyche is Charnage, Happpisburgh is Hazeboro, Salt Fleetby is Sollaby, Almondsbury is Amesbury, Conugresbury is Coonsbury.

**The Satisfactory Part.**  
Jamie having come into the possession of considerable wealth through the death of relatives was thus addressed by one of his neighbors:  
"Aye, Jamie, it was a guid thing for you that your rich freens waur born afore ye."  
"Weel," said Jamie, "I'm nae sae sure about that, but it was a guid thing that they deed afore me."—Dundee Advertiser.

**Adapting Aims to Ends.**  
He—I think a woman's club, to be successful, should aim at something far removed from female suffrage. She—I don't agree with you. That should be its sole aim. He—Yes, but if it aims at something else it is more likely to hit that.

**Why She Left.**  
Miss—But, bless me, why are you leaving us, Mary? I'm sure I do all the work. The General Servant—Yes, ma'am, but I don't like the way you do it

**Whom to Consult.**  
Be sure you are right. Then consult your wife. Then go ahead.—St. Louis Republic.

## PUBLIC LIBRARY

How many of our citizens are continuing to do their duty towards the Public Library? When the building was erected there was a liberal response to the appeal for help, but many have done nothing since, feeling perhaps, that their duty was done when they subscribed towards the building fund.

No doubt a great many are willing to continue their assistance but it has never occurred to them that the Library was in need of their help. There are many paying \$1.00 a year for membership who can well afford to pay \$5.00 and ought to pay more than the nominal fee that is charged. It was never intended that the dollar fee was an adequate consideration for the privilege of belonging to the Library. If the Library were conducted as a private enterprise, the minimum fee would at the least be \$5.00 and there is no member who cannot get \$5.00 worth of reading out of the Magazines alone, if he never took a book home with him.

There are many to whom \$1.00 means considerable and in order to bring the benefits of the Library within the reach of all that nominal fee for membership is charged.

The Board is in need of money at the present time; magazines and books must be purchased; books are in need of re-binding; the building must be lighted and heated and the other expenses met.

The Board desires to make the Library as useful as possible; they perform their services free, and have only one object in view and that is to do as much good as possible with the means at their disposal. Their means are altogether too limited and they are appealing to the individual citizen for help. It should not be necessary to make a personal canvas, but the simple announcement that the Library is in need of help, should bring forth all the assistance that is required. A good many who are paying only \$1.00 for membership no doubt will be willing to double that fee. How many there are who would be willing to assist a poor neighbour a friend by presenting him or her with a membership ticket. There is scarcely a servant girl in the Town who takes advantage of the privileges of the Library and their mistresses wonder why they want to go out every night. Present them with membership to the Public Library. Make them feel that they have a right to go in and look over the magazines and papers and take a book home with them if they wish to do so.

Let the citizens bear in mind that in helping the Library they are helping themselves. It belongs to the people and the people should cheerfully assist in its maintenance.

Axes, saws, cow ties, axe handles, meat choppers, food cutters, mitts, Gloves, herbageum, feed it now.

For further particulars enquire of  
30-1m JOHN M. HAWLEY

The Bible Society, of Newburgh, had quite an interesting meeting here last Wednesday evening. Rev. Mr. Smith took the topic.

Monday evening was literary evening at the Epworth League, a very interesting debate was discussed. Resolved that a Monarchy was preferable to a Republic. The affirmative was taken by Mr. Ray Farley, Pearl Patterson and George Paul, while the negative was taken by Mr. Percy Nesbit, Jennie Brandon and Ruth Patterson. At the finish the decision was given in favor of the affirmative. The judges were Rev. Mr. Mears, Rev. Reddick and Miss Baker. After the debate the members of the church presented Miss Young, our organist, who is about to leave us, with a magnificent silver bakelish. The address was read by Rev. Mrs. Mears and the present was given to her by Miss Jennie Brandon. Miss Young returned her thanks in a few fitting words.

Mr. Herbert Shane, of Belleville, spent a few days at his home, Milsap Post Office.

Mr. Henry A. Hicks is spending a couple of weeks visiting friends at Harrowsmith.

A great offer—The Napanee Express from now until January 1907 for \$1.00. Send your order early.

#### The Choice of Royalty.

It is not generally known that the only chocolates served on the railway car during Prince Arthur of Connaught's recent visit to Canada, were McConkey's fresh hand-made chocolates. The Medical Hall—Fred L. Hooper, sole agent for Napanee.

#### DENBIGH.

Mr. James Stater had the misfortune while attending a threshing mill to get a prong of a hay fork run clean through one of his hands. The wound was a very painful one and the whole arm swelled so bad that it was feared blood poisoning had set in. Under proper treatment however, the pain as well as the swelling has been reduced and the wound has commenced to heal.

Ferdinand Stein who had a very serious attack of Pneumonia and was for several days in a very critical condition, is also improving again and it is hoped that he will fully recover.

Mr. and Mrs. Robert Thompson, of Hungerford, are the guests of Mr. and Mrs. Walter Thompson, of Slate Falls.

Mrs. Louise Dunn, of Deseronto, has again arrived and intends to spend the winter with friends and relatives in this vicinity.

Mr. F. E. Anderson, of Napanee, A. S. I., visited our schools last week and improved the opportunity by enjoying a few days sport. He succeeded in getting the number of deer to which he was legally entitled. Our woods are alive again with local and outside sportsmen, and their hounds. The Township clerk had issued all the settlers permits sent to him before the opening of the season, and had to send for another supply. Yet a number of settlers or their sons are suspected or known to hunt without a licence or permit, and are running the risk of being fined. Deer are reported to be rather more plentiful this fall than in previous seasons.

A series of evening entertainments consisting of tricks of leger demain and pieces of comedy, were given last week in the Orange Hall, by Mr. and Mrs. M. Labelle, of Pembroke, representing the Turner Medicine Co., of St. Louis, Mo. The hall was nearly disposed every evening and they disposed of a large quantity of their medicines.

A great offer—The Napanee Express from now until January 1907 for \$1.00. Send your order early.

#### Actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to 10 per cent (10 p. c.) of the amount of the tender, which will be forfeited if the party tendering declines to enter into a contract when called upon to do so, or if he fails to complete the work contracted for. If the tender is not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

FRED GELINAS,

Secretary.

Department of Public Works,  
Ottawa, November 2nd, 1906.

Newspapers inserting this advertisement without authority from the Department will not be paid for it. 49b

#### Gas Mantles, Globes and Lamps. MADOLE & WILSON

Premier Bond of Newfoundland has decided to enforce the bait act in spite of the modus vivendi.

Forty-seven persons were killed in a wreck on the Baltimore & Ohio Railroad burned to death in the fire which followed.

The efforts of the defence in the case of Mr. Charles McGill are directed towards proving the connivance of the President and the directors in the series of marginal stock speculations and in the manipulation of accounts.

ITCH, Mange, Prairie Scrathees and every form of contagious Itch on human or animals cured in 30 minutes by Wolford's Sanitary Lotion. It never fails. Sold by F. L. HOOPER.

On account of the Quebec City Council refusing to endorse the request of the Ross Rifle Company for an additional piece of land the company will move their plant for the manufacture of sporting rifles, shotguns and automatic pistols to some other place.

Belleville, Ont., Nov. 10.—A boy fourteen years of age named Lake, son of John Lake, township of Murray, met with an accident that may possibly cause death. The boy was handling a gun, when it exploded, and he received the full force of the charge in his breast, which was literally torn away. His chances of recovery are slim.

Belleville Ont., Nov. 12.—The second hand store of Sandy Wardhaugh, situated on Front street, was broken into, on Sunday morning, and the robbers secured about forty watches and other jewelry to the value of about \$400. Mr. Wardhaugh discovered the burglary on Sunday morning, after breakfast. The police have no clue as yet. Entrance was obtained through a back window.

Genuine American and Canadian Coal Oil.

#### MADOLE & WILSON.

Kingston, Nov. 13.—Mr. Joseph Bawden, a well-known lawyer and writer, was drowned this afternoon. He had been on the lookout for two rowboats to send to Fort William. Two weeks ago he bought one, and he was trying another when the lamentable accident occurred. After lunch Mr. Bawden went to Black's boat livery and talked with the caretaker about a boat. He said he would go for a row. He started off rowing at a good stroke. He went westward. Edward Ferris noticed a man rowing, and a minute later when he looked the boat was empty. Employees at the Kingston hosiery mill noticed the empty boat, and, after watching it for some time, Mr. Pettit borrowed a boat and went out. He towed the craft, and he says on his way in he saw the body floating. After he brought the boat ashore he started to find the body but could not locate it. The coat and hat were soon identified, and the sad tidings spread over the city.

#### That Night has Passed.

When one is obliged to sit by a smoked lamp chimney, and do their reading or sewing. The high grade American Coal Oil sold at The Medical Hall will give you light without the smoke. Try one gallon. Fred L. Hooper.

Your druggist not only keeps it, but recommends it.

Price, 25 cents.

# COLTSFOOTE EXPECTORANT

## RECORD IN BREAD-MAKING.

An Erdington (England) baker, Mr. Herbert Prosser, has distinguished himself by racing against time in the converting of a field of wheat into loaves. The entire field was purchased by Mr. Prosser, and cut, thrashed, winnowed, and baked by machinery. From the time that the last of the wheat was gathered to the moment of its withdrawal from the oven in the shape of loaves, only three and a half hours elapsed. This, Mr. Prosser claims, is a world's record. Five years ago a similar feat was performed, but subsequent seasons have not been dry enough to allow of its repetition.

## BABY'S FRIEND.

Happiness is a sign of health in babies. Nearly all their troubles vanish when they digest food well and are free from teething pains. Baby's Own Tablets brings happiness to babies by curing stomach troubles, constipation, feverishness, diarrhoea and teething troubles. There's a smile in every dose and the mother has a solemn guarantee that this medicine contains no opiate or harmful drug. Mrs. James Jewers, Beaver Harbor, N.S., says: "I have given my baby Baby's Own Tablets as occasion required since she was a day old. They have always helped her, and now at a year and a half old she is a fine healthy child. I think every mother should always keep these Tablets on hand." You can get Baby's Own Tablets from any medicine dealer or by mail at 25 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

"Do you think that music is of any practical benefit?" "Well," replied the cynic, "judging from the photographs of eminent violinists, it must keep the hair from falling out!"

**Two Years Aboard.**—"For eight years I suffered as no one ever did with rheumatism; for two years I lay in bed; could not so much as feed myself. A friend recommended South American Rheumatic Cure. After three doses I could sit up. To-day I am as strong as ever I was."—Mrs. John Cook, 287 Clinton street, Toronto.—2

Perambulating barbers, shaving customers in the street, are no unusual sight in the side streets of Manila.

WE CLAIM that "The D & L" Menthol Plaster will cure Lumbago, Backache, Sciatica or Neuralgia faster than any other plaster. Recommended by everybody.

Often on the green leaves of trees there are little black spots which do not seem to arise from any disease, as the plant looks otherwise healthy enough. As a matter of fact, these are caused by burning, through the rays of the sun getting focussed by the drops of morning dew.

## THE ZULU WAR CRY.

The Zulu war cry, used whenever they take the field by the South African footballers now in London, has puzzled our newspapers, not one of which seems able to spell it correctly. The Daily Express gives it as "Igamilzho," and the Daily Mail as "Gammillo." The cry really consists of two words, and should be written "Igama layo." "Igama" is Zulu for "name," and "layo" is a possessive pronoun, meaning either "his" or "their." Thus the Daily Mail, although quite wrong in its orthography of the cry, is right in saying that it merely means "That is his name." The explanation is that Zulu etiquette does not allow warriors, when they rush into battle, to mention the names of their enemies, but the leaders shout out, "That is his name," pointing to the victims with their spears.

## IN A DEADLY DECLINE.

Saved Just in Time by Dr. Williams' Pink Pills.

"Before my daughter Lena began taking Dr. Williams' Pink Pills she looked more like a corpse than a live girl," says Mrs. Geo. A. Myles, of South Woodlee, Ont. "Her blood seemed as though it had all turned to water. Then she began to have bad spells with her heart. At the least excitement her heart would beat so rapidly as to almost smother her. She grew very thin, had no appetite, and what little food she did eat did not seem to nourish her. She was treated by one of the best doctors in this part of the country, yet she was daily growing worse and her heart got so bad that we were afraid that she would die. She slept but very little, and would frequently awake with a start and sometimes would jump right up in bed. These starts would always bring on a bad spell and leave her weak and exhausted. We had almost given up all hope of her ever being well again, when we decided to try Dr. Williams' Pink Pills. After taking a couple of boxes she began to sleep better at night and color began to return to her lips. From that on she kept right on gaining and after taking eight boxes of the pills she was again in good health. She is now fifteen years of age, the picture of health, and since beginning the pills has gained about forty pounds in weight. Only those who saw her when ill can appreciate the marvellous change Dr. Williams' Pink Pills have brought about in her condition. I believe that had it not been for the pills she would be in her grave to-day, and it is with feelings of great gratitude that I write you in the hope that it may benefit some other sufferer."

And Dr. Williams' Pink Pills can do just as much for every weak, ailing, pale-faced young woman who is slipping from anaemia into a deadly decline. Dr. Williams' Pink Pills actually make new blood. In that way they strike straight at the root of all common diseases like anaemia, headaches

# DARE HE?

## OR, A SAD LIFE STORY

### CHAPTER V.

There is no particular reason why Burgoyne should not impart to his companion what he knows—after all it is not very much—about their two countrywomen. Upon reflection he had told himself this, and conquered a reluctance, that he cannot account for, to mentioning their name; and to relating the story of those shadowy idyllic two months of his life, which form all of it, that has ever come into contact with theirs. So that by the time—some thirty-six hours later—when they reach Florence, the younger man is in possession of as much information about the objects of their common interest, as it is in the power of the elder one to impart.

To neither of them, meanwhile, is any second glimpse vouchsafed of those objects, eagerly—though with different degrees of overtiness in that eagerness—as they both look out for them among the luggage-piles and the tweed-clad English ladies at the station. It had been the intention of Burgoyne that he and his friend should put up at the same hotel as that inhabited by his betrothed and her family; but finding that it is full, he orders rooms at the Minerva, and in the fallen dusk of a rather chill spring night, finds himself traversing the short distance from the railway to that hotel.

As he and Byng sit over their coffee after dinner in the salle a manger, almost its only tenants at that late hour, the younger man remarks matter-of-factly, as if stating a proposition almost too obvious to be worth uttering—

"I suppose you are off to the Anglo-American now."

"I think not," replies Jim slowly; "it is past ten, you see, and they are early people." He adds a moment later, as if suspecting his own excuse of insufficiency, "Mr. Wilson is rather an invalid, and there is also an invalid, or semi-invalid sister; I think that I had better not disturb them to-night."

Byng has never been engaged to be married, except in theory, and it is certainly no business of his to blow his friend's flagging ardor into flame, so he contents himself with an acquiescent observation to the effect that the tarin must have been late. But at all events the next morning finds Burgoyne paying his siacre at the door of the Anglo-American, with the confidence of a person who is certain of finding those he seeks, a confidence justified by the result; for, having followed a waiter across a court-yard, and heard him knock at a door on the ground-floor, that door opens with an instantaneousness which gives the idea of an ear having been pricked to catch the expectant rap, and the next moment, the intervening garcon having withdrawn, Jim stands face to face with his Amelia. Her features are all alight with pleasure, but her first words are not particularly amorous.

"Would you mind coming into the dining-room?" Sybilla is in the drawing-room already this morning. She said she was afraid it was going to be one of her bad days, so I thought" (rather regretfully) "that possibly she would be a little later than usual in coming down; but, on the contrary, she is much earlier."

It is possible that an extremely ardent love may be independent of surround-

"She will tell you about it herself," says Amelia; "she tells everybody; she likes talking about it—it is very odd, but she does. When you throw me over"—rubbing his hand, which she holds, with shy and deprecating carelessness against her own cheek—"I shall tell nobody; I sha' keep my misfortune very dark."

"When I do!" repeats he, with laughing emphasis; but to his own ear both the emphasis and the laughter sound flat. This is perhaps the cause why he, a second time runs away from his subject; or, more probably, he is really in haste to get to the new one. "Meanwhile," he says, his eyes involuntarily dropping to the carpet, as if he had rather not see the effect of his words upon her; "meanwhile, some one has thrown me over."

"You?"

"Yes, me; I did not write it to you, because I do not see much use in putting down bad news in black and white, and even with this little delay, I am afraid," with a dry smile, "that you will have plenty of time to enjoy it."

He pauses for an instant, and she does not hurry him with any teasing questions; but waits, with meek patience, till he feels inclined to go on.

"My aunt is going to be married."

If he has wished that his news shall produce the effect of a torpedo, he has no cause to complain of his want of success. His placid Amelia vaults to her feet.

"Married!" she repeats with a gasp. "Why, she is quite, quite old!"

"She is sixty-five!"

The color has flooded all Amelia's face; the blazing color that means not pleasure, but consternation. It is some moments before she can frame her next query.

"And is he?—do you?—has she chosen wisely, I mean?"

Jim laughs again.

"Can one choose wisely at sixty-five?"

Well, whether she has or no is a matter of opinion; she has chosen the curate of the parish, who, by reason of his extreme juvenility is still in deacon's orders."

Miss Wilson's limbs are shaking so that she cannot maintain her standing attitude. She sinks down by the dining-table again in her hard chair. It is a very hard chair on which to receive such ill-news.

"And you cannot hinder it, cannot you dissuade her?" she asks falteringly.

"I shall not try; poor old woman."

After all, she has a right to pursue her own happiness in her own way, only I wish that she had made up her mind twenty years ago; though to be sure, how could she?—with another smile—"since, at that time, her bridegroom was not much more than born."

A dead silence supervenes—a silence of shocked stupefaction on the one side, of rather dismal brooding on the other. At length Amelia nerves herself to put a question upon which it seems to her, not very incorrectly, that her whole future hangs. She does it in such a low voice that none but very sharp ears could have caught it. Jim's ears are so; practised as they are in listening for the stealthy tread of wild animals, and for the indescribable sounds of mountain solitudes at night.

"Will it—will it—make a great difference to you?"

Burgoyne lifts his eyes, which have

there are little black spots which do not seem to arise from any disease, as the plant looks otherwise healthy enough. As a matter of fact, these are caused by burning, through the rays of the sun getting focussed by the drops of morning dew.

**Signals of Danger.**—Have you lost your appetite? Have you a coated tongue? Have you an unpleasant taste in the mouth? Does your head ache, and have you dizziness? If so, your stomach is out of order and you need medicine. But you do not like medicine. He that prefers sickness to medicine must suffer; but under the circumstances the wise man would procure a box of Parnelee's Vegetable Pills and speedily get himself in health, and strive to keep so.

**Young Mother:** "Do you think baby looks most like me or his papa?" Nurse: "Like you, mum. Mr. Jenkins is a mighty handsome man." Advertisement: "Wanted—A competent and well-mannered nurse."

**SCALD HEAD** is a disgusting and obstinate disease, frequent in children. Treatment: Perfect cleanliness and a generous application of Weaver's Cerate. Mothers will be glad to learn this.

**Cathart:** "Do you believe a child inferior, Mr. Moddest? Well, my child may make its mental qualities of his parents' some very brilliant remarks sometimes."

**Catarrah** for twenty years and cured in a few days.—Hon. George James, of Burlington, Pa., writes: "I have been a martyr to Catarrah for twenty years, constant hacking, dropping in the throat and pain in the head, very offensive breath. I tried Dr. Agnew's Catarrah Powder. The first application gave instant relief. After using a few bottles I was cured. 50 cents."

**Newly-wed:** "Why, I never thought of saving until I got married." Bachelor: "And do you now?" Newly-wed: "Oh, yes, indeed! I am content, by thinking how much I might save if I wasn't married."

**The Most Popular Pills.** The pill is the most popular of all forms of medicine, and of pills the most popular are Parnelee's Vegetable Pills, because they do what it is needed that they can do, and are not put forward on any fictitious claims to excellence. They are compact and portable, they are easily taken, they do not nauseate nor grip, and they give relief in the most stubborn cases.

It's a natural thing for some office-bodies that killing time isn't punishable by law.

**ITCH.** Mango, Prairie Scratches and every form of contagious Itch on human creatures cured in 30 minutes by Wobbold's Sanitary Lotion. It never fails.

#### NO TROUBLE.

**Fleming:** "What rate do they charge for a house like yours?"  
**Finnigan:** "Twelve dollars."  
**Fleming:** "My, that's high. Don't ye have trouble getting it together?"  
**Finnigan:** "Faith, Oi don't, but the agent does."

And Dr. Williams' Pink Pills can do just as much for every weak, ailing, pale-faced young woman who is slipping from anaemia into a deadly decline. Dr. Williams' Pink Pills actually make new blood. In that way they strike straight at the root of all common diseases like anaemia, headaches and backaches, heart palpitation, indigestion, neuralgia, rheumatism and the secret ailments and irregularities of girls and women. Sold by all dealers in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

#### WHY SEA-SHELLS MURMUR.

The reason why one can hear sounds like the roaring of the sea when certain shells picked up on the beach are placed to the ear is quite simple. The hollow form of the shell and its polished surface enable it to receive and return the beatings of all sounds that chance to be trembling in the air around the shell.

#### THE PRICE OF SUCCESS.

Eternal vigilance is the price of success, and it is in this way that the successes of the Starr Mfg. Co.'s hockey skates and sticks has been bought. The makers are ever on the alert to know what the hockey-ists' requirements are and in this way incorporate these features which make their line the most popular in the market. They are also alert to see that their goods cannot be excelled in quality of materials and workmanship. This policy, which will always be maintained, has made the firm and its goods famous thousands of miles away from the little North Scitain town where the factory is situated.

"Why on earth are they entering this woman?" "Perhaps they see that she wants practice!"

"Thought it meant death sure." Mrs. James McKim, of Danville, Ont., says of her almost miraculous cure from heart disease by Dr. Agnew's Cure for the Heart: "Until I began taking this remedy I despaired of my life. I had heart failure and extreme prostration. One dose gave me quick relief and one bottle cured me. The sufferings of years were dispelled like magic."

"Bridget, did you make that chicken brot?" "Oi did, mum." "I can't find it anywhere about; what did you do with it?" "Sure an phwat else would I do wid it but fade the chickens wid it, mum?"

Bickle's Anti-Consumptive Syrup is agreeable to the taste, and is a certain relief for irritation of the throat that causes hacking coughs. If used according to directions it will break the most persistent cold, and restore the air passages to their normal condition. There is no need to recommend it to those familiar with it, but to those who seek a sure remedy and are in doubt what to use, the advice is—try Bickle's Syrup.

#### ASLEEP FOR 28 MONTHS.

German Hurt on the Head June 20, 1904, Has Been Slumbering Ever Since.

Prof. Eulenber reports in the Medical Weekly the case of a patient who has been asleep steadily since June 20, 1904.

The man, who is 45 years old and was town clerk of a suburb of Berlin Germany, fell from a street car at the time mentioned and struck on the back of his head. When he was taken home it was found that he was suffering from concussion of the brain, but he was sensible of his surroundings. While the doctors were examining him he fell asleep and has been in that condition ever since.

He lies in bed, frowning heavily all the time. His limbs are flexible but his skin has lost its color. He shows sensibility when food is placed to his lips and chews it mechanically.

was afraid it was going to be one of her bad days, so I thought" (rather regretfully) "that possibly she would be a little later than usual in coming down; but, on the contrary, she is much earlier."

It is possible that an extremely ardent love may be independent of surroundings; may burn with as fierce a flame, when its owner or victim is seated on a hard horse-hair chair beside a dining-room table in a little dull hotel back room, as when the senses are courted by softly-cushioned lounges, penetrating flower scents, and cunningly arranged bric-a-brac; but perhaps Jim's passion is not of this intense and Spartan quality. At all events a chill steals over him as Amelia leads the way into that small and uncheerful chamber where the Wilson family daily banquet. He is not so lost to all sense of what England and Amelia expect of him, as not to take her in his arms and kiss her very kindly and warmly, before they sit down on two hard chairs side by side; and even when they have done so, he still holds her hand, and kisses it now and then. He has a great many things to say to her, but "out of the abundance of the heart the mouth speaketh" is not invariably true. Sometimes that very abundance clogs the utterance, and, after a ten months' separation, the hinges of even lovers' tongues are apt at first to be somewhat rusty.

"And are you really glad to see me again?" asks the woman—she is scarcely a girl, having the doubtful advantage of being her betrothed's senior by two years. The horsehair chairs are obviously powerless to take the edge off her bliss; and she can scarcely command her voice as she asks the question.

"I decline to answer all such futile inquiries," replies he, smiling not unkindly; but there is no tremor in his words or tone; but in both lurks a note of wistfulness which gives his conscience a prick.

"Of course not! of course not!" he rejoins, hastily; "but it is not really ten months—no, surely!"

"Ten months, one week, two days, four hours and a half!"

Against such exactitude of memory what appeal has he? He attempts none, and only thinks with a faint unjust irritation that she might have spared him the odd hours.

"And how are things going? How are you all getting on?" he asks, precipitating himself upon a fresh subject, since he feels prevented by circumstances from saying anything likely to bring him much distinction upon the old one. "Your father?"

"His throat is better"—with an accent of hesitating filial piety, as if there were something else about him that was not better.

"And Sybilla?"

"Oh, poor Sybilla! she has her bad days now and then."

"And, like the early Christians, she resolves to have all things in common. I expect that her family have their bad days, too, says Jim, drily."

"Well, we do sometimes," replies Amelia with reluctant admission; "but she really does try to control herself, poor thing; she is hardly ever unbearable now."

"And Cecilia?"

"She is rather in trouble just now; I fear there is no doubt that the man she was engaged to has thrown her over. You never saw him? Oh, no! Of course the affair came on after you left England."

could have caught it. Jim's ears are so practised as they are in listening for the stealthy tread of wild animals, and for the indescribable sounds of mountain solitudes at night.

"Will it—will it—make a great difference to you?"

Burgoyne lifts his eyes, which have been idly bent on the floor, and looks straight and full at her across the corner of the table.

"It will make all the difference!" he answers slowly.

Poor Amelia is holding her handkerchief in her hand. She lifts it to her mouth and bites a corner of it to hide the quivering of her lips and chin. She does not wish to add to his pain by any breakdown on her own part. But Jim divines the quivering even under the morsel of cambric, and looks away again.

"Her money is almost entirely in her own power," he continues, in an unemotional voice; "and when she announced her marriage to me, she also announced her intention of settling the whole of it upon her—her"—he pauses a second, as if resolved to keep out of his voice the accent of satire and bitterness that pierces through its calm—"her husband."

Amelia has dropped both shielding hand and handkerchief into her lap. She has forgotten her effort to conceal the blankness of her dismay. Unless she conceals the whole of her face indeed, the attempt would be in vain, since each feature speaks it equally.

"Her whole fortune?" she repeats, almost inaudibly. "All?"

"What, all my pretty chickens and their dam?"

says Jim, oppressed by her overwhelmed look into an artificial and dreary levity, and in not particularly apt quotation. "My dear, do not look so broken-hearted. I am not absolutely destitute; I need not become a sandwich man. I have still got my £200 a year, my very own, which neither man nor mouse, neither curate nor vicar can take from me. I can still go on rioting upon that; the question is"—his words coming more slowly, and his tone growing graver—"have I any right to ask you to riot on it too?"

Her hand has gone in feverish haste out to his for answer, and her eyes, into which the tears are welling, look with an intense dumb wistfulness into his; but, for the moment, it remains dumb. There is something painful to Burgoyne in that wistfulness, almost more painful than the telling of that news which has produced it. He looks down upon the table-cloth, and, with his disengaged hand, the one not imprisoned in his betrothed's fond hold, draws patterns with a paper-knife accidentally left there.

"The only thing I blame her for," he

TOILET WARE in artistic abundance is pictured in the pages of our Catalogue. Whether your taste turns to Silver, Ebony or Ivory, it will find ample variety from which to choose.

From our own factory comes the richly chased Pompadour Pattern in heavy Sterling Silver. A six-piece set—consisting of Cloth, Velvet and Hair Brushes, with Mirror and Comb—is unprecedented value at \$30.

Pieces are sold singly if desired, so that a set may be added to, year by year.

Drop us a postal card and we will send you free of charge our large illustrated catalogue of Jewelry, Silverware, Leather Goods, etc.

Ryrie Bros Limited  
Toronto, Ont.

continues, not following up the branch of the subject that his last speech had begun to open up, and speaking with a composure which, to the stricken Amelia, appears to evidence his attainment of the highest pinnacle of manly fortitude, "the only thing I blame her for, is her having hindered my adopting any profession. Poor old woman, it was not malice premeditated, I know; she had not seen her Jessamie then, probably had not even a prophetic instinct of him, but as things turned out"—stiffing a sigh—"it would have been kinder to have put me in the way of earning my own living."

Amelia's head has sunk down upon his hand—he feels her hot tears upon it; but now that the theme has no longer reference to herself, she can speak. She straightens herself, and there is a flash, such as he has very seldom seen there, in her rather colorless orbs.

"It was monstrous of her!" she cries, with the almost exaggerated passion of a usually very self-controlled person. "After having always told you that you were to be her heir!"

"But had she told me so?" replies Jim, passing his hand with a perplexed air over his own face. "That is what I have been trying to recall for the last few days. I never remember the time when I did not believe it, so I suppose that some one must have told me so, but I

"Have you realized," he says, "that I shall never be better off than I am now? never! never! For though of course I shall try to get work, one knows how successful that quest generally is in the case of a man with no special aptitudes, no technical training, and who starts in the race handicapped by being ten years too late!"

But the dismalness of his panorama raises no answering gloom in the young woman's face. She nods her head gently.

"I realize it." "And this is what I have brought you to, after all these years' waiting," he continues, in a tone of profound regret. "All I can offer you at the end of them is a not particularly genteel poverty, not even a cottage with a double coach-house"—laughing grimly.

"I do not want a double coach-house, nor even a single one!" replies Amelia, stoutly, and laughing too, a little through returning tears. "Do not you know that I had rather drive a costermonger's barrow with you than go in a coach and six without you!"

This is the highest flight of imagination of which Jim has ever known his matter-of-fact Amelia guilty, and he can pay his thanks for it only in compunctious kisses. Perhaps it is they, perhaps it is the thought which dictates her next hesitating speech that bring a light into Amelia's tear-reddened eyes.

"If you will never be better off—" She stops.

"Yes, dear, go on; 'If I shall never be better off—I certainly never shall; I feel sure that you will be able to put my earnings for the next ten years into your eye, and see none the worse for them!'"

"If — you — will — never — be — better — off," she repeats again, more slowly, and breaking off at the same place.

"Well, dear?"

"If you will never be better off." This time she finishes her sentence; but it is rendered almost inaudible by the fact of her flushed face and quivering lips being pressed against his breast. "Why should we wait any longer?"

"Why should we wait any longer?" To most persons, granted the usual condition of feeling of a betrothed couple, this would seem a very natural and legitimate deduction from the premises; but, strange to say, it comes upon Burgoyne with the shock of a surprise. He has been thinking vaguely of his change of fortune as a cause for unlimited delay, perhaps for the rupture of his engagement, never as a reason for its immediate fulfilment.

He gives a sort of breathless gasp, which is happily too low for Amelia with her still hidden face to hear. To be married at once! To sit down for all time to Amelia and £800 a year! To forego for ever the thrilling wandering life; the nights under the northern stars; the stealthy tracking of shy forest creatures; the scarce coarse delicious food, the cold, the fatigue, the hourly peril, that, since its probable loss is ever in sight, makes life so sweetly worth having—all in short that goes to make up so many an Englishman's ideal of felicity; that has certainly hitherto gone to make up Jim's. To renounce it all! There is no doubt that the bitterness of this thought comes first, but presently, supplanting it, chasing it away, there follows another, a self-reproachful light flashing over his past eight years, showing him his own selfishness colossal and complete for the first time. In a paroxysm of remorse, he has lifted Amelia's face, and, framing it with his hands, looks searchingly into it.

"I believe," he says in a shaken voice, "that you would have married me eight years ago, on my pittance, if I had asked you!"

No "Yes" was ever written in larger print than that which he read in her patient pale eyes. Even at this instant there darts across him a wish that they were not quite so pale, but he detests himself for it.

"And I never suspected it!" he cries, compunctiously. "I gave you my word of honor, I never suspected it! I thought you looked upon my poverty in as pro-

**THE STARR MFG CO., LIMITED,**  
DARTMOUTH. - N. S.

Dawkins: "I got a good square meal last night, the first in several weeks, and I have you to thank for it." Friend: "Me to thank? Well, that's news to me." Dawkins: "Yes, I know. I wired to my wife yesterday morning that you were coming home to dinner with me."

had had the same old sor sor repines him, passing his hand with a perplexed air over his own face. "That is what I have been trying to recall for the last few days. I never remember the time when I did not believe it. so I suppose that some one must have told me so; but I could not swear that she herself had ever put it down in black and white. However," tossing his head back with a gesture as of one who throws off his shoulders a useless burden, "what does that matter now? I am not her heir, I am nobody's heir; we must look facts in the face! Amelia, dear!"—in a tone of reluctant tender affection, as of one compelled, yet most unwilling, to give a little child, or some other soft, helpless creature, pain—"we must look facts in the face!"

There is something in his voice that makes Amelia's heart stand still; but she attempts no interruption.

"It is very hard for me, dear, after all these"—he pauses a second; he is about to say "weary years' waiting," but his conscience arrests him; to him they have not been weary, so after a hardly-perceptible break, he goes on—"after all these many years' waiting, to have come to this, is not it?"

He had not calculated on the effect which would be produced by his melancholy words and his caressing tone. She buries her face on his shoulder, sobbing uncontrollably.

"They were not long!" she murmurs "rokenly." "Nothing is, nothing can be, long to me as long as I have you, or the hope of you!"

#### CHAPTER VI.

It is, perhaps, fortunate for Amelia that she cannot see the expression of the face which looks out above her prostrate head into space, with a blankness equal to what had been her own, a blankness streaked, as hers was not, with remorse. He would give anything to be able to answer her in her own key, to tell her that, as long as he can keep her, the going or coming of any lesser good hurts him as little as the brushing past his cheek of a summer moth or wind-blown feather. But when he tries to frame a sentence of this kind his tongue cleaves to the roof of his mouth. He can only hold her to him in an affectionate clasp, whose dumbness he hopes that she attributes to silencing emotion. She herself indulges in no very prolonged manifestation of her passion. In a few moments she is again sitting up beside him with wiped eyes, none the handsomer, poor soul, for having cried, and listening with a deep attention to an exposition of her lover's position and prospects, which he is at no pains to tinge with a facetious rose-color.

were not quite so pale, but she detests himself for it.

"And I never suspected it!" he cries, compunctiously. "I give you my word of honor, I never suspected it! I thought you looked upon my poverty in as prohibitory a light as I did myself."

"I do not call it such great poverty," replies Amelia, her practical mind re-assuming its habitual sway over her emotions. "Of course it is an income that would require a little management; but if we cut our coat according to our cloth, and did not want to move about too much, we might live either in a not very fashionable part of London, or in some cheap district in the country very comfortably."

Despite his remorse, a cold shiver runs down Burgoyne's spine at the picture that rises, conjured up with too much distinctness by her words, before his mind's eye; the picture of a smug Bayswater villa, with a picturesque parlormaid, or the alternative cottage in some dreary Wiltshire or Dorsetshire village, with a shrubbery of three Aucuba bushes, and a kitchen-garden of half an acre. It may be that, her frame being in such close proximity to his, she feels the influence of his shiver, and that it suggests her next sentence, which is in a less sanguine key.

(To be continued).

**WEAK WATERY BLOOD** causes much trouble. That tired feeling and many more symptoms follow in its wake. Try "Ferrovin." It is the best tonic to make you strong and well. All druggists sell it.

She: "I wonder why a woman always marries the man who rescues her from drowning?" He: "That's what the man wonders later on."

A modern weapon in the battle for health.—If disease has taken your citadel of health, the stomach, and is torturing you with indigestion, dyspepsia and nervous prostration, South American Nervine is the weapon to drive the enemy from his stronghold "at the point of the bayonet," trench by trench, but swift and sure, it always wins.—4

"Isabel says she will never marry a man who isn't a hero." "But she can easily convert any man into a hero." "How?" "By getting him to marry her."

Are your corns harder to remove than those that others have had? Have they not had the same kind? Have they not been cured by using Holloway's Corn Cure. Try a bottle.

A judge and a barrister being upon indifferent terms, a client of the counsel's making his appearance at the bar with his jaw terribly swelled, the judge remarked:—"Mr. —, this client of yours would make an excellent barrister; he's all jaw," which set the court in a roar of laughter against the barrister. On silence being restored, the counsel then remarked:—"My lord, I think he would make a better judge, for his jaw is all on one side." The retort turned the laugh against the judge, and from that day they were good friends.

The price is 25c. per bottle, and all dealers in medicine sell  
**SHILOH**  
This remedy should be in every household.

#### 48 HOURS AT PIANO.

Napoleon Bird Establishes a New Record Thumping "Dominoes."

Napoleon Bird, of Stockport, England, has established a record for a non-stop run on the piano. For 48 hours he hammered away at the keys without a stop.

But this forty-eight hours' flow of melody was not achieved without physical discomfort. Mr. Napoleon Bird is fifty-one years, old, and his muscles are not so limber as they used to be, but Mrs. Napoleon Bird sat by his side for all the forty-eight hours, and her presence revived him in moments when his task appeared monotonous.

In the latter stages of this struggle between melody and time Mr. Napoleon Bird showed signs of excusable exhaustion and pardonable drowsiness. He was rescued from both by gentle showers of eau de cologne, which were sprayed on him. In the course of the last

The material used is straight grain selected second growth yellow birch.

day also a barber shaved him to slow music.

As the hands of the clock approached the hour of ten the enthusiasm of the audience knew no bounds, and when the clock struck and Mr. Napoleon Bird lifted his hands from the keyboard he was seized and carried in triumph through the streets to his home.

During the forty-eight hours he performed 1,500 separate compositions, accompanied three concerts, and played twice for dancing. A slight swelling of the fingers and cramp in the legs were the only ill-effects of his strenuous exertions.

A change of piano became necessary owing to the stiffness of the keys, but a skilful manoeuvre enabled Mr. Bird to change instruments without losing a note of the song he was playing.

#### AN ENGLISH MISER.

John Camden Neild, whose magnificent bequest to Queen Victoria supplied the funds out of which the Prince Consort built the present Balmoral Castle, deserves a place among the great misers and was as remarkable a man as any of them. He was educated at Eton and Trinity College, Cambridge, and was a barrister at Lincoln's Inn. At the age of 34 his father's death placed him in possession of a fortune of £250,000, and from that moment he became a confirmed miser. Neild lived at 5 Cheyne walk, Chelsea. His big house was so meanly furnished that it did not even boast of a bed. Two old women, who did his stoves, and a black cat were his sole companions. When he visited his large estates in the Midlands, which he did frequently, he generally walked, unless he could get a lift for nothing, and he was not even above taking a gratuitous seat on a dung cart. Sometimes he was compelled by the weather to take a seat on the stage coach. And there he would sit outside, shivering and dripping—for he never wore a greatcoat—an object of commiseration to his fellow passengers.

# AN ACCEPTABLE SACRIFICE

It Is the Service of Love Because We Are the Children of God.

If I were hungry I would not tell thee; for the world is mine and the fullness thereof. . . . Offer unto God thanksgiving, and pay thy vows to the Most High.—Psalms i., 12-14.

Men are not drawn together by a collection box. To make this the standard emblem of the church is but to emphasize the difference between the institution and the one who said, "Come unto me all ye that labor and are heavy laden and I will give you rest." It little helps the need of a hungry world to stand ever before it begging it to give, to bring in its offerings.

To the plain man there will always seem some absurdity in the request that he, human and finite, should sacrifice his own lamb or his few hard earned pennies to a being who is almighty, to whom the whole creation belongs. He cannot understand a Father who does nothing but sit by his altar and

## WATCH THE TITHES BROUGHT IN.

Is this the only concrete expression we can make of the spirit of worship, to give up material things to a spiritual being? Whence this change of conception, from the servants of the Man of Nazareth, who were sent out to heal and help and do good to an institution going out to collect everything that is good for itself?

Surely nothing could be farther from the old seer's and singer's thought of the wondrous one, from whom all things came, the source of all being, all beauty, all worth and wealth. He, as they clothed his glory in terms of mankind, was the great giver instead of a getter. To him the hungry looked and were fed, the naked were clothed, the sad cheered; to all he gave their meat in due season.

The emphasis was not on God's need of man and his possessions, but on man's need of the Most High. The life and spirit, the eternal power that moves through all our lives, needs not our

bare pittance wrung with anguish from field or loom, but the opening of our hearts, the lifting up of ourselves into touch with things sublime and spiritual. Heaven needs our hearts.

Who is to be pitied more than he to whom religion is the dropping of pennies through the slot of a collection box and seeing the world through its narrow crack. Rather is it the learning to see the eternal goodness, the unremitting giver in all this world, in every event, until the whole being goes out in grateful praise, offering the

## SACRIFICE OF THANKSGIVING.

True, there is no religion without sacrifice. But there is none in the sacrifice of gifts to the Almighty as though He were hard up, nor in gifts regarded as payments on paradise mortgages or as means of mollifying an offended judge. The sacrifice whose aroma rises sweet to heaven is the service of love, the self-denial born of gratitude or affection, the gifts to men because they are the children of the good Father.

The broken heart, the contrite sigh, the sympathy that serves—these are the sacrifices on which the welfare of the whole universe waits. We honor the divine less by lofty steeple or pealing organ than by entering into the beauty and enjoying the riches of the great temple of nature and making its wealth known, available and appreciable by all men everywhere.

The winning of the world waits for the revelation of the wealth of the Lord of all being. Men need not tarry till they have taxes for Him; with empty hand, with hungry hearts, with needy spirits, they are invited to come to the Father of spirits and the feast of His love as men came, the sick, the weary, the sad, long ago to one in whom they found the wealth of infinite love.

HENRY F. COPE.

# THE S. S. LESSON

## INTERNATIONAL LESSON.

NOV. 18.

### Lesson VII. Jesus Before Caiaphas.

Golden Text: Isa. 53.2.

#### THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Annas and Caiaphas.—Annas, the son of Seth, was high priest of the Jews from A. D. 6 or 7 to A. D. 15. Even after being deprived of his high-priestly office by the Roman authorities he still retained in a large measure both the power and the dignity of his former station among the Jews. Five sons and one son-in-law (Caiaphas) succeeded him in turn in the office of high priest. The family of Annas belonged to the old Sadducean aristocracy and derived its immense wealth, in part at least, from a monopoly which the family held on the sale of all kinds of articles necessary in connection with the sacrifices offered in the temple. It was the sons of Annas whom Jesus accused of making his Father's house a "den of thieves" and it was the vassal salesmen of this high-priestly family whom Jesus had driven from the courts of the temple. So strong was the influence of Annas in the Sanhedrin that even during the incumbency of his sons and

in the words quoted, yet from his use of the words in connection with his cleansing of the temple, and in answer to a challenge of the Jews to show them a sign establishing his authority, it was easy to place upon the words of Jesus the mistaken interpretation which the Jews gave to them, if indeed it was possible for those who heard him to understand his words in any other sense.

62. Answereth thou nothing?—A question of desperation. We note that the charge made by the two witnesses and referred to in the preceding verse was not pushed against Jesus by the Jews.

63. I adjure thee by the living God—Caiaphas, despairing of finding any charge of serious import against the prisoner, abruptly challenges him on the real point at issue between himself and the Jewish authorities, namely, his Messianic claims. His challenge is put into the form of this solemn demand, Tell us whether thou art the Christ, the Son of God. This challenge to definitely declare himself with regard to his Messianic claims Jesus answered unflinchingly and with full knowledge of what the consequences of a definite and public declaration of his divinity would be to himself.

64. Henceforth ye shall see the Son of Man sitting at the right hand of Power—As if Jesus had said, "I am indeed the Christ, the Son of the living God, and henceforth ye shall see him whom ye have known as a 'Son of Man' exalted to the dignity of the Son of God."

65. Rent his garments.—As custom required of the high priest before whom a prisoner had been convicted of blas-

# FLAGS OF THE REGIMENTS

BRAVE DEEDS PERFORMED TO SAVE THEM FROM CAPTURE.

Many of the Colors Droop From the Grey Walls of an English Cathedral.

The manner in which regimental colors have been saved in the face of superlative odds is to the everlasting credit of our officers, and the famous exploit of Lieutenants Coghill and Melville, who in the Zulu War escaped with the colors wrapped round their bodies, was a notable deed of valor. Another was seen at the surrender of Yorkton, when Captain Peter and another officer of the 23rd Regiment saved the colors by wearing them next their skin.

In the eagerness to save their priceless colors from falling into the hands of the enemy, the 20th Regiment, just prior to the surrender at Saratoga, deliberately burnt them. But on the same occasion Colonel Hill, of the 9th Regiment, displayed more cunning. Knowing that officers would be allowed to retain their personal baggage, he removed the colors from the staves and concealed them among his shirts and socks. There they remained for four years, and when, in 1781, the English troops were finally released, the gallant colonel was able to present the colors intact to George III., who in recognition of the successful feat, made Colonel Hill his A. D. C.

Many regiments are the possessors of distinctions in connection with their colors, of which they are very proud. The colors of the South Wales Borderers, for instance, are crowned by

## WREATHS OF IMMORTELES,

which were presented by the late Queen to commemorate the regiment's bravery at Isandhlwana; and the 7th Dragoon Guards—formerly the 7th Old Ligonier's Black Horse—claim to be the only regiment possessing the honor of having been presented with colors on the field of battle. At Dettingen George II., struck by the valor displayed by the regiment, and particularly by Cornet Richardson, personally presented the latter with a regimental standard, which now hangs in the Cavalry Barracks at Canterbury. It was at Waterloo that a famous Prussian officer, moved to enthusiasm at the gallant conduct of the old 52nd Regiment, approached and publicly embraced their regimental color.

The Northumberland Fusiliers and Queen's Royal West Surrey Regiments own a third color, presented for bravery in battle; and honorary third colors, to commemorate their gallantry at Assaye, were presented to the old 19th Regiment of Dragoons and 74th and 78th Regiments. The fact, too, is unique that the new colors given to the 43rd Regiment in 1874 were consecrated by the Rev. W. C. Madden—an old officer of the regiment who had been twice wounded

## IN THE PENINSULAR WAR.

The disposal of old regimental colors in these days suggests no difficulties—the most appropriate cathedral or church usually receiving them for safe custody. But the old colors of the 25th Regiment, which had been carried in all actions from Fontenoy to Wilhelmsthal, were, in 1763, after twenty years' service, solemnly buried with full military honors. And in view of the prospective disbandment of certain regiments it is interesting to recall that when, in 1816, the 2nd Battalion of the 8th Foot was disbanded at Portsmouth, the colors (which were painted, instead of being embroidered as is usual) were cut into small pieces and distributed amongst the officers; the poles were then burnt, and the ashes carefully buried in the centre of the barracks yard.

The number of occasions in which regimental colors have completely disappeared is astonishing when one considers the loving care usually bestowed on their custody. At the Battle of Chil-

# HOME.

## SOME DAINY RECIPES.

Apple Shape.—Peel, core and stew one pound of apples with a teaspoonful of grated lemon rind and half a pint of water; when quite soft rub them through a sieve. Dissolve a quarter of an ounce of gelatine in half a gill of water, add it to the apple, and stir in two tablespoonfuls of sugar. Fill a mould with cold water, let it drain, and put in the apple mixture. When cold turn out and serve with custard.

Parisian rice is a very good way of using up remains of poultry or game. Boil two ounces of rice, drain thoroughly, and place in a saucepan into a quarter of a pint of good gravy. Let this come to the boil, then add two ounces of poultry cut into dice, some chopped parsley, and half an ounce of butter; season with pepper, salt, and a grate of nutmeg. Let all simmer for about six minutes, place in a buttered pie-dish, cover the top with slices of tomato, and just brown in the oven.

Vegetable Marrow with Cheese.—Peel a small vegetable marrow, steep it in salted water for half an hour, take out and drain. Cut as many slices as you require to fill the dish to be used. Melt some butter in a stewpan, put in the slices, season with salt, pepper, and a little spice. Let all fry for a few minutes, shaking constantly. Place on a buttered dish, sprinkle grated cheese on the top, over this scatter bread-crumbs and a few bits of butter. Bake in a good steady oven for ten minutes and serve hot.

To Make Pink Apple Jelly.—Cut up seven pounds of apples (do not peel or core them), place in a pan with five pints of cold water, the rind of two lemons, and one inch of cinnamon. Cover with a flour and water paste and bake for six hours. Strain the juice through a cloth, place it in a clean preserving pan, and allow a pound of loaf sugar to every pint of juice; bring to the boil and cook fast for twenty minutes. Put the jelly into pots at once and cover with paper.

Lemon and Vegetable Marrow Preserve.—When the fruit is perfectly ripe cut it, and put it in a dry place for a few weeks so that the sap will dry out of it. Peel the marrow thickly and take away the seeds. To every six pounds of pulp, cut into squares of an inch, allow twelve pounds of sugar and two sliced lemons. Let these ingredients stand for twenty-four hours, then put into a preserving pan with two ounces of bruised ginger. Take out the ginger after one hour's boiling, and boil the rest slowly till all is clear, stirring frequently. Then place in perfectly dry pots for use.

A tapioca pudding is very good if carefully made, but it is so often merely a gummy stuff which is far from tempting. Take a teacupful of tapioca and soak in water for two hours allowing just sufficient water to cover, and adding more when that is absorbed. Pour into this a quart of milk, and boil in a double saucepan till soft, stir in the yolks of three eggs and two ounces of sugar, flavor with grated lemon rind. Place in a buttered pie-dish and cook gently till the egg is set, remove from the oven, spread a little raspberry jam over the pudding, and on it pile the stiffly-beaten whites of the eggs. Brown slightly in the oven and serve.

## THE BEST HOUSEWIFE.

The best housekeeper is not she who spends the whole day slaving in the house "doing the work," as she terms it; muddling is the correct expression. A woman with method gets through her domestic duties, even without the aid of a servant, by midday, or soon after, and then she takes a walk, makes a call on

# BISMARCK AND KAISER

## REVELATIONS IN DIARY OF THE LATE CHANCELLOR.

The Man of Blood and Iron Does Not Figure in a Very Amiable Light.

The revelations contained in Prince Hohenlohe's memoirs continue to astound the German public. They furnish the sole topic of conversation in official circles, and amazement is expressed on all sides that such a mass of indiscretion could be published without the knowledge or consent of the Emperor.

It is felt that the memoirs would have lost none of their interest had publication been delayed for 20 years. The majority of the personages involved would have been dead or retired from public service, and the episodes, the publication of which has given deep offence at more than one European court, would have lost their sting.

But the events described are so recent, and so many of the characters involved are still in public life, that the publication of the book at this time is, in the language of one Berlin newspaper, "the sheerest folly."

The German newspapers condemn the publication of the memoirs without exception. The *Tageblatt* asserts that old hatreds are revived, and that fresh troubles will likewise be engendered.

The *Vossische Zeitung* characterizes it as "the greatest political scandal for years." Certainly throughout the third Chancellor's absorbingly interesting memoirs details are given and conversations are reported bearing on living rulers and statesmen which are of such a nature that it is not surprising that they have roused the Emperor's anger, published as they were without his permission.

Writing under date June 2, 1880, Prince Hohenlohe describes the marriage of the present Emperor to Princess Victoria of Schleswig-Holstein. The Crown Princess, he says, complained of the unfriendly way in which the engagement of Prince William was received by the Prussian Princes and Princesses. Prince Hohenlohe refers to Prince William (the present Emperor) in the following words:—

"He is a rather boyish, inconsiderate young man, of whom his mother is afraid. He also has rows with his father. His wife is said to have a softening effect on him."

The Chancellor gives touching details of his interview with the dying Emperor Frederick, and describes in simple language how the Empress, hoping against hope, asked him whether her husband did not look better. After one interview the Emperor laid his hand on the Prince's shoulder and smiled so sadly that the latter almost broke down.

### BISMARCK'S RUDENESS.

On Sept. 22, 1888, Prince Hohenlohe was received in audience by the Empress Augusta Victoria, the wife of William I. "She was," he says, "very broken down and sad, and I am convinced that her cheerfulness was entirely assumed all last year. I found her in the depths of woe, and she could hardly speak through her tears. We began discussing the Emperor's last days, and then she became animated and spoke of the maliciousness and the disgraceful behavior of certain people, whom she mentioned by name. They were, she declared, trying to darken the memory of the Emperor by saying that he had never been really capable of ruling, and had done nothing, while he had, in fact, worked hard and had taken independent decisions.

"Prince Herbert Bismarck (the Empress added) had the impudence to tell the Prince of Wales that an Emperor who was unable to carry on a discus-

Prince Bismarck his pleasure at the latter's recovery."

Prince Hohenlohe records remarks made to him by the Emperor the day after the reconciliation of Bismarck, Jan. 27, 1894. "Yes, his Majesty is reported as having said, 'now they can erect triumphal arches in Bismarck's honor in Munich and Vienna, but I am a horse's length ahead of him. If the press starts its abuse again, it will put itself and Bismarck in the wrong.'"

Prince Hohenlohe records at length a highly interesting conversation on Far Eastern policy which he had with the Emperor Nicholas, at Breslau, on Sept. 6, 1890. The Czar said his chief task was Russian policy in the Far East and the completion of the Siberian Railway. The Japanese were making active military preparations, but they had no money, and, although the Chinese war indemnity now supplied them with means, when this was exhausted he did not know how they would find money to extend their armaments. In any case, they would take years, and by then the Siberian Railway would be ready to meet any eventuality.

The Czar also told Prince Hohenlohe that he had heard that Great Britain had a plan to bring Africa from the Cape to Egypt into her possession. That was, however, in his opinion, a long way off. The Prince, in reply, said that the British attached so much importance to their supremacy in Africa because they sought relief in South Africa from the fear that they would one day lose India.

"But who is going to take India from them?" asked the Czar. "We are not so stupid as to pursue such schemes."

### BISMARCKS TO RETALIATE.

There is soon to be a conference of members of the Bismarck family and of the intimate friends of the "Iron Chancellor" who survive him, to determine the weighty question whether the publication of Prince von Hohenlohe's derogatory account of the circumstances surrounding Bismarck's resignation as Chancellor warrants the counter publication of the fourth volume of Bismarck's memoirs.

This manuscript covers the period of Bismarck's relations with the young Kaiser. It lies in an iron chest in the vault of the Bank of England, where it was placed lest the Kaiser seize it. The Bismarck's do not believe in the sincerity of the Kaiser's indignation at the publication of von Hohenlohe's book, which really presents him in a favorable light.

## SHOULD DOCTORS SHAVE

A WRITER WHO CLAIMS IT IS ABSOLUTELY NECESSARY.

For They May Carry Infection From House to House in Their Beards.

It is a fact that many of the most famous surgeons and physicians of today wear beards and moustaches. It is also a fact that many hundreds of local practitioners allow their lips and chin to be covered with what they term "hirsute adornments." But is it healthy? Is it safe for the patient to be visited by a doctor who may be carrying from the last person he visited the germs of some more or less virulent disease in his beard? asks a writer in *Pearson's Weekly*.

Medical men are supposed to be the apostles of health and hygiene. Surely the wearing of beards and moustaches is a direct contradiction to their precepts. It is not that doctors can be accused in the slightest degree of uncleanness, or that they do not take the greatest care, in most things, of preventing the spread of disease.

It is true, of course, that the more

## MUST KEEP STILL TONGUE

EMPLOYEES WHO MUST NOT TELL OFFICE SECRETS.

Government Officials are Pledged to Secrecy — Bank Clerks in Same Position.

In an age when competition is at its fiercest it is essential that nations and individuals should take every precaution against having their positions prejudiced, if not endangered, by the indiscretions of employees. Even from time immemorial societies have been formed for the protection of trade secrets, among them London's famous guilds, such as the Loggers and the Spectacle-makers, to mention only two. Now-a-days different methods have to be adopted, and employers can only rely upon the honor of their employees, although the inevitable penalty of dismissal is no light one.

All Government officials are tacitly understood to regard the documents that pass through their hands as confidential, but in the most important departments—the Treasury, Foreign, and Home Offices—the clerks are formally pledged to secrecy, says London *Tit-Bits*. There are scores of men who would be willing to pay \$5,000 and more for certain particulars of the Budget a few days before it is presented to the House of Commons; while the value of details of important international treaties cannot be adequately expressed in mere dollars and cents.

In naval and military affairs the same considerations obtain; while the question of public contracts is also a temptation to the officials possessed of private knowledge. When a firm secures a great Government contract

### ITS SHARES ARE BOUND TO RISE.

Now, if anyone gets to know the name of the successful firm before it is published, all he need do is to instruct his brokers to buy up as many shares as possible and hold them until further orders. When the world has learned that Messrs. So-and-So have obtained a big order from the authorities the market changes, and the speculator is enabled to sell out at a large profit. This is only one of many temptations that daily beset the highly-placed officials in the service of the country, and it says much for the honor of the Civil Service that it is very seldom the tempter is successful.

Two important sections of State employees are the workers in dockyards and small arms factories. Everyone before being engaged must promise to keep a still tongue so far as the work is concerned, though, at the same time, the principals take good care to see that the men are watched during working hours. When a delicate and confidential piece of work has to be done it is usually divided up into sections, so that no one man can really understand the whole.

The manufacture of small arms is a very delicate matter, and that in more senses than one. Hundreds of patterns of new rifles are experimented with every year, for the Governments of Europe are still in search of the ideal rifle, and it behoves England to keep pace with their efforts; so details of experiments are never allowed to leak out.

### SECRET EXPERIMENTS

are also conducted by the manufacturers of steel casings for warships. Employees whose presence is necessary are bound not to disclose to rivals what they have seen. Of course, the Government is keenly interested in this particular trade, and every facility is afforded the firms in question to protect their interests.

Bank clerks occupy a somewhat peculiar position in the public service, for they are the repositories of many fam-

## ON THE FARM

### FEEDING MILK TO POULTRY

The great benefits to be derived from the feeding of milk to fowls seems to be almost entirely ignored by the majority of poultry keepers. Where corn is the principal ration, as is the case on the majority of farms, a liberal supply of milk to balance up this ration will be found most profitable in the return of eggs. If hens are fed all the milk they can be induced to drink, along with a corn ration, great gains can be expected in the egg production.

Last year we fed our fowls largely on corn, especially our laying hens, and for a balance ration we supplied all the milk we could possibly spare, and the result was an advance of eggs over any previous winter in our experience. On farms where there is a good supply of milk there should be no reason for not receiving a good supply of eggs. There can be no better ration for a flock of laying hens than plenty of corn to produce fat and milk to balance the corn ration and furnish the necessary elements for egg production. Where milk is supplied liberally to fowls, animal food in the form of cut green bone can be reduced, as milk supplies largely all the elements found in bone. Milk and corn make a much better combination than milk, wheat, and oats. Feed the layers corn and milk alternately with green food in the shape of cabbage or prepared clover, and we have an almost ideal food for egg production. Poultry are particularly fond of milk, and it can be given in almost unlimited quantities without any serious results following. It very often happens that feeding meat too freely produces diarrhoea, which checks the supply of eggs, but in feeding milk we did not experience such unfavorable results. In the country, where it is not convenient for the farmer to get bone fresh from the butcher, he can supply milk instead, which is almost or quite as good as bone.

We know of a lady breeder who feeds corn and milk the year round to both young and old, with very satisfactory results, using the sour milk (after boiling it) in mash with decided benefit, especially with the young growing stock. Next year we shall use boiled sour milk, wheat bran and corn meal sprinkled with pulverized charcoal for our young chicks, believing we will have a food that will be wholesome, palatable and inexpensive comparatively to some of the so-called "prepared chick foods" now on the market. At the same time we shall provide skimmed milk as we have previously done for the fowls to drink, believing we can realize more from the product in feeding in this way than any other way we could feed it.

### THE SMALL CHURN.

The kind of churn that should be used on a farm need not be long debated. One of the best churns was the old dash churn, but it was not as good as the barrel churn. The barrel churn is simply an empty vessel having in it neither dasher nor other obstructions. It revolves upon a pivot, and as it revolves the milk falls from one end of the churn to the other. The first barrels had obstructions in them consisting of round pipes of wood, against which the cream struck when passing from one end to the other. It was supposed that this caused the butter to gather in a very short time. It was soon learned, however, that this did not help much to bring the butter. Someone discovered by actually trying it that the cream striking the two ends was affected as quickly as if the obstructions were left in. From that time the barrel churn became the favorite, and has remained the favorite to the present time.

It does not seem likely that this principle will be improved upon. A great many different churns have been put upon the market with all kinds of im-

had done nothing, while he had, in fact, worked hard and had taken independent decisions.

"Prince Herbert Bismarck (the Empress added) had the impudence to tell the Prince of Wales that an Emperor who was unable to carry on a discussion was really incapable of ruling. The Prince of Wales said that, if he had not attached importance to the good relations between Great Britain and Germany, he would have thrown Prince Bismarck out of the room.

"As to Bismarck pere, she said that he had now ruled 20 years unopposed, and could not bear to encounter a show of will from the monarch. The young Emperor was entirely in his hands, and no one could know what he would do. The Empress declared that Bismarck 'was a false and unscrupulous man, who would not mind plunging his fatherland in destruction if his personal ambition were satisfied.'"

Prince Hohenlohe went after the audience to the Prince of Wales, who was then in Potsdam. "The Prince," he says, "spoke guardedly, but disgusted at the rudeness (grobheit) of the Bismarcks both father and son. The Prince cannot understand the policy of irritating France."

#### BISMARCK'S FRENCH POLICY.

Throughout the section of the memoirs covering this period, it is obvious that Prince Hohenlohe disapproved of Bismarck's policy toward France, especially in the matter of compulsory passes in Alsace-Lorraine, of which Prince Hohenlohe was then Statthalter. The Prince describes an audience which he had with the present Emperor on his accession, at which the question of issuing a proclamation to the Alsatis was discussed. The Prince remarks that the proclamation would be no use unless a milder policy was followed, and he adds: "I noticed that the Emperor . . . formed no opinion and did not dare to express a view differing from that of the Chancellor."

Prince Hohenlohe says that Prince Bismarck described the Emperor Frederick as a cold and selfish man, without heart, and mentioned several instances in support of his view. These instances, Prince Hohenlohe confesses, were certainly remarkable. Altogether, the history of Bismarck's relations with the Emperor Frederick does not show the Iron Chancellor in a favorable light.

Prince Radolin, the present German Ambassador in Paris, told Prince Hohenlohe that the story of Bismarck's visit to the Empress Frederick at the time of his fall was correct, but he did not beg her Majesty to speak with the Emperor on his behalf. His only words, when the Empress asked him if she could do anything, were: "I only ask for sympathy."

Prince Radolin further related how he took Bismarck to the Emperor Frederick just before the Monarch's death. At the moment Bismarck appeared to be moved, but when he returned afterward to his room Prince Radolin remarked: "It has been very affecting," to which the Chancellor rejoined: "I cannot follow sentimental policy now."

#### RUDENESS TO EMPRESS.

When the Empress Frederick asked for Bismarck after her husband's death, the Chancellor sent word that he had no time, and had to see his master; the Emperor. The Empress had, therefore, no small satisfaction when Bismarck begged for the audience of her after his fall.

The diary, covering the period from 1892 to 1894, contains frequent references to the Emperor's quarrel with Bismarck, and mentions the incident of the Emperor ignoring Prince Herbert Bismarck at the Ordensfest on Feb. 21, 1894. Writing next day, Prince Hohenlohe says:

"The Emperor was with Von Marschall to-day and abused Bismarck, but at the same time sent an aide-de-camp to Friedrichsruhe with a present of wine, and directed him to express to

the Emperor of Prussia and his subjects is a direct contradiction to their precepts. It is not that doctors can be accused in the slightest degree of uncleanness, or that they do not take the greatest care, in most things, of preventing the spread of disease.

It is true, of course, that the more sickness that prevails, the greater will be the number of their patients, and that the outbreak of a grievous disease in the neighborhood may be a veritable gold mine to them. But the profession, from top to bottom, is a honorable one. No certificated practitioner would wilfully spread disease among his patients. That may be taken for granted.

Thus the practice of wearing beards and moustaches by medical men is all the more astonishing. The danger to which such men expose their patients is

#### ALARMINGLY OBVIOUS.

In the big hospitals the skilled surgeon, because of his high fee and his lack of time, usually performs so many operations at a time. In an hour a dozen persons, some suffering from an infectious disorder may have passed under his knife.

If the surgeon be a bearded man, it is impossible for him to avoid making a collection of disease germs. He may be in the habit of sterilizing his beard and moustache, and so preventing the disease attacking his own system; but the process takes time. He would not sterilize his beard a dozen times for a dozen operations.

The patient under the anæsthetic is naturally in a very weak condition—a ripe ground, in fact, for any disease germs to rapidly develop themselves and create a complication of disorders. Many a mysterious "case" in the hospitals has been traced eventually to the

#### OPERATING SURGEON'S BEARD.

Now take the case of the local practitioner. Upon his daily rounds he goes from sick room to sick room. From one patient suffering with, say, influenza he passes to another whose only trouble is a weak and feverish condition induced by overwork. The overworked man, however, one day develops symptoms of influenza, but his bearded doctor is never for a moment suspected of introducing the disease.

It is unnecessary to enlarge upon similar instances. Considering the multitude of patients a busy medical man visits every day, the mixed and often infectious nature of their ailments, and the number of surgeons and physicians who are not clean-shaven, it is simply astonishing that an Act of Parliament has not been passed prohibiting beards and moustaches among medical men.

Such laws are in existence in other countries. In Alleghany, Pennsylvania, they go even further than this. Every man in the town must undertake to keep his beard disinfected, or his "hirsute adornment" will be

#### FORCIBLY STERILIZED FOR HIM.

To prevent the spread of infectious disease the Alleghany Board of Health decided to distribute a solution of bichloride of mercury to every man in the town with a beard. Those living in houses where there is contagious disease are kept under observation by inspectors, and if they neglect to use the fluid, they are forcibly shown the way to use it.

From the point of view of medical men, a moustache acts as a microbe trap, and restrains bacteria from entering the nostrils and lungs. "Not only that," said the distinguished surgeon to whom this question was put, "filters, as it were, the air as it enters the nostrils. A moustache is not only a manly ornament, but one of Nature's most hygienic provisions."

The matter, therefore, amounts to this: A moustache and beard may be beneficial to a medical man, but a grave source of danger to his patient.

Cut maidenhair fern will keep in water if the stalks are put into a jug of boiling water, and then allowed to stand till cold. After this arrange the fern with flowers in the usual way.

they have seen. Of course, the Government is keenly interested in this particular trade, and every facility is afforded the firms in question to protect their interests.

Bank clerks occupy a somewhat peculiar position in the public service, for they are the repositories of many family secrets. Here, of course, their silence out of office hours is absolutely indispensable, and no marks engaged until he has signed an agreement promising not to divulge particulars of customers' transactions. The same conditions apply to Post Office officials, especially telegraphists, who are often the possessors of information which would be worth thousands to an unscrupulous person. In their dealings with the public they must maintain a discreet reserve, and not even the police can obtain special information until they can produce a permit from head-quarters.

The manufacture of bank-notes is one of those enticing industries that have attracted the most eminent criminals of the last hundred years. The watermark has been their great difficulty, and many attempts have been made to buy over the employees of the Bank of England.

#### BUT THEY ARE INCORRUPTIBLE.

and, as a cynic might say, too many precautions are taken to safeguard the interests of the community.

Firms noted for celebrated products—sauces, ointments, pills, and so forth—are always on their guard against plagiarism, and when secrets must be entrusted the employee must first take oath that he will not betray them to rivals. Whenever possible the recipe is divided up, and in this way no single person knows the complete directions. This is by far the best method, but it cannot always be adopted. There are certain sauces the recipes of which are valued at thousands of dollars, so that extraordinary plans to protect them against infringement are quite justified.

A recent law case brought to light some very interesting characteristics of the money-lending fraternity. A clerk, whose salary was \$12.50 a week, went over to a rival firm, who paid him a salary of \$20 for his services, the latter including a list of his late employer's remunerative customers. In short, this is the object of everyone in the business. There are hundreds of young men about town who want to borrow money, and whose family connections indisputably prove that they will be able to pay heavy interest. Any money-lender will play a large commission for the names of likely customers, and employees of rival firms are bribed to betray their employers. Of course, the latter know human nature too well to care much for promises, but all the same they extract oaths of secrecy from their confidential clerks, who are well paid for their work.

During the German army manoeuvres the Kaiser's temporary quarters consists of a camp-house of wood. In addition to sleeping and bath room, the Kaiser has a large working room, which serves also as dining and reception room. Several smaller apartments complete this improvised house, from which the Imperial standard floats. When evening falls a huge fire is kindled before His Majesty's door. This is kept burning all night, and the Kaiser likes to sit beside it and talk to his friends. On these occasions all ceremony is forgotten. Another of His Majesty's evening pleasures is to walk round among the soldiers' bivouacs and witness their rough camp joking and games.

To prepare farm-machinery for painting, sandpaper it to take off the old paint, if there is any left on. If the paint is sound and has any gloss left, sandpaper just sufficient to take off the gloss; then mix 1½ pounds of venetian red to one quart of boiled oil, two ounces of turpentine, and the same of japan. Give the work a coat of this. When dry, make the same mixture of oil, turpentine and japan and put in 2½ pounds of venetian red; then give the work a coat of this mixture. This should be a fairly heavy coat. If too heavy, add more oil; if too light, add more red. If this coat stands out with an even gloss it is enough; if not put on another coat.

quickly as if the obstructions were left in. From that time the barrel churn became the favorite, and has remained the favorite to the present time.

It does not seem likely that this principle will be improved upon. A great many different churns have been put upon the market with all kinds of impediments on the inside, which were said to be able to bring the butter in a few minutes. The fact of it is that these churns were made to sell. The manufacturers know that if they send out agents with a complicated churn he can have something to talk about in making sales. He will claim, and does claim, enormous advantages over the ordinary barrel churn. One of these arrangements, which has appeared in a great many, has been to have a pipe conveying the air to the bottom of the stationary churn, the air being passed out through three or four arms that are made to revolve with great rapidity by means of cogs, wheels, and a crank. The agent tells the farmer that these bubbles of air passing up through the milk produce such a disturbance that it will cause the butter to collect in two or three minutes. Some of these churns have been called "two-minute" churns. In the first place, these churns do not bring the butter in two minutes unless the cream is raised to a temperature too high to be allowed in the making of good butter. In the second place, it is no advantage to have the churning done in two minutes, even if that were feasible. The ordinary time for churning should be from 20 to 30 minutes, as this gives a better grain of butter.

#### LIVE STOCK NOTES.

Sheep always seek shelter from rain or heat. They can not do well without it. They suffer terribly when exposed to the direct rays of the sun all day.

For cows on good pasture there is no better supplementary grain feed than bran and corn chop, equal parts by weight, fed in amounts to correspond with the ability of each cow to return a good profit for the increased expense.

The quantity of water required by horses varies more than is the case with any other of our domestic animals. The wisdom of supplying it frequently, especially during hard labor, is realized by nearly every careful horseman. The secret of many a successful feeder is the care with which he supplies water.

We would advise no one to rush into squab raising with expensive houses and a large number of birds and no experience. Better, as some people have done, get a few birds and fit up such places as are at hand. Learn the business by experience as it develops. For women and those not able to do heavy manual work this offers a healthful and profitable occupation. Yet no one should engage in it who is not willing to give care and attention to little details.

#### FARM NOTES.

The man who is on the hunt for money to the exclusion of everything else never has time to live. He does not smile, or if he does, it is a sickly sort of a thing that makes a man feel homesick to see it.

It has been estimated that more machinery is worn out by the weather and not being sheltered than is worn out by actual use, and I believe this estimate to be not far from correct. This is a good way to keep the manufacturers rich, and it is keeping more farmers poor.

In the ordinary wasteful method of cidermaking by small hand machines not more than 40 per cent. of the juice in the fruit is removed from the pomace, while only from one-third to one-half the sugar is recovered, the rest being thrown away. Hydraulic presses extract about 75 per cent. of the juice; but by macerating the pomace and repressing we may secure practically all the juice and sugar, as well as a greatly increased amount of flavoring matter, aromatics and tannin which are found chiefly in the skins.

The room in which Napoleon I. died is now a stable.

# Have You a Friend?

Then tell him about Ayer's Cherry Pectoral. Tell him how it cured your hard cough. Tell him why you always keep it in the house. Tell him to ask his doctor about it. Doctors use a great deal of it for throat and lung troubles.

## Str. REINDEER

WILL RUN AS FOLLOWS:

LEAVE Primer's Cove at 5.30 a.m. for Napanee and all way places. Leave Pictou at 8 a.m. Deseronto at 9.30 arriving in Napanee at 10.20, connecting with G.T.R. noon trains going East and West.

RETURNING will leave Napanee at 1.00 p.m., connecting at Deseronto with Steamer "Varuna" for Belleville and Trenton. Leave Deseronto at 2.30 p.m., Pictou at 1.30 p.m. for down the bay.

The lieutenant-governor of British Columbia is about to visit Ottawa. He will visit the scene of the late provincial conference and view the spot where his premier in a moment of weakness "spilled over."

Moral teaching is a live subject. Can it be taught in the schools? To some extent, and in no way better than by the general attitude and administration of the teacher. Morality is not built on asset of rules or principles.

The Bannerman government, in England, is seeking to pass a bill the effect of which will be to limit the franchise—one man one vote. The "gentry" are opposed, of course, and the Lords are expected to administer it a finishing blow.

### WHAT OTHER PAPERS SAY

Ottawa Citizen.

On the face of it, the act of using a company's funds for speculating, even though the speculation is successful, should be just as serious an offence as speculating and losing. The principle is the same. The fact that the speculations referred to were successful should not make any difference, but it seems so.

Leithbridge Daily News.

In this pleasant Indian summer weather and in the exhilarating champagne air of Southern Alberta, the word climate ceases to be prosaic, and might well inspire some joyous poet. The long summers of southern Alberta, our long sunny days, our cool summer nights, our mild winters, all go together to make an ideal climate for the growth of wheat of the very highest quality, as well as for the fruits of the temperate zone. They make an ideal climate too, for the growth of cattle, horses, poultry and other domestic animals, for the health and physique of men, women and children. Southern Alberta's climate is a mine of health, wealth and happiness.

Montreal Herald.

If the interests of the Conservative party were confined to one riding and one election, such appallingly despicable methods as are now being brought to light in East Elgin might be worth while. For local politicians who can see no object in politics further off than the beating of a local opponent, blackmail and conspiracy and slander are useful enough methods. But if the Conservative party had an organic unity throughout the country, if it enjoyed even the lightest discipline at the hands of leaders who were something more than ward-healers and company-grafters, such things would be impossible. The East Elgin conspiracy must have involved the complicity of a large part of the Conservative organization in the riding. The whole organization was not ashamed to profit by it.

Our sale of Stoves, Ranges and Furnaces exceeds anything in the history of this store, which speaks volumes for the quality of the goods in this line which we are offering, each and every one is guaranteed to you.

MADOLE & WILSON

Walnuts In France.

In some parts of France walnuts form a regular article of diet. The peasants eat them with bread that has oftentimes been rubbed with garlic. The hygienic effects are considered good, replacing meat to a large extent. These nuts are also used to make oil.

## Dr. Pierce's Favorite Prescription

Is a powerful, invigorating tonic, imparting health and strength in particular to the organs distinctly feminine. The local, womanly health is so intimately related to the general health that when diseases of the delicate womanly organs are cured the whole body gains in health and strength. For weak and sickly women who are "worn-out," "run-down" or debilitated, especially for women who work in store, office or schoolroom, who sit at the typewriter or sewing machine, or bear heavy household burdens, and for nursing mothers, Dr. Pierce's Favorite Prescription has proven a priceless benefit because of its health-restoring and strength-giving powers.

As a soothing and strengthening nerve. "Favorite Prescription" is unequalled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, nervous prostration, neuralgia, hysteria, spasms, chorea, or St. Vitus's dance, and other distressing nervous symptoms commonly attendant upon functional and organic disease of the womanly organs. It induces refreshing sleep and relieves mental anxiety and despondency.

Cures obstinate cases. "Favorite Prescription" is a positive cure for the most complicated and obstinate cases of "female weakness," painful periods, irregularities, prolapsus or falling of the pelvic organs, weak back, bearing-down sensations, chronic congestion, inflammation and ulceration.

Dr. Pierce's medicines are made from harmless but efficient medical roots found growing in our American forests. The Indians knew of the marvelous curative value of some of these roots and imparted that knowledge to some of the friendlier whites, and gradually some of the more progressive physicians came to test and use them, and ever since they have grown in favor by reason of their superior curative virtues and their safe and harmless qualities.

Your druggists sell the "FAVORITE PRE-

## Java's Population.

Java is very thickly populated, and cultivation is pushed to an extraordinary distance up the steep slopes of the hills. The plain of Leles in the month of July "is one sea of ripe golden rice, with here and there a village of brown thatched roofs nestling in a group of green cocoanut trees." In the middle of the island white chimneys of sugar mills peep above miles and miles of sugarcane fields.

## Fire and Water.

Why does water put out fire? Water reduces the temperature of the flame below the point of ignition; therefore it cannot burn. Water does not smother the flames even when the burning brand is completely immersed in a tank of water, because the first contact puts out the fire—that is, reduces the temperature of the flame below the point of ignition.

## Life Preserver Seats.

Some pleasure steamers on the English coast employ a very good idea in connection with a few of their deck chairs. They are really air tight boxes to which a back and sides have been added. They stand back to back in the middle of the deck and are kept together by means of a piece of wood across the top. When this is removed the seats can be opened on hinges. If the vessel got wrecked the seats could be opened and hung overboard, and they would form a buoyant raft for

### Farragut's Pig.

David G. Farragut was but thirteen years old when he served as midshipman under Porter in the battle of the Essex against the Phoebe and Cherub. He was taken to the Phoebe as a prisoner of war, says his biographer, and came aboard crying from mortification. At the same moment, however, a British midshipman came alongside with a young pig in his arms.

"A prize! A prize!" he was shouting. "Ho, boys, a fine grunter!"

It was a pig that had been a pet in the steerage of the Essex, where it was called Murphy. Farragut at once claimed it as private property.

"You are a prisoner, and your pig, too," replied the British midshipman.

"We always respect private property," said Farragut, grabbing the pig and determined to hold on till forced to surrender.

"Go it, little Yankee!" cried the others present. "If you can thrash Shorty you shall have your pig."

A ring was formed, and Shorty came at Farragut hammer and tongs, but the American was handy with his fists. He quickly laid his opponent low. The British bluejackets cheered him heartily, and the pig was declared to be his.

### Not Flattering.

S. Baring-Gould, the English novelist, had the bitter pleasure of reading many not flattering obituaries of himself. Through an error he was reported dead, and the newspapers of his native land declared unanimously that he had left no good work behind. An American editor dined with Baring-Gould in London. The talk turned to the premature obituaries, and the American said, "How did you feel on reading them?" Taken aback, non-plused, the novelist grimly replied: "I felt like a lady who owned a parrot. This lady's cook came to her one morning in joyful excitement. 'Oh, ma'am,' she cried, 'the parrot has learned some new words.' 'Good,' said the lady. 'That bird is wonderfully teachable. It sits and drinks in every blessed word my husband says to me. What does it say now?' 'It keeps a-sayin', said the cook, 'Shut up, you old fool!'"

### Kean and the Showman.

An amusing paper in Chambers' Journal on John Richardson, the illiterate and successful English showman of the last century, contains this story:

It was during the earlier and less fortunate part of his pilgrimage that he numbered Edmund Kean among his company. The old showman was not a little proud of this association and used to give himself some credit for having had a hand in Kean's theatrical education. When Macready's name was becoming known in the dramatic world Richardson was asked if he had seen him.

"No, muster," he said. "I know nothing about him; in fact, he's some vagabone as no one knows—one o' them chaps as ain't had any education for the thing. He never was with me, as Edmund Kean and them riglers was."

### The Oldest Bank Notes.

The oldest bank notes in the world are the "flying money," or convenient money, first issued in China in 2037 B. C. One writer tells that the ancient Chinese bank notes were in many respects similar to those of the present day, bearing the name of the bank, the date of issue, the number of the note, the signature of the official who issued it and its value in both figures and words. On the top of these curious notes was the following philosophic injunction: "Produce all you can; spend with economy." The note was

### A Bright Recruit.

Lieutenant (examining soldier)—What should you do if you met an enemy on the field of battle?

Soldier—Shoot him dead, sir.

Lieutenant—Right. And what should you do if you met a whole battalion of the enemy?

Soldier—Shoot them dead, sir.

Lieutenant—You couldn't by yourself. You should fall back and give warning.

What should you do if you met a cow belonging to the enemy?

Soldier—Shoot it dead, sir.

Lieutenant—Wrong.

Soldier—Fall back and give warning, sir.

Lieutenant—Wrong again. You should hold it by the horns and bring it into camp. Now tell me what you should do if you met me in the field.

Soldier—Shoot you dead, sir.

Lieutenant—Rubbish! I'm not an enemy! I wear the same uniform as you do.

Soldier—Fall back and give warning.

Lieutenant—Wrong, stupid! I'm not a battalion of the enemy.

Soldier—Well, then, I'd catch hold of you by the horns and lead you into camp.

Lieutenant—You—

—Lustige Blatter.

### Stevenson's Grave.

No English novelist rests in a more eccentric spot than that chosen by Robert Louis Stevenson, who is buried on the summit of the forest clad Vaila, in the island of Samoa. The day after his death at Vailima, in 1894, his remains were carried to the top of this precipitous and picturesque peak by sixty sturdy Samoans, who had loved and now mourned their dead chief, Tusiutula. A party of forty had previously cut a pathway through the thick, tangled wood with knives and axes, while another party had prepared the grave. With infinite care and trouble they bore him shoulder high over the rough ground to his last long home, and there, under the starry sky, they left him to sleep forever, with the Pacific at his feet. On either side of his tombstone is a bronze plate. One bears the words, "The Tomb of Tusiutula," while the other is inscribed with his own requiem, beginning:

Under the wide and starry sky  
Dig the grave and let me lie.

### The American Buffalo.

The buffalo is the bulkiest living land animal native to North America. A full grown buffalo bull stands about five feet eight or ten inches at the shoulder and weighs about 1,800 pounds. But specimens of over six feet at the withers have been recorded, and Mr. Hornaday tells me that he weighed a living bull at 2,190 pounds. A full grown cow stands about four feet eight at the shoulders and, according to Audubon, weighs about 1,200 pounds, though Henry says seldom over 700 or 800 pounds. The lower weight seems to be nearer the average run, but I have seen cows that stood as high and looked as heavy as ordinary bulls.—Ernest Thompson Seton in Scribner's.

### Fish Sold Alive.

Flensburg, a seaport town on the east coast of Schleswig-Holstein, has an excellent system of bringing to port fish which are intended for immediate consumption. Instead of packing the fish in the hold of the vessel the fishermen use flat, oblong boxes, drilled with holes to allow free access of water, and into these the live fish are placed as soon as caught and are towed under water. By this means the fish are kept alive until the harbor is reached, and they are then taken out of the boxes

The price of half a pound of Red Rose Tea is small—very small, but it will show you how much tea value, tea quality and flavor is contained in this "Good Tea"

# Red Rose Tea

## "is good tea"

## NERVOUS DEBILITY CURED

Excesses and indiscretions are the cause of more sorrow and suffering than all other diseases combined. We see the victims of vicious habits on every hand; the pallid, pimpled face, dark circled eyes, stooping form, stunted development, bashful, melancholic countenance and timid bearing proclaim to all the world his folly and tend to blight his existence. Our treatment positively cures all weak men by overcoming and removing the effects of former indiscretions and restores the patient to what nature intended—a healthy and happy man with physical, mental and nerve powers complete.

For over 25 years Drs. K. & K. have treated with the greatest success all diseases of men and women. If you have any secret disease that is a worry and a menace to your health consult old established physicians who do not have to experiment on you.

We guarantee to cure Nervous Debility, Blood Diseases, Stricture, Varicocele, Kidney and Bladder Diseases. Consultation Free. If unable to call, write for a Question Blank for Home Treatment.

**DRS. KENNEDY & KERGAN,** 148 Shelby Street, Detroit, Mich.

## MARTYR DAYS ARE NOT YET PASSED!

GREAT ARMIES OF MEN AND WOMEN GO UP AND DOWN THE EARTH IN BONDS MORE IRKSOME, IN SUFFERINGS MORE INTENSE, IN SHACKLES MORE SECURE THAN WERE THE IRON MANACLES OF SLAVERY DAYS, AND YET THE "LINCOLN OF EMANCIPATION" FINDS IN THESE LATER DAYS HIS COUNTERPART IN

## Dr. Agnew's Catarrhal Powder

whose mission it is and which mission it fills in freeing thousands from the bondage of dreaded, disgusting, discouraging, distracting catarrh, that cruel, relentless master that is no respecter of persons. How do you know you are in its thrall? Note the symptoms—headache, watery eyes, pains over the eyes, deafness, buzzing in the head, dropping in the throat, offensive breath, dryness in the nostrils—any or all of these symptoms are forerunners of catarrh, and catarrh in the head stage can be relieved in 10 minutes by Dr. Agnew's Catarrhal Powder and the sufferer may be saved the suffering that comes with the chronic stage and the distress and maybe fatal results when catarrh takes hold on the lung tissues.

Take catarrh in time with this wonderful cure, which, as thousands have said and thousands more could say, "works like magic," and you will have struck the chord that is the keynote to health and happiness.

ALL DRUGGISTS AND MEDICINE DEALERS SELL IT.

DR. AGNEW'S CURE FOR THE HEART gives relief in thirty minutes. DR. AGNEW'S OINTMENT relieves eczema, scrofula and all skin eruptions with first application—35 cents.

Sold by Fred L. Hooper.

**Rapid changes of temperature are hard on the toughest constitution.**

The conductor passing from the heated inside of a trolley car to the icy temperature of the platform—the canvasser spending an hour or so in a heated building and then walking against a biting wind—know the difficulty of avoiding cold.

**Scott's Emulsion** strengthens the body so that it can better withstand the danger of cold from changes of temperature.

**It will help you to avoid taking cold.**

ALL DRUGGISTS: 50c. AND \$1.00.

from a regular article of diet. And peasants eat them with bread that has oftentimes been rubbed with garlic. The hygienic effects are considered good, replacing meat to a large extent. These nuts are also used to make oil. It is much cheaper and similar in taste to that pressed from olives and is employed to adulterate the latter. The prisoners in certain prisons are engaged in cracking walnuts and picking out the kernels, which are pressed into oil.

**The World's Debt to Flowers.**  
I have never known man or woman who has not improved in character by becoming devoted to the affairs of flowers, and I venture to say that the world at large is under the deepest obligation to pansies, violets, roses and lilies, to name but a few of the blossoms that silently help the good angel of mankind.

**Exercising Dogs.**  
Never take your dog out for a run directly after he has had a meal. If the exercise is at all hard the food will remain undigested for hours. It is best not to allow a dog to play even directly after he has swallowed his dinner. In a little time he can do so, but do not encourage him to romp about.

**Got Him Mixed.**  
Miss Packbay—What I like about Henry James is the clarity of his style, his reserve force and his absolute mastery in the field of epigram and antithesis. Mr. Cahokia—Y-yes, but when it comes to the fast ball, you know, I think Walsh has got him skinned to death.

**Knew the Measure.**  
"When you get your groceries today," said the butcher to his wife, "don't go to that little grocer next door to my shop."  
"Why not?" she demanded.  
"Because he sent in yesterday and borrowed an old pair of scales."

**Odd Proposal of Marriage.**  
That celebrated painter of flower and figure subjects, William Hunt, was on one occasion commissioned by a gentleman to paint his portrait in the attitude of kneeling and holding in his hand an open scroll whereon were written a declaration of love and an offer of marriage. The lady to whom this unusual proposal of marriage was sent replied with a chalk drawing of herself with a sheet of paper in her hand, on which was inscribed a laconic "Yes."

friendlyer whites, and gradually some of the more progressive physicians came to test and use them, and ever since they have grown in favor by reason of their superior curative virtues and their safe and harmless qualities.

Your druggists sell the "FAVORITE PRESCRIPTION" and also that famous alternative, blood purifier and stomach tonic, the "GOLDEN MEDICAL DISCOVERY." Write to Dr. Pierce about your case. He is an experienced physician and will treat your case as confidential and without charge for correspondence. Address him at the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., of which he is chief consulting physician.

**The Sonnet Writers.**  
The fashion of sonnet writing was at its height in the sixteenth century, when Ronsard, the French "prince of poets" in his own country and generation, wrote over 900 sonnets, a total which appears only to have been exceeded by Gomez de Quevedo, the Spanish Voltaire, who is said to have written over 1,000. Fortunately for sonnet lovers some of the best poets have been prolific sonneteers. Petrarch, who created the classic model which later poets imitated, wrote 315. Camoens is responsible for 352, Sir Philip Sidney wrote 108, Spenser 88 and Dante 80. English sonnets were first written by Sir Thomas Wyatt (1503-42) and Henry Howard, earl of Surrey (1517-47), and the first appearance of any in book form was in a rare publication briefly known as "Tottel's Miscellany," the full title being "Songs and Sonnettes written by the Right Honourable Lorde Henry Howard, late Earle of Surrey, and other." The greatest sonneteers of our language are Shakespeare, Milton, Wordsworth and Rossetti.—London Standard.

**Tiger and Vulture of the Sea.**  
If the "killer" whale is "the tiger of the sea," as the writer of an interesting article in the September Windsor has it, the orcas surely are the vultures of the ocean. In connection with whale catching the author of this interesting natural history article tells of the following incident: Some years ago a whaler in the northwest had killed a large whale and had the animal alongside when it was attacked by a school of orcas. They doubtless were half starved and, crazed by the scent of blood that extended away a long distance, probably followed it up like hounds, immediately attacking the whale. The men, with spades and lances, cut and slashed at them, inflicting terrible blows, yet despite this the orcas literally tore the whale from the ropes and carried it off. This certainly shows that the orcas, together with a very fair share of intelligence, are also creatures of extraordinary courage.—Dundee Advertiser.

**Always in Trouble.**  
A still summer's evening, quiet and almost sad. The trees nodded sleepily, as if hushing the world to rest. Suddenly the silent beauty was rudely disturbed. The clattering of a horse's hoofs broke the silence into a thousand echoes. A horseman dashed through the scented lanes, rage glittering from his eyes. He sprang from his horse and rushed into the still homestead and dragged forth Farmer Brown.  
"Why, what be matter, Squire Tampion?" queried the worthy farmer in sleepy surprise.  
"Matter?" repeated the squire. "Why, matter enough, to be sure! Your great lubberly son Jack has run off with my beautiful daughter Maud."  
"Has he, really?" cried the farmer, now thoroughly awake. "Thee'rt right 't call 'im a lubberly idjut. He's allus doin' somethin' clumsy. Only last week he went an' broke a shovel!"—London Express.

**CASTORIA.**  
Bears the Signature of  The Kind You Have Always Bought.

across the top. When this is removed the seats can be opened on hinges. If the vessel got wrecked the seats could be opened and flung overboard, and they would form a buoyant raft for passengers to cling to.—London Mail.

**What the Jury Thought.**  
"Flatman, I hear you were arrested the other day for insulting and browbeating a janitor. How did you come out?"  
"I was tried for it and acquitted."  
"On the ground that it was justifiable?"  
"No; the jury couldn't be made to believe such a thing was possible."

**Study Yourself.**  
In order to judge of the inside of others study your own, for men in general are very much alike, and though one has one prevailing passion and another has another, yet their operations are much the same, and whatever engages or disgusts, pleases or offends you in others will engage, disgust, please or offend others in you.—Chesfield.

**They Knew Him.**  
Knox—It seems that Graphter's acquaintances are all very shrewd people. Jenks—Did he tell you that? Knox—He implied as much. He announced the other day that he doesn't owe anybody a dollar.

**Far Enough.**  
One day when William M. Evarts, secretary of state under President Hayes, was a college student he was called on to read Virgil in class.  
He started out bravely, "Three times I strove to cast my arms around her neck, and— and"—adding lamely—"that's as far as I got, professor."  
"Well, Mr. Evarts," said the professor, "I think that was quite far enough."

## Royal House

out of the wrong kind of can make the right kind the wrong kind of flour.

Ogilvie's Royal House hard spring wheat—a wheat that grinds fine and white pastry that are wholesome light and crisp—it's a flour the wheat fields, not in the

of Annas whom Jesus accused of making his Father's house a "den of thieves" and it was the vassal salesmen of this high-priestly family whom Jesus had driven from the courts of the temple. So strong was the influence of Annas in the Sanhedrin that even during the incumbency of his sons and son-in-law in office he remained the real power in Jewish religious affairs. It was for this reason that "the band and the chief captains, and the officers of the Jews," who had seized Jesus and bound him, "led him to Annas first" as John is careful to point out (John 18, 12, 13). In John, also as well as in Acts, Annas is given the title "high priest," though in the narrative of John at least it is evident that the narrator was fully aware of the relation between Annas and Caiaphas and also of the fact that the latter was the actual incumbent of the office.

Caiaphas, too, was a man of strong though wicked character. It was he who, professing to fear that the popular demonstration in favor of Jesus connected with the triumphal entry and other events would bring upon the city the displeasure of the Roman authorities, counseled the Jews that it were better "that one man should die for the people and that the whole nation perish not" (John 11, 50) thus, as the evangelist points out, becoming unconsciously a priestly prophet of the atonement. It was Caiaphas who took the leading part at the first informal meeting of the Sanhedrin mentioned in the text of our to-day's lesson.

Verse 57. In the verses immediately preceding this one, Matthew records the incident of Peter's drawing his sword and cutting off the ear of the high priest's servant, which incident is also recorded by the other evangelists. Seeing that their Master had been betrayed and was to be led away a prisoner "all the disciples left him and fled" (Matt. 26, 56). Mark records the incident of the young man who had followed Jesus and who, being seized by those who took Jesus prisoner, barely escaped, his clothing having been torn from him in an effort to hold him. Having bound their prisoner securely the soldiers took him first to the Jewish authorities under whose immediate direction they were acting. Matthew omits the examination before Annas.

To the house of Caiaphas—The words, the house of, do not occur in the Greek where the reading is simply to Caiaphas.

The scribes and the elders—Members of the Sanhedrin who had been hastily summoned to an informal meeting shortly after midnight. Matthew is careful to mention the more formal session of the Sanhedrin which occurred in the morning: "Now when morning was come, all the chief priests and the elders of the people took counsel against Jesus to put him to death."

58. Court of the high priest—A court in the high-priestly palace. From the Garden of Gethsemane Jesus had been taken first to Annas; thence after a brief examination, recorded in John 18, 19-23, to Caiaphas in another part of the same building. Here some members of the Sanhedrin had hastily gathered, and the first informal trial of Jesus took place at night (Comp. Mark 14, 52-65; Luke 22, 54, 63-65). Early in the morning a second and more formal trial was held by the Sanhedrin (Comp. Luke 22, 66-71; Matt. 27, 1; Mark 15, 1). Later, probably between five and seven o'clock in the morning occurred the trial before Pilate which consisted of two parts, in the intermission between which Jesus was sent by Pilate to Herod (Comp. Luke 23, 1-25; Matt. 27, 11-31; Mark 15, 1-20; John 18, 28-40).

60. Afterward came two—The number required to convict a prisoner of a crime.

61. The temple—Or, Sanctuary. Build it in three days—The actual words of Jesus referred to are found in John 2, 19, "Destroy this temple, and in three days I will raise it up." It is to be noted that while Jesus referred to his death and resurrection after three days,

—As if Jesus had said, "I am indeed the Christ, the Son of the living God, and henceforth ye shall see him whom ye have known as a 'Son of Man' exalted to the dignity of the Son of God."

65. Rent his garments—As custom required of the high priest before whom a prisoner had been convicted of blasphemy. The act was intended as an outward sign of sorrow, in this case of pious horror.

He hath spoken blasphemy—For one who rejected the claims of Jesus no other verdict was possible in view of the declaration which the prisoner had just made.

66. He is worthy of death—Under the Roman rule the Jewish authorities were not permitted to pronounce or execute death sentence. Hence, while the Sanhedrin members assembled considered their prisoner "worthy of death," it was still necessary for them to bring some formal charge against him before the Roman authorities, and secure from them a conviction and death sentence.

67. Buffet—To strike with clenched fist.

With the palms of their hands—The meaning of the phrase in the original is not clear. The marginal reading of the Revised Version is with rods.

68. Prophecy unto us, thou Christ—The demand of these men reveals the coarse, popular idea of prophecy, according to which it is a meaningless exhibition of miraculous power.

### ONE WAVE TAKES 35,000 LIVES

#### And Wiped Out Four Cities in South America.

There is one consolation about the two great earthquakes which destroyed respectively the two great cities of San Francisco and Valparaiso, and that is that they raised no seismic waves to speak of. This was because the carthremors were wholly on land, and did not extend beneath the bed of the ocean. It is when this latter eventually happens that these terrible waves are created, causing widespread havoc.

For instance, it was this kind of ocean avalanche that engulfed Lisbon, with 50,000 of its inhabitants, in 1755; and in 1883 a submarine earthquake started in the Straits of Sunda a so-called "tidal" (seismic) wave, that traveled twice round the globe, and drowned 25,000 people.

In 1891, again, a submarine earthquake threw up a wall of water seventy feet high, and more than three hundred miles in length, which overwhelmed the greater portion of the Nippon Islands. On this occasion 84,000 houses were swept away and 10,000 people lost their lives.

Worse still was a huge wave which, in 1868, wiped out of existence in a few minutes the cities of Arequipa, Iquique, Tena, and Chenchu, drowning 25,000 persons and destroying property worth \$300,000,000. The waters of the Pacific first retreated nearly half a mile, then rushed forward with irresistible force, so that great ships were carried far inland, and there left high and dry, for future generations to wonder at.

At Port Royal, Jamaica, again, many houses were engulfed forty fathoms deep, with above 3,000 of their inhabitants; while about the same time an earthquake-made wave so completely demolished Catania, in Sicily, that of the town and its 18,000 inhabitants not a trace remained.

### QUITE THE CONTRARY.

"That's the man they call Silent Simpson, is it? Is there a Silent Mrs. Simpson?"

"There's a Mrs. Silent Simpson, but no Silent Mrs. Simpson—not by a boatload of foghorns!"

### CRAZE DEFINED.

"What do you mean by saying something is the latest craze?" asked the man from abroad who carries a notebook.

"A craze," answered Miss Cayenne, "is something that amuses other people, but in which you yourself do not happen to be interested."

the poles were then burnt, and the ashes carefully buried in the centre of the barrack yard.

The number of occasions in which regimental colors have completely disappeared is astonishing when one considers the loving care usually bestowed on their custody. At the Battle of Chillianwallah the Queen's Color of the 24th Regiment disappeared as completely as though the earth had swallowed it up. It was conclusively proved that it had not fallen into the hands of the enemy; and a most thorough search, stimulated by the offer of a large reward.

### FAILED TO BRING IT TO LIGHT.

The third honorary standard of the 78th Regiment, already alluded to, vanished as mysteriously; and it was not till some time following the disappearance of the colors of the 81st Regiment (since disbanded) that it transpired that some American pirates, who reaped a good harvest during the unsettlement caused by the American War of Independence, had stolen them and taken them to Ireland.

The colors of the 72nd (Manchester) Regiment, which were deposited in Chatham College, Manchester, about the year 1782, have since completely disappeared from view; and a similar fate befell the colors of the 71st (Highland Light Infantry) Regiment. On proceeding to the Peninsular War this regiment led its colors in the Tower of London; and on returning to England nearly seven years later could find no trace of them. An investigation that ensued disclosed the fact that when the Prince Regent gave a banquet and fete at Carlton House to the allied Sovereigns, in 1814, the colors of the 71st Regiment, along with many others, were taken from the Tower for use as decorations, and were never seen nor heard of afterwards!

Even more surprising was the fate of the colors of the separate infantry regiments, which found their way into the possession of pawnbrokers. One of the colors of the 1st Battalion Northamptonshire Regiment, which had been carried right through the Peninsular Campaign, was discovered some years ago

### IN A PAWNBROKER'S SHOP

though how it got there is a mystery to this day. A similar uncertainty attaches to a pair of old colors of the 2nd Battalion Border Regiment, which now hang in the parish church at Kendal. The advertisement of a London pawnbroker, in 1888, who offered the colors for sale, being probably unaware of their historical value, caught the attention of Lord Archibald Campbell, who promptly purchased the priceless relics.

It was just twenty years ago that the 1st Battalion of the Gloucestershire Regiment recovered from a York pawnbroker four colors which had accompanied the regiment in Egypt and in the Peninsula, from 1795 to 1810. An inquiry elicited the facts that these colors, on being replaced by new ones, became the property of the colonel of the regiment, who, on his death in 1818, bequeathed them to his son. Many years later they passed into the possession of a servant whose monetary needs outweighed his regard for the sentimental value of the colors. He pawned them for a few shillings.—London Tit-Bits.

### FATHER OF 33 CHILDREN.

There is in the Selly Oak Workhouse an inmate named John George Stratton, who is the father of thirty-three children, says the London Chronicle. His case came before the guardians this week, when inquiries were made as to a maintenance contribution from his family. Stratton is 90 years of age and his third wife, who is with him in the institution, is 67. His thirty-three children are scattered all over the world and none is in a position to assist the father. His first child was born two months after Queen Victoria came to the throne. It was a girl, who has now attained the age of 69 and lives in London. His youngest child is 24, so it will be seen there is a difference between the first and last of forty-five years.

The best housekeeper is not she who spends the whole day slaving in the house "doing the work," as she terms it; muddling is the correct expression. A woman with method gets through her domestic duties, even without the aid of a servant, by midday, or soon after, and is ready to take a walk, make a call or two, or rest comfortably with a book or her needlework, her home is tidy, and she is always neatly and consistently dressed.

Although no one enjoys a pleasant chat more than she does, she avoids anything like idle gossip, and no one can tempt her to waste the early morning hours in talking over her neighbors' affairs.

A good housekeeper also avoids debt. She insists upon paying for everything as she gets it, and sees that she gets good value for her money.

A fussy woman may be a prim old maid, but she is probably an untidy wife, always very unpunctual, for she has "no time" to do anything, her faculty for fuss retarding her actions. She never suppresses herself, never idles a moment, and thinks nothing can be done so well by anyone as by herself. Hence she is quite unnecessarily overworked, overfatigued and frequently fractious.

The husband goes out; the children are so accustomed to continued scolding that they become either hypocrites or unusually unmanageable and heedless of rebuke. To some extent they deserve pity, for they are teased about their food, clothes, health, exercise, games and lessons. Nothing is done without plenty of fuss and discussion and many harmless pleasures are lost.

### FOOD IN PAPER.

It is a very common practice to put away food that comes from the shop in the brown paper in which the dealer wraps it. While this may be convenient it is certainly open to serious objection on the score of health and cleanliness. Most of the cheap papers are made from materials hardly up to the standard of the housekeeper's ideas of neatness; and although a certain degree of heat is employed in their preparation it is by no means sufficient to destroy all the disease germs with which the raw material may be filled.

When it is taken into consideration that waste papers of all sorts and those used for all purposes, are gathered up and worked over into new paper to wrap our food in, it behooves the housewife who cares for the health of her family to see that articles of food remain in contact with such wrapping the very shortest time possible.

It is not unusual to see meat, butter, cheese and other extremely susceptible articles put away in the very cheapest, commonest brown paper.

Immediately upon the receipt of soft groceries or fruits they should be put into earthen dishes, and under no circumstances should they be allowed to remain in the papers in which they are delivered.

### HINTS FOR THE HOME.

Should a cake be baked too quickly on the top, make an incision in the crust that the steam may escape through it.

Avoid using the first water that comes from the tap, for it has been in a lead or iron pipe all night, and is therefore unwholesome.

To Cool an Oven While Baking.—Keep the door shut, put in the damper of the oven flue, and if the oven is still too hot, remove one of the rings of the hot plate. This will reduce the temperature quickly without admitting cold air to the oven.

To Stew Fruit Perfectly.—Take a stewing jar with a cover, place the fruit in it with a pinch of salt and just sufficient sugar to flavor. Place the jar with the cover on in a pan of boiling water, and let it boil till the fruit is tender. Do not uncover the jar till the contents are cold, or the flavor will be lost.

spend with economy." The note was printed in blue ink on paper made from the fiber of the mulberry tree. One of these notes bearing the date 1399 B. C. is still preserved in the Asiatic museum at St. Petersburg.

## Chapped Hands and Chilblains

### ZAM-BUK A CERTAIN CURE

For chapped hands, cold sores, chilblains, etc., there is nothing so effective as Zam-Buk. Mrs. H. H. Rankin, of Appleton, Ont., says:—

"My hands had big cracks on them which caused me such pain I could hardly work. Whenever I tried to put them near water they would smart and burn as if I had scalded them. They did not seem to be benefited by anything I tried until Zam-Buk was introduced. To my great pleasure within a very short time Zam-Buk closed up the cracks and healed the sore places. My hands are now white and smooth."

"I recommend Zam-Buk to a friend who had a sore finger, and it cured that, too. I think it a splendid household ointment."

Miss E. Heintzman, of Ossington avenue, Toronto, says:—"I would advise all who suffer from chilblains to try Zam-Buk. I have suffered from them acutely, and was suffering when I first tried Zam-Buk. I am pleased to say I had only used about three-quarters of the supply when the chilblains were completely cured."

Zam-Buk is a cure for cuts, burns, bruises, eczema, ulcers, abscesses, festering sores, bad leg, ringworm, and all skin diseases and injuries. It is purely herbal in composition. All druggists sell at 50c a box, or post free from the Zam-Buk Co., Toronto, upon receipt of price. 6 boxes for \$2.50

## IMPROVED machinery

will not, of itself, produce good flour.

You may be an excellent cook, but you cannot produce light, wholesome baking unless the flour you use be the kind that permits rich results.

So in the milling; machinery alone cannot produce

## Household Flour

wheat any more than you can of bread or pastry out of

Household Flour is made from wheat that is rich in nutriment, and produces bread and is nourishing as well as that begins to be good in mills.

Your grocer prefers to sell you Ogilvie's Royal Household Flour because he knows the value of a pleased customer.

**Ogilvie Flour Mills Co., Ltd.**  
Montreal.

"Ogilvie's Book for a Cook," contains 130 pages of excellent recipes, never published before. Your grocer can tell you how to get it FREE.

they are then taken out of the boxes and sold alive on the quay, so that there can be no question as to their absolute freshness.

### Sir Walter Scott's First Brief.

Sir Walter Scott had his share of the usual curious experiences shortly after being called to the bar. His first appearance as counsel in a criminal court was at Jedburgh assizes in 1793, when he successfully defended a veteran poacher. "You're a lucky scoundrel," Scott whispered to his client when the verdict was given. "I'm just of your mind," returned the latter, "and I'll send you a maikin (i. e., a hare) the morn, man." Lockhart, who narrates the incident, omits to add whether the maikin duly reached Scott, but no doubt it did. On another occasion Scott was less successful in his defense of a housebreaker, but the culprit, grateful for his counsel's exertions, gave him, in lieu of the orthodox fee, which he was unable to pay, this piece of advice, to the value of which he (the housebreaker) could professionally attest: First, never to have a large watchdog out of doors, but to keep a little yelping terrier within, and, secondly, to put no trust in nice, clever, gimcrack locks, but to pin his faith to a huge old heavy one with a rusty key. Scott long remembered this incident, and thirty years later, at a judges' dinner at Jedburgh, he recalled it in this impromptu rhyme:

Yelping terrier, rusty key.  
Was Walter Scott's best Jeddart fee.  
—Westminster Gazette.

### Wastebasket Treasures.

"I have in my employ," said a dealer in autographs, "a number of celebrities' housemaids. Thanks to these young women, I secure at nominal cost many an autographic gem. All I ask of the maids is that they ship me weekly the contents of their masters' wastebaskets. They bale the stuff up in burlap, and every Monday or Tuesday it comes to me by freight. I go over it carefully, making many finds. Here will be a begging letter from a famous author in hard luck. Here in a brief note a great actor will boast of his last success. Here will be a dinner invitation from a celebrated millionaire. Some celebrities, of course, save their valuable letters, and some sell them, but the majority throw into the wastebasket most of the mail they receive, and I, searching the baskets' contents every Monday morning, find my reward in many a letter worth \$10 or \$20."

### The Bed and the Candidates.

Judge Harlan and James B. McCreary once canvassed Kentucky together as the Republican and Democratic candidates for governor. They traveled about the state on a joint debating trip and in many small mountain places had to sleep in the same bed. They were warm personal friends and so did not object to this intimacy. One night Mr. Harlan got into bed first. Senator McCreary was not far behind, and just as he entered the bed Judge Harlan raised his bulky form and said in his stentorian voice, "McCreary, there is one thing certain—the next governor of Kentucky is in this bed." As he spoke the bed slats broke, and Judge Harlan rolled to the floor. Senator McCreary caught and held himself in bed, and, as Judge Harlan reached the floor, said: "John, you are right. The next governor of Kentucky is still in this bed."

Builders' Hardware of almost every description, Paints, Oils and Glass, Cement.

# Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

## Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.]

## TAKING THE LEAD

## THE NEW RAYMOND

JOHN DALTON, Agent.

Napanee, and Deseronto.

### The Wreckers of Scilly.

As far back as the time of Henry I. there were royal grants of "the islands and their wrecks," and frequent was the phrase in centuries following. With royal encouragement, why should they not be wreckers? One Sunday, long ago, in Scilly, service was in progress when there came the cry of "Wreck!" The men started from their seats. In a moment there would have been a stampede, but they cowered back as the minister sternly thundered a warning. He strode to the door. Again his voice arose. "Let's all start fair!" he shouted, throwing off impeding cassock as he ran, while his congregation labored at his heels. Most curious of all wrecks was that of a bark, with a cargo of beads, that went ashore 200 years ago. So generous has been the ocean with this treasure that throughout these two centuries it has intermittently been tossing beads ashore, yet so frugally that the supply is not yet exhausted, for in a few minutes' search I found that some had been thrown there since the last search of the islanders.—Robert Shackleton in Harper's.

### Bankes and His Horse.

Animal trainers of the old days led adventurous lives. In 1600 all London was talking of a man named Bankes, servant to the Earl of Essex, who had taught his horse to count and perform a number of feats, including mounting to the top of St. Paul's cathedral, while "a number of asses," as the historian puts it, "brayed below." Sir Walter Raleigh in his history says of Bankes that he "would have shamed all the enchanters of the world, for whatever was most famous among them could never master or instruct any beast as he did his horse." When Bankes took his horse to Rome both were burned for witchcraft.

### A Possible Exception.

A high schoolteacher was examining the physiology class.  
"How many ribs have you, Charles?" he asked.  
"Why—er—I don't know," said Charles.  
"Didn't the text books state?" he then queried somewhat sharply.  
"Yes—oh, yes—of course, but, you see, I'm long waisted."

# Bowel Troubles of Childhood

It is impossible to exaggerate the value of FRUIT-A-TIVES as a medicine for children. They contain no alcohol—no morphine or cocaine—no dangerous drugs of any kind.

Fruit-a-tives are fruit juices—concentrated and combined with the most valuable tonics and internal antiseptics known to medicine.

Fruit-a-tives are free of calomel, cascara, senna, and the host of violent purgatives that simply act by irritating the bowels. Fruit-a-tives are made from fruit and tonics and are pleasant to take, and so mild in their action that they never gripe or pain.

During the summer, when children are so apt to eat improperly, mothers should have a box of Fruit-a-tives always handy.

At the first sign of Diarrhoea, Indigestion, Headaches, Bilioussness, Peevishness, Vomiting—give Fruit-a-tives according to directions. These splendid fruit liver tablets will instantly correct faulty digestion—clean and sweeten the stomach—regulate the bowels, kidneys and skin—and so invigorate and strengthen the whole system, that the little ones can quickly throw off the temporary illness.

Get a box now—to-day. 50c. a box or 6 for \$2.50. Sent on receipt of price, if your druggist does not handle them.

FRUIT-A-TIVES  
LIMITED,  
OTTAWA.

The brave Newfoundland had just rescued his young master from the boiling surf.

"My dog, too," said L'Oignon pensively, "once saved my life."

"Tell us about it," said Tete de Veau, with eager interest.

"I sold him for \$3," said L'Oignon, "when I was nearly starving."

## Full Price.

Mrs. Skrimper—One can never believe one-half that is said in advertisements. Blasfold & Tating had an advertisement in yesterday's paper saying that everything was marked down. Mrs. Bargainhunter—Yes, I saw it. Mrs. Skrimper—Well, it was false. I bought two postage stamps there this morning, and I had to pay as much as ever for them.

## The Song Bird.

They say the birds are timid! Great heavens, to be so small and lovely in a world of hawks and snares and yet dare to sing as if the gods were good! In all the wide creation there is nothing braver than the heart of a singing bird.

## Yet Both Made Hits.

Director Say, my man, how is it that Shakespeare's statue is standing on the pedestal marked Scott? Attend—He must have got his base on an error, sir.

## The Old Roman Epicures.

Almost any dish which had to recommend it rarity, costliness, indigestibility and, to our way of thinking, nastiness was sure to take with the Roman epicure. And if he were unable to make it costly any other way he would add powdered precious stones or gold dust. Were dined on one occasion from a peacock which was sprinkled with diamond dust, and specimens of that bird dressed with gold or with crushed pearls were by no means a rarity at the triclinia of the moneyed Romans. A dish of parrots' tongues was a great delicacy. But a dish of parrots' tongues which had been capable, when in their proper place, of framing words was of almost incalculable value, which increased in a direct ratio with the vocabularies of the defunct parrots. Another bird for which the Roman epicure was in the habit of paying fabulous prices was the phenecoptrix, which is believed to have been the ptarmigan. It had its home in the most northerly parts of Scotland and Norway, and as this made it hard to get at the Romans appreciated it all the more and put it in the same rank with ostriches, buzzards and peacocks. The tongues of these birds were specially prepared, together with the brains, and took the place which a hors d'oeuvre would now take.

## The Words on a Cigar Box.

What mean the various words which are stamped on the lid and sides of a cigar box? These are not mere fancy names, but terms actually descriptive of the cigar. On the lid is the name of the cigar. The front of the box describes the shape and size, as "conchas," "reina," "regalias," which state the shape, and "perfecto infantes," "princesses," which signify the size. These may be combined, as "conchas speciales," "conchas finas," to state both shape and size. At the back of the box, where the lid turns over, is stamped the quality of the cigar—"superfina," "fina," "flor," "superior" and "bueno," being the terms in the descending scale. The color of the cigar is declared on the right hand side or end of the box. "Claro" signifies the lightest color, "colorado claro" rather dark, "colorado" dark, "colorado maduro" darker, "maduro" very dark, "oscuro" extremely dark, "negro" darkest.

## Hours of Sleep.

The belief that the hours of sleep should be artificially restricted is contrary to ordinary good sense. If the human body does not need sleep for the upbuilding of its tissues it will not call for it. A rule of health which cannot be wrong is to sleep if possible as long as any inclination for it exists. The erroneous view on this subject is undoubtedly due to the fact that when the mind and body are thoroughly rested it is often difficult to arouse the mind from its comfortable lethargy. On the other hand, the man who is under a mental strain and sleeps only five or six hours at night is keen and alert soon after awakening. But it is an unhealthy activity. His nerves are at a high tension. He is on edge, so to speak. Such a strain long continued results inevitably in a nervous breakdown.

## Original of "Uncle Toby."

Captain Roger Sterne, the father of the author of "Tristram Shandy," was the original of Uncle Toby. As captain of Chudleigh's regiment of foot, a marching regiment ever on the move, Roger Sterne and his family tasted the most varied military and domestic experiences in Flanders, at Gibraltar and finally at Jamaica, where the old campaigner died of "country fever." A simple minded, good natured, but shiftless and rather peppery Irishman, Roger bore his disappointment bravely and carried his load of debt with a light heart. "My father," says Sterne, "was of a kindly, sweet disposition, void of all design and so innocent in his own intentions that he suspected no one, so that you might have cheated him ten times a day if nine had not been sufficient for your purpose." Such a character and such a father supplied the germ from which the genius of the son developed his conception of one of the most perfect and delightful portraits in the gallery of English fiction.

## Sex and Rebirth.

The theories concerning the possibility of our having previously existed seem to be endless. Of them all I think the one best which suggests that sex is reversed at rebirth and that when we turn up ears after we previously existed we do so either as men or women according to whether we were women or men aforesaid. This largely accounts for the suffragette and for the long haired, thin voiced creatures who potter around boudoirs, play the piano like "sweetly pretty" things and call themselves men. Presumably the best material of which we were fashioned then is now used in our composition, for the most manly women and effeminate men generally have some good points about them. But if one is to keep on performing these Protean feats through all ages it hardly seems worth while worrying over sex problems. It seems to me, in the long run, that we shall each get about equal, according to this arrangement.—London World.

## The Remarkable Rhea.

"The rhea of South America is a remarkable bird," said an ornithologist. The male rhea hatches out the eggs. He and not the female is the setter. He sets always in a quiet and desolate place, where there is no food, nothing to attract enemies, and as soon as the young are born the question is how to feed them. The rhea answers that question in advance. Three or four days before the eggs are to open he shoves a couple of them out of the nest with his bill and lays them in the sun. What is the result? The result is that the hot South African sun decomposes the eggs, and the father breaks them as the young birds begin to appear in the nest, and the flies settle on them and in twenty-four hours they are alive with worms—tender, juicy, delicious worms, the best food in the world for the nest of new born birdlings."

## Garrick as Author.

Writing of Garrick's literary efforts, I suppose not every one knows that he was the author of such well known lines as:

Their cause I plead, plead it in heart and mind;  
A fellow feeling makes one wondrous kind.

Or this again:

Let others hail the rising sun;  
I bow to that whose course has run.

Or again:

Hearts of oak are our ships,  
Hearts of oak are our men.

But I suppose every one knows his epigram on Goldsmith, "who wrote like an angel and talked like poor Poll," an epigram that conveyed only half the

## Holiday Crowds.

For some men it is sufficient recreation to have no work. The moment that the "knapsack of custom" falls from their backs they are happy. Not to awake in the morning with the thought of what must be done in the day is in itself a sufficient recreation. Naturally, they have no very definite taste in holidays. They go where it suits their purses or their wives or their children. To such men, though they may spend all their working days in the thick of a town, the sight of nature never becomes a necessity. It is a luxury, an agreeable augmentation of the sense of doing nothing. A holiday maker of this type very often goes to a watering place, one of those resorts which it is now the fashion for cultivated people to despise. Such contempt is affectation. A number of happy people create, no doubt, an exhilarating atmosphere. Well behaved pleasure seekers make an agreeable and ever changing picture. A well kept public garden, a good band and a fine view form attractions which no continental affects to despise, and English people do not despise it either if only the brightly dressed crowd should happen to talk in a foreign tongue.—London Spectator.

## The Englishman Abroad.

An English observer says that he finds the American abroad both civil and genial: "I climbed to the top of Notre Dame in Paris and found there a party from across the Atlantic enjoying lunch. The day was hot, and a young man in the group offered me a refreshing drink. At the top of the lacework in marble which is the spire of Milan cathedral three English speaking men met accidentally—an American, an English clergyman and myself. He who hailed from the land of the stars and stripes offered me his field-glass; the other did not even return our good morning salutation. In a beer garden at Lucerne I followed the custom of the continent and asked permission before sitting at a table of those already seated there. The only one who did not raise his hat and reply was an Englishman, and the only one to make excuses for him was a young man who prefixed his words with 'I guess.'"

## Parchment.

Parchment is the skin of sheep or other animals prepared in sheets to render them fit for being written upon. The heavier parchment, used for drumheads, is made from skins of asses, older calves, wolves and goats. All these are similarly prepared. The skin, being freed from the hair, is placed in a lime pit to cleanse it from fat. The pelt is then stretched upon a frame, care being taken that the surface is free from wrinkles. The flesh is then pared off with a circular knife. It is then moistened and whitening spread over it. The workman then with a large pumice stone rubs the skin. He next goes over it with an iron instrument and rubs it carefully with pumice stone, without chalk. The skin is gradually dried, tightening being occasionally required.

## A Literary Prize.

The largest amount ever offered as a prize for a literary contribution is 1,500,000 rubles, which is still open for competition and will be awarded at St. Petersburg on Dec. 1, 1925, to the writer of the best history of Alexander I. of Russia. Arakhtcheief, founder of the military colonies of Novgorod, left a fortune of 50,000 gold rubles to provide for this unique prize. The prize giving day is the centenary of the Czar Alexander's death, by which time the money will be estimated.

Gray's Syrup  
of  
Red Spruce Gum

An old lawyer in speaking about General Ben Butler said: "Ben Butler was a terror and a torment to the judges. On one occasion Judge Sanger, having been bullied and badgered out of all patience, petulantly asked, 'What does the counsel suppose I am on this bench for?' Scratching his head a minute, Butler replied, 'Well, I confess your honor's got me there.'"

### A Faroe Reformer.

The people of the Faroe islands cling to their old customs and see little good in change, says the author of "The Faroes and Iceland," but now and then one of them becomes a conservative reformer. Such was an old man of Storno who, in his youth, had learned cabinetmaking in Copenhagen, then had been a blacksmith in New South Wales and later a marine in the Danish navy during the Sleswick-Holstein war. Having thus traveled far beyond the wildest dreams of his countrymen, he returned while still a comparatively young man to Storno and invested his savings in a home. Conservative though he appeared to outsiders, to the islanders he was a reckless innovator. He roofed his house with slate instead of with the traditional turf, but could find none to follow his example. They shook their heads in doubt. He argued vainly with them against the habit of throwing fish cleanings into the brook and getting drinking water lower down. The only advice they would accept from him—and that after long hesitation—was to boil their fish oil outdoors instead of in the living room. But when this terrible innovator heard from a visitor that women rode bicycles in England he was so astonished that he asserted confidently that the world could not last much longer.

### Cause and Effect.

Shakespeare saw life in large and wrote as he saw. He never "blamed it on to God." His pages are full of the inexorable sequence of cause and effect, and the swift march of deeds points the moral of individual responsibility. If things were "rotten in Denmark," it was because the fathers had eaten sour grapes and the children's teeth were set on edge; if Macbeth trembled at the knocking at the gate, it was because conscience doth make cowards of us all. The ghosts that haunted Bosworth field were of Richard's own creating, and Regan and Goneril, desperately dead, reap but their inevitable doom. In short, Shakespeare's message is the message of a robust manhood and womanhood: Brace up, pay for what you have, do good if you wish to get good. Good or bad, shoulder the burden of your moral responsibility and never forget that cowardice is the most fatal and most futile crime in the calendar of crimes. Cowards die many times before their deaths; The valiant never taste of death but once.

—Martha Baker Dunn in Atlantic.

### To Cheer Him.

The wife of his bosom was going to leave him for a fortnight, and Fitz Tomkins was trying his very best to look sad.

"My dear," he said, clucking back a chuckle with his handkerchief and wiping his eyes, "I hardly like to think how I shall miss you. The evenings will be so long and lonely without you. I shall have no one to talk to."

"George," said Mrs. Fitz, surveying him with a quizzical eye, "I have provided for your comfort in this as in every other way. When you return home you will find dear mother there. She will remain till I come back and keep you company in the evenings, George."

And as the train slowly glided out of the station the guard wondered why Fitz Tomkins nearly bit him when he insinuated a tip. London Telegraph.

### No Sincere in China.

Everybody in China works hard, even those who have reached the highest positions. It is related of a member of the Chinese cabinet that he left home every morning at 2 o'clock, as he was on duty at the palace from 3 to 6. As a

### CENTREVILLE.

Quite a fall of snow occurred here on Sunday night and Monday and most everything presents a wintry appearance.

Our deer hunters have not yet returned from the North.

F. C. Gerow is having a new drive house and stable erected. Wm. J. McGill and James B. Weese have the contract.

Wellington Lockwood finished the threshing in this part during the week.

The Cheese factory is receiving a large supply of milk yet.

It is now stated that survey (the one through here) made by the G. N. R. has been accepted, it being the most possible and that work on the construction of it will commence early next season.

Mr. and Mrs. J. R. Perry are visiting friends at Meyer's Cave.

A number of weddings have been announced to take place here during the next two weeks.

A great offer—The Napanee Express from now until January 1908 for \$1.00. Send your order early.

### Coal Oil Stoves.

MADOLE & WILSON

### ENTERPRISE.

The weather has been very cold and rough since Hallowe'en.

Some of our weather prophets predict a hard winter with lots of north wind. We hope this may not be true.

Threshing is all completed for this year. We will miss the merry whistle of the threshing engine.

Mr. Wm. Fenwick is engaging men and sending them to his lumber woods in the west.

Owen Meehan boarded the train on Monday for Crogan, where he intends spending the winter.

The bank is nearly completed and is a great addition to our village.

Mr. Coxal Jackson has his beautiful residence almost ready for occupation. He intends moving into it shortly.

Mrs. Jas. Keho, who has been seriously ill, we are glad to say is recovering as rapidly as could be expected.

Mr. Chas. Keech has purchased the building from Mr. Sidney Wagar, formerly occupied as a furniture store, and removed it on his own lot, where he intends to fit it up as a harness shop.

We are very sorry to state that Mrs. James Scanlin, who has been sick for the past month is not improving very rapidly. We sincerely hope to see her able to go around as usual, in the near future.

Mrs. John Dillon, Carmanville, was the guest of her mother, Mrs. M. McKeown, one day last week.

Our cheese factory has closed after a very successful season. We hope dairying may always be as encouraging.

Miss Sarah Hinch has recovered from a serious attack of pneumonia. We are glad to see her able to be out again.

A great offer—The Napanee Express from now until January 1908 for \$1.00. Send your order early.

### How's This.

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO, Toledo, O.

We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm.

WALDING, KINNAN & MARVIN, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

### LAPUM.

Rev. R. A. Whittam preached a

### MARYSVILLE

For last week.

Hallowe'en passed off pleasantly with our young people.

The station is being treated to a fresh coat of paint.

Charles Mills has resigned as night operator here, and Frederick Bouly is welcomed back in his place.

Mr. and Mrs. Dennis O'Connor, Chambers, spent Sunday with friends here.

Miss Pearl Stewart, Shannonville, spent a few days last week, renewing old acquaintances.

Mrs. Gemima Gates, Westbrooke, is spending the week with Mrs. John C. Mea, her.

Edward Hunt, Chicago, visited Patrick McAlpine last week.

Mrs. Bernard McGuinness entertained a number of her friends on Sunday. Miss McAlpine, Mont Eagle, is spending a few weeks with her uncle, P. McAlpine.

Henry Oliver left last week for the north, deer hunting.

### KALADAR.

For last week.

A number of miners passed through here on Saturday last. They are about to re-open the Golden Fleece mine.

Loads of hunters are going north every day, some of them have returned with their number of deer.

Mr. E. Morton has returned to Bancroft after spending a couple of weeks with his mother, Mrs. J. Morton.

P. J. Morton left last week with a carload of stock and household effects for Dryden, Ont., also Messrs. C. Kellar Geo. Kellar, Geo. Bishop, W. C. Campney, W. Morton and Nelson McBride. They all expect to spend the winter at Dryden.

Miss Maggie Bongard who has been on the sick list for the past three weeks is around again.

Mr. Wm. Belfour has returned to Kaladar after spending the summer in Tweed.

Mrs. John Daffoe and Mrs. W. E. Miller are visiting friends at Moira.

Mr. and Mrs. O. H. Dunn spent Sunday last in Flinton.

Mr. and Mrs. A. Fleming have returned after spending a couple of weeks at Peterboro.

Miss G. P. Dougan was the guest of Mrs. Fleming on Sunday.

Mr. Henry and Miss Lizzie Abbott, Mrs. C. Godfrey and Miss Hazel spent Sunday at Mr. Jos. Morton's.

Mr. and Mrs. Robt. Mills, of Lime Lake, are visiting Mrs. N. McBride.

Mr. John Critchley passed through here on his way to Montreal on Monday.

Mr. H. Persal is visiting our town. Miss Beatrice McBride spent Sunday last at Harlowe.

Harry Head is on the stage route for a few days, while our stage driver Mr. Rolufs is hunting.

W. Crothers, of Kingston, is around taking Christmas orders for confectionery.

Mr. C. Godfrey, proprietor of King Edward Hotel, has returned after spending about seven months in the Northwest.

### Protective Colors of Animals.

I seem to trace a faint clew to the connection between the protective coloring and the mind in the intense desire of the fox to remain concealed and unseen. That this is a possible theory we infer from the fact that a blind animal does not change color.

Put a dozen minnows into an ordinary white wash hand basin and they will in a very short time be of a pale color. If over one no change passes we may be tolerably certain that it is blind.—From Dale's "The Fox."

Guess Again.

## HOPE FOR THE SICK.

MRS. HENRIETTA MARSH.

### A VICTIM OF LA GRIPPE.

Mrs. Henrietta A. S. Marsh, 769 W. 16th St., Los Angeles, Cal., President Woman's Benevolent Ass'n, writes:

"I suffered with la grippe for seven weeks, and nothing I could do or take helped me until I tried Peruna."

"I felt at once that I had at last secured the right medicine and I kept steadily improving. Within three weeks I was fully restored, and I am glad that I gave that truly great remedy a trial. I will never be without it again."

In a letter dated August 31, 1904, Mrs. Marsh says: "I have never yet heard the efficacy of Peruna questioned. We still use it. I traveled through Kentucky and Tennessee three years ago, where I found Peruna doing its good work. Much of it is being used here also."—Henrietta A. S. Marsh.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

### The Human Head.

An Irishman once defined the human head as "a bulbous excrescence, of special use to many as a peg for hanging a hat on, as a barber's block for supporting wigs, as a target for shooting at when rendered conspicuous by a shining helmet, as a snuffbox or a chat-box, as a machine for fitting into a halter or guillotine, as a receptacle for freaks, fancies, follies, passions, prejudices, predilections—for anything, in short, but brains."

### Amenities of the Table.

"I waited ten minutes for a car to-day," the landlady was saying, "and then it passed me without stopping."

It was afterward recalled that the habitually silent man had been having unusual difficulty with his chons.

"Perchance," he remarked, "the conductor didn't care to have you board his car." Exchange.

Vapo-Resolene

Established 1870

**No Shucrens in China.**  
Everybody in China works hard, even those who have reached the highest positions. It is related of a member of the Chinese cabinet that he left home every morning at 2 o'clock, as he was on duty at the palace from 3 to 6. As a member of the privy council he was engaged from 6 to 9. From 9 until 11 he was at the war department, of which he was president. As the member of the board of punishment he was in attendance from 12 till 2, and as a minister of the foreign office he spent every day from 2 till 5 or 6 there. In addition he frequently served on special boards of commissions.

**The Equinoxes.**  
"The popular belief that storms are more frequent about the time of the equinox, or when the sun crosses the line" in March and September, receives some slight degree of support from the investigations of European scientists," states an expert of the weather bureau. "In southwestern Europe March is the stormiest month, while in the British islands and Norway January takes the lead in that respect; but, considering Europe as a whole, it appears that storms predominate near the seasons of the equinoxes."

## BUILT UP HER HEALTH

### SPEEDY CURE OF MISS ECCLISON

She Is Made Well by Lydia E. Pinkham's Vegetable Compound, and Writes Gratefully to Mrs. Pinkham.

For the wonderful help that she has found Zula Eccleson, 6 Erie St., East, St. Thomas, Ont., believes it her duty to write the following letter for publication, in order that other women afflicted in

the same way may be benefited as she was. She writes:  
Dear Mrs. Pinkham—  
"I heartily recommend Lydia E. Pinkham's Vegetable Compound as a tonic and regulator for female troubles. I suffered for four years with displacement and no one but those who have experienced this dreadful agony can form any idea of the physical and mental suffering those endure who are thus afflicted. Your Vegetable Compound cured me. Within three months I was fully restored to health and strength and now my periods are regular and painless. What a blessing it is to obtain such relief when so many doctors fail to help you. Your medicine is better than any doctor or medicine I ever had."

No other medicine has such a record of cures of female troubles as has Lydia E. Pinkham's Vegetable Compound.  
Women who are troubled with painful or irregular periods, backache, bloating (or flatulence), displacement of organs, inflammation or ulceration can be restored to perfect health and strength by taking Lydia E. Pinkham's Vegetable Compound.  
Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. Her experience is very great, and she gives the benefit of it to all who stand in need of wise counsel. She is the daughter-in-law of Lydia E. Pinkham and for twenty-five years has been advising sick women free of charge. Address, Lynn, Mass.

**Whole-Sale Druggists, Toledo, O.**  
Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists.  
Take Hall's Family Pills for constipation.

**LAPUM.**  
Rev. R. A. Whattam preached a missionary sermon here on Wednesday evening.  
F. E. Brown will build a cement platform in front of the schoolhouse. Our school is progressing well under the able management of Miss Gretta Asseltine.  
Mrs. William Latimer, daughter, and two grandchildren, are making their farewell visits in this vicinity before their departure for their home in Michigan.

Col. Clyde is having some repairs put on his buildings now occupied by J. Huff.

On Friday, as two of our sportsmen were out on a hunt, in Mrs. C. Lapum's woods, they found a wicked baby carriage. Owner may have the property by calling around for it.

Miss Edna Walker, Sydenham, was on Sunday the guest of Miss Florence Joyner.

George Joyner, Sydenham, spent Sunday under the parental roof.

P. W. Truesdale passed through here this week, taking orders for crayons.

Mrs. Cyrus Bash, Thompsonville, is the guest of Mrs. F. E. Brown.

Mr. and Mrs. Levi Brown were in Napanee on Thursday.

Mr. Smith, Napanee, passed through Friday, securing the poultry for turkey days in Napanee, Nov. 30th and Dec. 1st.

A number from here attended the sale at Mrs. Hunter's in Sydenham, on Wednesday.

Miss Martha Hogaboom was, on Thursday, the guest of Mrs. C. Joyner.

Miss Hazel Joyner has returned from visiting friends in Sydenham.

Visitors: Mr. and Mrs. F. Truesdale, Mr. and Mrs. W. Hobbs and Sperry Snider, Sydenham, with Mr. and Mrs. C. Joyner; Mrs. R. Lapum, Wilton, with Mrs. B. Rose; Miss Florence Joyner with her sister, Mrs. Freeman, Sydenham.

A great offer—The Napanee Express from now until January 1907 for \$1.00. Send your order early.

**CASTORIA.**  
Bears the Signature of *Charles H. Pritchard*  
The Kind You Have Always Bought

**Happiness.**  
Things are so arranged in this world that happiness as a profession must ever be a failure. It cannot be found by seeking it. It is a reflex action. It is incidental, a product which comes from doing noble things. It is impossible for a person to be really happy by making pleasure a profession.

**Some of Them Do.**  
The master of being given a class of youngsters some ideas of adages and how to make them. Presently he said:

"Birds of a feather—do what?"  
"Lay eggs," piped a small boy before anybody else had a chance to speak.

**The Leading Part.**  
Twynn—I hear that Skidmore has led the Widow Weeds to the altar. Trip-let—That is what it is called for politeness' sake, but from my post of observation it looked as though the widow were a neck ahead of him all the way up the aisle.

Men are born to succeed, not to fail. —Thoreau.

Horse Blankets, a complete line of first-class blankets at right prices. MADOLE & WILSON

white wash hand basin and they will in a very short time be of a pale color. If over one no change passes we may be tolerably certain that it is blind.—From Dale's "The Fox."

**Guess Again.**  
"I have a pleasant surprise for you, Miss Sharply."  
"Can I guess what it is, Mr. Bore-some?"  
"You may try, Miss Sharply."  
"Let me see, I guess you are going to tell me that you intended leaving the city."  
"Good night, Miss Sharply."  
"Good night, Mr. Bore-some."

**Monotonous.**  
"Wealth has its disadvantages," said the philosopher.  
"Yes," answered the man with sporting inclinations. "It must be very monotonous for a man to be able to bet \$5,000 or \$10,000 on a horse race without caring whether he loses it or not."

**Sounded Expensive.**  
Dumley—How much will it cost to send a packing case from Philadelphia to Boston? Freight Agent—Six cents a foot. Dumley—My! How many feet is it from Philadelphia to Boston?

**An Ascending Scale.**  
Curate's Little Girl—My hen has laid an egg. Vicar's Little Girl—My hen has laid two. Bishop's Little Girl—That's nothing. My father has laid a foundation stone.—London Sketch.

He that was never acquainted with adversity has seen the world but one side and is ignorant of half the scenes of nature.—Seneca.

**Vapo-Cresolene**  
Established 1879  
Whooping Cough, Croup, Bronchitis  
Cough, Grip, Asthma, Diphtheria  
Cresolene is a boon to Asthmatics  
Does it not seem more effective to breathe in a remedy to cure disease of the breathing organs than to take the remedy into the stomach?  
It cures because the air rendered strongly antiseptic is carried over the diseased surface with every breath, giving prolonged and constant treatment. It is invaluable to mothers with small children.  
Those of a consumptive tendency find immediate relief from coughs or inflamed conditions of the throat.  
Sold by druggists.

Branch Office: 25 E. St., Washington, D. C.

**BILEANS**  
WIN A  
MINISTER'S PRAISE  
Bileans win praise from all quarters because of their sterling merit and their wonderful cures. Purely vegetable, free from all trace of alcohol, made in the finest laboratories in the world, suitable to the most delicate constitution, mild in operation, yet searching out and removing the causes of disease—that is why your friends speak so highly of them. Ask any one who has tried them. Better still, write for a free sample box and prove them yourself. Conditions below.  
**A WIFE'S EXPERIENCE**  
Mrs. A. M. Jen, of Frankley, says: "I have had stomachic disorders reduced in me to a terrible point. I had dizzy fits, and feelings of faintness and weakness. Food caused pain, so acute that I actually pined myself to prevent it. My tongue was coated, my head ached, there was always a bad taste in my mouth. I was constipated and felt dull, weak and miserable. My condition became so serious that my husband feared my days were numbered. Then Bileans were introduced, and from the first they worked like magic. They corrected the liver and stomach, the root causes of my illness. The pain after food ceased, food was digested, the acute constipation was removed and the bowels became normal in their operation. A few days later the headache and taste in the mouth and the dizzy spells left me and in a few weeks Bileans cured me of my troubles."  
"It was wonderful what their effect on me that our minister said: 'It is your duty to write to the company and tell them what great benefit you have derived.'"  
**Bileans a Cure.** Headache, biliousness, indigestion, female ailments and irregularities, piles, hemorrhoids, constipation, eruptions and itching of the whole system. All druggists sell it at 25 cents a box, or from the Bilean Co., Toronto, upon receipt of a note.  
6 boxes for \$1.50.  
**THEY CURE**  
**Constipation**  
Send this coupon and 1c stamp to Bilean Co., Toronto, and trial box will be mailed you.

# DODGED AN AVALANCHE

## United States Surveyors in Alaska Have a Close Call.

A despatch from Vancouver, B. C., says: Crouching close to one another, prone on the ground while an avalanche passed over them, three members of the United States party that is demarcating the Alaska boundary line, had the closest call of their lives. Members of the Canadian survey party who were in the field with the Americans tell the adventure. The men belonged to Prof. Blackwelder's party and were working along the Alaska River. They had reached the canyon when they saw rocks, stones and trees coming down the precipitous mountain which overfthrows the swift waters. Not having time to run to a place of safety they crouched down as close to one another as they could get, and fortunately the great mass of falling debris passed over them. To indicate how narrow their

shelter was it may be stated that the whole shoulder and sleeve of a man's coat on the outside was swept away so speedily that he did not realize it till he stood up when the danger was over.

The survey parties have fixed for all time a portion of the dividing line between Canadian and American soil. A. J. Brabazon had charge of the Canadians whose field of operations was confined to the Alsek River. W. F. Ratz devoted attention to the Whiting River, and the Craig party was back of Juneau. The Alsek party's work changed the misconception that the line crossed the river at the forks and was there marked by a succession of lofty peaks. The line is found to be six miles below the forks and Canada is a distinct gainer by getting valleys of great fertility (note) between the mountain peaks. Messrs. Brabazon and Ratz have left for Ottawa to report to the Government.

## THE WORLD'S MARKETS

### REPORTS FROM THE LEADING TRADE CENTRES.

#### Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home and Abroad.

Toronto, Nov. 13. — Flour — Ontario wheat 90 per cent. patents are quoted at \$2.70 in buyers' sacks outside for export. Manitoba first patents, \$4.50; second patents, \$4, and strong bakers', \$3.90, Toronto.

Poultry—Turkeys, fresh killed, 13 to 15¢; chickens, dressed, 8 to 9¢; alive, 6 to 7¢ per lb. Fowl, alive, 5 to 6¢; ducks, dressed, 10¢; do. alive, 7 to 8¢ per lb.

ern, 77½¢; No. 2 Northern, 76¢; Nov., 77¢; Dec., 75¢; May, 78¢; July, 78½¢.

#### LIVE STOCK MARKETS.

Toronto, Nov. 13.—The amount of poor stuff continues to give the market a somewhat draggy tone, but good cattle are in demand, and prices for anything that is considered worth killing are steady to firm.

Export Cattle—Choice, \$4.50 to \$4.75; medium, \$4 to \$4.25; bulls, \$3.50 to \$3.75; cows, \$3.50 to \$3.75.

Butcher Cattle—Choice, \$4.25 to \$4.50; medium, \$3 to \$3.75; common, \$2.50 to \$2.75; cows, \$2.50 to \$3; bulls, firm at \$2.75 to \$3.25.

Stockers and Feeders — Quotations: Choice, \$3.25 to \$3.50; common, \$2.75 to \$3; bulls, \$2 to \$2.25; heavy feeders, \$3.60 to \$3.75; short-keepers, \$3.75 to \$3.90.

Milk Cows—Choice, \$4 to \$5; common, \$2.5 to \$3.5; springers, \$2.5 to \$4.

Calves — Trade in calves continued slow at unchanged prices. Quotations are at 3¢ to 6¢ per lb.

Sheep and Lambs—Export ewes, \$4.50 to \$5; bucks and culls, \$3 to \$3.50; lambs, \$5.25 to \$6.

Hogs—Quotations are 10¢ lower at: Choice selects, \$5.65 per cwt. and lights and fats, \$5.40.

#### ANOTHER COBALT FOUND.

##### Discoveries in Temagami Forest Reserve so Characterized.

A despatch from Toronto says: Further reports of the discoveries of silver in the Temagami Forest Reserve, announced a few days ago, confirm the statements regarding the richness of the district. In addition to the find made by White Brothers, of Muskoka, silver has been located on a claim staked and recorded by F. N. McConnell, of Haliburton. This gentleman is credited with the statement that the field is a new Cobalt. In an interview with the Temiskaming Herald, he is quoted as saying: "We have something as fine as Cobalt ever showed in the way of surface indications. Think of a vein of cobalt running up the face of a cliff for fifty feet into the air and showing the bloom so clear and bright that it could be seen for a quarter of a mile away. And then add to that the native silver veins running back and forth on the property closer together and as distinct as in Coleman Township. Two claims are even now being held at \$100,000 each."

Brandon's postoffice accommodation will be enlarged by the addition of 400 boxes and the installation of a stamp-erasing machine.

The Hamilton Board of Trade has endorsed a scheme by which the city will be advertised in the important news-

## Fashion Hints.

### PRETTY PARTY FROCKS.

That lingerie evening gowns will be as good this year as they were last is a fact pretty well established, early as the season is; and that messaline and the long tribe of soft—exquisitely soft—silks of which it is easily chief is to make many of the loveliest gowns is another assured fact.

One of the quaintest, simplest gowns of messaline was of the palest blue—thick more-than-satiny shimmer, which is one of the chief characteristics of messaline, making it almost ethereal in its loveliness. Both skirt and waist were pleated, the skirt in the pretty sun-pleating that makes so graceful a skirt for almost any figure; the waist, of course, done in the simplest of accordion pleating. The only trimming was a yoke of Duchesse lace, outlined with a band of the messaline cut so that a second strap ran across the shoulder, remotely suggesting the suspender dress of a year or so ago.

Net and tulle and a new stuff that looks like tulle but wears as much better than does that ethereal material as chiffon cloth does than chiffon, are used for simple or elaborate gowns alike many of them made with the lining cut quite low, the net shirred in above like the old-fashioned tucker. That same net, by the way, is used for the Marie Antoinette scarf, which many a woman prefers to any other sort when she wears a decollete gown.

Black is very good for evening gowns, particularly when it is made up over white, and has plenty of lace set in.

Princess styles still hold, but the craze for them has died down—it's only the woman whom they really suit who clings to them, for she has discovered that there's nothing which does suit her so well as those long, clinging lines. When they are lingerie gowns, they are less apt to be shirred or tucked into the figure at the girdle than they are to have lace set in to form a girdle, the material disposed so as to emphasize the effect.

For edging a decollete gown, if you wish to be very luxurious you might choose some of the fancy pendant trimmings with a shaped edge of braid, gold and embroidery in pastel tints finished with a fringe of white silk with overhanger in colors to match the body of the trimmings.

Opalescent and gold spangles with raised gold figures and tiny gold beads and colored embroidery outlined in gilt beads are much used on net. These come in the very narrow edgings.

Hams—Light to medium, 15 to 15½¢; do, heavy, 14 to 14½¢; rolls, 12¢; shoulders, 11½¢; backs, 16½ to 17¢; break-fast bacon, 15½ to 16¢.

Lard—Tierces, 12½¢; tubs, 12¼¢; pails, 13¢.

#### BUSINESS AT MONTREAL.

Montreal, Nov. 13. — (Special).—Business on the local Grain Market continues quiet. Oats were quoted at 38½ to 39¢ for No. 4 store; 39½ to 40¢ for No. 3, and 40½ to 41¢ for No. 2. Buckwheat was still quoted at 56½ to 57¢ per bushel in store. American corn, No. 2 yellow, being 56½ to 57¢, and No. 3 mixed, 55½ to 56¢ in store. Flour—Manitoba spring wheat, \$1.60; strong bakers', \$1.40; winter wheat patents, \$1.10 to \$1.25; straight rollers, \$1.75 to \$1.80; do, in bags, \$1.65 to \$1.75; extras, \$1.50 to \$1.60. Feed—Manitoba bran, in bags, \$20; shorts, \$22 per ton; Ontario bran, in bags, \$20 to \$20.50; shorts, \$22.50 to \$23; milled middling, \$21 to \$25 per ton; straight grain, \$28 to \$29. Provisions—Barnes short cut mess \$22 to \$24; half-barnes, \$11.75 to \$12.50; clear fat backs, \$22.50; long cut heavy mess, \$20.50; half-barnes do, \$10.75; dry salt long clear bacon, 12½ to 12½¢; barrels plate beef, \$12 to \$13; half-barnes do, \$6.50 to \$7; barrels heavy mess beef, \$11; half-barnes do, \$8; compound lard, 8 to 9½¢; pure lard, 12½ to 13¢; kettle rendered, 13½ to 14¢; hams, 14 to 15½¢; breakfast bacon, 15 to 16¢; Windsor bacon, 15 to 16½¢; fresh killed abattoir dressed hogs, \$8.50 to \$8.75; alive, \$8.50 to \$8.75. Eggs—Selects, 26¢. Butter—Choicest creamery, 26¢; medium grades, 24 to 25¢. Cheese—Ontario, 12¼ to 12½¢; Quebec, 12¼ to 12½¢.

#### UNITED STATES MARKETS.

St. Louis, Nov. 13. — Wheat—Cash, 73½¢; Dec., 72½¢; May, 76½¢.

Minneapolis, Nov. 13. — Wheat—No. 1 Northern, 78 to 81¢; No. 2 Northern, 76 to 78¢; Dec., 74½¢ bid. Rye—No. 1, 65½ to 66¢. Barley—No. 2, 55½¢; sample, 41 to 55¢. Corn—No. 3, cash, 46 to 47¢; Dec., 42½¢ bid.

Duluth, Nov. 13. — Wheat—No. 1 North-

star for a quarter of a time away. And add to that the native silver, veins running back and forth on the property closer together and as distinct as in Coleman Township. Two claims are even now being held at \$100,000 each."

#### PORT ARTHUR IS GROWING.

##### Ratepayers Carry Two By-laws to Assist Large Industries.

A despatch from Port Arthur says: The ratepayers, on Wednesday, voted upon and carried two by-laws—one to guarantee the bonds of the Meisel Manufacturing Company to the extent of \$75,000 for the establishing here of works to manufacture agricultural and mill machinery, and the other to loan the Seamen, Kent Company \$15,000 for a term of ten years to erect a factory to manufacture hardwood house building material. Work on both factories will be pushed during the winter, with a view to their being ready for operation in the spring. The Meisel Company will employ a force of 500 men from the start, and the Seamen, Kent Company too, so that the locating of these new industries means a great deal to the town. Construction work on the Alkaskan Iron Company's blast furnace plant is rapidly proceeding, and it is expected to go into operation making pig iron next March. Counting the men employed at the company's mines, about 600 will be engaged.

#### CONSCIENCE GAVE HIM NO REST.

##### John Wachine, an Austrian, Confesses a Murder.

A despatch from New York says: Unable to eat or sleep under the prickings of his conscience, he declared, John Wachine, 23 years old, an Austrian baker, on Tuesday night confessed to Coroner Julius Harburger, according to a statement made by the Coroner, that he was the murderer of Mrs. Maggie Gordon, 22 years old, who was choked to death at home on Second street, Sunday last. The A-man's common law husband, Alexander Gordon, had been arrested in connection with the crime and remanded to the Tombs Prison to await an inquest. Wachine, according to the Coroner, said that the Gordon woman called him into her home as he was passing. He said he had been robbed and otherwise had suffered at the hands of the woman and had long nursed a desire to be revenged upon some of them. An irresistible impulse came to him to kill the woman, he declared, and he choked her to death. The man was locked up on a charge of homicide.

This has been the greatest building year that Brantford has known. Three hundred and ten building permits have been issued, representing structures worth nearly \$100,000.

injured. Brandon's postoffice accommodation will be enlarged by the addition of 400 boxes and the installation of a stamp-erasing machine.

The Hamilton Board of Trade has endorsed a scheme by which the city will be advertised in the important newspapers of the country.

The Cataract Power Company offers the City Council of Hamilton a substantial reduction in street lighting, providing the contract is made for five years.

So that they may not be interfered with by the Lord's Day Alliance, the Pratt & Letchworth Malleable Iron Company will move from Brantford to Montreal.

Saskatoon has been inquiring into the cost of damming the South Saskatchewan at Saskatoon. Engineer Proudfoot has estimated the cost at a quarter of a million.

At Reston, Man., 10 880 acres of school lands were sold for \$122,040. The price ranged from \$7 to \$17 an acre. The attendance at the sale was good and bidding was brisk.

#### GHE BRITAIN.

London Times warns United States that Hearst, though beaten, is not crushed.

Liverpool Mercury advises Canadian banks to warn British investors against wild-cat schemes.

#### UNITED STATES.

A San Francisco criminal has confessed to a large number of murders and robberies.

A woman and her four children were suffocated in a fire in a New York tenement on Wednesday.

Several large corporations in the United States have given all-round increases of salary to their employees.

The Congressional elections leave both parties much as they were, with no marked gains for either side.

In Detroit the proposition to give a long-term franchise to the street railway company was defeated by a majority of two to one.

President Roosevelt has dismissed in disgrace a battalion of colored troops because they refused to disclose the identity of a murderer among them.

Fire on Wednesday night destroyed an automobile garage at Twelfth and Oak Streets, at Oakland, California, and two adjoining houses, incurring a loss of \$150,000. Twenty-five automobiles were burned. The fire was started, it is reported, by the dropping of a match into a pool of water heavily coated with oil.

E. H. Harriman has secured control of the Illinois Central Railway.

A thirty-foot flywheel, weighing eighty tons, burst on Thursday at the Whitaker iron works, Wheeling, West Virginia. A large section of the roof of the mill was blown off and heavy pieces flew 500 feet against neighboring plants. The floor of the engine-room was driven through the ground. The workmen made their escape.

During the last two months there have been 887 executions in Russia.

Russia has disfranchised all city and railway employees.

Russia is complaining that Japan is advancing too far into Manchuria.

The French Treasury report shows a deficit of \$35,000,000 for the year.

Morocco has apologized to France for assaults on French sailors at Tangier.

M. Clemenceau, Prime Minister of France, has declared that a part of his policy is to maintain the peace of Europe.

#### TWO ILLICIT STILL.

##### Seized by Inland Revenue Officers in Middlesex.

A despatch from Ottawa says: The Department of Inland Revenue has been advised of the seizure by its officers in the London division of two illicit stills, which were found in the possession of two farmers in the Township of East Williams, Middlesex County. The farmers were fined \$100 each and the stills were confiscated.

A despatch from London says: The customary Lord Mayor's banquet was given on Friday night at the Guildhall the official residence of the Lord Mayor and was attended by the usual crowd of Ministers, Ambassadors, and other notable men. In the absence of Prime Minister Campbell-Bannerman, the Marquis of Ripon, Lord Privy Seal, was the chief speaker.

Reviewing foreign affairs, he said that although at the time the Algerian conference opened there was a somewhat uncomfortable prospect, it had through the mutual forbearance of the power, resulted in greatly improving and strengthening the confidence in European peace. All the indications now pointed to peace being assured.

Referring to the Congo Independent State, he said that the primary duty of putting things right there belonged to Belgium. If she did not accept the duty Great Britain would have to consider

making over, and which provides the economical with a use for material long wasted, is the converting of partly worn night gowns into the daintiest and fines of underpetticoats. As is well known it is only the upper part of the gown which wears out, and that which is left has wearing qualities in it which are proved by experience to be well worth the making over. The length and going of these usually comes right if the are cut off just below the front band and the placket is set in the back, the only other necessary part of the process being the attachment of the belt.

Princess skirts or gowns may be built up out of several different skirts which have been in vogue. One successful princess dress was made by slipping a skirt shirred about the hips, putting in new shirring below, and another had a fresh piece shirred and invisibly joined to the skirt, which reached up far enough to form a frame for the full waist above. A lace flounce set over chiffon to match the crepe de chine of the dress was used in the dress whose skirt was shortened. In this there were lace sleeves.

Another white silk evening skirt made on a yoke was pieced up from this underneath with a canvas lining until it made the outlines of a slightly corseted skirt. The canvas foundation for this was simply cut in a bias piece and fitted in with two great darts at the sides. After the outlines were obtained silk was laid over and creamy lace was cut out and fitted in until the top of the dress skirt was a complete girdle of solid lace. The waist tying down into this ever slightly gave the effect of a complete princess dress.

#### FASHION NOTES.

Black allover embroideries are one of those staples in dress trimming that somehow always seem to be in good style. Those of this winter are more open and airy than formerly.

These brilliant stones are more used than ever, and are combined with oxidized silver, gift mother-of-pearl and smoked pearl in waving stripes, squares scrolls and circles.

Certain of the new buttons so closely resemble a handsome marquise ring that they are really rather startling when freely used on a frock. They come in Italian turquoise, ruby, sapphire, emerald and pink coral, surrounded by rhinestones.

A trimming for a quiet taste was a graceful applique in garlands, silk embroidered with flowers, with a peach pink centre and deep pearl-colored foliage.

Spangled jet ornaments in graceful festoon designs now come with alternate right and left figures, greatly simplifying the work of the dress-maker.

Dull jet for mourning wear is hand some than ever, as it is seen either in appliques or worked in elaborate and very flowing designs on fine net. Se quins, pointed and round, small beads and studdings are frequently noticed in the same material. Studdings are especially popular.

## WOLVES IN ALGONQUIN PARK TREADED LONELY LUMBERMAN

Are so Plentiful This  
Year That Firearms  
Will be Permitted in  
Its Precincts.

Algonquin Park is infested by wolves, according to the reports received by the Department of Lands, Forests, and Mines yesterday. Mr. C. E. Hubbs,

bookkeeper for A. Barnett and Company, a lumbering firm operating in the park, writes that one of the company's employees was driven by a pack of the animals to seek safety in a tree on Thursday last. The incident occurred about a mile from Brule Lake Station on the Canada Atlantic branch of the Grand Trunk Railway. Mr. Hubbs asks permission to lay down poison to destroy the wolves and to carry a gun to protect himself from attack. G. W. Bartlett, the park superintendent, reports that "wolves are very numerous this year." It is very probable therefore that Mr. Hubbs' requests will be granted, although, as Algonquin Park is a game preserve, firearms are not allowed within its boundaries.

## THE HORSE QUESTION.

Best Methods of Improving the Quality of Our Horseflesh.

The friends of the horse, do not feel inclined to allow the noble animal to be side-tracked by the automobile. The action of the Government in instituting investigation and inquiry to discover the best methods of improving the quality of our horseflesh, is simply the concrete expression of the sentiment of a large part of the public in regard to the horse. Whatever may be the results of the work of the horse commission, there is one thing evident, that a set-back, if not knock-out blow, will be administered to the practice of employing scrub sires. The experimental work, with grains at the Agricultural College, has demonstrated in a striking way, that good crops cannot be successfully grown from defective seed. Neither can good horses be bred from broken-down, decrepit and unsound dams and sires, of low strain, and no breeding. The best stock can only result from the employment of well-bred sires and good dams. It is, besides, far easier to keep a good animal in condition, during his growth, than it is to bring a scrub along till it reaches a saleable age, and even when, in its case, that age is reached, its saleable quality is far inferior to that of a well-bred colt. Supposing, however, that in both cases, the same trouble and expense are involved in bringing a colt to a marketable age, the value of the well-bred animal is so promptly and practically recognized by a shrewd buyer, and the disabilities of the scrub so promptly taken into account, that there becomes no question of which is the more profitable animal to handle. The commission, it is a pleasure to know, had not much reason to find fault with the horseflesh of the district, for there are perhaps few sections of the province in which so many good horses can be seen, either on our city streets, on the highways, or on the farms. Still, there are in too many cases, sires kept and employed, which, in place of looking forward to future generations of horseflesh, should be looking forward to a peaceful life in front of the plough or harrow—their only place of real usefulness.—Peterborough Examiner.

## CHINA MOVING FORWARD.

Important Rearrangements in High Offices.

The London Times prints the following cable despatch from its correspondent at Peking:—An Imperial edict has been issued, making various important rearrangements in high offices in the central administration. While the changes are not so thorough as those called for by the Progressive party, being essentially in the nature of a compromise, they are unquestionably a step in the right direction, and augur hopefully for more radical changes hereafter. The most important change is the creation of a new Board of Communications, called Yuchuanputo, to control telegraphs and steamship lines,

## YOUNG FOLKS

"WHOSE BUSINESS."

Miss Rose Penton was standing at the old-fashioned oak table washing the fine silver and delicate china that had been used at the meal just finished, when a small, plaintive voice said:

"Do you know, auntie, when I grow up I shall use all the dishes I can so as to make more to wash up. You couldn't let me help you now with those, could you?"

It was a very sweet coaxing voice and it belonged to a demure little maiden who was sitting in a high-backed chair whose oaken blackness set off her fair, dainty prettiness.

"I'm afraid not, dear," Miss Rose said, regretfully. "You see, Daphne," she added, apologetically, grandmother would never forgive me if I allowed you to wash the dishes she has had so many years and then an accident should happen to them. Take your book and go to the summer house; it is very pleasant there now. When my little duties are finished I will join you."

"Come, now, auntie, dear" Daphne said, pleadingly.

"No; work first, pleasure afterward. Run along, dear, and don't pout."

"But it's so lonesome by myself. Couldn't you come now?" Daphne persisted.

Miss Rose shook her head, and so her little niece, finding that coaxing was of no avail, started off alone.

"Mamma said I should have a lovely time all the while when I came to see grandmother and Aunt Rose," she said to herself; "but I don't call it having fun when you have to amuse yourself."

You see, Daphne had been so used to having things her own way that she could not grow accustomed all at once to her Aunt Rose's kind, firm way, but pouted and fretted until she was in fair danger of sprilling her roselike face.

She went to the summer house, which stood on the top of a small hill overlooking the sands—for Miss Rose's house was on the seashore—and sat down with her book in her hand. But presently, hearing voices on the beach, she looked out and saw two girls there. One was sitting on a little pier, the other was bending over something on the sands.

"Come, Midge, come and help me," the latter called; "if you don't we shall be late in meeting mamma."

"I'm so tired," called back the one sitting on the pier, "and—"

"Oh, please come," repeated the other, "for I dropped them, every one."

Daphne looked and saw that the speaker was filling a pail with pretty stones that she had evidently just spilled on the ground.

"I suppose I might go and help her," she said; but the next moment she added, "No, I won't. It's so hot out there, and I might spoil my new pink dress; and besides, it's none of my business if she did spill them, and her sister won't help to pick them up."

There was no doubt about it, Daphne was very cross because Aunt Rose had not done as her niece wished. And so she sat on the top of the wall that separated the garden from the beach and watched the little stranger busily at work. Presently she heard the one on the pier say:

"It's my foot, Polly, that hurts so. I'm most afraid I can't walk to mamma."

"Then you'd better rest it, and I'll pick up the stones," Polly said so cheerfully that Daphne at once concluded she must be a nice girl.

A few minutes later Miss Rose came down the walk and into the summer house to look for her on the sands.

"I'm here, auntie," Daphne said, as Miss Rose appeared in view. "I'm watching two girls on the sand."

Miss Rose joined Daphne, and, as her eyes alighted on the busy worker,

# JAPAN AND UNITED STATES

## Trouble Is Likely to Ensure From Delay in School Question.

A despatch from Tokio says: The Jiji Shimpo, commenting on the trouble with the United States, says that while the educated Japanese fully appreciate the attitude of the Washington Government, and realize that its intentions are fair, they regret that the obduracy of the Californians in regard to the treatment of the Japanese in that State necessitates a settlement of the question by the courts.

The paper adds that it fears the effect of slow legal process upon a majority of the people, to whom San Francisco means the United States. Propinquity strengthened the appeal for contributions for the relief of the earthquake sufferers, and likewise accentuates popular resentment, which, despite the persuasions of the educated minority, seems likely to attain the dimension of national bitterness towards all the United States, which will seriously affect future social and trade relations. The

Jiji Shimpo prays the Californians to consider the serious consequences of their exclusiveness.

## HATES THE JAPS.

A despatch from San Francisco says: Secretary Metcalf will return to Washington on Monday, and there is no likelihood of the Board of Education reversing their decision to exclude Japanese children from the schools. It is claimed by eminent jurists that since the treaty with Japan does not contain a "favored nation" clause, California, as one of the federated States, is in no way bound to extend to Japanese citizens all the privileges that it extends to persons of other nationalities.

The whole Pacific slope is unanimous in its support of San Francisco's attitude. In fact a California representative to Congress will next session present a bill to exclude Japanese, the same as Chinese. There is a deep-rooted dislike of the Mikado's subjects.

## BUILDING COLLAPSED.

Dozens of Workmen Buried Beneath the Ruins.

A despatch from Long Beach, California, says: The huge Bixby Hotel, in course of construction on the beach here, collapsed on Friday, supposedly because of faulty construction. Between twelve and fifteen workmen were killed and more than a score of others were seriously hurt. Several of the injured may die. Fifteen others are believed to be still buried in the debris. The building was of reinforced concrete and the men were crushed to death beneath tons of mortar and iron.

The Hotel Bixby, which has been under course of construction for several months, was to have been one of the best-appointed hotels on the southern coast. The total cost of the building was estimated at \$750,000. It was being built on the beach facing the ocean and was out 200 feet distant from the shore.

## GIRL SAVED BY PRIEST.

Suicide in Canal at Ottawa Was Bravely Prevented.

A despatch from Ottawa says: Through the presence of mind of a priest, who jumped into the canal and saved her, a young woman was prevented from committing suicide at Ottawa East on Thursday. She jumped into the water, and there is every reason to believe she was trying to put an end to her life. The name of the woman was not learned, and the priest was too modest to disclose his.

## BLONDIN RELICS AT AUCTION.

Include Medal Presented to Him for Walking Across Niagara River.

A despatch from London says: Several Blondin relics, including a diploma and a medal presented to him for his feat in walking across Niagara River on a tight-rope, will shortly be sold at auction at Sotheby's.

## NO FOREIGN LOANS.

Denial at St. Petersburg That Such are Contemplated.

A despatch from St. Petersburg says:

## WAS 105 YEARS OLD.

Probably Oldest Woman in the Province Is Dead.

A despatch from Brockville says: In the death of Mrs. Darby Morrison, of Montague, probably the oldest person in the province passed away. She was born in Sligo, Ireland, almost 105 years ago. She lived with her daughter, Mrs. Kate Guthrie, in Montague, and up to a few weeks ago was remarkably smart and active.

## DERAILED TRAIN WITH BOMB.

Terrorists Then Seized the Mail and Escaped.

A despatch from Warsaw says: As a train was entering the Rogoff station on Thursday evening a party of terrorists threw a bomb at the mail car. The explosion caused the derailment of the train, and killed or wounded many persons. The men terrorists seized the mails and escaped. It is reported that they obtained a million roubles.

## CONNAUGHT TO VISIT US.

Official Tour of Canada to Follow His Visit to East.

A despatch from London says: The Dublin Express has been informed that the Duke of Connaught, Inspector-General of the Forces, will make an official tour of Canada after visiting the Far East. He will be accompanied by the Duchess and Princess Patricia. The Duke starts on his tour next month.

## AUSTRALIANS FOR ARMY.

Premier Deakin Favors Enlistment in National Reserve.

A despatch from London says: Premier Deakin of Australia has given a sympathetic answer to a deputation which proposed a voluntary enlistment of 50,000 Australian citizens in the national military reserve. Personally he did not shrink from compulsory service, but some such scheme as suggested should first be tried.

## CHOOSE YELLOW HEAD PASS.

# ON OF FORCE

## r Secretary Makes ing Speech

whether it was possible to concert steps with other powers to remedy the evils. Responding to the toast, "The Imperial Services," War Secretary Haldane said that he and the First Lord of the Admiralty, Lord Tweedmouth, realized it was a solemn duty on their part not to diminish the country's fight-

with other powers to remedy the evils. Responding to the toast, "The Imperial Services," War Secretary Haldane said that he and the First Lord of the Admiralty, Lord Tweedmouth, realized it was a solemn duty on their part not to diminish the country's fighting force by one whit. It was the duty of a Christian people, the speaker continued, to set an example by reducing the expenditures for armaments, but unless they had a response from other nations, this was impossible.

The speaker hoped the time would come when nations would look back upon these days as a period of barbarism and wonder why they had spent millions in this manner. But until that time arrived it was in the interest of peace itself that no nation let down its strength, and it was the duty of Great Britain to maintain its fighting efficiency.

both now under Viceroy Yuanshikai; railways, now under the Board of Commerce, and the post-office, now a branch of the maritime customs.

### ONE COUNTRY, ONE WIFE.

#### Louis Bloom's Plea in a Montreal Police Court.

A despatch from Montreal says: A Russian Jew, named Louis Bloom, alias Swartz, a rag sorter, when arraigned before Judge Lafontaine on Wednesday on a charge of bigamy, made the following statement: "When I see any woman I want to marry her. I don't know why, but I cannot help it. One country, one wife. I have only one wife in this country. The other one, she belongs to the United States." Bloom had pleaded guilty to a charge of vagrancy, and non-support of his Montreal wife, and she and the Rochester wife met one another in court. When Judge Lafontaine asked Bloom if he had another wife in Russia he replied: "No, your Honor. I have only these two, and now that is one too many." Bloom was then remanded for sentence on the charge of vagrancy and non-support.

### BIG FIRE IN QUEBEC.

#### Several Stores Are Destroyed — Loss Totals About \$40,000.

A despatch from Quebec says: A big fire raged in St. Roch from 4 till 7 o'clock on Thursday morning. Fire broke out about 4 o'clock in the wood-sheds at the rear of Robitaille's music store, on Cartier Street, opposite Jacques Cartier Church. The blaze spread to the store of L. C. Giguere, hardware dealer, St. Joseph Street, and then to Valliere's furniture store, and both were reduced to ashes. The residence of Mr. Onesime Goulet and the drug store of Mr. J. B. Moran were also badly damaged. The damages are valued at \$40,000.

### MERE BOYS EXECUTED.

#### Firing Party at Riga Unnerved and Shot Wildly.

A despatch from St. Petersburg says: The Riga correspondent of the Bourse Gazette has sent in harrowing details of the execution by shooting of three boys who had been condemned by a court-martial for robbery. Four other persons were executed at the same time. The firing party was completely unnerved at the sight of mere children before them for execution, and fired wildly, and it was only after several volleys that all the prisoners were killed.

### SIR H. M. DURAND TO RETIRE.

#### British Ambassador to the United States to Return to England.

A despatch from Washington says: Sir H. M. Durand, the British Ambassador to the United States, is to retire early in the New Year.

down the walk and into the summer house to look for her on the sands.

"I'm here, auntie," Daphne said, as Miss Rose appeared in view. "I'm watching two girls on the sand."

Miss Rose joined Daphne, and, as her eyes alighted on the busy worker, she called out, pleasantly: "Polly! Polly Benton! What are you and Madge doing down there? Where is your mamma?"

"Mamma has gone on ahead to the Cove, and Madge and I are to meet her there, Miss Rose," Polly said, leaving her work and drawing near to the two on the wall. "But we dropped our stones and Madge hurt her foot, and, between the two, I am afraid we shall be late in meeting mamma. She is going to make us some pretty things from these shells and pebbles."

"Daphne and I will come down and help you, dear," Miss Rose said, readily. "This is my little niece; she has come to stay with us a few weeks, and I am sure she will be glad to join you for a while."

Daphne followed her aunt with a curious feeling tugging at her heart.

"If auntie knew how selfish I had been she would not wish me to help now, I'm afraid," she said to herself. "I guess it is her business to help those two little girls, it is mine, and I'm just going to do it now all I can."

And when Daphne had made this resolution it was surprising how much better she felt. The four worked away busily for a few minutes, and then the two sisters were started on their way with their pail filled to the top again.

"Thank you, Miss Rose, and you, too," Polly said, including Daphne in her thanks, with a pretty nod. "I shall tell mamma how good you were to us."

"Oh, it was just a good time for Daphne and me!" Miss Rose laughed back.

"Auntie," said Daphne, suddenly, as they went back to the summer house, "is it always one's business to help anybody that needs it, if you can?"

This was not very clear, certainly, but Miss Rose seemed to understand, and she said:

"It is always right and good, deary, to lend a helping hand to another if one can. It always pays to step out of the way to be neighborly and kind."

And Daphne thought sorrowfully, "I wish I had helped Polly before auntie came, but next time I won't wait—that I won't."

Which was the best resolution to make, and one that we hope Daphne will be able to keep.

### IS WANTED IN CALGARY.

#### Alleged Defrauder of Bank Arrested in Chicago.

A despatch from Chicago says: Percy C. Roberts, said to be wanted by the authorities of Calgary, Canada, in connection with an illegal banking transaction, was arrested here on Thursday when he alighted from a train in the depot of the Chicago and North-Western. A description of the man had been received from the police at Calgary, and he was recognized by the local police. He denied that he was wanted in Calgary, but declined to talk when shown the telegram received from the police of that place.

### IRON DEPOSITS FOUND.

#### Vein Discovered in Snowdon Township, Haliburton County.

A despatch from Toronto says: An important find of ore is reported to have been made in Snowdon Township, in the Haliburton District, within three-quarters of a mile from the Irondale and Bancroft Railway. The deposit is the largest found in the locality, where are situated a number of mines in operation. The body of the ore is 150 feet in width and it consists of a good quality of magnetite. A claim has already been staked by William Robinson, of Bobcaygeon. The scene of the discovery originally formed part of a grant for agricultural purposes.

### NO FOREIGN LOANS.

#### Denial at St. Petersburg That Such are Contemplated.

A despatch from St. Petersburg says: It is authoritatively denied that the Government is considering the question of an issue of a supplementary loan of 500,000,000 rubles (\$250,000,000), at 4 per cent., or that it has been decided to give to foreign banks as security shares of the Peasants' Land Bank.

There is also no truth in the statement that it is planned to give a concession to an American syndicate for exploiting the economic riches of the country.

These reports are spread by the Opposition press, with the view of discrediting the Ministry.

### MONEY IN IRRIGATION.

#### Alberta Company Has Net Profit Double That of Last Year.

A despatch from London says: At the annual meeting of the Alberta Railway & Irrigation Company Colonel Wodehouse said the estimated net profit for the year was \$343,960. After paying interest on the five per cent. debentures, there remained a balance of \$47,225 against \$21,000 last year. The minimum selling price of irrigated land is now twenty dollars per acre.

### VOTES FOR WOMEN.

#### Bill in British House—No Consideration This Session.

A despatch from London says: In the House of Commons on Wednesday Keir Hardie, Labor leader, introduced a bill to confer the suffrage on women. The Premier said there would be no opportunity of dealing this session with the measure, which was read a first time.

## MONEY FOR REVOLUTION

### Train Derailed by a Bomb, Surrounded and Robbed

A despatch from Rogow, Russian Poland, says: The Cossacks have thus far been unsuccessful in their pursuit of the revolutionist train robbers, numbering a hundred well-armed men, who surrounded this station on Thursday night, threw a bomb at the mail car of a train, derailed it, killing or wounding several soldiers of the escort, and fled with a sum of money now said to amount to \$650,000. The robbery was well planned. It occurred at 9 p.m., while the train was changing engines. The stationmaster declares the revolutionists hid in the neighboring forests and were excellently disciplined, their commander giving orders through bugle signals. When the robbery was completed the revolutionists transported their booty to two waggons and marched off in military order, singing socialistic songs. Rogow is now occupied by troops.

### MEN SPRANG FROM ALL SIDES.

Eye-witnesses confirm the statement that the revolutionists were hidden in the neighboring woods. When the train stopped, men armed with rifles sprang up upon all sides. Quickly executing the orders conveyed by the bugle, they shot and killed the gendarmes standing in front of the station. Sentinels were placed at all the approaches and the telephone wires were cut. While some of the robbers overpowered the trainmen,

others attached the escort of the mail car.

### CHOOSE YELLOW HEAD PASS.

#### Route of Grand Trunk Pacific Through the Rockies.

A despatch from Ottawa says: The Grand Trunk Pacific has decided upon the Yellow Head Pass as the one which it is to use to reach the Pacific coast. This has been done after careful surveys. The Government will be asked to approve this pass, which will give a grade through the Rocky Mountains of about four-tenths of one per cent.

### GOLD IN SASKATCHEWAN.

#### Found in Large Quantities West of North Battleford.

A despatch from North Battleford, Sask., says: Gold in vast quantities has been found at Birling, a tank station, forty-two miles west of here. The discovery was made by an old prospector named Hughes. Returns from the assaying office at Ottawa, Monday, showed \$40 to the ton, placer mined. The vein is ten miles long. A great rush to the tract is expected.

### DEEP BREATHING.

Enough cannot be said of full, deep breathing. It is no hobby or wild notion, but if you would prove its benefits, practice it daily, and you will increase the circulation, purify the blood, and send it rich and hot to warm the feet, make ruby lips and plant roses on the cheeks. It will aid your digestion and give you a clean, sweet breath, promote sleep, quiet the nervous system, strengthen the throat and vocal organs, and increase the chest capacity. It will also cure your asthma, catarrh and bronchitis, and prevent lung trouble.

### THREE BOMBS THROWN.

Three bombs, not one, it now appears, were thrown. Two of them exploded with terrific force, blowing the cars into matchwood, killing five soldiers and mortally wounding eleven others. The robbers then ransacked the mail cars, transferred the bank notes, gold and silver to their own bags, and, unfolding the red flag, formed up in military order, marched out of the station, entered waggons, which were in waiting in the forest, and drove off.

It was not until three hours later that a detachment of Cossacks hurriedly sent for appeared on the scene and started in pursuit of them.

### UNJUSTIFIABLE EXECUTIONS.

A despatch from St. Petersburg says: M. Stolypin, the Premier, has warned the various provincial authorities that the field court-martial can only deal with serious offences and with Terrorists caught in the act of breaking the law. The Government realizes that a number of minor criminals have been executed without justification, and it is proposed, therefore, to limit the jurisdiction of the drumhead courts. M. Stolypin points out, however, that there can be no appeal from the sentence of a field court-martial.

SLAUGHTER IS FEARED

RUSSIAN SOLDIERS ARE BITTERLY INCENSED.

Matters are Ripe for Another Massacre of the Hebrew Inhabitants of Warsaw.

Less than a year ago, fears of a Jewish pogrom caused the peace-loving inhabitants of Warsaw to use every means in their power to calm the spirits of the masses, incensed at some excesses of Jewish Hooligans, for they knew that the Russian authorities would be glad to see the disgraceful scenes of Odessa and Kieff repeated in the Polish capital, writes a Warsaw correspondent. The danger passed over, but recent events in Siedlce have renewed the possibilities of a pogrom in Warsaw.

In Warsaw, as in other Polish towns, the Jew has to reckon with two forces—the Polish masses and the Russian authorities. The first may be altogether ignored except when encouraged by the second in moments of intense national excitement, for though the Pole does not love the Jew, he is content to live and let live. But the danger of the second is twofold, consisting of the organized hostility of the authorities and the personal hatred of the individual soldier—an element whose importance has not been sufficiently considered out of Russia, when judging the Jewish massacres.

The military forces in Poland are made up of men drawn from diverse districts, such as the steppes of Little Russia, the Caucasus and the remote governments beyond the Ural's. These men have little in common with each other and nothing with the civil population they serve amongst. This has always been so; but now they consider that they have special grievances against the

JEWISH AND POLISH ELEMENTS.

For nearly two years, they have been doing hard sentry duty. They have frozen in the streets by night and scorched in the sun by day. They have carried their rifles, fingers on trigger, in their right hands, and kept their reins in their left, till their bones have ached with the strain. They have stood at their posts week in, week out, for twelve hours at a stretch, without respite, on Sundays, holidays and gala days. They have patrolled the streets of Warsaw and the larger towns in all weathers, under all conditions of danger, been jeered at, spat upon, shot at, bombed at, killed and wounded from house-tops and balconies for doing a duty they delect and for reasons which they cannot understand. They have been called upon to protect the policemen and share his duties, standing in the streets as so many marks for the bombs and revolvers of the terrorists. They have experienced the most demoralizing of all fears, the constant thought that they will be struck at from behind by an unknown hand or attacked from a passing tram, cab or carriage, for the means of the anarchist are innumerable. And all this without the excitement of regular warfare, without a word of praise, a koepick of extra pay, without a day in camp and often—when the field kitchen forgets to leave their soup—without food. In the depth of winter, when men need warm food to keep the blood circulating in their veins, sentries have dropped from sheer exhaustion, whilst their comrades have gone to the nearest bakers and vainly begged a piece of bread to stave the pangs of hunger. Yet they are not the products of crowded cities, but strong, well-built giants, who can live upon daily fare of hot soup and black bread. Many of them have seen their comrades shot in the streets or mutilated beyond recognition by bombs, not during a brawl or big disturbance, but on what the Poles call normal days, when men, going about their business, hear with indifference that "another

MARVELS OF OLD LONDON

AN ARTICLE THAT WILL AMAZE AND BEWILDER YOU.

Figures From the Recently Published "Statistical Abstract for London."

If anyone wishes to realize how fascinating and startling figures can be, let him pick up the recently published "Statistical Abstract for London," and even if he has no love for statistics he will find it almost as absorbing as a novel and full of bewildering pictures of wonderful London, the most amazing city the world has ever known.

Within the compass of about 118 square miles are gathered together more people by a quarter of a million than you will find in the whole of Ireland, and three-quarters of a million more than are spread over the vast continent of Australia, which has an area twenty-five times that of the United Kingdom! You could find room in Ireland for, approximately, 270 Londons, and for 25,000 in Australia; and yet in population the wonderful Metropolis outstrips them both, with more people to the acre than you will find in forty-seven square miles of the great Southern Continent.

In the districts of Stepney, Southwark, Bethnal Green, and Finsbury there are 260 people to every acre; while in the City, during the daytime, the density reaches

848 PERSONS TO THE ACRE.

In Stepney alone there are more residents than in Bradford, although the Yorkshire town has twenty times the area; and more than in Hull, with nine times the acreage. Between the hours of eight and ten in the morning 325,000 people flock into the square mile of London's City—a number little less than that of the entire population of Bristol; more than 22,000 vehicles pass the Mansion House in a single day of busy London life; and nearly 700 omnibuses and hansom cabs pass the same place, going in one direction only, in a single hour.

The inhabitants of London County (with which alone we have dealt so far) are so numerous that they could touch hands across the extreme length of Europe from North-East to South-West; the Parliamentary electors alone of the County of London far exceed the population of Manchester (men, women and children); and its borough electors are almost as many as the inhabitants of Liverpool. London's streets if placed continuously would easily reach from Charing Cross to Constantinople; every day throughout the year 108 bridegrooms lead the same number of brides to the altar.

A YEAR'S WEDDED COUPLES

exceeding the population of Coventry by some thousands; more children are born in twelve months than would re-populate Derby; and a year's deaths would depopulate a town as large as Davenport.

When we come to "Greater London" the figures are more amazing still. The houses in this extended Babylon would form a street (a double row) long enough to link the Mansion House with Moscow; every day nearly 3,000,000 people travel within this area by rail, tram, or omnibus; the year's passengers being equal to two-thirds of the world's entire population; the licensed vehicles would form a close procession from the British Museum to Bognor; and the army of drivers and conductors, with their families, outnumber all the residents of Blackburn.

Every week-day more than 3,500,000 letters and postal packets of one kind or another are delivered by postmen, who, in twenty-four hours, tramp a distance equal to four circuits of the Equator; you could enter three different post-offices every working day for twelve months,

SOME DESPERATE DEEDS

PURLOINED A BATTLESHIP AND ABOUT EVERYTHING ELSE.

Their Operations Carried Them Over Many Seas and Three Continents.

The first fire of a new army has been lighted; the world has a new fighting force, the fighting force of "The Lost Legion." The Legion of Frontiersmen, says the London Sketch, have made their first bivouac, not, indeed, as they would have wished it, under a sky reddened by the glare of battle, but that they might notify in time of peace that they will be ready in time of strife. They are becoming an army of Imperial defence, and they aim at being the intelligence branch of the service when the god of war calls for sacrifice. They represent the true frontiersmen, men who have worked hunted or fought in wild countries or at sea, the brotherhood of the camps. Guerrilla tactics are second nature to them; and so it is that they will act as guides, scouts, pioneers and mobile forces for raiding. Wherever their numbers are sufficient they will have a command.

Typical of all are their founder and honorary secretary, Frontiersman Roger Pocock and the London commandant, Mr. De Hora. Both are born adventurers—we use the word in its older sense, deprecating the fashion that has distorted the term into meaning

SOME FORM OF SKUNK.

Frontiersman Pocock has been many things. He was clerk in the cable service, a laborer on a fruit farm in Ontario, insurance clerk, survey hand, "boo's" in a hotel, or navvies, milkman's bookkeeper, log hauler, railroad navvy, book agent, peddler of photographs, dairyman, and trooper in the Northwest police—all in two years. While trooper he took part in the forced march of forty-two miles a day for seven days from Regina to Prince Albert, in a vain endeavor to prevent the Northwest rebellion; but it was not his fortune to finish, save under the Red Cross. Half way he was frozen and so was invalided with a pension.

Next he was civil servant, trader, war correspondent, missionary, seaman with Yokohama pirates, robbing the warehouses of seal rookeries; free lance journalist to British Columbia, special correspondent at Kootenay mining camp, then a new creation; photographer, keeper of a cigar-stand, painter of photographs and newspaper agent in the Blue Mountains. Then home called and he started as a novelist, but it was not long before he was back in the wilds as a cowboy in Alberta, gold miner and captain of a pack train. A little later he placed to his credit what is probably the longest lone ride on record—from Fort McLeod, Canada, to the City of Mexico—3,600 miles of rough country, covered in 200 days. In the South African war he was in turn in a looting corps (unpaid), whose business it was to capture Boer food supplies, and in the National Scouts. His most recent expedition was up the

WEST COAST OF GREENLAND.

Mr. De Hora, the well-known mining engineer, who was born on a stock ranch in California and brought up as a cowboy, has a unique record in that at the early age of three and twenty he stole a battleship. He had been before the mast, peering in the south seas, and, scenting further adventure, he threw in his lot with a revolutionary leader, and, aided by a boat's crew, speedily gathered together, contrived to steal the war vessel Huascar from Peru. In her he committed piracy on the high seas by stopping a British tramp steamer, with the result that he had to fight H.M.S. Shah. He was badly

VENDETTA UP TO DATE

A Corsican Murderer Clears Innocent Relatives by a Snapshot Photograph.

A murder trial which is soon to take place in Ajaccio, Corsica, will be the climax of one of the oddest cases of vendetta, with the strangest up to date features, on record. The central figure is Giuseppe Paoli, who killed a man in a quarrel some years ago; was arrested, tried and sent to New Caledonia to serve out a long sentence of deportation.

In some unexplained way Paoli escaped from the French convict settlement some eighteen months ago and forthwith made his way home to Corsica. No information of his escape was communicated to the authorities of the island and they had no suspicion of his presence as he lay hid in the maquis, or dense second growth thickets which skirt the forests in the mountainous regions of Corsica. His presence was known only to two of three friends.

Paoli had returned to Corsica to perform what was in his eyes almost a religious duty. This was to take vengeance upon a former comrade, whose testimony only had caused his conviction. One day he surprised the traitor, as he considered him, on a lonely road and

SHOT HIM DEAD.

When the body was discovered, suspicion fell at once upon Paoli's two brothers. It was plain from the outset that the murder was not committed for robbery, and they were the only people known to be in the island who had any grounds for a vendetta against the dead man.

They were arrested. Some circumstantial evidence was unfavorable to them and they were held for trial, with their prospects of clearing themselves rather black.

Then a countryman stepped one day into the offices of the Prefecture at Ajaccio.

"Sir," said he to the official who received him, "I come from Paoli, who humbly asks for an interview with the Prefect."

"What Paoli?" he asked.

"The deported Paoli."

"But he's in New Caledonia. We can't go there."

"No, he's in Corsica and he must talk with the Prefect alone and soon. Tell him so."

The countryman bowed politely and went out.

Some days later the Prefect started on a tour of inspection. He drove in an open carriage and was accompanied by one of his councillors and a military surgeon.

They had not the faintest idea that anything unusual was to happen, and were enjoying the drive as the road led them into a dense patch of woods. A sudden shout caused the coachman to rein up, and the party found themselves covered by four carbines.

The man who had called at the Prefecture a few days before approached and ordered the Councillor to step out of the carriage. Covering the official with his gun, the man explained

WITH COOL POLITENESS:

"Paoli is there, just behind the bushes. He wishes to speak to the Prefect alone. Advise his Excellency to go to him, for if he refuses I shall be obliged to kill you. His Excellency's safety is guaranteed."

The prefect didn't like it much, but he went; what else could he do? He found Paoli a little way from the road. "Signor Prefect," said the outlaw, "I have taken this step in order to prevent a judicial murder. You propose to condemn my brothers. They are innocent. I escaped from prison, and the

five upon many more are not soup and black bread. Many of them have seen their comrades shot in the streets or mutilated beyond recognition by bombs, but during a brawl or big disturbance, but on what the Poles call normal days, when men, going about their business, hear with indifference that "another bomb has been thrown" or

#### "ANOTHER SENTRY KILLED."

Rightly or wrongly, these soldiers affirm that their assailants are nearly always young Jews. If they dislike doing sentry work in the Polish quarters of the towns, they hate it still more in the ghettos. Indeed, there are streets in the Jewish part of Warsaw where soldiers singly or in couples dare not venture, for fear of assassination. Patrols, searching passively in the Jewish quarters, are frequently shot by spectators, for the streets are full of Jews who like to transact their business—political or commercial—in the open air.

One Wednesday, last August, a number of soldiers were shot in Warsaw, mostly in the Jewish streets. As usual, the inn-keepers suffered for the guilty and the dead men's comrades carried out orders to close the Jewish shops with a liberal use of their rifle bullets, beating all within their reach. They told their frightened victims that eight of them should perish for every comrade shot, and their officers had the greatest difficulty to prevent them from carrying out their threats.

The average Russian soldier—the Cosack excepted—is a good tempered fellow under ordinary conditions. He always will answer a civil question with a broad grin. At harvest time, he hires himself out to the Polish squire, working hard all day and musing the evenings in singing the beautiful folksongs of Russia. But he is like the proverbial Russian, he will not refrain from making a joke. He has been taken from the plow to do sentry work in Poland and the experience has soured his temper. His mental range is limited, he sees that the Poles and especially the Polish Jews are responsible for the dangers he now encounters, and when he gets the chance of revenge he uses it without hesitation.

He has another grudge against the Hebrew. The Jews who serve in the army are often drafted into the regimental bands and it has frequently been proved of late that mutinies and cases of insubordination

#### COME FROM THE MUSICIANS.

The soldier who gets punished for joining in an unsuccessful movement, which he is too ignorant to understand, and which was to land him in a kind of military paradise, bears a grudge against the Jewish agitators, and pays off some old scores when he has the chance of beating a Jew who refuses to move on or shut up his shop when ordered to do so.

His officers have the greatest trouble to keep him in hand whilst searching flats and houses, in the vicinity of places from which bombs have been thrown or dignitaries shot. He invariably makes havoc among the furniture and valuables. Rooms which he has entered present a sad spectacle of broken furniture, smashed mirrors and rumpled-up mattresses. He makes no secret of his motive — to pay out the Poles and Jews for the trouble they have given him. The better-informed Poles know of these feelings and the more reasonable understand them, as to the Jews—those who have anything to lose are convinced that they will be the first victims, whereas their coreligionists who do the shooting have neither shop nor counting-house and risk but little.

The Russian authorities in Warsaw, therefore, need not incite, but merely sanction a pogrom, the officers have only to release their pressure on the men to let the contents of the barracks loose, first upon the Jews as arch-offenders then on the Poles as the next culprits.

Joy unsought always is first to arrive.

Blackburn.

Every week-day more than 3,500,000 letters and postal packets of one kind or another are delivered by postmen, who, in twenty-four hours, tramp a distance equal to four circuits of the Equator; you could enter three different post-offices every working day for twelve months, and still leave nearly a hundred unexplored; while London's postal officials, with their families, are more in number than all the dwellers in Newcastle-on-Tyne.

There are five more theatres in London than there are weeks in the year; of music-halls and variety theatres there are forty-six; in addition to

#### 248 CONCERT-HALLS

and other licensed places of recreation. And yet, if every seat in all these 351 places were occupied, only one of every 20,000 inhabitants of Greater London could be present. The premises in London licensed for the sale of intoxicants are so many that, placed side by side, they would enable you to have 7,382 drinks between the outskirts of London and Brighton Pavilion. London's paupers number 136,000 (roughly the population of Oldham), and every year nearly 60,000 prisoners find lodging in her jails.

London uses 14,000,000 gallons of water to extinguish twelve months' fires, and the water she uses for other purposes in a single day would fill a bath 200ft. long and 10ft. wide to a depth of 6ft. She drains the contents (also in twenty-four hours) of a beer-bottle as tall as the Duke of York's Column and more than 10yds. in diameter; a single day's wine-bottles would reach, if placed end to end, from the Bank to the western limit of Kensington Gardens; while her daily allowance of spit-dishes would make a rivulet 1ft. wide and 6in. deep from the Mansion House to the Clock Tower at Westminster.

Finally, the Londoner's daily cup of tea has a diameter of 60ft. and a height of 56ft. A spoon long enough to stir it would be as long as Cleopatra's Needle, and all the people of Brighton could scarcely raise the cup from its saucer.—London 111-Bits.

#### SENTENCE SERMONS.

Worship doesn't wait for walls, Faith is the foe of formalism. Religion is a spring, not a cistern. Self-sufficiency does not secure efficiency.

Sympathy is the master key to every soul.

When a man's head hangs loose it soon gets sore.

The intellectual blank makes the best religious bigot.

Though you are but a puddle you may reflect heaven.

The only cloth that can claim divinity is the cloak of charity.

One does not become a saint by discovering the sins of others.

You can run a business without cash, but not without character.

Many a son's solid virtues spring from his father's vicer virtues.

It's better to have a small cookie well done than a large cake all dough.

The man who sneers at sincerity has taken a long course in the school of sin.

The burden you bear for another is the best badge you can wear as a Christian.

When a man really has a treasure in heaven he doesn't object to paying taxes on it.

The path to heaven is paved with good intentions crystallized into worthy acts.

Some folks think they are holy because a good dinner makes the feel unhappy.

The formation of a child's character is a greater work than the reformation of many men.

It's possible to throw out your crumbs of comfort in such a way as to make them seem like cinders in the eyes of others.

Some who think they are showing the hardness of their hearts by their sins are revealing only the softness of their heads.

throw in his lot with a revolutionary leader, and, aided by a boat's crew, speedily gathered together, contrived to steal the war vessel Huascar from Peru.

In her he committed piracy on the high seas by stopping a British tramp steamer, with the result that he had to fight H.M.S. Shah. He was badly beaten, but escaped, only to find it necessary to surrender to the ruling government. His next expedition, made in partnership with the former revolutionary leader, ended in the discovery of the famous Maghellan treasure—\$2,000,000 in a sunken Spanish galleon of the seventeenth century—spoils promptly confiscated by a schooner sent by the Argentine government, whose captain Mr. De Hora entered a little later at the head of three hundred cowboys from the Rio Negro. It was he also who led Colonel North's exploring expedition from Brazil to Ecuador. Thus adventure followed adventure until the South African war broke out. At that time he was acting as mining engineer in Johannesburg, and, seeing the state the city was likely to get into, he raised a corps of six hundred neutrals to act as armed police. These did their work until the arrival of Lord Roberts; when their organizer formally handed over the place to the care of Captain Walter Kirtland, who, by the way, of the London command. Surely a difficult record to eclipse.

#### OFFICERS MUST STUDY.

General French Tells Them How to Spend Winter Months.

Lieutenant-General Sir John French has given his views on the work performed by the troops of the Aldershot army corps during the training season of 1906, in a memorandum just issued.

In it he gives all the credit for the great improvement shown by all arms in the science and practice of war, but urges for a yet higher standard, which can only be attained by officers studying seriously military problems during the winter months.

With regard to the infantry, the General says that the night operations were marked by too much noise and talking and too frequent use of lights for signalling and other purposes.

A fleet of battleships could be taken in and out of a dangerous harbor or roadstead in total darkness—an example of what the army ought to try to achieve on land.

#### KILLED BY HIS FAMILY.

Wife, Daughter, and Two Sons are Guilty of Murder.

The wife of an elderly man named Heger, who lived at Alford, in the Canton of Uri, Switzerland, has confessed that, with the assistance of her 18-year-old daughter and two younger sons, she murdered her husband.

The man's body was found in the River Reuss the other day, three weeks after the crime. Heger was persuaded to walk into a wood by his daughter, and the mother and two sons, armed with sticks, followed.

On coming up with her husband the woman struck him to the ground with a blow on the head, and the children then rained blows on him until he was dead. Afterward they threw his body into the river.

The family has been placed under arrest and will be put on trial for murder.

Customer (to waiter)—"I thought I told you to boil the eggs for four minutes. Here you have been twelve minutes at it." Waiter—"But you ordered three eggs, sir."

"Yes, I was awfully fond of the girl, and I believed her to be perfect; but I saw something about her last night that I didn't like." "What was that?" "Another fellow's arm."

Jack Lover (expecting an outburst of grief)—"And what would you say if I should take your sister from you?" Little Helen (quietly and politely)—"Thank you, sir."

The prefect didn't like it much, but he went: what else could he do? He found Paoli a little way from the road.

"Signor Prefect," said the outlaw, "I have taken this step in order to prevent a judicial murder. You propose to condemn my brothers. They are innocent. I, Paoli, escaped from prison, am the avenger who sent my betrayer to his last accounting. In order that there may be no doubt as to my identity you will photograph me at once. When the picture is developed every one will recognize me."

"But how am I to take the picture?" "The signor doctor who accompanies you in all your journeys never moves without his camera. Just call him here."

The picture was taken. On the strength of it Paoli's brothers were liberated.

Despite vigorous pursuit, Paoli succeeded in keeping out of the hands of the gendarmes for a year longer. Then he became himself a victim of the vendetta.

A sweetheart whom he threw overboard for another recently betrayed his hiding place on he was taken unawares and captured. He is in jail in Ajaccio and his trial is to begin next month.

#### BOYS TAUGHT TO SHOOT.

Compulsory Drill in Schools of the Australian Capital.

Australians, realizing that the only alternative to conscription in a democracy is a citizen army, with a great reserve of men able to shoot and knowing a little elementary drill, are steadily proceeding with plans which have as their aim compulsory drill in all schools for lads over a certain age. These plans are quite independent of the cadet corps attached to the schools, elementary and secondary, and of the various flourishing rifle clubs which now cover the civilized centres in the Commonwealth.

The first schools to adopt these plans are the great secondary grammar schools of Victoria, which can very easily rival many of the big grammar schools of Great Britain.

From Oct. 1 this year between 1,500 and 1,600 lads of the middle and professional classes and of "the wealthy lower orders," who are over the age of 12 will be obliged, unless medically unfit, to undergo courses of physical drill and military training until they leave for the university or business careers.

G. E. Blanch, the headmaster of the Church of England Grammar School, in Melbourne, is the moving spirit in the business. Under his leadership all the secondary schools are coming into line. The Secondary School Teachers' Association has taken the matter up, and it is hoped that before long it will carry the compulsory military training idea to success throughout the length and breadth of Australia and Tasmania.

#### CLEVER MATILDA.

"Your father is just a little bit—well—opinionated, you know, dear, and I'm rather afraid as to what he will say when I ask him," said he.

"That's all right, George. I know how to manage papa," she replied.

So the next morning she went to papa in a state of great indignation, and exclaimed:—

"What do you think has happened? That absurd young man, Mr. Jenkins, has had the impertinence to propose to me!"

"Absurd young man!" exclaimed her father. "Who are you calling absurd? Let me tell you that I consider Mr. Jenkins a hard-working, steady, respectable young fellow, just the very sort of a husband for you. You'll die an old maid, Matilda, if you're so confoundedly particular. Just you tell Mr. Jenkins to see me, and I'll make it all right."

And it was "all right."

#### MODERN METHODS.

"Is your milkman reliable?" "Yes, indeed! Why I hear he even sterilizes the water before he adulterates the milk."

## ODD HARVEST CUSTOMS

### QUINT PRACTICES WHICH BELONG TO THE PAST.

#### Old-Fashioned English Farmers Like to Keep the Customs of the Olden Time.

In these days the use of agricultural machinery has driven almost all manual labor from the harvest-field, and with it have disappeared most of those quaint customs of English farm life which endeared the season to the farmer as well as to his men.

One old-fashioned Gloucestershire farmer, however, still keeps up as many of the old customs as he can. All his wheat, barley and oats are cut by hand, just as in the days of half a century ago. The first sheaf in each of his wheat-fields he has always cut himself, and the binding, or tying together, of it has always been done by his wife.

It was a quaint idea of his own. When the reapers, to the number of three or four, are ready to begin, he appears in the field, armed with a bright sickle sacred to the occasion, with which he solemnly proceeds to cut the first sheaf. Just as solemnly his spouse, who accompanies him, takes up a handful of the newly-cut wheat and with it ties the sheaf together.

Refreshments are then passed round to the waiting reapers, and, bidding them God-speed in their work, the farmer and his better-half leave them to it. If they make a neat, even stubble they always receive

#### AN EXTRA SHILLING OR TWO

for their pains.

Gleaners are rarely seen in the harvest-fields now, but there is at least one farm in Herefordshire where the wives and children of the harvest hands turn out after the corn has been gathered in to pick up the scattered ears that have fallen.

It is surprising how much wheat a family of three or four industrious children can pick up ear by ear. It must be back-aching work, and cannot be very profitable, but in this instance it is done more for keeping alive an old custom than for anything else.

Every afternoon when there are any gleaners at work the farmer's wife sends out tea and cake for all, which is much appreciated by the workers. When they have finished for the season the farmer adds a bushel of wheat to each collection and pays for the grinding of the grain at the flour-mill.

A Yorkshire farmer, renowned for his genuine hospitality, insists on all his helpers attending his harvest supper, though as a rule they do not require much pressing. The tables groan under the load of good things provided, and the guests are invited to eat

#### TO THEIR HEARTS' CONTENT.

Part of the meal is the fruit of their own industry, for the bread on the tables is always a special baking of loaves made from the flour of the recently-cut wheat. Of this a loaf is given to each worker when he leaves for home.

Driffield, in the East Riding of Yorkshire, is one of the few places in the country where the ancient custom of ringing the harvest bell is still observed. The ringing is to notify the inhabitants of the district that the time has arrived for them to cut their corn.

As soon as the grain has ripened, one of the bells of the parish church rings out at five o'clock in the morning the welcome intimation that reaping-time has come; the same bell, throughout the harvest, signaling the fall of eventide by again tolling at 8 p.m. It is an interesting fact that for upwards of fifty years the harvest bell of Driffield was rung by one and the same parish clerk, a record which stands almost unique.

IN THE TOWN OF RICHMOND.

## RICH MAN'S TREASURES

### \$5,000,000 SPENT ON A SINGLE PURCHASE OF PICTURES.

#### Mr. J. P. Morgan's Magnificent Collection of Paintings, Ornaments and Books.

It would be difficult to imagine a more splendid illustration of the colossal wealth of the Croesuses of to-day than the fact that one of them, Mr. J. Pierpont Morgan, recently paid \$5,000,000 for the Kann collection of pictures, to add to the art treasures of his palatial home (one of many) in Madison Avenue, New York. And not content with this prodigal indulgence of his passion for works of art, Mr. Morgan is, we learn, negotiating for the purchase of some fine sculptures for an estimated sum of \$400,000.

If these had been but isolated examples of Mr. Morgan's lavish use of wealth, they would still give one quite a startling conception of the riches of a man who can afford to spend more than five million dollars to gratify a whim; but for many a year this multi-millionaire has been pouring his money into similar channels at a rate which would have made the original Croesus gasp with impotent envy.

It is not long since Mr. Morgan paid \$300,000 for a single picture, the Raphael Madonna of St. Antony of Padua. Gainsborough's "Stolen Duchess," whose chequered history is one of

#### THE ROMANCES OF ART,

he purchased for \$150,000, or nearly three times the sum it realized in the Wynn Ellis sale just thirty years ago. Reynolds's superb "Lady Betty Delme and Children" he purchased for a sum exceeding \$100,000, and one of Hobbema's loveliest landscapes and a Rubens portrait of a Grand Duke were added to his collection of pictures at a cost of about \$250,000. Thus, on five paintings alone Mr. Morgan has lavished a million dollars.

And these are but a small portion of the art treasures which have now been so magnificently enriched at a cost of over \$5,000,000. For 158 Rembrandt etchings and M. Mannheim's collection of antiques in marble, bronze, and terra-cotta Mr. Morgan paid a fabulous sum, the precise amount of which is not known by the public. The Mannheim collection alone, however, is valued at \$450,000, and the Gavet etchings at \$75,000. \$75,000 was the cost of the Pfungst collection of antique bronzes; Mr. Morgan paid 2,000,000fr.—roughly, \$100,000—for four tapestries after Boucher, and the value placed on a series of ten decorative panels, painted by Fragonard for Mme. du Barry, far exceeds \$500,000.

#### THREE COSWAY MINIATURES,

exquisitely beautiful and faintly examples of the master's art, are valued at \$5,000 apiece; a single table in Mr. Morgan's house in Prince's Gate, London, a unique Louis XVI. console table, actually cost \$350,000 many years ago; and under the same roof are three rose-colored Coventry vases which cost \$50,000, and a tiny blue Sevres tray, with cup and saucer, said to be worth \$10,000.

A silver table ornament, representing Diana seated on a stag, is valued at \$50,000. The head of this exquisite statuette is removable; the body, filled with liqueur, careers about the table by means of concealed clockwork, and doubtless created much laughter at the uproarious table of the German nobility three centuries ago; and a similar price is placed on an iridescent nautilus, on a gold and silver snail, on which a Robin boy sits perched, holding the reins. And these are but samples of the magnificent collection of table ornaments which form a small part of Mr. Morgan's treasures, a single purchase of old silver in Berlin running far into

## CHEATING DAVY JONES

### HOW SOME GOOD SHIPS HAVE ESCAPED HIS LOCKER.

#### Great Steamships That Barely Missed Going to the Bottom by a Hairbreadth.

"I could not have found a more comfortable place for stranding the vessel. It was like a natural dock. Yet five feet either side would have spelt disaster." So said the captain of the s.s. Lady Wolsey, which went ashore, in a dense fog one night in August last, on the dangerous Killigerran Rocks, near Falmouth, England. The vessel was towed off in perfect safety, and absolutely undamaged. Her escape was a marvellous one, for before she went ashore where she did, she had only just missed the much-dreaded Manacles.

One of the most famous victims of the Manacles was the great liner Paris, which ran bow on to the rocks, and remained there firmly wedged. Week after week the tugboats strained and churned, but to no avail.

#### "NO CURE, NO PAY."

Then, just as hope was given up, a German salvage company made a "no cure, no pay" proposition, and succeeded in dislodging her. Now, the Paris, under another name, still sails the Atlantic, but surely of all her sisters, none ever had a closer shave of leaving her bones to rust upon a reef than has this great ship.

The records of the sea are full of these hairbreadth escapes from disaster, and it is perhaps the Belgian steamship Galileo that can boast of the most wonderful of them all. On the morning of October 20th, 1899, the ship was some seventy miles south of Barbadoes. At four o'clock a sharp thunderstorm came up. The rain was tremendous, and the thunder came in sharp, whip-like cracks. Suddenly came a peal of a different character, long sustained, rolling and reverberating. "Then," says the chief officer, who was on the bridge, "the storm-cloud split, and out of the sky, right above the vessel, came whizzing down a gigantic mass of something—earth, rock, or stone, I cannot tell which. It struck the sea close in front of the steamer's bow, and a wall of water rose sixty feet, and fell crashing upon our decks."

Every single one of the passengers and crew was thrown out of his bunk. All thought that the ship had gone full speed upon a rock. The steamer had seemed to stop and quiver from stem to stern. As for the Italians in the steerage, they went quite mad with fright. Yet when the Galileo was overheauled, it was found that no damage had been done. Had the aerolite, or whatever the awful visitant was, fallen ten yards closer she must have sunk like a stone.

#### FROM A SUBMARINE VOLCANO.

Almost equally strange in its way was the escape of the barque Neptune, in 1874. She was passing the Azores, when suddenly in the middle of the night the crew were roused by a tremendous thud. The vessel seemed to lift and lose way. All came tumbling up on deck, only to find the sea much agitated and no land in sight. The general idea was that the ship must have struck a submerged wreck, for there was something like a mile of water beneath her at the time. The Neptune proceeded to her destination, which was Marseilles. There, as she was leaving somewhat, she was docked, and a curious discovery was made. Buried deep in her stout timbers was a piece of black stone weighing about half a hundredweight. It is not certain, of course, but he supposition which explains its presence is that the Neptune had sailed over the very site of some submarine eruption, and that the shock was caused by this piece of rock striking her. The

## A SELF-CREMATION RITE

### RUSSIAN FANATICS THUS IMMOLATE THEMSELVES.

#### Some Fix the Date of the World's End—Others Worship the Late Queen Victoria.

The eighty-three "Lost Children of Israel" who arrived in New York a short time ago on their way from Australia to Michigan have many strange beliefs, among them an assurance that the end of the world is fixed for the month of August, 1916, and that, when Satan and his armies have been finally routed, they will be borne away to a happier place in chariots of gold.

These lost Israelites need not travel far out of their way to find a sect with at least as strange practices and as unorthodox a creed as their own, for the "Holy Rollers" have their headquarters among the Bristol Hills, in New York State. The Holy Rollers had arranged for the end of the world in March, 1902, and if the programme was not rigidly kept it was through no lack of faith and enthusiasm on their part.

As they swayed to and fro they sang, "O, the joyful day is coming," with eyes wild and staring and perspiration streaming down their faces, while their leader filled up the pauses in the singing with fierce bursts of exhortation. "That's right," he would shout. "It's comin'—comin' on March 1, 1902, and ev'ry man, woman, and child in this place is goin' to be right here to see her come. Yes, sir; you'll get up in the mornin' just as usual. First thing there'll be thunder and lightning, next thing you'll be—where, where?"

In Kentucky there is a sect whose religion consists largely in neglecting everything mundane, from their appearance to their farms. Washing and shaving are vices; Saturday is devoted from dawn to dusk to the wildest forms of so-called religious exercises. "They sing and dance, shout and pray, and jump until the very hills resound with the noise of the gathering. They join hands and march round and round until they grow into a perfect frenzy of nervous ecstasy."

Russia has many sects at least as singular as any you will find in the United States, the most remarkable of which is that of the "Runner Smotherers." When a member of this strange community is so ill that recovery seems improbable, he is promptly despatched under circumstances which must be more agreeable to the looker-on than to himself. A meeting of the brethren is summoned, and while hymns are sung and censers swung, a lady who fills the responsible office of "smotherer" places a cushion over the invalid's mouth and nose and holds it there until her pious task is accomplished.

In the Village of Ternofo, in Russia, are the "Begonny," one of whose amiable practices is that of self-cremation. When one of them attains the requisite height of virtue and enthusiasm to face the ordeal, he walks into a specially prepared and heated oven, while his fellow-worshippers, who lack the courage to follow his example, pray and weep for him in the more comfortable atmosphere outside. Another Russian sect is that of the Underground People, whose methods are little, if at all, more humane than those described. When a member of this community becomes seriously ill he is baptized by the elders, and then immured in an underground cell, where he is left to face death alone.

To a sect in the Punjab the chief object of worship is a deity called Nikkal Sen, who was no other than Gen. Nicholson, whose prowess was so conspicuous in the Indian Mutiny, and, who, during his life, was an object of adoration to thousands of Natives; and in Orissa there is a body of worshippers whose chief divinity was, and probably still is, our late beloved Queen Victoria.

out the harvest, signaling the fall of eventide by again tolling at 8 p.m. It is an interesting fact that for upwards of fifty years the harvest bell of Driffeld was rung by one and the same parish clerk, a record which stands almost unique.

#### IN THE TOWN OF RICHMOND.

in the same county, a very curious and ancient harvest custom is observed. There, for many years, it has been the practice for the mayor of the borough to present a bottle of wine to the person who first takes into the market a sample of newly-threshed wheat.

Needless to say, the competition for the honor of first comer and the coveted bottle of wine has always been pretty keen, though the recipient has not always been the same.

A Lincolnshire landlender used to make a somewhat similar present, but in this case the present went to that one of his tenants who was the first to start cutting his wheat. The gift, too, was a great deal more valuable; for, instead of a single bottle, it consisted of a whole case of wine.

#### SEARCH FOR RICH TREASURE.

Gold Valued at \$7,500,000 in Hull of Sunk Vessel.

Another search for lost treasure is about to begin under the auspices of a British company. This time it is gold brought from Australia in 1859 that is the object of the search. It is believed to be in or near a wreck at Moelfre, on the coast of Anglesey.

The wreck in question was one of the most terrible in seafaring annals. The Royal Charter, a full rigged ship, sailed from an Australian port with nearly 500 persons, crew and passengers, on board.

A large proportion of the passengers were gold-diggers who had "made their pile," and were returning home as rich men. The gold they brought with them was contained partly in belts worn by the owners, but mainly in two great boxes. The value of all the gold on the ship is estimated at more than \$7,500,000.

The Royal Charter struck on a reef at Moelfre, and became a total wreck. Four hundred and fifty-nine of her crew and passengers were drowned.

There have been many efforts to recover the gold from the wreck, and it is understood that the smaller of the chests that contained the bulk of the treasure was found at an early period. Dwellers along the coast profited by digging in the sands, and even in recent years prospecting of this sort has been rewarded occasionally by the discovery of a few coins.

The wreck is still in existence, and partly visible. The bow of the vessel is hard on a rock, but the stern is embedded in sand. It is the plan now to destroy the wreck with dynamite and search by diving and dredging in the debris for the larger of the treasure chests.

Preparations for the work are in active progress at Holyhead. Councillor Edward Owen, who is an expert in such matters, will superintend the operations.

#### BOUND TO GRUMBLE.

A man who was given to grumbling at everything and on every occasion was attacked by inflammatory rheumatism, and was carefully nursed by his wife, who was very devoted to him in spite of his fault-finding disposition. His suffering caused her to burst into tears sometimes as she sat at his bedside. One day a friend of the invalid came in and asked him how he was getting on.

"Badly, badly!" he exclaimed; "and it's all my wife's fault."

"Is it possible?" asked the friend in surprise.

"Yes. The doctor told me that damp places were bad for me; and there's that woman sits and cries just to make the air moist in the room."

is placed on an iridescent nautilus, on a gold and silver snail, on which a Nubian boy sits perched, holding the reins. And these are but samples of the magnificent collection of table ornaments which form a small part of Mr. Morgan's treasures. A single purchase of old silver in Berlin running far into six figures.

#### MR. MORGAN'S LIBRARY, TOO.

is worth a fortune—indeed, it would be easy to choose from it three or four volumes which would keep a suburban family in comfort for the rest of their days. Mr. Morgan paid \$50,000 for the "Evangelical Quatuor" in the Ashburnham Library, the binding of which is of beaten gold, richly studded with gems; and for a copy of the "Psalmorum Codex," printed by Fust and Schoeffer in 1459, of which only twelve copies are known to exist, he gave \$26,125. The manuscript of Book I. of "Paradise Lost," shabby quarto volume of only eighteen leaves, written by a seventeenth-century scrivener, cost more than \$25,000, the sum at which it was withdrawn when offered for sale not long ago in London; and four years ago Mr. Morgan purchased the fine library of a Manchester merchant, which contained no fewer than thirty-six Caxtons. Four of these had cost their owner over \$20,000; and another volume, "The Hoole Life of Jason," was bought for \$10,500.

Such are a few only of the treasures which Mr. Morgan has already accumulated at a cost probably far exceeding \$10,000,000, and which are principally preserved in his wonderful Temple of Art, in its setting of glorious gardens, at New York. But Mr. Morgan has many other lordly pleasure-houses, each of which is a museum of such treasures—his beautiful country house, Cragston, on the Hudson River; another fine seat in the Adirondacks, his London mansion in Prince's Gate, and his roomy old Georgian house at Roehampton.

#### IMMURED IN ASYLUM.

Deputy Falls From Horse and Finds Himself Among Lunatics.

Count Eugen Zichy, a prominent deputy, great traveler and millionaire, of Budapest, Hungary, declares that he has been wrongfully confined for six weeks in a lunatic asylum.

He says that last June, while shooting, he had sunstroke, and fell from his horse. For four days he remained unconscious, and when he recovered was tricked into entering a private asylum.

When he realized his position he was prevented from leaving the place, and letters written to friends were not delivered. Permission to see his son was refused, and the Count says that during the whole time it required all his strength of mind to prevent him really becoming mad.

Finally the president of the Lower Hungarian Chamber paid him a visit and secured his liberation, when the doctors declared him sane.

The matter was raised by Deputy Ugron at a sitting of Parliament the other day and the standing committee who watch over the immunity of members was directed to make enquiries.

#### STRAIGHT HAIR MADE CURLY.

Discovery of Process Which Produces Lifelong Ringlets.

A process has been discovered by which the desire of those who want straight hair changed to curly can be satisfied.

The inventor is Mr. Nestle, the well-known ladies' hairdressers, of Oxford Street, London, who claims to transform plain, straight hair into a delightful mass of curls and ringlets which last for a lifetime—all for a modest two to five guineas.

"Naturally curly hair," said Mr. Nestle, "is really inferior in quality to straight hair. Flaws and holes in the hair make it contract and curl. If, therefore, ordinary hair be treated so as to produce such holes and flaws, it will become lastingly curly."

in her stout timbers was a piece of black stone weighing about half a hundredweight. It is not certain, of course, but he supposition which explains its presence is that the Neptune had sailed over the very site of some submarine eruption, and that the shock was caused by this piece of rock striking her. The force which drove the lump of stone up through thousands of feet of water must have been terrific. A very little more, and it would have passed right through the ship's bottom and sunk her.

This escape calls to mind one that occurred to the frigate Pique, which went ashore about fifty years ago off the coast of Japan. She was got off apparently none the worse, and returned to England, the voyage lasting about four months. When she got to Portsmouth she was put into dry dock. Imagine the feelings of her officers when there was discovered, wedged in her bottom and protruding right through her heavy oak timbers, an enormous boulder weighing over three tons. The Pique and sailed some seven thousand miles with this stone embedded in her hull. Had it fallen out whilst the ship was at sea, down she must have gone. The stone was preserved for many years as a relic, but then lost sight of.

#### UNWELCOME EXTRA CARGO.

Of a strange peril of the sea, the Norwegian steamer Egil has a thrilling story to tell. In January, five years ago, she set sail, heavily laden, for Iceland. The weather was fearful, and at last a heavy gale from the north reduced the temperature to far below freezing point. As the seas broke over the vessel, the water froze. Soon the decks were all ice, and the masts and ropes coated with thick ice. Thicker and thicker grew the granite-like mass, and with the weight the Egil, already dangerously deep in the water, sank lower and lower. And still the gale blew fiercely out of the bitter north. Nothing could be done except to keep the engines going. The boats were utterly useless, being covered with ice, and all the lowering tackle frozen solid. Lower and lower sank the ship, and hope abandoned the hearts of her half-frozen crew. At last, just when it seemed certain she must founder, the weather broke and the sun came out. Every man was set to work to chop away the glassy coating, and before the next gale came the Egil was herself again.

#### AFTER MANY PERILS.

Perhaps no vessel ever had a longer or more thrilling series of escapes than the Thörnleibank, in the autumn of 1903. She left Philadelphia early in August, and met such fearful gales that on September 9th the rivets started and she began to leak alarmingly. The donkey-engine had been disabled, and the men had to work the hand-pumps. They remained at them in spells for the whole of the rest of the voyage. The next thing that happened was the shifting of the cargo. It rolled from side to side, so that sometimes the port rails were on a level with the water, and sometimes the starboard. The boats were made ready and provisioned, but so well did the men work that they were not reduced to using them, and after 165 days of hardship and peril they safely reached Sydney.

#### SOMETHING LACKING.

A certain drill-sergeant, whose severity had made him unpopular with his troops, was putting a party of recruits through the funeral service.

Opening the ranks so as to admit the passage of the supposed cortege between them, the instructor, by way of practical explanation, walked slowly down the lane formed by the two ranks, saying as he did so:

"Now I'm the corpse. Pay attention." Having reached the end of the path he turned round, regarded them steadily with scrutinizing eye for a moment or two, then remarked:

"Your 'ands is right, and your 'eads is right, but you haven't got that look of regret you ought to 'ave."

Sen, who was no other than Gen. Nicholson, whose prowess was so conspicuous in the Indian Mutiny, and, who, during his life, was an object of adoration to thousands of Natives; and in Orissa there is a body of worshippers whose chief divinity was, and probably still is, our late beloved Queen Victoria.

But one need not wander from London to find strange religions. There are the Sandemanians, who abstain from blood and things strangled, dine together at each other's houses between their services, and consider all games of chance wicked; and the Cokelers, founded over half a century ago by William Sirgood, a Walsworth shoemaker, whose Bible is the Book of Cople, and who partake of refreshments as part of their lengthy services. Joanna Southcott, the domestic servant, who received revelations and prophesied over a century ago, has still her followers in London; among several other unconventional sects are the Seventh Day Baptists and the Peculiar People, whose aversion to doctors has so often brought them into conflict with the law.

#### ZADKIEL'S PROPHECIES.

Next Year to be a Bad One for Rulers and Governments.

"Zadkiel's Almanac and Ephemeris" for 1907, which contains the "voice of the stars," foretells an exciting year. The present Government appear to have no lucky star, for in nearly every month the prophet warns them against some approaching disaster.

The year is to open well, however. "Jupiter is supreme in Cancer, the tropical sign, at the birth of the new year, and as the same benefic planet had lately risen at the winter solstice in time aspect with the ruling planet, Mars of Great Britain, a good beginning for our beloved country may assuredly be anticipated, albeit political turmoil will soon attend." But in February, the House of Commons will be "the scene of great excitement, and the British Government will be in a quandary—one of their number will be in some personal danger."

In March a warning is made to the Government about naval disarmament, and in the following month, "inasmuch as Mars meets with the opposition of Jupiter, the conjunction with Uranus thrice, and remains in the same tropical sign until Oct. 13—a stay of more than six months—a most important epoch for India is now inaugurated. Let the British Government and the Viceroy accept this serious warning that a great crisis is at hand."

As the result of the affliction of the sun and moon at their anniversaries in May "two European sovereigns, a certain Royal Duke and a popular Earl, will soon be involved in trouble or ill-health." The following month there are further misfortunes for India and Afghanistan. July is more fortunate.

"Jupiter, being now free from the hostile rays of Mars, benefits Scotland and other countries subject to Cancer." On Aug. 26 Mars is in conjunction with Uranus again in the ninth degree of Capricornus, and "accidents and explosions will soon follow in the southeast of Europe and in India," while in September accidents, explosions and fires will afflict New York.

"There will be sickness in high places" in October and "the Government will not be in a very salubrious condition." A furious storm may be looked for in November, and during the last month of the year there will be "a change in the personnel of the Cabinet and in that of the Common Council of the City."—London Standard.

"You are an iceberg!" exclaimed her elderly, but well-preserved adorer, pale with anger and mortification. "A dozen Cupids, with a hundred arrows each, could never find a vulnerable place in your heart!" "Not if they used an old beau to shoot with," coldly replied the young and beautiful Miss Fylyppe.

## Lots of Bargains Yet

## THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.  
 When buying Flour ask for Dafoe's and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.  
 A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

NAPANEE,  
16th January, 1906.

Election Rumors.

Rumor says that Mayor Lowry will be a candidate for the reeveship at the coming municipal elections. Mr. Will T. Waller is also spoken of as a candidate for the Mayor's chair.

New Public School Equipment.

All Public School Trustees will be interested in the exhibit of the new equipment for schools—which is to be seen in Mr. A. E. Paul's window and store. These articles must all be put in each Public school during 1907. Mr. Paul will give you all particulars.

Old Boys' Reunion.

If Napanee intends having a homecoming of the "Old Boys" in 1907, would it not be the proper thing to start the ball rolling at an early date. One of the particular reasons for the postponement of the Old Boys' Reunion at Napanee this year, was, that the matter was not taken up soon enough. The number of Napanee's home-comers would certainly be large.

Fireman's Oyster Supper.

Preparations for the grand annual event, the Firemen's Oyster Supper, are being hustled along. Besides a sumptuous repast, an elegant programme is being prepared. The firemen are noted for their excellence in this their annual event, and this year will prove no exception to the rule. Don't forget the date—Wednesday December 5th, in the town hall.

The Bazaar.

The Bazaar in aid of the Improvement Fund of St. Patrick's Church was an unprecedented success, financially and otherwise. It was brought to a close on Thursday evening last, by a large progressive euchre party and the drawing of prizes, the latter part of the programme being conducted by Messrs. G. F. Rutten, T. B. Wallace and W. T. Waller. The holders of the lucky numbers being as follows:

Gold watch—A. W. Caton, Napanee, Ticket No. 435.

Five o'clock tea service—C. J. Papineau Napanee, No. 2889.

Silk Umbrella—Mrs. T. F. Eden, Toronto, No. 2321.

Case of Choice Wine—Miss O'Donnell, Toronto, No. 1428.

\$5 Gold Piece—Mrs. Wm. Hayes, Tamworth, No. 2642.

Silk Embroidered Tea Cloth—J. McCauley, New York, No. 379.

Fancy Bed Spread—Carmelella Hunt, San Francisco, No. 4803.

Fern Pot—H. Butler, Toronto.

Money Bottle, correct amount contained therein, \$4.17, guessed by Miss S. McDermott, Belleville, and Miss Margaret Meagher, Napanee.

The prizes won in the progressive euchre party were as follows: Ladies' Mrs. E. McGurn, first; Mrs. D. J. Hogan, second; Miss Mary Murphy, Consolation. Gentlemen, Mr. Zina Ham, first; Mr. Ray Gleeson, second; Bernard Murphy, consolation. The total amount realized from the bazaar was \$1335.00.

Warranted the most wonderful Blemish Cure ever known. Sold by F. L. HOOPER.

Napanee's Ladies Musical Club, will hold their first club meet on Saturday Nov. 17th, at 3.30 p.m. in the town hall. Topic "Mendelssohn, His Life and Compositions." Any ladies not having yet joined and wishing to become members please come prepared to pay their fees at this meeting.

Rec. Sec.

The local Tribesman of Comassie Sanatorium held their first meeting for this season on Monday evening in the lodge rooms of Napanee Lodge. A large number of members were present also visiting Tribesman from Deseronto. Twenty Neophytes were initiated, a number of them from Odessa, and a very merry evening spent. At the close of the meeting all adjourned to Rikley's restaurant where a good oyster supper was in readiness.

Vincent Turett, Kingston, fifteen years of age, was killed at the G. T. R. junction at 5 o'clock Sunday afternoon. With three other lads he jumped on a westbound freight train, intending to go to Napanee. Then he took a notion to jump off, and in doing so fell between the cars. His head and body was badly crushed, and death was almost instantaneous. Coroner Ross, after inquiry into the case, decided that an inquest was not necessary.

Mr. J. J. Tilley, Provincial Inspector of Model Schools, visited the Napanee Model School on Wednesday afternoon for the purpose of explaining to the model school pupils and teachers, generally, the workings of the new school law in its relation to the teachers. The Inspector explained to the pupils, the new financial side of the act, and the use of the various new paraphernalia necessary in all schools, also refuting several objections that might be made to the new regulations. A number of the members of the school board were also present.

### Choral Club.

The Ladies' Choral Club will meet next Tuesday evening at eight o'clock, in the Town Hall for practice. A large number joined last week, and it is earnestly hoped that more singers of our town will avail themselves of this opportunity to study choral work during the winter. It was the original invitation of the Musical Club that every member of the Choral Club must also be a member of the Musical Club but owing to the fact that several are engaged during the day and found it impossible to attend club meetings Saturday afternoon, it has been decided that such members may join the Choral—the fee being one dollar. For further particulars apply to the Secretary of Choral Club.

### Opera House Nov. 21st.

Address and Presentation.

The employees of Madill Bros. met in the store on Wednesday evening last, and presented Mr. J. F. Moore, their genial window trimmer, with the following address, and beautiful fountain pen suitably engraved, prior to his departure for Peterboro, where he has gone to fill a similar position.

Napanee, Nov. 14th, 1906.

Mr. J. F. Moore,

Napanee.

Dear Sir:—We your fellow employees of Madill Bros. regret your departure from among us.

Though our acquaintance has been of a little over two short years, we have learned through close business relations, your better qualities of a personal nature as well as your high qualifications in your chosen occupation of life.

We all wish you the greatest success in your new field, and congratulate you upon your promotion to that of a partner in a well established business. We take pleasure in presenting to you this "Waterman Pen," knowing that, "The Pen is Mightier than the Sword," and hope that it may be in some small way the means of helping you on to yet higher attainments.

Signed on behalf of the Employees.

A. J. GLEESON,

M. E. CLARKIN.

### Plan Open Nov. 19th.

Died in Kingston.

Rev. F. B. Stratton, a retired Methodist minister, died at Kingston on Friday, after several months' illness. The deceased was born near Napanee sixty-eight years ago. He served forty-eight years in the ministry, being superannuated several years ago. Trenton, Salem, Orono, Selby and Little Britain were some of his charges. He was once president of the Bay of Quinte Conference and attended every General Methodist Conference except the one this year. Surviving are his wife and six daughters.

The funeral took place from his residence on Saturday afternoon. Rev. C. E. Manning conducted a short service in the house in which the Rev. William Service, Harrowsmith, and Rev. J. R. Real, Napanee, took part. Subsequently a public service was held in Sydenham Street Methodist church, of which the Rev. W. H. Sparling, chairman of the Kingston district, had charge. There were a large number of ministers present and among those who took part in the service, were Rev. J. R. Real, Napanee, and Revs. R. F. Leitch and George Brown of Belleville, all of whom are members of the Bay of Quinte circuit, to which Mr. Stratton belonged. Each of them bore very impressive testimony to the sterling character of the deceased and the faithful service he had rendered to the church and the kingdom of Christ. The flowers of the casket and sorrow manifested by a large circle of friends and acquaintances were evidence of the high esteem in which the deceased was held.

Prices 25c and 35c.

A few good Second Hand Stoves on hand

Miss Jennie Robinson, Camden East, is the guest of Miss Emma Wallace, Tweed.

Miss Muriel Love and brother, Jimmie, were visiting their aunt, Miss Maggie Love, Picton, last week.

Mr. Chas. Wesce has returned from his three months trip through the west.

Mrs. Lydia Fretts left this week for Camden East, where she will spend the winter.

Mr. and Mrs. Percy Balfour, Marlbank, were in town on Friday.

Mr. W. W. Asselstine, Moscow, was a caller at our office on Saturday.

Mr. and Mrs. H. M. P. Deroche, of Deseronto, were guests of his father, H. M. Deroche, K. C., last week.

Mr. Hugh Fitzpatrick returned from his hunting trip in the north country with a two hundred pound buck.

## WORKINGMEN'S SUITS.

We make a specialty of our Workingmen's Suits—We see to it that the man who measures his wealth by his daily toil, gets every dollar of value that can be put into a suit at a stated price. We select durable and satisfactory fabrics and then we see that the Tailoring—the cut and every detail of suit making is

### Absolutely Right

Mr. Workingman, we want you to come in to see our Suits—examine them—try them on—if you like—we'll not urge you to buy.

Suits at \$5.00, 7.50, 9.00 and 10.00.

Any of these suits will stand careful comparison with similar priced suits sold by any clothing house in this vicinity.—If you do buy and are not perfectly satisfied in every way.—Your money will be waiting for you.

## J. L. BOYES.

The Men's and Boys' Clothing Store.

### The Surprise OF THE SEASON.

The prices at which we are selling some of our goods surprise ourselves, but we must reduce our stock.

NOW IS THE TIME TO BUY.

The Kind You Have Always Bought

**Life Preserver Seats.**  
Some pleasure steamers on the English coast employ a very good idea in connection with a few of their deck chairs. They are really air tight boxes to which a back and sides have been added. They stand back to back in the middle of the deck and are kept together by means of a piece of wood across the top. When this is removed the seats can be opened on hinges. If the vessel got wrecked the seats could be opened and flung overboard, and they would form a buoyant raft for passengers to cling to.—London Mail.

**What the Jury Thought.**  
"Flatman, I hear you were arrested the other day for insulting and browbeating a janitor. How did you come out?"

"I was tried for it and acquitted."  
"On the ground that it was justifiable?"  
"No; the jury couldn't be made to believe such a thing was possible."

**Study Yourself.**  
In order to judge of the inside of others study your own, for men in general are very much alike, and though one has one prevailing passion and another has another, yet their operations are much the same, and whatever engages or disgusts, pleases or offends you in others will engage, disgust, please or offend others in you.—Ches-terfield.

**They Knew Him.**  
Knox—It seems that Graphter's acquaintances are all very shrewd people. Jenks—Did he tell you that? Knox—He implied as much. He announced the other day that he doesn't owe anybody a dollar.

**W. M. CAMBRIDGE.**

**A Newspaper Bargain**

The biggest dollar's worth in the newspaper line to-day is the Family Herald and Weekly Star of Montreal. Other large city weeklies make feeble attempts to follow the big Montreal weekly, but they fall far short of it. The Family Herald and Weekly Star spares no expense to give its readers the best to be had and the result is their subscription lists are growing larger every year. The beautiful premium picture given this year with the Family Herald and Weekly Star is entitled "A Tug of War" and is certainly a gem. It is one of those pictures you see in an art store with a price of generally two or three dollars on it.

The Family Herald and Weekly Star deserves the first place in every home in Canada and combined with your own local paper it is about all you require. If you are not a reader of the big Montreal Weekly try it for 1907 and you will never regret it.

**The Brute.**  
"What," asked the sweet girl graduate, "was the happiest moment of your life?"  
"The happiest moment of my life," answered the old bachelor, "was when the jeweler took back the engagement ring and gave me collar studs in exchange."—London Tribune.

**Special Delivery.**  
Mrs. Uptowne — I purchased some socks and a drum for my boy. How does it happen that you have brought only the drum? Driver — You see, ma'am, I'm the driver of the band wagon; the socks will come in the horse cart.

The brain of an idiot contains much less phosphorus than that of a person of average mental power.

**Saved by a Fish.**  
The preservation of life through the curative properties of pure Cod Liver Oil in throat and lung trouble, has long been attested to, by most eminent physicians. The highest quality of this valuable remedy is that obtained from the healthy livers of the cod, native to the waters of the Lofoten Islands off the coast of Norway. You get it fresh at The Medical Hall—Fred L. Hooper.

### TOWN COUNCIL.

Council Chamber  
 Nov. 19th, 1906.

Council met in regular session, Mayor Lowry presiding. Councillors present—Meng, Normile, Graham, Williams, Simpson.

The minutes of the last regular session were read and confirmed.

### COMMUNICATIONS.

From the Poultry, Pigeon and Pet Stock Association asking for a grant to assist them in their annual show to be held in January. Laid on table until later in the evening.

From Thos. Butcher complaining of the action of Mr. H. B. Sherwood in emptying water on the street. As soon the ground freezes it will again back the water into his cellar. Laid on the table until later in the evening.

From the Dominion Rock Drill Co. asking for a partial remittance of taxes as in former years. Referred to Court of Revision.

The Finance Committee reported in reference to grant asked for Hay Bay ferry. The solicitor states that the town cannot legally make a donation toward the ferry. Report adopted.

The Street Committee reported the account of Madole & Wilson, \$237.34 correct, and had granted an order for same. Also, that they had made an estimate of the cost of the continuation of the West street sewer, and in their opinion it would cost \$2,250. Also that John Wilson be paid the sum of \$10.00 for damage to his cellar, caused by Canning Factory sewer. Report adopted.

The Fire, Water and Light Committee reported recommending the granting of the petition of P. Bristol and others asking for an arc lamp in Dundas street west, instead of incandescent lamp now in use. Report adopted.

The Fire, Water and Light Committee also reported in reference to boat to bring coal for electric light plant from Sudus. It was quite a difficult task to get a boat, but they had finally made necessary arrangements.

The Poor and Sanitary committee reported in reference to account of Dr. Leonard for examining insane persons. They recommended the payment of \$10 for two examinations but would suggest that the clerk be authorised to write Brockville Asylum and ask them to remit for examination of escaped lunatic from that institution. Report adopted.

W. Exley addressed the council in reference to cellar under engine room. The water from it was leaking through into his cellar, and he asked that it be remedied. Referred to Fire, Water and Light Committee with power to act.

Wm. Hicks, jr. complained that he was assessed for dog tax, and as he did not live in the town he thought he should not pay taxes for it. Referred to Court of Revision.

Councillor Normile gave notice that at the next regular session of council he would introduce a by-law to be voted on at the next municipal elections, to raise a sum of money to put in a sewer system in the Town of Napanee.

The Finance Committee asked the council for an expression of opinion in reference to the new treasurer moving the treasurer's office to his place of business on Dundas street.

Moved by Coun. Graham, seconded by Coun. Kimmerly, that the treasurer's office remain in the town hall. Yeas—Graham, Kimmerly, Normile,

the treasurer's office to his place of business on Dundas street.  
Moved by Coun. Graham, seconded by Coun. Kimmerly, that the treasurer's office remain in the town hall. Yeas—Graham, Kimmerly, Normile, Simpson,  
Nays—Lowry, Meng, Williams.  
Moved by Coun. Simpson, seconded by Coun. Kimmerly that the Street Committee investigate the matter of the roadway on Dundas street on Piety Hill, and consult solicitor, and report to this council. In the meantime the road is to be put in a safe condition. Carried.  
On motion, Mrs. Gibson and S. Wilson were granted enough 6-inch tile to carry the drain from their premises to the sewer at the R. C. Church corner.  
Mr. Chas. Walters, electrician, at the electric light works, asked the council for an increase of wages.  
On motion of Councillors Meng and Kimmerly, Mr. Walters' salary was increased to \$40 per month, said increase to date from November 1st.  
In reference to matter complained of by Mr. Butcher, it was referred to Street Committee to consult with solicitor as to what action should be taken, and report to this council.  
Mr. Close, the engineer at the electric light works, complained that his hours of duty were too long. He goes on duty at four o'clock in the afternoon and remains on duty until 7 a. m. The matter of securing a second engineer was left in the hands of the Fire, Water and Light Committee with power to act.  
On motion, \$25 was granted the Napanee Poultry, Pigeon and Pet Stock Association, also that they be granted the use of the town hall on Jan. 9th to 14th inclusive, for their show.

## OPEN LETTER.

To the Ratepayers of the Town of Napanee.

Ladies and Gentlemen—Allow me (with all due respect,) to make the following suggestion, which is, that on some evening in the early part of December, we meet in the Town Hall, and, for our mutual and future benefit have a serious talk over our municipal affairs, without waiting for the Town meeting, (which in the opinion of many has become a perfect farce) and if we find the present management satisfactory (as an act of justice) let us allow it to remain as represented at present, so that our representatives may receive in time and in full all the honor or condemnation that may rightfully be attached to the sum of their opportunity, during the last two years, but on the other hand, if we should decide that, (for our present and future good) a change is necessary, then let us decide who shall do our business next year, without regard to any prior claims that may be (for personal ambition or worse) put forward by any person or persons.

Yours Respectfully,  
RATEPAYER.

Napanee, Nov. 21st, 1906.

Axes, saws, cow ties, axe handles, meat choppers, food cutters, mitts, Gloves, herbageum, feed it now.

**BOYLE & SON**

## LETTER TO THE EDITOR.

THE EDITOR OF THE EXPRESS :

Dear Sir—As the time is near when the ratepayers must elect representatives for the coming year, the time seems opportune for the electors to take an active interest in securing men of the right sort to fill the various offices.

The present council has come in for considerable criticism, some of which, no doubt has been well deserved, some perhaps not, at any rate the council was the choice of the electors, and if the selection was unfortunate, the electors have only themselves to blame. If the standard is low it shows that those, who could better fill the offices, where from fear of personal loss or comfort, or from unwillingness to encounter hostile criticism and ingratitude decline to assume the responsibilities of office.

There is no doubt, that the acceptance of office, does entail considerable loss and sacrifice in many men, and this, with the disinclination to engage in the unpleasant details of an election campaign, prevents many from accepting nomination.

On the other hand, every one is interested in securing honest and efficient conduct of public affairs, and as everyone receives benefits from the public service, those who possess qualifications should at some time be prepared to make sacrifices for the public good.

To me it appears that the only remedy is for men of ability and standing to allow their names to go before the electors as candidates. I believe that some such men would accept office if they were satisfied that there was a real demand for their services and if their names could be placed before the electors without their having to bring themselves forward as candidates.

Now as to practical remedies, I would suggest that those of the electors who wish to elevate the standard of the council, should either by public meeting or otherwise sign requisitions asking such men as they wish to accept

**SEALED TENDERS** addressed to the undersigned, and endorsed "Tender for Addition to Parliament Buildings," will be received at this office until Monday, November 26th, 1906, inclusively, for the construction of an addition to the Parliament Buildings at Ottawa.

Plans and specifications can be seen and forms of tender obtained at this department.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to 10 per cent (10 p. c.) of the amount of the tender, which will be forfeited if the party tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.  
By order,  
**FRED GELINAS,**  
Secretary.

Department of Public Works,  
Ottawa, November 2nd, 1906.

For further particulars enquire of

30-4m **JOHN M. HAWLEY.**

electors without their having to bring themselves forward as candidates.

Now as to practical remedies, I would suggest that those of the electors who wish to elevate the standard of the council, should either by public meeting or otherwise sign requisitions asking such men as they wish to accept nomination, and that such requisitions be as largely signed as possible and presented to the proper persons.

The signing of such should not be considered as binding to either vote for or promote the candidature of all or any of the names on the list.

The next important consideration is to get the electors to the polls so that the elected may represent the whole of the electors; and to secure that the signers of the requisitions should make it their business to see that every vote possible should be got to the polls, no matter for whom he or she proposes to vote: for I hold that the man whose sole aim is to get himself elected by getting his own supporters to vote, and by making it difficult for supporters of others to do so, or by any other tricky method, is totally unfit to fill public office.

Yours Truly,  
RATEPAYER.

## Coal Oil Reduced in Price

at Wallace's Red Cross Drug Store. Bring your demijohn and get it filled with Oil as clear as crystal.

## CAMDEN EAST

Subscription lists are out at the different stores in Camden East to provide Mr. John Skinner with two tons of coal. Last year the amount required was readily given and we hope it will be this year also. Mr. Skinner's state of health is much the same as last year. This is practical christianity, which will do all good to cultivate.

The Christmas Tree given under the auspices of the members of the Church of England, will be held (D. V.) at Hinch's Hall, Camden East, December 28th, 1906.

Coughs, colds, hoarseness, and other throat ailments are quickly relieved by Crescitol tablets, ten cents per box. All druggists

## NEWBURGH.

## No Disappointment.

You get the highest grade of American Coal Oil at the right price, when you bring your demijohn to the Medical Hall, Fred L. Hooper.

The Grand Trunk Pacific dock at West Fort William collapsed, carrying 800 tons of steel rails into the river.

Deseronto, Ont., Nov. 16—Gas escaping during the night was the cause of the death by suffocation of the only daughter of John Wright of this town. The family consisting of Mr. and Mrs. Wright, two sons and one daughter, aged twenty-one, retired as usual last night, the two sons sleeping in the upper flat. This morning they were around the house, but appeared to be dazed through inhaling the gas, and it was three o'clock this afternoon before they recovered sufficiently to realize the condition of the rest of the family. A doctor was immediately summoned, and when he arrived he found the daughter had been dead for some time. The father and mother are now in a very serious condition, with but slight hopes of their recovery. An inquest will be held. The gas escaped through a sewer pipe in the cellar.

ITCH, Mange, Prairie Scratches and every form of contagious Itch on human or animals cured in 30 minutes by Wolford's Sanitary Lotion. It never fails. Sold by F. L. HOOPER.

Gananoque, Nov. 18—David Taylor has been missing from his home since Wednesday last. His body was grappled for near near the railway wharf and was found by Chas Wand in about twenty feet of water. Taylor was seen in a dazed condition by the night employees of the Thousand Island Railway in the station waiting room lying on the floor. He was advised by the night clerk to go outside and get the fresh air. Taylor did this and went up the railway tracks and turned up the main street past the customs house. When the Thousand Island Railway train was turning from meeting the G. T. R. local about 7:20 the train crew noticed a man staggering towards the railway wharf across the tracks. When the train had stopped one of the crew took a lantern and went down to the wharf to look for him, but nothing could be seen of him. The trainman, thinking he had gone another way, went back to his work. There was nothing thought of the matter until his sister made inquiries about him to Policeman Thompson, who promptly gave her the required assistance, which led to his being found. Taylor's watch was found to have stopped at 7:25. Coroner Shaw of landsdowne was notified and arrived in Gananoque about 3:30 p. m. After hearing the particulars he decided that an inquest was unnecessary owing to the probability that the deceased fell off the wharf. The deceased was born in the township of Camden, Lennox county, in 1846. He was a bachelor and with his sister resided on a farm in the east end of this town. He was a wealthy farmer. The remains were brought to Napanee for interment on Monday.

## Premier Whitney Was There.

And opened the third Ontario Horticultural Exhibition at Massey Hall, Toronto. The floral display was declared to be second of its kind only, to that of the world famous St. Louis exhibition. The Dale Estate florists, of Brampton, the largest on the continent, carried off the prizes in orchids, carnations, chrysanthemums, violets and choice roses. The Medical Hall—Fred L. Hooper, is sole agent for this enterprising firm for Napanee. Special orders delivered direct from the green-houses in six hours,

# THE ALL-SEEING EYE

It Is An Eye of Sympathy, of Tender Kindness, of Loving Wisdom.

"Thou God seest me."—Gen. xvi., 13.  
There are few who cannot call to mind many times in childhood when this text was quoted to them in awe-inspiring tones. It may be you remember these words printed or worked in worsted hanging in your room at home. The interpretation supplied by parent or teacher served, for a time, as an effective, invisible, and omnipresent police force. The Almighty became an officer to be feared.

Once nervous natures could hardly find a moment of quiet comfort so filled were they with vague alarms at the thought of the eye unceasingly searching their secret being. To tell such a child that death would thrust him into the full presence of the one whose eye thus unremittently watched him had at least the wholesome effect of making him determined to live as long as possible.

The motives have gone and the child hears less of the supreme spy, though there remain parents so morally twisted or so mentally indolent as to attempt to coerce their children into goodness by cowardice, by dread of their God. But the type of mind whose religion consists either in the fear of that all-seeing eye or in dodging its inspection, is by no means extinct.

Gone is the God who with jealous eye watched the jam in the pantry or the apples in the cellar, who seemed delighted to record against us the petty

## MISDEEDS OF CHILDHOOD.

Yet there remains to perhaps nearly all an impression that the Almighty oversight is principally exercised in detecting our wrong doing and our shortcomings.

One of the most singular things in the history of religion is the assiduity with which men have twisted its simple truths into elaborate errors and the devotion with which they have been prepared to defend with the last drop of their blood the errors which worked damage to their whole lives and to denounce as traitors any who assumed to recall to men the simple beauty of the truth which they had buried with their traditions.

Here, says this old world story, was a woman, cast out, ill-treated, alone in

the desert. Man had betrayed her and God seemed to have forgotten her. Well might she despair. Then, when things seemed darkest about her, in the soul's night, came the vision from above, the messenger of the Eternal, with a picture of the goodly future awaiting her child. When all seemed wrong there came this reminder of the power working for the right.

With heart refreshed the woman turned back, naming the place by a word meaning "Thou God seest me." Think you that place to her was to be dreaded because of the all-seeing eye? What a triumph of joy and peace was in her tones, as she cried, "After all, I know that Jehovah does not forget us at any time; his eye is upon me for good."

Long ago, in simplicity of heart, men thought of one who was ever near, coming and dwelling among them as a friend.

## ENTERING THE TENT<sup>h</sup> DOOR,

sitting at the evening meal, knowing all the cares, fears, needs, joys, hopes, and desires that were theirs. Of the best of them it was said that they walked with God, so clear was their sense of the imminence of the Father of spirits.

As Hagar cried aloud with joy at the thought of one who could always see her, so did they; it was the strength and consolation of their lives that neither enemies nor adversities, nor even their own follies and wandering could hide them from him, that desert places and lands remote were not far from him.

It is the eye of a friend that looks down, an eye of sympathy, of tender kindness, of loving wisdom; behind it the all-pervading, controlling might that binds the universe into a unit and brings all its motions under the sway of law. Every source of infinitude is for our aid; the Omnipotent is man's ally.

This is the faith that makes men strong, that sends them forth to endure, to persist in the right, to fight the wrong; this makes heroes in the silence as well as in the glare of publicity, the knowledge that we are ever in the light of infinite love and might, that the eternal goodness knows, deeply feels with us.

HENRY. F. COPE.

# THE S. S. LESSON

INTERNATIONAL LESSON,  
NOV. 25.

Lesson VIII. The World's Temperance  
Sunday. Golden Text: 1 Cor. 9.27.

## THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Historical Background. — Isaiah, the greatest of Hebrew prophets, lived and labored at Jerusalem during the last forty years of the eighth century, B. C. His public career was nearly coextensive with the successive reigns of Jotham, Ahaz and Hezekiah, Kings of Judah. He was much influenced in the early part of his prophetic activity by the spirit and earnestness of Amos and Hosea, earlier prophets of the Northern Kingdom. To rightly understand the mission and prophecies of Isaiah a knowledge of the political situation of the time is necessary. The greatest political fact of that period was the steady westward extension of the Assyrian empire, which in

12. Lute—An instrument belonging to the guitar family, no longer in common use.

Tabret—Archaic form of tabor or tambourine without jingles. Used especially to accompany some form of pipe or flute; a timbrel.

Regard not the work of Jehovah, neither, . . . the operation of his hands—They read not the signs of the times, nor do they understand the ominous import of the events which are transpiring about them and which are indicative of the impending judgment of Jehovah.

13. Are gone—Or, goeth. The form used in the text has been called the prophetic perfect.

Into captivity—The only specific mention of the exile in Isaiah.

Their honorable men are famished, and their multitude are parched with thirst—Rich and poor shall suffer alike in the time of famine to come.

14. Sheol—The Hebrew word "Sheol" corresponds to the Greek "Hades," and was the name given to the underworld or realm of the dead.

Hath enlarged its desire, and opened its mouth without measure—This underworld is here represented as elsewhere (comp. Prov. 1. 12; 30. 16) as a devouring, insatiable monster.

Descend into it—Into Sheol. The

# MANY WOMEN SOLDIERS

THOUSANDS OF THEM IN THE  
FRENCH REVOLUTION.

Amazons of Many Countries Who Have  
Done Valiant Service in  
the Field.

There were thousands of women soldiers in the French Revolution. After the fall of the Bastille a battalion of young women took up arms under the name of Amazons and rendered yeoman service, says the London Express. Jeanne Lacombe, comedienne, forsook the stage for the field. Theresa Figueur saw four horses die under her in battle. Other Amazons were pensioned by Napoleon and one was decorated with the Legion of Honor.

The "Amazon of the Cossacks" is the daughter of a Vladivostok merchant. A skilled horsewoman and rifle shot, she distinguished herself greatly in the Russo-Japanese war and at the beginning of the present year she was made a ward of the Czar.

There died in Florence last March an Italian woman, Signora Mario, who fought with Garibaldi, and "Mother Jarrethout," a heroine of the Franco-German war, died last year. She fought in male uniform on the walls of Chateauaudun, and at Abhis she took two prisoners.

"Mother Jarrethout's" end was pathetic. She had made a great name for herself as the Florence Nightingale of the Franco-German war, had received the cross of the Legion of Honor and numbers of lesser medals. Yet she died

## FORSAKEN AND IN POVERTY.

An attempt to make amends signaled her burial in August, 1905. A picket of soldiers followed the coffin to the grave and old soldiers who had been her comrades in the field mustered from all parts of France to say farewell.

The American civil war bred a whole corps of women soldiers. Many women served throughout the entire war without their sex being discovered by officers or comrades.

Pauline Cushman, an actress, was captured in male uniform by the Confederates and was rescued by her companions just as she was about to be hanged as a spy. Pauline was so successful in the field that for her faithful services there was conferred upon her the rank of Major.

Still more successful was Bridget Danvers, known as "Irish Biddy." Bridget performed wonders as nurse; hospital steward, surgeon, vivandiere and private soldier. In one battle she had three horses killed under her. The war did not give Bridget her fill of fighting, so she afterward crossed the Rockies and engaged in campaigns against the Indians.

A woman known as Frank Thompson carried messages through shot and shell at Fredericksburg disguised as an orderly. Her name did not transpire till twenty years after, when she obtained a pension and was admitted to the

## GRAND ARMY OF THE REPUBLIC.

A faithful spouse who refused to be parted from her husband was Mrs. Reynolds, wife of Capt. Reynolds, Company A, Seventeenth Illinois Regiment. She rode at his side, in male attire, through almost the entire campaign.

There was never a time when this heroic and sacrificing little woman flinched or hesitated in time of battle or on long marches. On the field after a conflict she would go about ministering to the sick and dying, and at last she became widely known as the Angel of the Regiment. Like Pauline Cushman, she eventually received a commission as Major in the army.

Mrs. Katy Brownell, a skillful sharpshooter, joined the ranks and served as a color bearer. Romantic Ellen Goodridge enlisted in her lover's company, and rode as a common soldier by his

# HOME.

## SOME DAINTY DISHES.

Potato Fritters—Take slices off a large parboiled potato half an inch thick season with pepper and salt, dip into batter and fry in deep fat. Drain very dry, scatter grated cheese over, and serve on a dainty d'oyley.

Cut off the flap of a sirloin, rub a little salt into it, turn and rub twice daily for three or four days. Then boil slowly with soup, vegetables and spices to taste. Press the beef and serve cold brushed over with glaze, and garnished nicely.

Hasty Pudding.—Boil one quart of milk with a little salt to flavor, and stir into it when boiling a paste made of six ounces of flour and cold milk. Return to the saucepan, stir while boiling for ten minutes, and serve in a pie dish. Eat with brown sugar and fresh butter.

Potted Meat—Use the remains of cold salted beef. Pass the beef twice through the mincing machine and free it of little bits of gristle, pound thoroughly in a mortar, adding anchovy sauce, a little good gravy, pepper and allspice. When all is thoroughly blended press the mixture into jars, and put some melted butter on the top.

Milk Cakes.—Have one pound of flour half a teaspoonful of salt, a teaspoonful of sugar, two of butter, one egg, half ounce of German yeast; mix all together with new milk enough to make a nice light dough; let this stand for two hours in a warm place to rise. Make into cakes the size you prefer, just glaze them on the tops with white egg, and bake for twenty minutes in a quick oven. Currants or caraway seed may be added if approved.

Delicious cream tarts can be made from the following recipe: Three ounces of flour, two ounces of butter, an ounce of Plasmon, some salt, the yolk of an egg, water and jam as required. Rub the butter into the flour and add the Plasmon and salt. Mix a stiff paste with the egg and water, roll out, put into greased tins, and bake in a hot oven for half an hour. When cold, put jam and Plasmon whipped cream on top each tart and serve.

Angel Pudding.—Two ounces of flour two ounces of caster sugar, two ounces of butter melted in half a pint of new milk, and two eggs. Beat the yolk with the milk and whisk the whites till they are a stiff froth. When all is nice, mixed flavor with a few drops of essence of vanilla. Bake in small puffed pans until nicely browned and puffed and send to table on a dainty d'oyley. A little sugar should be dusted over each pudding, and slices of lemon served with them.

Baked onions are excellent. The onions should first be scalded and then have their skins removed, after which they should be dropped into boiling water, which should be changed twice. When soft but not broken they are cut in quarters and arranged in a baking dish that is not deep and which may be sent to table. Pour a nice white sauce over the onions. Strew them with breadcrumbs, sprinkle with pepper and bits of butter, then bake a light brown. This is a nourishing dish and easily digested even by a delicate person.

Stewed apples prepared as follows: make an excellent dish.—Peel and core some good apples, and throw into cold water. When all are peeled, arrange in a stewpan so as not to touch each other. Pour half a pint of water over them, add sugar and lemon-rind to taste. Stew gently without the cover for forty minutes. Take out the apple carefully, so as not to break them, boil the syrup to reduce it, and strain over the apples. When cold ornament each apple with a little red currant jelly and a few strips of blanched almonds.

Almond Loaf-Cake.—Rub very smooth enough almond paste to make a small loaf. Or if you prefer to prepare

earnestness of Amos and Hosea, earlier prophets of the Northern Kingdom. To rightly understand the mission and prophecies of Isaiah a knowledge of the political situation of the time is necessary. The greatest political fact of that period was the steady westward extension of the Assyrian empire which endangered the independent existence of all the smaller nations of western Asia. Among these the two Israelitish kingdoms, because of their favored geographical position, ought to have been the last to come into conflict with the Assyrian power; but the shortsightedness of the kings of Judah and Israel dictated a political policy which involved them in premature and compromising relations with both Assyria and Egypt, the two great world powers on either side of them, and this in both cases with disastrous results. It is also important to remember that the historical period just preceding the time of Isaiah, had been one of unusual prosperity for the northern kingdom under Jeroboam II. as well as for Judah under the long reign of Uzziah (or Azariah). The boundaries of both kingdoms had, during this period of prosperity been once more extended unto their utmost limits and great wealth flowed into the national treasures of both kingdoms. ("And their land is full of silver and gold, neither is there any end of their treasures; their land also is full of horses, neither is there any end of their chariots" Isa. 2. 7.) But material prosperity was attended by an aggravation of social evils already grievous. Debauchery and a general corruption of morals among the wealthy upper classes (Isa. 3. 16-23; 5. 11, 12; 28. 1-8; 32. 9), the rise of great landed estates (Isa. 5. 8; Mic. 2. 2, 9), and the consequent oppression of the poor (Isa. 1. 23; 3. 14, 15; 5. 23; 10. 1, 2; 29. 21) called forth the sternest rebukes of Isaiah and his contemporary Micah. Of their denunciations of the oppression, avarice and drunkenness prevailing in the higher ranks of society in their time our lesson passage is an excellent example. The scathing rebuke of Israel which it contains really embraces the longer passage, verses 8-10, which in turn is inseparable from the introductory parallel of the refractory vineyard contained in verses 1-7. The entire chapter should be studied.

Verse 11, in the form of a simple parable or story, the prophet has addressed an assemblage of his countrymen, appealing to them to judge between him and his infertile vineyard. Unaware of the rhetorical purpose of the narrative, they readily assent to the condemnation of the vineyard, not perceiving that in so doing they are pronouncing their own condemnation. Thereupon the prophet suddenly changes the figurative language of the parable (v. 7) and with tremendous force drives home the charge of disobedience and rebellion against Jehovah upon his hearers. "For the vineyard of Jehovah, of hosts is the house of Israel, and the men of Judah his pleasant plant; and he looked for justice, but, behold, oppression; for righteousness, but, behold, a cry."

Verse 12, a simple interjection of threatening. There are several different Hebrew words thus translated in the Old Testament. In Prov. 23. 29, "Who hath we?" for example, the Hebrew word translated "we" is not the same as the word so translated in this chapter, being rather an interjection of lament. The threat against drunkards contained in this verse is preceded in verses 8-10 by a similar threat against the avaricious aristocracy who "join house to house, and bay field to field."

Rise up early in the morning — The craving for drink in the morning is proof of an abnormal appetite, drinking and carousing being generally associated in thought with the late hours of the day and night. This verse reminds us of the words spoken by Peter in defense of the disciples on the day of Pentecost: "These were not drunken, as ye suppose; seeing it is but the third hour of the day" (Acts 2. 15).

Strong drink — Fermented liquor of every kind.

was the name given to the underworld or realm of the dead.

Hath enlarged its desire, and opened its mouth without measure—This underworld is here represented as elsewhere (comp. Prov. 1. 12; 30. 16) as a devouring, insatiable monster.

Descend into it—Into Sheol. The thought of the verse is that the pomp and the glory of the multitude will not shield them from death. The latter part of this fourteenth verse has been rendered in another translation as follows: "And down goes her (Jerusalem's) pomp, and her tumult and her uproar, and (all) that is (so) jubilant in her." This makes the prophecy of destruction refer more particularly to the city, including, of course, her inhabitants. The whole city shall be destroyed.

15, 16. This severe judgment which is to come upon the capital city will but reflect the justice and holiness of Jehovah, who thereby compels the recognition of his righteousness and reveals his true nature as the Holy One in Israel.

17. The waste places of the fat ones shall wanderers eat—The city with its glory having vanished into the underworld, its former site now affords scant pasturage for herds which graze amid the ruins. The picture intended seems to be that of awful desolation rather than that of "idyllic peace." The word "wanderers" may be translated also "sojourners," and refers, possibly, to nomad shepherds.

18. The third woe is uttered against those who, skeptical of the fulfillment of the dire prophecy against the city, harden themselves in sin and increase the measure of their iniquity, thereby really hastening the day of judgment.

19. Let him make speed—A mocking challenge to Jehovah to fulfill the prophecy against the city.

20. The woe of this verse is pronounced against those who confuse moral distinctions; that is, against the class of moralists and philosophers "who employed their subtlety in making out a case for abuses condemned by the unsophisticated moral sense."

21. The fifth woe is against the self-satisfied astuteness of politicians and statesmen of that period.

22, 23. The sixth and last woe is uttered against them that are mighty to drink wine, the carousing and debauched aristocracy, and against the corrupt judges who justify the wicked for a bribe.

Take away the righteousness of the righteous from him—Tempt the righteous to forsake the right and employ similar unrighteous means to obtain desired ends. In the succeeding verses of the chapter the prophecy of ruin which is to come is repeated.

25,337 UMBRELLAS LEFT BEHIND.

Forgetfulness of the Public is Said to be Growing.

Is the public growing more absent-minded? An answer in the affirmative would appear to be the legitimate deduction from the figures, supplied in the annual report of the Commissioner of London Police, regarding articles found in cabs, omnibuses, and tramway-cars, and received at the Lost Property Office.

Last year 57,820 articles were found, an increase of over 5,000 on the previous year. In 1901, 40,221 articles were found, and since then there has been a steady increase.

Owners of the lost articles were found in 26,770 cases. These were of the declared value of £27,215 12s., and awards amounting to £3,500 12s. were paid to drivers and conductors who found the lost articles.

Public forgetfulness was most marked in the case of umbrellas, no fewer than 25,337 being left in public vehicles. Bags numbered 4,607, articles of men's clothing 3,279, women's clothing 3,229, purses 3,707, opera glasses 703, jewelry 1,535, and watches 332.

Altogether 127,317 persons were arrested during last year—an increase of 787—and of these 106,538 were convicted. The strength of the police force was 17,210, and the pay £1,483,676.

of the Regiment. Like Pauline Cushman, she eventually received a commission as Major in the army.

Mrs. Katy Brownell, a skillful sharpshooter, joined the ranks and served as a color bearer. Romantic Ellen Goodridge enlisted in her lover's company, and rode as a common soldier by his side right through the war. "Frank Henderson" of the Nineteenth Illinois was really a young girl who enlisted because she could not bear to be parted from her brother.

Mary Owens of Danville, Pa., wanted to accompany her husband in the war and share with him its hardships and its victories. The brave woman fought at his side until he was killed. In the next battle she was severely wounded and had to be sent home, her discharge papers bearing the tribute: "A more faithful soldier never shouldered a musket."

The civil war, of course, did not have a monopoly of women soldiers. There have been female warriors in all countries from Boadicea and Joan of Arc to the "Amazon" of the Cossacks," who startled the world at Mukden. Among the hundreds of such examples a few of special interest may be cited.

THERE WAS ENGLISH MOLL

(Mary Ambree), who in 1584 headed 1,000 men against the Prince of Parma and sustained an unequal combat with 3,000 Spaniards for seven hours, challenging any three Spaniards to try their powers against her single arm.

There was valiant "James Gray" (Hanna Snell), a hosier's daughter who fought in the war of the Spanish succession, received innumerable wounds, was pensioned by Queen Anne and at her death was buried with full military honors in the cemetery of Chelsea Hospital.

There was hardy Mrs. Christian Davis, trooper of the Scots Grays, an Irish Amazon, who was wounded at Ramillies. And there was "Able Seaman" Rebecca Ann Johnstone, who fought and died on one of Nelson's ships.

There was Mme. Drucourt, who valiantly withstood the siege of Louisburg in Cape Breton (1758). Day and night she was to be found on the ramparts, cheering the soldiers and herself loading and firing the guns.

BIBLE MEASUREMENTS.

Often Mentioned Weights and Distances in Modern Figures.

A day's journey was about twenty-three and one-fifth miles.

A Sabbath day's journey was about an English mile.

A cubit was nearly twenty-two inches.

A hand's breadth is equal to 3 3/4 inches.

A finger's breadth is equal to one inch.

A shekel of silver was about 50 cents.

A shekel of gold was \$8.

A talent of silver was \$538.30.

A farthing was 3 cents.

A mile was less than a quarter of a cent.

A gersh was a cent.

An ephah or bath contains seven gallons and five pints.

A bin was one gallon and two pints.

A firkin was seven pints.

An omer was six pints.

TALLEST OF WOMEN.

The tallest woman in the world is said to be a native of the Tyrol, who has just arrived in Vienna. Twenty-seven years old, she is 7 feet 5 inches high, and weighs 374 lbs. She is spare rather than stout, hard of features and voice, and somewhat of the masculine type. Her father and mother are not above ordinary stature.

Scarlet flowers stand drought better than any other.

for forty minutes. Take out the apples carefully, so as not to break them, boil the syrup to reduce it, and strain over the apples. When cold ornament each apple with a little red currant jelly and a few strips of blanch almonds.

Almond Loaf-Cake.—Rub very smooth enough almond paste to make a small cupful. Or, if you prefer to prepare the paste yourself, blanch enough almonds to make a cupful, and, when cold, pound to a paste, moistening it with a little rose-water. Cream together a quarter-pound of butter and a pound of powdered sugar, and, when very light beat in the well-whipped yolks of eight eggs. Beat in gradually the almond paste, and, when this is well blended, fold in the stiffened whites of the eggs alternately with one quart of prepared and sifted flour. Last of all stir in a half teaspoonful of essence of bitter almonds. Bake in a loaf-pan in a steady oven, covering the cake for the first twenty minutes it is in the oven. When done, and cool, turn out, and cover with a white icing flavored with a very few drops of essence of almonds. Place blanch almonds and halved almonds on the icing on top of the cake before it (the icing) hardens.

HINTS FOR THE HOUSE.

Rub fresh eggs over with salad oil and they will be milky and fresh when boiled after six weeks' keeping. Glycerine answers the same purpose.

A slice of whole wheat bread spread with cream cheese sprinkled with finely minced sweet green or red peppers, makes delicious sandwiches.

Pumpkin pies topped with whipped cream and sprinkled with minced nuts or dotted with whole pecan meats is an appetizing variation of an old-time dessert.

Take an old piece of carpet or new piece of burlap forty-five by twenty-seven inches. Bind and hem the cut ends. Sew on strong leather handles. Use to bring kindlings and small wood in.

To get Well-Fitting Shoes and Boots.—People should never go in the early morning to get boots and shoes fitted. For in the latter part of the day the feet are at their maximum size—activity and standing tend to enlarge the feet. If people would remember this rule there would not be so many complaints of shoes when worn being tight which when fitted seemed perfectly comfortable.

An excellent remedy for your sore mouth is one teaspoonful each of powdered borax and alum with half a teaspoonful of bicarbonate of soda, all dissolved in half a pint of boiling water. These ingredients should be well mixed, and the mouth rinsed frequently with the solution.

Nice Way to Cook Mutton Chops.—Take a chop from the neck or loin of mutton cut rather thick, trim it neatly, leaving only a little fat on it. Flour it well, and sprinkle lightly with pepper and salt, place in a stewpan with a teaspoonful of rice, and sufficient cold water to cover it. Bring to the boil, and let it simmer very gently for one hour. If onion is liked, a few slices and a sprig of parsley may be added.

Enamel for Shelves.—An excellent idea for pantry shelves is to give them two coats of ordinary white paint and then a third finishing coat of white enamel. As soon as the enamel dries wash it over with cold water, and then it will harden quickly. Do not cover these shelves with oilcloth or paper, but leave them bare and notice the improvement. As there are no covers under which crumbs, etc., can collect, there is nothing to encourage mice, and the enamel is easily wiped clean with a damp cloth.

To Give Table Linen a Gloss.—Take the tablecloths from the line while they are still damp, fold them carefully up once and roll them up tightly. Pass them two or three times carefully through the mangle. Lay the linen singly on an ironing board, covered with two or three thicknesses of blanket, and iron it all on the right side with heavy hot irons. When the cloth has been thus ironed fold it lengthwise with the selvage towards the operator, and iron again. Turn it and iron on the other folded side. Fold and iron

again, continuing thus till the cloth is folded the required size. The cloth should then have a satin surface, with the pattern of the damask showing well.

#### THE SUCCESSFUL WOMAN.

No woman will succeed who is so shame-faced about her business that she must apologize for being engaged in it. Employers do not want her and if her business is her own, people will not deal with her if they can help it, says a writer in the Minneapolis "Tribune." Nothing so wins the respect of others as self-respect. A woman who cannot be womanly at all times has no place in the business world. A woman who truly respects herself will do whatever she undertakes as well as she can.

## BATTLE WITH A BRIGAND

### FIGHT IN LONELY HUT ON SUMMIT OF MONT ZEDA.

#### Notorious Brigand After a Reign of Terror Falls Into Hands of Law.

The notorious brigand, Guiseppe Crealin, who has long been the terror of the valley between the Lepontine Alps and Lake Maggiore, Switzerland, has been captured in his hut in the snow on the summit of Mont Zeda, after a long and desperate fight with a party of soldiers.

A year ago Crealin built a hut on Mont Zeda, 6,860 feet high. He plundered and terrorized the valley, and then retreated through the forests and snowy heights to his mountain fastness. The local authorities made many attempts to catch him, but the elusive Crealin only laughed at them, and when they thought they were close on his tracks in the woods, he was making love to a farmer's daughter, while he carefully noted the position of her father's household goods.

#### TWELVE TO ONE.

At last the local police appealed to the Italian authorities, and a dozen special men were sent to capture Crealin. They were dressed as guides, but each man carried a rifle and a revolver.

They divided up into pairs and proceeded cautiously through the forest. There they caught sight of the nimble Crealin, but he was too quick for them and effectively stopped them by setting fire to the belt of dry wood that barred their progress for some time, while it gave him an opportunity to disappear in the smoke.

A large tract of the forest was burned, but the soldiers continued the ascent by different routes to the summit. Six hundred yards from the top Crealin challenged them by firing a shot over their heads.

He had loopholed his hut and was evidently prepared to withstand a siege. The soldiers took cover and opened fire on the hut. Crealin replied with great spirit and the soldiers closed in round him very cautiously, for he was sending shots in all directions.

#### AT LAST.

The attack began in the late afternoon, and at sunset the reports of the shots were still echoing along the mountain. The attacking party was thinking of making a retreat for they recognized that if they could not capture the hut they would have to spend the night on the mountain top, and probably be frozen to death. Their hands, too, were almost numb, and their firing was erratic.

After Crealin had poured out a very brisk fusillade the firing stopped. The soldiers suspected a ruse and waited. Then they made a rush for the door and battered it in, to find Crealin unconscious on the floor.

A bullet had struck him above the temple and knocked him out, without injuring him seriously. A large sum of money and jewellery and a great stock of provisions were found in the

## A MOST THRILLING TRIP

### ACROSS THE FALLS OF NIAGARA ON BLONDIN'S BACK.

#### Death of Harry M. Colcord, at Chicago, the Man Who Made the Sensational Trip.

A few days ago there died in a Chicago hospital a man who had one of the most thrilling sensations ever given to mortal.

Harry M. Colcord was the man who, nearly half a century ago, the famous Blondin carried on his back over a rope stretched across the river at the Falls of Niagara. Blondin died a few years ago in London.

The sensational aerial trip across the Falls of Niagara occurred Aug. 14, 1859. It was repeated twice afterward, the last time in the presence of the Prince of Wales, now King Edward VII. of England.

Even after the lapse of such a long space of time the thrilling memory of his experience ever remained vividly with Colcord.

#### HAUNTED BY THRILLING FEAT.

"The thought of it haunts me as closely as if it happened yesterday," he used to say, "and after in my dreams it all comes back to me. Again I sway from side to side and lay myself like a dead weight as Blondin goes onward, step by step, the rope swaying and his balancing pole oscillating; again I see the shores black with people and look down the swirling river, far below, until we seem to be rushing up stream; again I descend from his back and stand on the taut, vibrating rope, and again I feel Blondin stumble and sway as the rufians try to upset us, and I jump up in nervous terror and cold perspiration."

Blondin had acquired international fame by his wonderful feats on the tight rope. He was a native of Calais, France, and his real name was Jean Francois Gravelette. At the age of 4 he was sent to L'Ecole Gymnasium, and soon obtained the name of the "boy wonder." His people were poor and exacting, and they made him work hard. His daredevil feats made him fascinating and renowned. He was the first to throw a double somersault on the tight rope—the first and last and only one. When he visited Niagara he promptly formed the ambition of crossing the river on the tight rope.

#### SEEN BY GREAT CROWDS.

The place chosen was opposite the Clifton House, where the rope, a three-inch manila, was stretched across to a place called White's pleasure ground. The rope was in two pieces of 1,000 feet each, united by a long splice. It hung at a distance of 270 feet above the river and sagged about 50 feet in the centre by its own weight.

The performance was well advertised and was a big money maker. About 300,000 persons were present, mainly attracted by the prospect of seeing two human beings going to probable and spectacular death. Heavy bets were placed as to whether the two performers would succeed in their feat or perish.

Harry Colcord, who agreed for a substantial consideration to be the man carried, was a native of Attica, N. Y. He was 31 years old at the time, his muscles had been tensed and hardened by roughing it for four years on an Arctic whaler, and he weighed only 135 pounds. Blondin's weight was 140.

The start was made from the Canadian shore. Blondin wore his professional tights; his burden wore a conventional black dress suit. The balancing pole was thirty feet long and weighed sixty pounds. The tight rope, taut as a violin string, was kept in place by guy lines stretched at intervals of twenty feet, save for a space of forty feet in the centre. "Harry, be sure to let yourself rest all the time like a dead

lous gambler who had bet against our crossing.

#### WILD CHEERS AT FINISH.

"Again I mounted his back, and as we toiled up the slope of the rope toward the American bank we confronted an immense sea of faces, intense with interest, alarm, fear. A band was trying to play, but the wrought-up musicians could only evoke discordant notes. As we approached the brink there was an immense danger that the rush of spectators might crowd us over the cliff and others along with us. At my advice Blondin rushed into the throng as far as he could go. There was a great cheer, and the danger was over."

For his intrepidity Harry Colcord was made the recipient of numerous substantial testimonials. Blondin was presented was a handsome diamond-studded gold watch and chain, while the representatives of railroads, steamboats and hotels presented him with sums aggregating a few thousand dollars.

A second time that fall Blondin carried Colcord across the river, the passage being without special incident. The third crossing was made, over the whirlpool, in August, 1860, in the presence of the Prince of Wales and a gathering of about a quarter of a million people. Immense grand stands were erected on both sides of the river and the admission fee was a dollar. Doors placed at regular intervals gave admission to the stands.

The Prince, now King of England, who was accompanied by a brilliant retinue headed by the Duke of Newcastle, proved a great drawing card. Newspapers from far and near sent their representatives to watch not so much the performance of the balancist and his burden but its effects on the young scion of royalty, and the imaginative reporters had full sway. "The Prince of Wales Faints," and "Great Emotion of the Prince of Wales" were among the scare headlines of special editions.

The Prince did not faint or otherwise create a sensation, but when the adventurers stepped from the rope on Canadian soil he kindly received them in his pavilion. "He put his arms around me," said Colcord, "kissed me on the cheek, and said, 'You're a brave lad'—although at the time I was old enough to be his father."

## BRITAIN'S GREAT RECORD

### BUILDING THE GREAT BATTLESHIP DREADNOUGHT.

#### Can Turn Out Warship in Half the Time Any Other Nation Would Take.

The English naval authorities have built in one short year the most powerful ship in the world. Their most speedy rival, they believe, could not do what they have done in double the time, and so they can build two ships while that rival is building one, even supposing her plant to be larger. "Engineering," London, says: "We can now afford to begin the construction of a ship almost a year later than any foreign nation, with the advantage of full knowledge of their design, and still have it ready for war as soon as they."

#### MANY FIRMS READY.

"There are eight or nine British firms willing to complete a ship of the Dreadnought class in two years and three months; four or five could quite readily undertake to repeat the performance of completing a Dreadnought in eighteen months. This is especially the case with the firms who themselves manufacture the armor, guns and gun-mountings, as well as the machinery and the hull.

"While Germany continues what is

## ON THE FARM

### BUTCHERING ON THE FARM.

The first thing is a good scalding barrel or tank. I had a tank made of 2-inch oak that I used for this purpose. It is about 4 feet across and 2½ deep, writes J. O. Schroyer. After the scalding is done, it is well cleaned, and serves for packing down meat. When I use this tank for scalding, I set the derrick over it and a hog of 400 pounds can be hoisted in and scalded as easily as a 150-pound pig can be handled without a derrick. My derrick is made of four 2x4s and a block and tackle. This block and tackle is handy for many other jobs about the farm.

When scalding, the hog is hoisted out of the tank and swung onto a bench at the side and scraped clean. I use a patent hog scraper which costs from 15 to 20 cents. If you cannot get one of your local dealer, you can easily get it of any large mail order house. When sending for it, get a couple of knives. I have one with an 8-inch blade that comes handy in a great many instances. But do not do as one of my friends did, order a 12-inch knife and think that means handle and all. Knives of this sort are sized according to the length of the blade. The fellow that got the 12-inch knife, said it came handy to use when cutting up corn if he ran short of corn knives. A good sausage mill and a lard press are also necessities. The lard press will get out enough more lard over hand pressing to pay for itself in a year or two.

When cool I cut up the meat, and if the weather is not too cold it is left to still further lose all trace of animal heat, then it is rubbed with salt and all allowed to stick that will possibly adhere to it. Afterward, it is packed in the meat tank, the hams in the bottom, the shoulders next and the sides on top. It is allowed to stand in the dry salt for three weeks and then a brine is made that will float a fresh egg. This brine is poured directly on the meat without removing it from the dry salt and it is then left for five weeks longer, when it is taken from the brine and allowed to drain. Then it is hung in the smoke-house and well smoked in the old-fashioned way.

After the meat has been well smoked I take it down and rub each piece with a good coating of borax and hang it back in the smoke-house. Not a fly touches it and it remains sweet and firm until wanted, even until a gust or September of the following summer I do not pack in oats or ashes, as many do and as I formerly did. My present method beats all of that sort of thing.

By having these few necessary tools butchering is not half the work that it is if everything has to be borrowed and taken home again. I have a good set of gambrels which have been saved from year to year. They are always ready. When I am through with the lard stick or paddle, I put it away, and the next fall it is right at hand again.

Some weeks before butchering time I gather a lot of broken posts and ends of boards and dead limbs that are needed to make hot fires. In this way I clean up the premises and have nice dry wood for butchering. Pieces that are full of nails and cannot be well cut with an axe or saw are here put to good use.

#### HANDY DEVICE FOR SAVING WOOD.

To readers who live in wooded sections I recommend a sumpson to raise heavy trees off the ground to be sawed, says M. J. Lawrence. A sumpson is made as follows: Two pieces of ash plank 5 inches by 10 feet by 1½ inches are bolted together at top and bottom with a space between for an ash lever. This is 2 inches thick and about 8 feet long with two round notches near the end. It rests on 1-inch iron pins which fit in holes inside of the sumpson. An oval iron is bolted to the lever midway between the notches. To this a strong

prisk insulate the living stopped. The soldiers suspected a ruse and waited. Then they made a rush for the door and battered it in, to find Crealin unconscious on the floor.

A bullet had struck him above the temple and knocked him out, without injuring him seriously. A large sum of money and jewellery and a great stock of provisions were found on the premises, as well as a number of love letters from his various sweethearts in the valley.

When he recovered consciousness Crealin said, "Well, Messieurs, I think I have given you a good long chase all these months, and a stiff fight at the end of it."

Crealin, who is a tall, handsome man about forty, will probably be taken to Milan for trial.

## MUNICIPAL BATHS.

### Luxuries Provided in Many Cities of the Old Country.

In ten years the ratepayers of the United Kingdom have added £200,000, 000 to the municipal debt.

The progressive borrowing in the past thirty years has been in this form for England and Wales only:

|            |             |
|------------|-------------|
| 1875 ..... | £84,500,000 |
| 1885 ..... | 165,000,000 |
| 1895 ..... | 224,500,000 |
| 1905 ..... | 400,000,000 |

Out of these £400,000,000 London owes £100,000,000.

Some of this money has been spent by Camberwell Borough Council in building luxurious Turkish and Russian vapor baths. Camberwell's conception of municipal progress has resulted in a building in which in the swimming bath there stands a drinking fountain in marble, with gold mosaic. As the bather passes to the Turkish bath he walks up Sicilian marble steps, holding the handrails of verte antico, pleased with the vista of leaded lights to gratify his Oriental senses.

When he reaches the frigidarium to cool himself he is enchanted with the walls of Sicilian marble, and the floors of black and white marble, across which are dove-colored bands.

He cannot quench his thirst without gazing at the statuary which pours the clear, cold water into the cup.

He revels during the whole of his stay in Oriental magnificence and luxury which cannot be eclipsed in West End private establishments.

Even Chiswick has municipally "gone Oriental" in the matter of Turkish baths.

Bradford's bath glories outshine all others; even Camberwell is dwarfed. There the citizen can obtain municipal Vichy douche baths, radiant and light baths, electric sun baths, as well as Turkish and Russian baths.

Manchester owns three municipal Turkish baths, which, with the other baths and washhouses, entail a loss of £25,000 a year.

Camberwell's proportionate loss is greater than Manchester's, for, while the Northern city's bath luxuries cost a rate of 1½d. in the pound, Camberwell's cost a rate of 2½d.

A ratepayer living in a house rated at £40, pays 9s. 2d. a year for these baths, besides the bath for his own house.

If he wants the Oriental luxuries, he must pay for admission. As so few people need them, the majority pay a large proportion for the people who have time and inclination to luxuriate.

reply, Wooden—"Mildred, I offer you my heart, my hand, my love, my devotion, my whole life." No reply. Wooden—"I lay my proudest ambitions, my brightest hopes at your feet. Will you not speak, Mildred?" Mildred—"Who owns the grocery store at the corner— you or your brother?" Wooden—"I do." Mildred—"Well, why didn't you say that at first?"

sional tights; his burden wore a conventional black dress suit. The balancing pole was thirty feet long and weighed sixty pounds. The tight rope, taut as a violin string, was kept in place by guy lines stretched at intervals of twenty feet, save for a space of forty feet in the centre. "Harry, be sure to let yourself rest all the time like a dead weight on my back. If I should sway or stumble on no account attempt to balance yourself." This advice Colcord strictly obeyed.

## PERIL IN MIDAIR.

"My first thrill occurred as we started; over the pine trees, whose sharp tops bristled far below us between the cliff and the river, it seemed far more terrifying than out over the water. My heart was in my mouth as we started, but I had absolute confidence in Blondin, and I believed that he would get us across all right. Our progress seemed to be dreadfully slow. The sight of the rapidly flowing river gave me a queer sensation; it was that we were moving up at a great rate and going but very slowly toward the opposite bank. Every now and then, in order to give him a rest, I had to get off Blondin's back and stand behind him on the rope, steadying myself with my hands around his waist while he balanced with the pole.

"Imagine the situation—getting down off a man's back hundreds of feet in air, feeling for and standing on a taut vibrating rope, and holding on to him, clad in slippery tights, when the least false move or loss of presence of mind on the part of one or other might plunge you both into eternity. And this getting on and off had to be repeated seven times.

"When we reached the middle of our journey, at the forty feet unsupported by guy lines, Blondin suddenly tottered and swayed, and his balancing pole began furiously thrashing up and down. He had lost his balance and was unable to regain it. He broke into a run. In that awful moment his advice forcibly impressed itself on me, and I lay like a dead weight on his shoulders, to stay or fall with him. When we reached the first guy line on the American side he slipped on it. It instantly broke, and the main rope, pulled by the corresponding guy line, was jerked sideways. This was the most critical moment of all. With his wonderful agility he recovered himself in time and won equilibrium enough to run to the next brace of guy lines twenty feet away. 'Get off, quick,' he said, and I obeyed. He was like a marble statue; every muscle was tense and rigid; large beads of perspiration trickled from him. It was then I most admired his wonderful grit and coolness. Neither by voice nor sign did he manifest his knowledge of the fact that a dastardly attempt had been made to kill us, probably by some unscrupu-

months; four or five could quite readily undertake to repeat the performance completing a Dreadnought in eighteen months. This is especially the case with the firms who themselves manufacture the armor, guns and gun-mountings, as well as the machinery and the hull.

"While Germany continues what is regarded by some as a 'menace' to British naval supremacy, we may wait for such full knowledge of her designs as our Naval Intelligence Department will provide, as we may then not only produce ships superior in fighting qualities, but in greater numbers, and within a much shorter period of time.

## WHAT THEY CAN DO.

"The prospects, therefore, are that in 1908 no continental nation will have in fighting condition one single ship of the Dreadnought type, whereas if the British Admiralty continue the rate of construction attained with the ship to be tried next week, they then have one squadron made up of six Dreadnoughts, and, in addition, a squadron composed of eight ships of the King Edward VII. class and two Lord Nelsons. The first squadron will have sixty 12-inch guns, with the enormous advantage of a short and easily manipulated fighting line, while the second squadron will have forty 12-inch guns, and fifty-two 9.2-inch guns. Both will be enormously superior to any squadron of an equal number of ships of any other navy.

## MAKES FOR PEACE.

"By 1908, too, the British nation will know whether foreign nations accept the olive-branch which it has held out in this year's naval policy, by a relaxation of naval expenditure, without any diminution of determination of determination to ultimately maintain mastery of the sea. If this desire for limiting armaments is not reciprocated, then there will be equal unanimity in continuing building operations to maintain our supremacy at all costs. There should be no mistake about this view. The Sea Lords who, after all, have the confidence of the nation, will not waver as to the vital principle of supremacy. Foreign nations, and notably the German people, may realize that their continuance in the development of their naval programme—involving as it does in their case not only an enormous sum for ships, but something like ten million sterling for the widening of the Kiel canal—cannot win even the mastery of the German ocean—the ambition of the 'Admiral of the Atlantic.'

## AMERICANS BEATEN.

"Where the Americans stand in this matter may be seen from the fact that in the constructive speed-trial between the Louisiana and Connecticut these two battleships occupied not far from three years in building. We are evidently not yet in a position to compete with the English in this kind of contest."

as follows: Two pieces of ash plank 5 inches by 10 feet by 1½ inches are bolted together at top and bottom with a space between for an ash lever. This is 2 inches thick and about 8 feet long with two round notches near the end. It rests on 1-inch iron pins which fit in holes inside of the sampson. An oval iron is bolted to the lever midway between the notches. To this a strong log chain is hooked, the other end passed under the log and hooked to the top of a crocheted limb. The lower end rests on the ground, the upper end against the log. This sampson will raise an ordinary sized beech tree if attached near the butt. To raise a large tree, saw once or twice in two. Work lever up and down like a pump handle, moving the pins up one hole at a time, first on one side of the sampson then the other.

In fitting a cross-cut saw, joint the saw so the teeth do not longer on one side than the other. Next set saw for the kind of wood to be cut; dry or frozen wood requires but a little set, green, hard wood a trifle more, chestnut or black ash a still wider set, and bass-wood or willow the widest of all. Set saw on a piece of iron beveled at end. Gauge each tooth separately so all will be set at equal width. For a gauge use a piece of saw plate 5x2 inches. Have four of these to set different widths. Shorten raker teeth about 1-32 inch. File cutting teeth square across at base, bevel points slightly for hard wood, more for soft. Rub machine oil on saw, never let it get rusty.

## CEMENT FOR FARM BUILDING.

The high prices of lumber and brick are bringing cement into use as a valuable and durable building material. In constructing cow stables, hog houses and poultry houses cement is proving especially valuable. Where small rough field stone and plenty of sharp sand can be had, nearby, the cost compares favorably with wood. With one good man to superintend the laying, the balance of the labor can be done by common help. Rough field stone need very little facing in a high wall, providing a good general line is followed, says Mr. C. S. Phelps.

The best grades of portland cement are the best and the cheapest. The quantity to be used for the foundation for walls and floors need not exceed, by bulk, one part cement to ten parts sharp, coarse gravel. The chief care should be to lay a good surface about 1 inch thick for floors. This surface can be made of one part cement to five parts sharp sand. Cement floors have the advantage of being easily cleaned, free from hiding places for rats or other vermin, and when properly laid, prove very durable. In my poultry work this year I have seen the great advantage of a rat-proof brooder house, as the losses by rats have been practically nothing, while last year with lamp brooders I lost 30 to 40 per cent by rats alone. Hogs are very destructive to wood work and cement should be used wherever the animals can reach the sides or bottoms of the pens.

## CLERKS AS HUSBANDS.

### Pen Users Said to be Immune From Struggles of the World.

"By virtue of his calling a clerk must perceive the value of money; that it is easier to get into debt than out of it; that by taking care of the pence the pounds take care of themselves; and that economy is a great revenue," says a writer in Pearson's Weekly in the course of an article on "Do Clerks Make Good Husbands?"

"Furthermore, a clerk has a regular income," he continues. "His wife knows to a penny what she will receive for housekeeping, for dress, for this, that, and the other, and can make arrangements accordingly."

"Possessed of an assured, unvarying income, a clerk is free from the care which besets the man whose pocket, full of money one month is empty the next. The struggles with the world, the everlasting race with the busy competition of trade, which turn grey the hair of the employer do not affect the clerk."

## DIDN'T BELIEVE IN SIGNS.

"How many times have I told you, Lena, that you should always stand at the left of your guest in serving?"

"Lor, mum. I'm not so superstitious!"

# FORTUNES IN LEGENDS BOYS' ARTHURIAN IDEAL KING RIDES IN LUXURY KING WAS PUGNACIOUS

## FAMOUS MASCOTS IN SOME BRITISH HOMES.

### Crystal Goblet of the Musgraves—Highland Chieftain's Fairy Flag.

The best-known of all family mascots is the crystal goblet in the possession of the Musgraves, known far and wide as the "Luck of Eden Hall." Whence it came is uncertain, though tradition avers that many years since a butler in the service of the family, having gone early one morning to the garden to draw water from St. Cuthbert's Well, saw within its depths the fairies holding high revelry, and stooping down, snatched from their hands the drinking-cup on whose safe preservation, it is said, the fortunes of the Musgrave family depend.

Another treasure from Elfland is the "Braulauchski," or fairy flag, which, in the ages of the long ago, was presented to a chieftain of the clan Macleod by Queen Titania herself, who restricted its miraculous aid to three invocations, the last of which should be coincident with the disappearance of the flag and its bearer. Twice has the fairy talisman proved its power; once in a skirmish when the Macleods were on the point of annihilation by superior numbers, and again when the direct line was in danger of dying out for want of an heir. Occasion, for the third, and last, invocation has not yet arisen, and at Dunvegan Castle, in the Isle of Skye.

### THE FLAG YET REMAINS.

In the centre of one of the lower chambers of Cawdor Castle may still be seen a venerable hawthorn, coeval with the ancient pile itself. The founder of the castle, so runs the legend, was hidden by a seer to follow on ass laden with the gold that it was his intention to expend on his new home, and to commence building at the spot where the animal should stop. Under the shade of a hawthorn the ass halted, and there, according to direction, was erected the vast castle—a guardian shrine to the tree on whose preservation rested the house's fortune.

Muncaster Castle guards a cup out of which Henry VI., a fugitive from his enemies and a guest of Sir John Pennington in 1461, crossed himself, saying as he returned it to his host, "Thy family shall prosper so long as they preserve this cup unbroken." During the troublous times that followed it was buried, and on being disinterred the box in which it was packed was accidentally dropped, to the dismay of the family, who for forty years dared not open it to ascertain their fate. When at length the goblet was taken from its resting-place it was found intact.

### THE "COALSTOWN PEAR."

In the possession of the ancient family of Broun of Coalstown, was in the thirteenth century brought as her dowry to one of the Barons of Coalstown by his wife, Jeanne Hay. Its possession was supposed to insure luck, and for many years, until one of the ladies of the family, with the true curiosity of Eve, bit it, it was kept intact. On its mutilation misfortune followed; several of the best farms had to be sold, while the "pear" itself was turned into the hard mass of stone it still remains.

The Lockharts of Lee, in Lunarkshire, possess a precious heirloom in the Lee penny, a small stone set in a silver coin, which has been in the family since the days of the Crusades, when it formed part of the ransom paid to Sir Simon Lockhart by a Saracen chief. Legend endows it with the property of curing all diseases, a purpose for which it was, in 1635, on the deposit by the civic authorities of securities to the value of several thousand pounds, borrowed by plague-stricken Newcastle.

Every bride of the Vernays of Clay-

## GLASTONBURY ABBEY AS A SCHOOL OF CHIVALRY.

### Trying to Uplift the Hooligans of London and the Hoodlums of Chicago.

The purchase of ancient Glastonbury, the teaching of the beautiful lessons of the Holy Grail to the boys of England and America, and the uplifting of the hooligans of London and the hoodlums of Chicago to a better life by the influence of chivalry, poetry and romance, are three beautiful things which are to be bound in one in a project now contemplated can be carried into practice.

Mrs. Isabel Inez de Gusman Garrison, a friend of Lord Strathcona and Mr. Choate, has established in America a boy knighthood of the Round Table with a view to teaching chivalry, honor, loyalty, magnanimity and other knightly virtues to the boys. She is elevating their thoughts and their lives by means of the Holy Grail.

### KNIGHTLY IDEALS.

My experience, corroborated by that of the authorities of the juvenile courts of Chicago, teaches me that it difficult to reform the adult," said Mr. Garrison. My idea is to hold up beautiful and knightly ideals to the boys and by enlisting them in our Arthurian organization, to counteract the vicious and pernicious influences of the streets.

With a heart full of sympathy for the lads of her own great city of Chicago, a mind saturated with Tennyson, and the mystery, legend and romance of Arthur and his knights, and an intense love of England and her old-time history, it was only natural that Mrs. Garrison should look with fascinated eye on the beautiful ruins of ancient Glastonbury, now for sale. She stated recently that she can find half the money for the purchase of Glastonbury.

### NATIONAL QUESTION.

The question that Mrs. Garrison now puts to the British nation is:—Shall the beautiful ruin of Glastonbury be bought as the joint possession of the two English-speaking races, to serve as a lasting and central lesson in chivalry for the stimulating and uplifting of the boys of both countries?

Mrs. Garrison has made a long and thorough exploration of "Arthur-land," as she loves to call it. She has been down at Glastonbury and Tintagel Castle reconstructing the Arthurian history, tracing out the steps of Tennyson, and obtaining pictures of these British links with the past to reproduce on lantern slides in Chicago for the benefit of the boys who are especially under her influence.

"The same thing will be done in England," said Mrs. Garrison. "I have been in communication with heads of boys' brigades and other leading men in England, and they are so favorable to the idea that I am quite sanguine that in the near future there will be established here Arthurian chapters with a definite training in the 'Idylls of the King' and the doings of the chivalrous knights of old."

"I want Glastonbury to become the joint possession of the motherland, and what Tennyson called 'The giant daughter of the west.' Glastonbury is surely the most sacred heritage of both. Surely Little Englandism, and Little Irishism and Little Yankeeism could be merged in the greater Anglo-Saxon and Anglo-Cell."

"The legends of both Saxon and Celt are represented in the 'Blessed Tirnanog,' the Irish Avalon, resting place alike of Arthur and St. Patrick, a place where the very dust is sweet with the ashes of saints and martyrs."

### GUARANTEE OF MONEY.

Now I come to the practical point. If the owner of the sacred ruin will consent to such joint ownership, I will

## HIS MAJESTY'S TRAIN IS A PALACE ON WHEELS.

### Emperor William Spent Millions on Cars, Which Contain Twelve Saloons.

Whenever his objective point is within convenient distance King Edward travels by motor car nowadays, and he frankly tells his intimates that this is for economy's sake. But he travels longer distances in splendidly appointed royal trains.

The train he used in going to and about the Highlands is a palace on wheels, furnished in satinwood, inlaid with ivory and equipped with most modern electrical conveniences, heaters, fans, even cigar lighters.

The smoking-room, where the King is happiest while travelling, is of mahogany inlaid with satinwood and rosewood.

### GREAT CARE IS TAKEN.

And when Edward travels every precaution is taken for his safety as well as his comfort. While the royal train is passing there must be no whistling nor the hiss of escaping steam from locomotives on the side tracks. All work on the road itself and the stations is suspended and freight trains are switched off and stand motionless and silent.

Kaiser William travels in the most gorgeous royal train. It cost \$1,000,000 and took three years to build. In its twelve saloons are two nursery coaches, a gymnasium, a music-room and a treasure-room. The drawing-room is furnished with oil paintings and statuary. The treasure-room—a unique feature—is constructed like the safe deposit vaults, with two large burglar-proof safes.

### BIG STAFF IN PARTY.

When the Kaiser travels in this wonderful train he is accompanied by several secretaries, half a dozen personal adjutants, the household physician and many servants, including the imperial barber, the imperial valet, and, of course, the imperial chef.

Most of the mansions owned by King Edward's close friends contain a royal suite of rooms. If not, a suite of rooms which in effect is a private flat must be set apart for him and usually a private garden is attached to it. Other suites must be provided for the members of the royal household in attendance.

The King and Queen rigorously censure the list of guests who are invited to meet them. They usually take their own body servants, who wait on them at the table, and oftenest the King is served with his own particular wine from his own cellars.

### TRAFFIC IN DEAD BODIES.

#### Wooden Dummies Substituted in Coffins of Hamburg Dead.

A sensational case has been occupying the Hamburg (Germany) law courts.

Recently the head of a workmen's association, Herr Schonberg, publicly accused the Hamburg Hospital of carrying on a large traffic in corpses. He declared that closed coffins were delivered to relatives of the deceased containing only ashes and rubbish or a wooden image. In several cases the body had been placed in the coffin in the presence of relatives, and extracted after their departure. The leg of a man who had suffered from a peculiar disease was cut off and replaced by that of a dead woman. In this state the body was exhibited to the relatives.

In another case the body of a book-binder was represented by a piece of wood painted and dressed in the dead man's clothes, and buried with much solemnity.

On several occasions, said Herr Schonberg, the servants of the hospital had cut off the heads of corpses and

## AN INCIDENT WHEN HE WAS PRINCE OF WALES.

### Remark of Prince Herbert Bismarck Almost Provoked Him to Throw Latter Out of Room.

Much that is interesting to Britons is contained in the astounding "Memoirs" of Prince Hohenlohe (published by his son), which shed considerable light on the relations of Kaiser Wilhelm II. and Prince Bismarck. The publication of the book has given the Kaiser much annoyance, and has drawn forth a fiery telegram of reprimand for the young Prince.

Prince Hohenlohe refers to Prince William (the present Emperor) in the following words: "He is a rather boyish, inconsiderate young man of whom his mother is afraid. He also has rows with his father."

On September 22nd, 1888, Prince Hohenlohe was received in audience by the Empress Augusta Victoria, the wife of William I. "She was," he says, "very broken down and sad. We began by discussing the Emperor's last days, and then she became animated, and spoke of the maliciousness and the disgraceful behavior of certain people whom she mentioned by name."

### ANGERED PRINCE OF WALES.

"Prince Herbert Bismarck, the Emperor added, had the impudence to tell the Prince of Wales that an emperor (Kaiser Frederick) who was unable to carry on a discussion was really incapable of ruling. The Prince of Wales said that, if he had not attached importance to the good relations between Great Britain and Germany, he would have thrown Prince Bismarck out of the room."

The pages relating to that period so interesting to Britons—viz., the months of December, 1895, and January, 1896—contain no reference to the Kruger telegram, and the South African War is barely mentioned. Prince Hohenlohe, however, records at length a highly interesting conversation on Far Eastern policy which he had with the Emperor Nicholas at Breslau.

"His Majesty thinks," says the Prince, "that Great Britain is responsible for the whole movement in Armenia and Crete, and he said: 'I am very fond of Great Britain and the British, who are sympathetic with me, but I distrust their policy.'"

### TO GOBBLE ALL AFRICA.

The Czar also told Prince Hohenlohe that he had heard that Great Britain had a plan to bring Africa, from the Cape to Egypt, into her possession. That was, however, in his opinion, a long way off. The Prince, in reply, said that the British attached so much importance to their supremacy in Africa from the fear that they would one day lose India.

"But who is going to take India from them?" asked the Czar. "We are not so stupid as to pursue such schemes."

Alluding on January 7, 1900, to the prospects of the passing of the Navy bill, Prince Hohenlohe wrote:

"We must not expose ourselves to the danger of meeting at the hands of Great Britain the fate of Spain at the Hands of the United States."

Unquestionably the publication of the memoirs was an act of indiscretion, and it is easy to understand the indignation which prompted Kaiser Wilhelm to send a telegram to Prince Philip, which is one of the most fiery documents which even the Kaiser has ever launched.

### TEXT OF KAISER'S TELEGRAM.

The North German Gazette publishes the text of the telegram as follows:

"Have just read with amazement and indignation the published account of the most private conversations between

all diseases, a purpose for which it was, in 1035, on the deposit by the civic authorities of securities to the value of several thousand pounds, borrowed by plague-stricken Newcastle.

Every bride of the Vernys of Clendon, Buckinghamshire, has, for the last two and a half centuries, been married with

#### A THICK GOLD RING,

which has been in the family's keeping since the days of Charles I., when a Verney wore it over his military glove at the Battle of Edgehill. After the fight search was made for his body, but only a gloved hand could be found—a gloved hand wearing a heavy ring, and still firmly grasping the Royal Standard. On the completion of the wedding ceremony this precious heirloom is put aside until it shall be again required, and the ordinary gold circlet substituted.

The lucky Prayer-book of the Hamilton family is a veritable mascot, that has been used at nearly every Royal wedding from that of George III., in 1761, down to that of the Duke of York, in 1893. So great is its reputed virtue that, in 1874, Dean Stanley took it to St. Petersburg that it might be used at the marriage of the Duke of Edinburgh with the Grand Duchess Marie. The unfortunate marriage of George IV., is, by the superstitious, attributed to this prayer-book not having been used at the ceremony.

#### DON'T LOSE THE ROMANCE.

Life without sentiment is as insipid as a savory without salt. Yet when people marry they usually "settle down," which means they endeavor to look at everything from the common-sense point of view, and forswear all the delightful nonsense which they indulged in when they were sweethearts. Is it that rent, taxes, butcher, baker, and candlestick-maker usurp the place given to romance? Or is it that people always grow staid as they grow older? Is it possible that the wife cares less for love than the sweetheart used to do? Not in her heart of hearts. But, once surrounded by it, she grows unconscious of it, and imagines it no longer of supreme importance, even making the ludicrous mistake of fancying it can be done without. Familiarity breeds contempt, and so she lightly prizes love to her own undoing. Stick fast to the high ideals of courtship days; don't let yourself be persuaded they are foolish or old-fashioned. Don't, when love becomes a daily certainty, fancy that sentiment can be dispensed with, or you will wake up with a start one of these fine days and find to your cost that the future which promised to be so fair is stretching blank and dreary before you, and that your husband, or your wife, as the case may be, bears no resemblance to the sweetheart of years gone by.

#### CUPID IN OTHER LANDS.

Among the Afghans marriage is a case of purchasing the bride. A rich Afghan marries early, simply because he can afford to pay for a wife, while a poor one often remains single until middle life on account of his inability to purchase. If the husband dies, and the widow wishes to marry again, she or her friends have to refund the purchase money to the friends of the dead husband. A common custom is for the brother of the deceased to marry the widow. No other person would think of wedding her without first asking the brother's consent. In China early marriages are the rule. The match is arranged by the parents, and is in the nature of a commercial transaction. The groom is expected to make presents of money and clothes to the bride, who, however, brings no dowry or anything in return. The calendars are consulted solemnly for lucky days, and the blessings of the tutelary gods sought by various propitiatory measures. If the signs fail to turn out auspiciously, the wedding is postponed again and again. The ceremony of marriage consists in drinking a cup of samshoo together in the nuptial chamber.

ashes of saints and martyrs.

#### GUARANTEE OF MONEY.

"Now I come to the practical point. If the owner of the sacred ruin will consent to such joint ownership, I will guarantee the production from America within a reasonable time of half of any sum demanded as the purchase price. 'Can we not unite on the high plane of common ancestry, and make this 'Island-valley of Avalon' a mighty memorial of international meaning? America has given her Lowell, her Abbey to sing and paint with Tennyson, Burne-Jones, Holman Hunt, and other children of the muses, and it seems to me that the pulseless heart of 'Alfred' the great laureate, in the dark crypts of the Abbey would almost throb with life again to know that England and America had joined hands in such an undertaking.

"What a new impetus this would furnish to the study of high ideals! We live, I know, in a practical age, but it is not so prosaic as many think. After all, sentiment is king.

#### MAKING CASTLES.

"I went this summer to the English seaside. I saw little children digging in the sand. I said to one little Anglo-Saxon child: 'What are you making?' 'I'm making a castle,' she said. I went to another. 'What are you making?' 'A manor house,' she replied. I went to another. 'I'm making a cathedral,' said the child.

"Now, had they been Chicago children digging in the sand they would have been making packing houses and factories and docks. You have here in England these beautiful links with the romance and poetry, the legend and history, the chivalry and nobility of the past. So, you see, such a movement as that of forming the lads into chivalrous Arthurian chapters is even more necessary in America than it is here. But it is a good thing on both sides of the Atlantic."

#### WORLD WALKERS.

India Seems to be a Stamping Ground Just Now.

The Allahabad (India) Pioneer reports the start, from Karachi, for a walk around the world, of a man named Thomas Lorimer.

The wager was one of 16,000 rupees, made with two bookmakers; the condition being that Lorimer was to start from Karachi without money; that he was neither to beg, borrow, nor steal on the journey, but would earn his living by honest means, and return to Karachi within four years.

Lorimer set out in fit condition, carrying only a waterproof sheet, a couple of small cooking utensils of aluminum, and a few other necessities.

He is not new to such adventure; and he hopes to get through his present expedition by giving performances en route. He is a society entertainer as well as a good athlete.

His route will be through India, Upper Burma, to China; through Japan to the Philippines; to and across Australia; then by sea to New Zealand, and thence to and across America. He will cross to the British Isles, and continue onward through France, Germany, the Balkans, Turkey, Palestine, on to Egypt, through Abyssinia and Samoliland; and return to Karachi by sea.

#### SHRINKING FLANNEL WITH STEAM.

All good flannel is shrunk before being offered to the public. The flannels are placed between two heavy wet sheets first, and left in that position for twenty-four to thirty-six hours. When removed they are spread out on specially prepared rails in a drying-room heated by steam-pipes, where they are allowed to remain until thoroughly dry. The next process is to place the lengths of the flannel in folds between layers of glossy paper, and subject it to a pressing by hydraulic machines. The more pressure they are subjected to, the more valuable and heavy the flannels become.

under was represented by a piece of wood painted and dressed in the dead man's clothes, and buried with much solemnity.

On several occasions, said Herr Schonberg, the servants of the hospital had cut off the heads of corpses and sold them for 8s apiece to other German hospitals.

Many witnesses have been heard in the inquiry now proceeding. The director of the hospital, Dr. Lenhartz admitted that in every case the bodies of persons who died in the hospital had been dissected for scientific purposes. The relatives had not protested within twelve hours after death. Since 1900 twenty-six corpses had been sold to universities abroad, and many parts of bodies had been retained in the hospital. The relatives were not informed; he added, from fear of wounding their feelings. Some 2,500 persons die every year in the hospital, and out of these 2,000 are dissected.

The superintendent, Dr. Rumpel, stated that heads of corpses were frequently cut off and added to the hospital collection. For the purpose of instruction, it was also necessary to keep other parts of bodies.

A former employee of the hospital, whose trial for selling bodies was the occasion of these disclosures, declared that he had seen the arms of a dead man amputated and replaced by a girl's arms in order that the man's relatives should suspect nothing. It was also proved that wardens had cut off and sold heads and other parts of corpses for their own profit, and without the knowledge of the doctors. In two cases at least coffins were buried containing only parts of the body. The employee was acquitted on the ground of the value of his evidence to the public interest. Herr Schonberg has also now been acquitted on the ground that he had merely carried out his duties, and that the graver charges were not proved.

#### GIVING THE REASON.

The counsel prosecuting in a breach of promise case was youthful and fresh, and delighted in showing himself off. The defendant had entered the witness-box.

"You say," said the counsel, after several impertinent questions, "that you never asked the plaintiff to be your wife?"

"Never," responded the witness, with emphasis.

"But you made love to her?"

"Not to my knowledge."

"And never called her pet names, either, I suppose?"

"No, sir."

"Now, as a matter of fact, didn't you call her 'Lizzie' after you had been to see her only three or four times, and always after that, when you knew you should have called her 'Miss Mint,' if you had not been seeking to win her young and trusting heart?"

"No, sir."

The plaintiff pulled at the counsel's sleeve, but he paid no attention to her. "Ah, indeed!" very sarcastically, "I presume you never called her 'Lizzie' in your life, eh?"

"Never."

The counsel brought his fist down and simply glared at the defendant.

"I'd like to know why you never did, sir?" he asked, with the air of a man who knew he had the facts.

The witness was as cool as a palm-leaf fan could make him as he replied, with an exasperating smile, "Because that isn't her name."

Then it was the counsel heeded the plaintiff's wild clutchings, and wanted to hit himself in the neck with a law-book; but it was too late.

The Master—"Alphonse, I can't pay you your wages for last month." The Man—"Pardon me, sir, but how shall I get along?" The Master—"You think that time is money, don't you?" The Man—"I certainly do, sir." The Master—"Then I'm going to give you a month's holiday instead."

#### TEXT OF KAISER'S TELEGRAM.

The North German Gazette publishes the text of the telegram as follows:

"Have just read with amazement and indignation the published account of the most private conversations between your father and myself concerning Prince Bismarck's retirement. How was it possible that material of this kind could be published without having first obtained my permission? I must describe this proceeding as tactless and indiscreet in the highest degree, and as entirely inopportune, since it is unheard of that incidents which concern the reigning Sovereign should be published without his consent."

The Kaiser's indignation is supposed to be out of chivalrous regard for Bismarck's memory, for the memoirs disclose nothing which does not redound splendidly to the Kaiser's honor. The Kaiser very early in his reign realized that it was a question of showing that he and not Bismarck was the ruler of the Empire.

#### TO PRINT BISMARCK'S SIDE.

It is interesting to learn at this juncture that the third volume of Prince Bismarck's memoirs is at present deposited in a safe in the Bank of England. They were left to Prince Herbert Bismarck with the proviso that while the chief persons figuring in the volumes were alive they were not to be published. On the other hand, if an account of this important episode in modern German history was published, Prince Bismarck left instructions that the volume should immediately be sent to the printers. It will be interesting to see whether the recent publication of Prince Hohenlohe's memoirs will be considered by the Iron Chancellor's family as sufficient cause for the latter step.

#### FORTY YEARS A CONVICT.

Pardon at Last for Man Who Shot at a Czar—Now a Lunatic.

Antoine Berezowski, a Pole, who was sentenced to penal servitude for life for attempting to assassinate the Czar Alexander II. on June 6, 1887, on the occasion of his Majesty's visit to Paris, has been pardoned.

Berezowski, who was eighteen, and apprenticed to an engineer, fired into a carriage in which the Czar, the Emperor Napoleon, and his two sons were driving in the Bois de Boulogne on their way to the exhibition.

The occupants of the carriage were uninjured by the first shot, but one of the equeries and a horse were wounded. Berezowski fired again, and the barrel of his pistol exploded and seriously injured his hand and a woman who was close by.

Berezowski was arrested, and with difficulty saved from being mobbed by the crowd.

It is said that the Emperor Napoleon turned toward the Czar and said with a smile, "Sir, we have been under fire together." Alexander replied gravely, "Our destinies are in the hands of Providence."

The Pole was tried, condemned, and shipped to New Caledonia. After some years, by reason of his good behavior, he secured a remission of the hard labor, but was obliged to reside in the colony. He procured a farm at Bourail.

#### WHY ALL FOAM IS WHITE.

The question as to why all foam is white is not an easy one to understand, but the fact is that foam is always white, whatever be the color of the liquid. The froth produced on a bottle of the blackest ink is white, and would be perfectly so were it not tinged, to a certain extent, by particles of the liquid which the bubbles hold in mechanical suspension. As to the cause of this whiteness, it is sufficient to say that it is due to the large number of reflecting surfaces formed by the foam, for it is these surfaces which, by reflecting the light, produce upon our eyes the impression of white.

# AUSTRALIA AND BRITAIN MODERN GREEK TRAGEDY WHAT IS CONSCRIPTION RIOT AT A RACE MEETING

## REIGN OF THE BRITISH OFFICER IS AT AN END.

Commonwealth Would Leave the Protecting Wing of Britain and Soar Alone.

"Australia First." Not "the Empire First." Not "the Race First." No. It is "Australia First"—that is the real, strong, vibrating note of the development of this six-year-old Commonwealth, says L. V. Biggs, in London Daily Chronicle. It may irritate you as an aggressive thing, without light or shade, but you cannot get away from it if you live in Australia. If you are an altruist and a Liberal, with some ideas still remaining concerning the confraternity of nations and internationalism, this crude, arrogant note will shock you. But you must answer the cry with any other which will satisfy the rapidly-growing consciousness of this young people of the south, this outpost of the white races face to face with the Yellow Peril. Please or displease, there it is—"Australia First."

Look at the symptoms of the influence the note possesses in national life. Take imperial and local defence. One committee of defence, sitting in London with the entire genius of army and navy at its service, has just reported that Australia need not worry about a separate navy of her own; she is safe under the wing of the imperial navy, into whose mighty hand she drops her note of £200,000 a year. What happens? Is the advice quietly accepted as reasonable and conclusive? Not a bit of it. "How can we ever be a nation if we never begin a navy of our own?" cries the Australian, who, in life and death, places "Australia First." Listen to the interpretation put upon his half-spoken thoughts by the Melbourne Age, probably the shrewdest conducted paper in the Commonwealth:

### NATIONAL IDEAL.

"Shall we continue forever to hire our defence and our maritime protection? Or shall we now, as we are well able to, accept the responsibility that properly belongs to us, and begin by easy stages to fit ourselves for the performance of that greatest of all national duties—self defence—by laying forth with the foundations of an Australian navy? We have no doubt as to the answers which the vast majority of patriotic Australians will return to these questions. . . . And we are so sure of the sturdy spirit of patriotism and independence of the average Australian that we unhesitatingly proclaim the acquisition of a navy as the paramount Australian national ideal."

Let there be no mistake as to the meaning of this. The Age correctly voices the sentiment of Australians.

### EXIT BRITISH OFFICER.

It is the same, too, in military ideals. With the departure of Major-General Finn, the retiring Inspector-General of Military Forces, ends the reign of the British officer in Australia. "Australia for the Australians" and "Australia First" apply to the men in khaki, as to the bluejackets. General Finn will be succeeded by Colonel Hoad, an Australian-born soldier, who has risen from the ranks to be the chief administrator of military affairs in the Commonwealth. Except for an occasional visit of inspection for special purposes no British officer will again exercise influence or authority in this land. Every regiment will have an Australian at its head, every fortress an Australian-born commander. Thousands will be spent in sending Australian officers for training in India, Egypt, Canada, South Africa and Great Britain, but obligation is upon them to return to the land of the wattle and the stringy bark, and pass on to their brother Australians the military knowledge they have acquired.

## REMARKABLE SUPERSTITION ABOUT THE VEIL.

Athens Villager Whose Suit Was Rejected Takes Revenge on Girl.

A drama which illustrates the wilder aspects of life in modern Greece has just reached its last chapter. The scene of it is the village of Menidi, which lies about ten miles north of Athens at the foot of the Parnes Mountains, and the people are of the Albanian race and preserve a number of old traditions and customs which even to-day have an almost religious force.

One of the most remarkable superstitions is that of the relation between a young girl's veil and her honor. The peasant girls all wear a veil, not the yashmak of the Turk, but a head covering something like that which Italian peasant women wear, and popular opinion holds a girl as dishonored if a man steals this headress away from her. The only efficient way to reestablish her reputation is to have the veil robber marry her.

Three years ago a young man of the village named Michas began paying attentions to a young girl named Stavroula. His approaches were not favorably received. He lay in wait for her one evening when she went to draw water at the well, snatched her veil from her head and disappeared in the twilight.

### NOW THE TABLES WERE TURNED.

All the relations of Stavroula began paying their addresses to Michas. But now it was his turn to be coy. He would not marry Stavroula; he would not even return the stolen veil and so make minor reparation for the injury he had done her.

He began, however, to force his attentions on her at such times as he could find her unprotected, and at last he made a forcible attempt to carry her off to the mountain. A village gendarme arrived in time to save the girl, but was himself shot down by Michas. Michas was arrested and condemned to a short term of imprisonment.

Returning to Menidi about two months ago Michas found Stavroula betrothed to another man. He lay in wait for her. When she appeared she was accompanied by three women and two men.

He opened fire from his place of concealment and did not stop until he had mortally wounded every one of the six. Then, dashing out into the road, he imprinted a kiss on the lips of Stavroula, who was already in the throes of death, and at the same instant drove his dagger through her heart. Then he disappeared.

The Government promptly offered a reward of 5,000 drachmas (about \$1,000) for the arrest of the murderer. All the police and gendarmes in the kingdom were busy searching for him for a month, but not a trace of him was found. The crime was drifting into oblivion when suddenly a cousin of Michas went to the authorities and

### OFFERED TO BETRAY HIM.

In order to reach the guilty man a stratagem had to be used. Two soldiers dressed themselves as tramps, and, steered by the cousin, scraped up an acquaintance with him as if by accident.

After a while they proposed to him that all three should go to America together. In this way they got him to a place near Athens, and there, under pretence of celebrating their departure, they made him half drunk.

The two then fell upon him. Michas fought like a wild beast and inflicted serious injury on both his assailants. They succeeded, however, in holding him and in doing him up in a neat package with ropes so that he could be carried off

## THE PEOPLE TRAINED FOR THE NATIONAL DEFENCE.

If It Is Introduced Into Great Britain, What It Would Mean to Young Men.

"A home defence army, capable, in the absence of the whole of the greater portion of the regular forces, of protecting this country against invasion, can be raised and maintained only on the principle that it is the duty of every citizen of military age and sound physique to be trained for the national defence, and to take part in it should the necessity arise."

This is what the Royal Commission, presided over by the Duke of Norfolk, said a couple of years ago.

What would conscription mean to Englishmen?

The first step would be to divide the whole country into a number of recruiting districts. In each district would be formed a recruiting board, composed of officers, medical men, and others, and every year the boards would draw up a list of all young men in their twentieth year.

### INCREASE EACH YEAR.

All those young men physically fit would be summoned to train for the defence of their country. Some 360,000 or more young men reach the age of twenty in the British Islands every year, and after the rejection of the unfit about 250,000 would remain. But the army would not need such a large number of recruits every year. Authorities have fixed the standing army at 380,000 men, in addition to the regular forces for use in India and the colonies. Of course, the size of the yearly contingent needed to keep up his army would depend on whether we had a period of one, two, or three years' training. Germany has fixed three years for cavalry and horse artillery, and two years for the great bulk of the other men. French students in law, medicine, divinity, etc., and young men needed for the support of families, serve only one year. About 74,000 are thus enrolled. The remainder—about 100,000—are enrolled for two or three years.

Now, with Great Britain the whole 250,000 fit young men would not be needed. Probably less than 200,000 would have to leave home every year and go through one or two years' life in barracks. There would be no escaping.

### "GOOD-BYE, LIBERTY."

As to the 60,000 or 80,000 who escaped service in the active army, they would not go scot free, but would pass probably into a special reserve.

Those who were enrolled for regular training would bid good-bye to liberty for two years or three. After two years (one in some cases) in the active army, the conscript would pass into the reserve, where he would remain for four years.

While in the reserve he would be liable to training for two periods, possibly of eight weeks each. In the event of war the reservist would, of course, be liable to a summons to fight.

The conscript would now have been six years a soldier and have reached his twenty-seventh birthday. He would have spent one, two or three years in the active army; the remainder in the reserve. On his twenty-seventh birthday he would pass into whatever force would correspond with the German Landwehr. In this body there is the "First Bau," in which the conscript remains for five years. And there in the "Second Bau," in which he stays for six or seven years, but has no training to go through.

### VERY COSTLY.

Now the conscript would have reached his thirty-ninth year, and, although in the prime of life, have no more trouble

## LONGCHAMP RACECOURSE WRECKED BY A MOB.

Many Spectators Were Injured—Wild Scenes in a Paris Commune.

Longchamp, Paris, race course was wrecked recent January during violence and incendiarism, which ruined those who saw it of the wild scenes of the Paris Commune. The pari-mutuel booths were burned to the ground by an infuriated mob, and it is believed that \$600,000 money deposited as bets, was stolen.

There was a false start for the third race, and the favorite—a horse with the appropriate name of Storm—remained with four others at the starting post, while an outsider, M. Perichon, and five others got away.

M. Perichon won the race, if race it could be called, amid loud shouts from the public in the paddock and all round the course, and shrieks of "Au voleur! This is robbery." In a twinkling the crowd had rushed across the course, which immediately became a theatre of fighting maniacs.

The police and forty Republican Guards tried to stem the tide making for the pari-mutuel booths, where the official betting is taken, but were thrown, beaten, kicked and had their clothes torn from their backs. Women and children were trampled under foot, numbers of revolver shots were fired, knives were drawn and used, and the pari-mutuel booths, barricades and fences were set ablaze.

### CROWD GOES CRAZY.

The crowd went absolutely crazy. As soon as it was seen that, in spite of the false start, the race was to count, there was a mad rush for the starting gate, which was pulled down and broken up in an instant. Then the crowd went for the police, who were helpless against it, and many people were very seriously hurt.

A few moments later little puffs of smoke rose from all over the course, and wherever there was a pari-mutuel booth, stand, or benches, flames were seen to be rising.

Suddenly a shriek was heard from all sides of "Let us take our money back!" The pari-mutuel clerks could be seen fighting the flames first, and then rushing away from the blazing booths with their boxes of money and of tickets in their arms. In a moment they were surrounded and knocked down, and their boxes were snatched away from them.

These wooden boxes, containing the money and the tickets of the pari-mutuel, were smashed to pieces on the ground, men tearing them open and stamping them into fragments with their feet, and a regular pitched battle took place for the silver, the gold, and the bank notes they contained.

The scene of pillage and of arson lasted for a full hour before it showed any signs of abatement, and it was several hours before it ceased altogether. Well-dressed men and women rushed about with their hands full of gold and bank notes which did not belong to them, and for which they fought desperately with others who tried to rob them of their spoil. From the top of the grandstand the course looked like a battlefield of mad people, a pandemonium in which men and women shrieked and fought and fell amid the yellow blaze of fire and the mounting column of choking smoke.

### BEYOND CONTROL.

A strong force of police arrived, but although they made a number of arrests, and although the order was given to mounted guards to ride the crowd down if necessary, very little could be done to maintain order.

No lives were lost, but the casualties were innumerable. At about half-past

head, every fortress in Australia is under the command. Thousands will be spent in sending Australian officers for training in India, Egypt, Canada, South Africa and Great Britain, but obligation is upon them to return to the land of the wattle and the stringy bark, and pass on to their brother Australians the special knowledge they have acquired.

#### MOTHERLAND SECOND.

If one turns to Australia's foreign policy, and the questions connected with the control of Pacific islands "Australia First" is seen to be the motto still.

The Governorship of Papua and the control of the New Hebrides are cases in point. Australians are determined to have an Australian Governor of British New Guinea (Papua). Social and diplomatic pressure is brought to bear on the Prime Minister to delay the fulfillment of this desire, and a sort of "marking time" Royal Commission has been appointed. But the Australian Governor and a new system of Colonial development in line with Australian ideas must come. As I write a series of meetings are being held in the great secondary schools in this city with the object of stirring in the minds of the youth of the nation a purely Australian enthusiasm and devotion. "Australia First—the Motherland Second!" It makes one shiver a bit. But after all, Australia is the Motherland now of the majority of her inhabitants. It is, therefore, but human nature that she should take first place in the hearts of her sons and daughters.

#### DANGER IN HYPNOTISM.

##### A London Medical Expert Talks of Experiments.

The advantages and dangers of hypnotism as a means of treating disease formed the subject of a notable lecture accompanied by some remarkable experiments given before the Psycho-Therapeutic Society by Dr. Edwin Ash, for some time demonstrator of physiology and house physician at St. Mary's Hospital, London, England.

"In using hypnotism to cure disease," said Dr. Ash, "we at present are toying with a great force which we do not fully understand, and which we cannot entirely control. We certainly cannot control it sufficiently to govern the grosser forms of disease, and it is important to remember that nothing can do more harm to psycho-therapeutic methods than that one case so treated which should have been treated by surgical means should go wrong.

"Diseases which generally can be influenced by hypnotism are of a functional order, and not those associated with organic changes. It can, I think, be proved that it is possible by mechanical means and suggestion, without any personal influence, such as magnetism, to mask the conscious mind of the subject and bring out some underlying unconsciousness."

To illustrate the points of his lecture he experimented on a young member of the auxiliary forces. Rapidly putting the subject into a state of hypnosis the youth was told by Ash that he was in the drill-room of his regiment. At the word of command he stood at attention, and went through the actions of loading his rifle and firing.

On being told that he must drive his colonel's automobile, the audience being assured he never had driven one, the youth sat in the chair, pulled imaginary starting levers, worked unseen pedals, and occasionally made a movement as if sounding a warning horn. Hypnotism, Ash said, was a great power which could be used with advantage if due care is taken, but it emphatically was not the thing for an amateur to trifle with.

"Sir, I come to ask you for the hand of your daughter." "All right," absently replied the old man, who was looking over the said daughter's millinery bill, "would you as soon take her head also?"

place near Athens, and there, under the pretence of celebrating their departure, they made him half drunk.

The two then fell upon him. Michas fought like a wild beast and inflicted serious injury on both his assailants. They succeeded, however, in holding him and in doing him up in a neat package with rope so that he could be carried off to prison without further trouble.

He is there now awaiting his trial and sentence. It is expected that the Government will exact full value for its drachmas and that the career of Michas will soon be brought to a close.

#### GIRL DRUGGED, TEETH EXTRACTED.

##### Police of Berlin Mystified by a Remarkable Adventure.

A child of 12, named Frida Wagner, has had a singular adventure, about which all Berlin, Germany, is speculating. She was visited at school by a young woman, who said she was an opera singer named von Sassen, and Frida's aunt. She told the rector of the school that she had not seen her niece for nine years, and wished to have a talk with her. Frida was permitted to leave the school for three hours.

Together, Frida and Fraulein von Sassen drove for a while through the streets, then went to a dentist's, where she was drugged, and two of her front teeth extracted. Von Sassen and the dentist wished to extract three more, but the child, who had come to her senses, grew alarmed, and resisted. Von Sassen and Frida then walked about. Frida was shown beautiful articles of female apparel in the shop windows, and was told that after a while she would wear such clothes and ride in a carriage. Von Sassen promised to train her as an opera singer, and praised the child's voice. Frida at this point took fright and rushed to a passing tramcar, boarded it, and made the best of her way home.

The police are investigating the story, but the child's statements are so confused and her nerves so shaken that it is impossible to get a really coherent narrative from her. They believe it is some new development of perversity, regarding which it might be well to have medical opinion.

Von Sassen is evidently a false name, as no opera singer with this name exists. The so-called von Sassen is a girl of about 19, quietly dressed, with a winning manner.

#### WOMEN'S THREE STAGES.

##### England's Chancellor of the Exchequer Says Last is "Welcome."

Mr. Asquith spoke recently in a most good-natured manner about women. The occasion was the opening of a golf bazaar at Dundee, Scotland, and there was a preponderance of women present. "We are all delighted at all times and in all places," said Mr. Asquith, "to see ladies upon golf links."

"I have watched the process of female emancipation going through its successive stages. It began with exclusion; then, I think, passed to toleration, and now it amounts to welcome. Well, you may draw any moral you please from that chapter in the history of female effort."

"I will only venture to say this—that it is to me a most gratifying proof of how by process of what I may call peaceful persuasion woman can always extend her own legitimate domain."

Dealing more particularly with golf, Mr. Asquith spoke with some amount of regret.

"There was once," he said, "a famous Lord Chancellor, who said to one of our English judges, that if he had a little more experience he would be the worst judge that ever sat on a bench. I think one is often tempted to think the same of golf, as one proceeds steadily by assiduous practice from bad to worse."

"I was calculating the other day that I myself might have learned a new language in the time I have devoted to becoming a very indifferent performer at the game."

main for five years. And there in the "Second Bau," in which he stays for six or seven years, but has no training to go through.

#### VERY COSTLY.

Now the conscript would have reached his thirty-ninth year, and, although in the prime of life, have no more trouble so long as peace lasts. He would then pass into that militia called the "Landstrum" in Germany and the "Territorial Army" in France. Here he would remain until forty-five years old.

"This is the career through which the majority of healthy Englishmen will have to pass if the Continental system of universal military service is adopted. Conscription for the army is spoken of in Great Britain. In Germany there is conscription for the Navy as well, and in France the Navy is manned partly by conscripts and partly by volunteers. Both countries by this means have secured a fine naval reserve. Britain's weak point is the insufficiency of a reserve marine force."

Very likely, if conscription comes, the farmer, the artisan, the clerk, and the common laborer will be very much better workmen for their training. One of the evils is that a large number of men, perhaps 150,000, would be thrown upon the labor market every year. And the other strong argument against conscription is that it would cost nearly £20,000,000 in addition to what we already spend.

#### ARISTOCRATS FOR CHIEFS.

##### King Edward Suggests an Opening for Hard-up Younger Sons.

King Edward has made a wise and practical suggestion. He says it would be a good thing for some of the younger sons of the aristocracy if they sought positions as chefs. This idea was the outcome of an incident which took place while the King was recently visiting Lord and Lady Colebrook. His majesty and his hostess returned from a motor drive one evening about 7.30, when Lady Colebrooke was told in the presence of the King, by an indiscreet young footman, that there was no dinner in progress as the chef was drunk and in bed. An almost identical incident occurred a year ago when the King was visiting the Sassoons.

King Edward sees nothing derogatory in any kind of work and in suggesting a new profession for the numerous younger sons of impecunious noblemen he knows of what he is talking. Good chefs earn anything from \$1,000 to \$25,000 per annum, and their behavior of late is, as Mark Twain would say, "causing remark." The male chef is the fashion and the King's notion is that were hard-up scions of the aristocracy to take up the calling they would earn much more money than they could hope to get by going in for business for which their training ill fits them. And they would start with the initial advantage of knowing what dishes appeal most to luxuriously cultivated palates and appetites. Furthermore, as their duties would be restricted to the kitchen, matrons anxious above all things that their daughters should wed wealth, would see no risk of having their matrimonial plans upset by engaging young honorables to supervise their culinary departments. Always practical, his majesty told the Colebrooks that if his suggestion was taken up he would see that a gentleman chef got the first chance when a vacancy occurred in any of the royal palace kitchens.

#### FOR THE PUBLIC'S BENEFIT.

Jack, who was a sailor, had one day been painting some railings, and had put under it "Whet Paynte."

A friend of his coming along, and knowing that Jack was by no means a good scholar, thought to take the rise out of him, and said:

"You don't spell it that way, Jack." But Jack answered him thus: "Well, shure, don't I just know it; only, you see, if I spelt it right nobody would notice it."

A strong force of police arrived, but although they made a number of arrests, and although the order was given to mounted guards to ride the crowd down if necessary, very little could be done to maintain order.

No lives were lost, but the casualties were innumerable. At about half-past three the firemen arrived from Puteaux. By that time there were fifty booths blazing, and the crowd, in a white heat of excitement and fury, threw themselves on the firemen and prevented them from extinguishing the flames.

Half a dozen men cut the traces of the horses dragging one of the fire engines, belabored the animals with their sticks and umbrellas, and thus frightened them into a stampede right in the middle of the crowd. The horses galloped wildly hither and thither, lashing out with their hoofs and injuring many people.

At half-past four M. Lepine, the Prefect of Police, arrived with reinforcements of police and a squadron of engineers, and the fire was got under to a certain extent.

#### GENERAL RUIN.

In the middle of the thicket the building in which the stakes and pickets for the course were stored, was burned to the ground, nothing but the framework being left standing.

The "pelouse" of Longchamp race-course—one of the most picturesque race-courses in Europe, the buildings of which are all renovated and improved last season—is a pitiable sight. It is generally by soldiers, and no one else, who are under any pretext of cleaning the turf pulled up and blacked with fire, all the fencing is either torn up or burned, while all over the course is a sprinkling of parimutuel tickets which the crowd scattered when they broke into the booths.

The twenty franc (\$4) paddock or "pesage," has suffered little in comparison with the five-franc (\$1) paddock, or "pelouse," the buildings of which are entirely wrecked.

#### GIRL VERGERS.

##### New Method of Attracting Men to Divine Service.

The "hustling" pastor of the Ebenezer Episcopal Methodist church in the Philadelphia suburb of Manayunk has found a method of increasing the attractiveness of his ministrations, which results in crowds being turned away at both services.

He has formed the young, attractive, and unengaged girls of his congregation into an ushers' association, the chief duties of membership being to conduct worshippers, and especially strangers, to their seats, and to collect the offertory. The girls take turns, twelve of them officiating each week. They wear a simple, neat, and very effective uniform of white, with a becoming lace cap, and stand ready in a double row at the church door to welcome arriving worshippers.

The first trial of the innovation was an enormous success, crowds of young men, who have heretofore been stubbornly unregenerate, coming from far and near. The pastor, the Rev. Everett D. Decker, is delighted with the success of the experiment, which, he said, he was sure would prove the long-sought solution of the difficult problem of how to bring light to many young men whom the distractions of business and pleasure have, hitherto monopolized.

The church's principal supporters are prominent business men, and they are equally delighted. They say that the opposition churches in the neighborhood must follow suit or go out of business. The treasurer said the fact was sufficient that the offertory showed a 150 per cent. increase over the corresponding Sunday of last year.

"You seem unset, Mr. Minge," said a customer to the grocer. "I am. The inspector of weights and measures has just been in." "Ha, ha! He caught you giving fifteen ounces to the pound, did he?" "Worse than that. He said I'd been giving seventeen!"

## WHAT OTHER PAPERS SAY

Ottawa Journal.

Our Mr. Mackenzie King seems to have something of a hypnotic eye. The British House of Commons has already passed favorably upon the clause for the penalizing of false representation to prospecting emigrants to Canada. Mr. King saw Lord Elgin and it was done.

Toronto Globe.

The farmers' protest against high protection, and also against any protection must be considered in the coming tariff revision. Heretofore the bulk of the farming community has been willing to carry a reasonable burden for the benefit of the manufacturing interests. A tendency toward inconsideration on the part of the organized protected interests has produced a retaliatory feeling which, though quite natural, is none the less to be regretted.

Orangeville Sun (Con)

One of the hopeful signs of the country is that the people at large are thinking more and more for themselves, and on a few memorable occasions they acted on their thoughts. Now, for instance, the farmers do not swallow tariff arguments in gulphs the way they did in the old days. In both Canada and the United States the great army of producers, the farmers, have awakened to the fact that the manufacturer has been getting most of the protection. There is bound to be a big change in the first policy of Americans before many years.

Bramford Expositor.

The more the matter is examined the clearer does it become that comparative immunity from punishment is the chief cause of electoral corruption. Make it really certain that swift and certain punishment will overtake the wrongdoer and there will be few party zealots who will care to take the risk. The political party in this country which will have the courage to create a tribunal which it cannot control, and which may have to deal summarily with some of its own members, will have done much to bring about a better state of affairs and deserve the thanks of all Canadians who desire clean elections.

Comber Herald.

Chilly mornings—a cold breath that fans all the blood of your body to your heart, to pulse out again with bolder meanings. Again, winter and the old pre-eminence of the north—that land ever of strong, independent manhood and pure women. The croaking in the frog ponds has grown more melancholy in the far north the ice dogs are already baying; our Lady of the Snows smiles softly through her autumn at us as behind her foliage she discards with a silken rustle her summer gown. A Lady of the Snows, indeed! But in her heart burns fires, the purest, noblest in all the world. And hark! Just now she is whispering to herself—sometimes she laughs softly—sometimes she sighs. She is remembering the summer glories, the triumphs that were hers—the nature song-sang during the long days in golden wheat fields, the lit of ripening orchards, and the quieter enchantment of flower-scented nights pitched in the soft light of spangled skies. How pleasant is winter after all—the keen air the brisk fire in the heater, and most of all the sublime production of home! Home!—what a word to conjure by! And that's what makes Our Lady of the Snows the greatest little woman on

## My Hair is Extra Long

Feed your hair; nourish it; give it something to live on. Then it will stop falling, and will grow long and heavy. Ayer's Hair Vigor is the only genuine hair-food you can buy. It gives new life to the hair-bulbs. You save what hair you have, and get more, too. And it keeps the scalp clean and healthy.

The best kind of a testimonial—

## The Best Guaranty of Merit Is Open Publicity.

Every bottle of Dr. Pierce's world-famed medicines leaving the great laboratory at Buffalo, N. Y., has printed upon its wrapper all the ingredients entering into its composition. This fact alone places Dr. Pierce's Family Medicines in a class all by themselves. They cannot be classed with patent or secret medicines because they are neither. This is why so many unprejudiced physicians prescribe them and recommend them to their patients. They know what they are composed of, and that the ingredients are those endorsed by the most eminent medical authorities.

The further fact that neither Dr. Pierce's Golden Medical Discovery, the great stomach tonic, liver invigorator, heart regulator and blood purifier, nor his "Favorite Prescription" for weak, overworked, broken-down, nervous women, contains any alcohol, also entitles them to a place all by themselves.

Many years ago, Dr. Pierce discovered that chemically pure glycerine, of proper strength, is a better solvent and preservative of the medicinal principles residing in our indigenous, or native, medicinal plants than is alcohol; and, furthermore, that it possesses valuable medicinal properties of its own, being demulcent, nutritive, antiseptic, and a most efficient antiferment.

Neither of the above medicines contains alcohol, or any harmful, habit-forming drug, as will be seen from a glance at the formula printed on each bottle wrapper. They are safe to use and potent to cure.

Not only do physicians prescribe the above, non-secret medicines largely, but the most intelligent people employ them—people who would not think of using the ordinary patent, or secret medicines. Every ingredient entering into the composition of Dr. Pierce's medicines has the strongest kind of an endorsement from leading medical writers of the several schools of medicine. No other

hibition of, let us say, the Society of American Artists, has as high a standard of admittance as the Paris Salon and is likely to contain less trash, and that, purely as a matter of investment, to urge no higher motive, it pays to buy the best American work.

Another way for those who wish by their wealth to add to the pleasure of their countrymen is to give or bequeath a portion of it to a museum for the encouragement of native art, and to be of the highest efficiency such a benefaction should be without condition. It is said that in Boston it is not respectable to die without making a bequest to Harvard university or the Museum of Art. Certainly that city has an enviable reputation for the unceasing, ever vigilant civic pride and solidarity that made Emerson exclaim of it, "Thou darling town of ours!"—Century.

## Fishes as Barometers.

"In their way," said the old fisherman, "fishes are not such bad weather prophets. If a storm is approaching the fish stop biting, and they won't bite again until the storm is well over. They appear to know when a storm is coming and when it has really passed. And to fishermen and farmers living along the shore fish foretell the near approach of cold weather. Hours before it comes fishes leave the shallow waters inshore and seek deeper water, which in its depths will stay warm and keep an equable temperature after the shallower and surface waters have turned cold. Oh, yes, fishes know a thing or two about the weather."

p.m. connecting at Deseronto with steamer "Varuna" for Belleville and Trenton. Leave Deseronto at 2 30 p.m., Picton at 4 30 p.m. for down the bay.

—What a word to conjure by!—  
that's what makes Our Lady of the Snows the greatest little woman on earth. She is the queen of home and hospitality.

Our sale of Stoves, Ranges and Furnaces exceeds anything in the history of this store, which speaks volumes for the quality of the goods in this line which we are offering, each and every one is guaranteed to you.

**MADOLE & WILSON**

**Not In His Line.**  
Smart—I'm thinking of a trip abroad. Knox—Oh, come now! You can't afford that. You're not accustomed to that sort of thing. Smart—Ha, ha! I simply said I was thinking of it. I can afford to think, can't I? Knox—No. That's what I meant when I said you were not accustomed to that sort of thing.

**Finished Product.**  
Mrs. Upmore (at bench show)—Look at that bulldog! Isn't he the most hideous and repulsive creature you ever saw? Mr. Upmore (dog fancier)—You bet he is! He's a beauty!

**Complete Depravity.**  
"We've often heard about the meanest man, but I happen to know the meanest woman."  
"Who's she?"  
"The one who goes to weddings and slyly removes the cards from the presents, so that the bride can never know which of her friends it was who gave her the plated butter knife."

**Just Like Chess.**  
Hubby—It becomes very trying, my dear. You're always saying check, check, check! I feel as if life were a long game of chess. Wife—Well, Edward, if you don't give me something I shall have to pawn, pawn, pawn, and it would still seem like a game of chess, wouldn't it?

**Sarcasm.**  
"That's my best work," said the poet, after reading the verses to Crittick. "I'm thinking of having it copyrighted."  
"Copyrighted?" said Crittick. "If I were you I'd have it patented."—San Francisco Call.

the strongest kind of endorsement from leading medical writers of the several schools of practice. No other medicines put up for like purposes has any such professional endorsement.  
Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. One "Pellet" is a gentle laxative, and two a mild cathartic. Druggists sell them, and nothing is "just as good." Easy to take as candy.

## FURIES IN THE ARENA.

**The Wrestling Matches Between Women in Japan.**

Describing a wrestling match between women in Japan, a writer says: "The wrestlers arranged themselves in two sides, each led by a captain. They sat cross legged around the platform in the dirt, all but the two chosen to begin, who advanced into the center with the umpire. They squatted upon their feet and bowed to each other slowly and solemnly. Politeness thus being fulfilled, they stood up again and bent over opposite one another like two gamecocks, watching intently for a chance to seize an advantage. During the preliminaries the audience was tense with expectation. Then suddenly the women sprang, hissing at each other furiously and gnashing their teeth, at first by simulating ferocity to spur themselves up to greater excitement, but, after a few clutches, in deadly feminine earnest, the umpire meanwhile buzzing close to them as they swayed around the narrow ring.

"Any and all holds seemed fair means to the end of pushing a combatant over the edge. Sometimes with a clean throw one woman landed her opponent, sprawling, in the midst of her friends. This was the signal for the umpire to begin, 'Hittotsu, futatsu, mitsu, yotsu, itsusu' (one, two, three, four, five), in a series of irregular and disconnected squeaks, and before he ceased counting another wrestler from the losing side jumped up to meet the champion, who stood panting, hissing and spitting like a boiling kettle in the center of the arena.

"This time there were no preliminaries. A wild rush, and like two furies or two beasts the women were struggling again. Some affected quick clutches, some locked their adversaries in their arms and stood stock still for a full five minutes. Some picked up their opponents almost at once and threw them bodily over the ring, while others rolled over with them."

## AMERICAN ART.

**The Way Men of Means May Promote Its Advancement.**

It is an encouraging theory that all important art epochs have been preceded by epochs of great wealth, and it may well be that the present multiplication of large fortunes will be the foundation of a more ideal condition of society, affording, as these fortunes do, the support of extensive artistic undertakings, as did those of Genoa and Venice. And while it would be in-sensate folly to fill our museums exclusively with work by Americans, it is more and more to be expected that our artists will profit by the showing they make in such collections as the comparative exhibition of a few years ago, in which they held their own with foreign masters of the same departments.

The first way, therefore, to help American art is to buy worthy pictures by American artists. Our rich men—particularly our new recruits in this class—should bear in mind that an ex-

of *Chas. H. Fletcher*

turned cold. Oh, yes, fishes know a thing or two about the weather."

## Sighs For the Old Days.

What stopped the old housewife habit of taking the tablecloth out after each meal and shaking it on the ground to the edification of the dog, cat, chickens and birds? As a boy we used to delight in that shake, especially if a comely matron or a pretty girl had hold of the cloth her body swayed so gracefully as she handled it. No other motion, not even the rhythmic dance, set off her figure to better advantage, and the minxes knew it and always managed to give those flirts when admirers were handy by. But some one invented a brush and a pretty receiver, and a new fashion was set.

## The American Girl.

The American girl is a most interesting contradiction. She is regarded as the world's greatest representative of feminine freedom, and yet at the root of her character she is the most prudish of girls. She makes the best friend for a man, and yet his worst lover. She cannot deny that she is a flirt, and yet she is at heart hard and selfish. She will do the most unconventional things, and yet in no part of the world is etiquette more insisted on than in American society.—Madame of London.

## A Certain Advantage.

"A woman can always get the better of a man in an argument," said the visitor.

"Yes," answered Miss Cayenne. "But we should remember that in argument a woman always has a certain advantage. She is not expected to be a gentleman."

## During the Rush Hour.

She—Were you ever in a street car accident? He—Yes. The car was completely wrecked, but the passengers were packed so tight that only the outside layers were injured.—Chicago News.

Whether your bread is good or bad, the cost of baking is the same. You pay a few cents more for

## Royal Household Flour

but those few cents insure good results every time. It is the finest, whitest, purest flour that's milled. It's the flour that is always good.

**Ogilvie Flour Mills Co., Ltd.**

**Girlhood and Scott's Emulsion are linked together.**

The girl who takes **Scott's Emulsion** has plenty of rich, red blood; she is plump, active and energetic.

The reason is that at a period when a girl's digestion is weak, **Scott's Emulsion** provides her with powerful nourishment in easily digested form.

It is a food that builds and keeps up a girl's strength.

ALL DRUGGISTS, 50c. AND \$1.00.

### AN UNKINGLY KING.

The Lion is a Low, Crafty Brute and a Good Deal of a Coward.

The "king of beasts," declares a writer upon the lions of Africa in the Metropolitan Magazine, is an unmitigated nuisance. The stock owner loathes him for the havoc he causes among the herds. There is no security against him. He is always traveling. A pair of lions may find a spot where game is easily obtainable and make a considerable stay there, but their real home is the whole veld.

If the lion slew only as much as he could eat he would be less hateful, but he will often kill four or five oxen and content himself with devouring only the entrails of one.

He is a low, crafty brute, one that takes no risks, for, unlike the leopard, he will never leap a wall unless he can see what is on the other side. A paper fence would keep him away from a herd of cattle, provided they did not break out through terror of his growling and his smell.

The lion's roar is the subject of another fiction. Not that he is incapable of making the most terrible, awe-inspiring sound emitted by any living thing, but because when he is roaring he is harmless. It is the lion which keeps quiet that is to be feared, for as a rule the male and female work in couples, and the one that makes the noise is merely driving the game down the wind to the silent partner.

In a single respect only—on the score of strength—does the lion deserve his name of "king of beasts." He can drag a large bullock over rough ground with the greatest ease; he can carry a mule on his back, after hoisting it there by some strange sideways jerk of his head; he can leap a five foot fence with a full sized donkey gripped in his mouth. Otherwise, speaking from a seven years' experience in the lion country, I have no hesitation in describing the king of beasts as a fraud, at least so far as his alleged nobility is concerned.

His regal attributes lose some of their glamour when one learns that the so called monarch frequently lives for days at a time on such plebeian food as field rats, and the vision of the kingly creature sitting patiently on a flat rock waiting for the rats to come out from underneath is a rather unheroic one.

### POINTED PARAGRAPHS.

If you must lie it is better to lie for practice than for profit.

Most of us discover we need bread after the wagon has passed.

Mothers are wonderfully patient considering there is no prize up.

Ever notice that when people owe you they quit speaking to you?

A boy and his mother never agree as to the age when a boy should change from short to long pants.

A man looks in a parlor for a wife and when he finds her demands that she be more at home in the kitchen.

When a baby gives a shrill cry every one in the house runs to it, and when it keeps it up every one runs from it except its mother.

When you run yourself down and your listeners say nothing it is a sign they agree with you. If they stand up for you it is a sign they are being polite.

### A Lively Roman Sauce.

Garum, the black green sauce of the Romans, was a species of universal sauce, but its principal use was for fish. The recipe is as follows: Let the cook take several fishes; it matters not which, but mackerel are the

### FALLING OF THE LEAVES.

The Wind in the Autumn Really Has Very Little to Do With It.

When the storm clouds gather behind the brown autumnal woods and cold winds begin to blow, then the bright leaves come drifting down in fluttering, fast thickening showers until it almost seems as if the wind were the active agent and actually tore the leaves from the trees. This, of course, is not the case. The leaf fall only becomes possible after a long preparation on the part of the tree, which forms a peculiar layer of cells in each leaf stem called the cleavage plate.

This cleavage plate, or separation layer, consists of a section of loosely attached thin walled cells with a few strands of stronger woody fiber in among them, so, in the early autumn, although the leaves appear as firmly attached as ever before, they are really only held on the tree by these few woody strands and the outer brittle skin or epidermis of the stem. Now only a slight shock or wind flurry is sufficient to break the fragile support and bring the leaves in showers to the ground. We may see these woody strands broken through in the leaf scar of the horse chestnut, where they appear as little rounded projections on the broken surface and are often spoken of from their fancied resemblance to the nails of a horseshoe. The hickory and ash among other trees have similar markings on their leaf scars and from the same cause. On the root of the wild sarsaparilla, which projects just above the ground, a like series of little projections will be seen upon the ringlike scar which surrounds the bud where the leaf stalk has just separated.

Often the leaves separate and fall even on the quietest days, for their own weight is sufficient to break the frail support. These hushed and supremely tranquil days we all remember, when our October walks are accompanied by the soft, small sounds of falling leaves, by the rustlings and dry whisperings of their showering multitudes.

### SLEEP AND NERVE REST.

A Necessity That Is Overlooked In the Modern Strenuous Life.

In the days when eight hours for sleep were nominally regarded as an hour too long for any self respecting individual the exhausting character of modern life was unknown. There was less wealth and more contentment; less competition and more security; fewer distractions, but more simplicity. Work was easier, slower, and care, anxiety, apprehension—in a word, worry—did not feed, like the worm in the bud, upon the hours exempt from toil. We are remorseless in overtaxing the delicate mechanism of our minds and nerves. The best walker, for instance, does not propose to himself to go regularly sixty miles a day or to subject the same set of muscles in any other form of physical exercise to intense and unremitting labor. But that is what we do with the immediate agent of our minds—the brain machine. We cannot watch its operations. We often assume that its movements are as light and endless as the ripples of the universal air. We know and nevertheless we forget that the brain is a substantial apparatus as liable to depreciation as the fixed plant in a workshop. Now, nothing is more certain than this—that the potential capacity of the human brain has not increased, if at all, in anything like the proportion of the immensely aggravated demand upon it.

The modern man is subject to as much mental and moral wear and tear in a day as his ancestors in no very remote generation experienced in a

ment, but its principal use was for fish. The recipe is as follows: Let the cook take several fishes; it matters not which, but mackerel are the best for the purpose. Let him take out their entrails and put them in vinegar and leave them there for ten days. Then let them be taken out and dried and powdered in a mortar with pepper, frequently, roots of dandelion, mint, thyme, sage and a little ginger and well mixed, after which the powder must be put in jars, together with honey, and left to ferment during several weeks. When ready for the table it must be mixed with Falernian wine.

#### Stuttering Women Scarce.

"Women who stutter are very scarce," remarked a physician. "I think it is safe to say that the average person passes through life without ever meeting a stuttering woman. There are two reasons for this. First, woman naturally—I don't know why—is less liable to the disease of stuttering than man. Second, if she develops this disease she sets out with the determination to cure herself, and she succeeds. Whereas a careless man, rather than take the trouble of a cure, will go stuttering on to the end."

#### The Jehu of Bombay.

In no city in the world is there a public vehicular system so irresponsible and so dangerous to human life as in Bombay. Even were the gharrywalla a Jehu of ordinary intelligence the principle of allowing Europeans to be chased by two or three gharrywallas "sahibing" for a fare would be an affront to the civilized public of the city. But the Bombay gharrywalla is notoriously the most stupid individual to be found on the earth's surface, while as a coachman he is the personification of cruelty to his horse and of disregard of the public safety.—Bombay Gazette.

#### Zam-Buk wins Workers' Praise.

#### MARVELOUS CURE OF BURNS.

Zam-Buk has been called "the worker's friend" because it brings such relief and healing to workers who suffer from cuts, burns, bruises or any skin injury or disease. Mr. Alf J. Clark, of Cavendish street, London, (Ont.), tells how Zam-Buk cured him of severe burns. He says:—"I got my hands very severely burned with lime. The burns were so deep that as I lifted my shovel the blood actually ran down the handle. The agony I suffered you may well imagine. I tried several different kinds of salves but the burns were too severe for these preparations to heal.

"I obtained a supply of Zam-Buk and the very first application gave me ease. This pleased me, you may guess, but as I applied the balm each day I was more and more pleased with the effect. The pain was relieved completely.

"I had often heard of Zam-Buk, but thought before I tried it that it was similar to the ordinary salves you see advertised. In a very short time Zam-Buk healed my burns completely, and my hands actually felt better—the muscles more firm and the skin in better condition than before I was burned.

Not only for burns, but for cuts, bruises, sprains, etc., Zam-Buk is the best and surest cure. It also cures eczema, ulcers, abscesses, ringworm, boils, eruptions, poisoned wounds, chapped or cracked hands, cold sores, chilblains, bad leg, piles, etc. All druggists sell at 50c a box, or post free from the Zam-Buk Co., Toronto, on receipt of price, 6 boxes for \$2.50.

The modern man is subject to as much mental and moral wear and tear in a day as his ancestors in no very remote generation experienced in a week. Yet in respect of sleep we have hardly changed traditional habit. We keep later and still later hours. We catch our trains in the morning as usual. There is no doubt whatever that we burn the candle at both ends with unprecedented disregard of the laws of psychological economy, and that the amount of rest we allow for nerve and brain is no longer adequate.—London Telegraph.

#### A Fast Train.

On the Riviera line near Ventimiglia, Italy, the train, after ambling gently along, stopped suddenly. An impatient passenger put his head out and asked crustily, "Is this Bordighera?" No answer. "Guard, is this Bordighera?" he shouted again. A voice came from the fore part of the train, "No, monsieur, it is not Bordighera—it is a cow." When the cow had been removed from the line the train ambled on again. Two minutes later it once more came to a dead stop. "Another cow, I suppose?" shouted the testy passenger witheringly. "No, monsieur, it is not," said the guard placidly. "It is the same cow."

#### A Costly Desk.

There is a famous old desk in the British war office in London. It is a desk to which old hands point with emotion. That desk cost the nation \$25,000,000. In it is a pigeonhole with a story. It was into that pigeonhole that the dispatch of King Theodore of Abyssinia was thrust—and forgotten. After we had been to war the document was found in the desk, and we all learned that there ought to have been no war.—London Sketch.

#### The Sting.

"I hear your firm discharged you." "Yes, but I wouldn't mind that so much if they hadn't added insult to injury." "How?" "They advertised for a boy to fill my place."

Sheridan fell in love with Miss Linley and told the story of "The Rivals," which is a true account of his courtship.

#### Java's Population.

Java is very thickly populated, and cultivation is pushed to an extraordinary distance up the steep slopes of the hills. The plain of Leles in the month of July "is one sea of ripe golden rice, with here and there a village of brown thatch roofs nestling in a group of green coconut trees." In the middle of the island white chimneys of sugar mills peep above miles and miles of sugarcane fields.

#### Fire and Water.

Why does water put out fire? Water reduces the temperature of the flame below the point of ignition; therefore it cannot burn. Water does not smother the flames even when the burning brand is completely immersed in a tank of water, because the first contact puts out the fire—that is, reduces the temperature of the flame below the point of ignition.

Nature is the most thrifty thing in the world; she never wastes anything; she undergoes change, but there's no annihilation; the essence remains; matter is eternal.

Builders' Hardware of almost every description, Paints, Oils and Glass, Cement.

MADOLE & WILSON.

# Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIR,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

#### Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

[Napanee, and Deseronto.

#### Beef Tea For the Aged.

I have often had occasion to protest against the widely huggled delusion of beef tea being a highly nutritious food. As I have stated, it is a stimulant and has the objectionable quality of rendering the bowels lax. In old age there is an opposite natural tendency—at least, that is the rule. When this rule obtains and there is weakness we shall find in strong beef tea a most valuable medicine. But do not commit the mistake of regarding the stuff as food, says Home Notes. It will so stimulate the body that food can be taken; it will so stimulate it that the person will feel better, but it is making him live on his vital capital. Beef tea is no more nourishing than brandy.

#### She Got a Job.

There is a true story of one young woman who had devoted almost a year to pulling wires and using all possible influence to gain an interview with a certain theatrical manager. At last her hopes were realized; she got her appointment, and she was finally ushered into the manager's private office. He received her most cordially and offered her a chair. "Thank you,"

she said gratefully; "I think I will sit down. I've been just ten mouths getting here, and I'm a little tired." And the manager, who is really a great man and hence has a sense of humor promptly engaged her.—Charles Belmont Davis in Outing Magazine.

#### Built of Bulrushes.

The first place of worship in Western Australia was unique in two respects—the materials of which it was built and also the several purposes to which it was devoted. This remarkable building was made at Perth by soldiers shortly after their first arrival in 1832 and was composed almost entirely of bulrushes. In addition to its use on Sundays for divine worship it occasionally served as an amateur theatre in the week and during the whole time as a barracks.

#### A Money Question.

Jack—What's the difference between the color of a rose and a counterfeit copper? Dick—I hate to give up anything with money in it, but I do. What is the answer? Jack—One is a good scent, and the other isn't.

### A POET'S SELECTION.

Markham on the Greatest Passage in English Literature.

To ask for the one most justly celebrated passage in English prose literature is like asking for the one most fully concentrated sort of fruit in the orchard. There are only a score of fully worthy passages, each one making its especial appeal to a different mood of the mind.

Ruskin's description of Turner's rainbow satisfies our love for the majestic color and motion of the scene. Quincey's reverie on the nebula in fiction carries a sense of the vastness and mystery of the sky. Pater's piercing of the shield of Hercules reminds for us the light and life of dried Hellas. Swinburne's eulogy of Rossetti astounds us with the splendor and speed of his words. Le Gallienne's prose fancy, "The Twelve Wells," stirs our hearts with the precious disquiet of sorrows. Victor Hugo's oration in "The Man Who Laughs" awakens in us the ennobling passion of humanity. Lincoln's Gettysburg speech hushes the soul with its fine appeal to the heroic heart of man.

I might go on to mention Emerson, Poe, Thoreau, Hawthorne, Lake Hall, Jeremy Taylor as well as St. Matthew, St. John, Isaiah, Job and others in the parliament of words, but I content myself with making the selection that is perhaps my favorite in most of my moods. I refer to that stately and sonorous passage on Carlyle's "Sartor Resartus" where he sees history as a stupendous procession forth-issuing from chimney at night and vanishing into pathetic

and fathomless silence. Here is the passage:

"Like some wild flaming, wild thundering train of heaven's artillery does this mysterious mankind thunder and flame in long drawn, quick succeeding grandeur through the unknown deep. Like a God created, fire breathing spirit host, we emerge from the inane, haste stormfully across the astonished earth, then plunge again into the inane. Earth's mountains are leveled and her seas filled up in our passage. Can the earth, which is but dead and a vision, resist spirits which have reality and are alive? On the hardest adamant some footprint of us is stamped in; the last rear of the host will read traces of the earliest van. But whence? O heaven, whither? Sense knows not, faith knows not, only that it is through mystery to mystery, from God to God."

—Edwin Markham in Success.

### The Word "Sinister."

Of "Sinister" a writer says: "How charged, since the time of the Romans, is this simple word with dubious things, with suggestions that are ever terrible! It seems to convey the vague threat of dreams—the threat that is something worse than the clear menace of trouble in waking hours. Man wanted a word for such terrors and took the mere name of the left hand. This would serve as well as another, seeing that all words which we have filled with mental emotions had a grossly material beginning, as 'bitter' and 'sweet.' Emerson says that all language is fossil poetry, but the reverse is true—human language has grown into poetry and has come to life with time."

## SIGNS IN THE THUMB

**WHAT THEY MEAN AND HOW YOU MAY LEARN TO READ THEM.**

**They Serve as an Index to the Character of the Individual—The "Thumb Center" in the Brain—Position of the Well Balanced Thumb.**

The gypsies have always recognized that the thumb is the most important factor in delineating special tendencies. These nomadic people are the most intuitive on earth, and the fact that in their fortune telling they often confine their prognostications to the thumb alone is worth more than a passing notice.

The fact that there is what is known as the "thumb center" in the brain, recognized by all surgeons, demonstrates the immense importance attached to it by medical science. If there is a tendency toward paralysis the physician notes it in the thumbs long before the malady shows itself in other directions. An operation to avert the calamity if possible is frequently performed on the thumb center of the brain, and the thumb itself is watched for results favorable or otherwise. It is a matter of record that the thumbs of idiots and those mentally weak are undersized, characterless and usually cling closely to the side of the hand. There have been books written on signs in the thumbs as denoting criminal instincts, and detectives have been often moved to consider seriously this phase of the hand in making their deductions in puzzling cases.

The position of the thumb with reference to the rest of the hand makes either for or against favorable tendencies. If it is bound to the first finger at a close angle, lying nearly parallel, it indicates a weak and cowardly nature. People with such thumbs are not open and frank in character, preferring to creep along in the shadow and profit by another's enterprise. If in connection with this position it should be very small, with vacillating, almost invisible joints, it indicates mental weakness. If, on the contrary, it flies out at right angles or even farther it shows want of balance in another direction. The person will rush to extremes and is independent and aggressive almost to foolhardiness. Such people are disagreeable to associate with in any enterprise, as they always want their own way and are not subservient to authority.

The well balanced thumb lies at an angle of about forty-five degrees from the first finger. The joints of the thumb also tell their story. The limber jointed thumb which turns back from the hand is a misfortune to its owner. He will never be rich by saving his earnings, and if a fortune should be left him it is likely to be soon dissipated. He is a spendthrift by nature, not only in money, but in thought. If he gets a hobby he rides it to death, and his policy in all the affairs of life will be, "If a little is good, more is better." And if he does not actually live out all his impulses he will always fret in the spirit and grow rebellious in resisting his natural tendencies.

The stable jointed thumb is everything that is the opposite to the first type. And while the people with these thumbs are not so companionable or so helpful to others they succeed by concentration and a certain amount of selfishness. They have the directness of purpose and the tenacity to carry to successful issue great enterprises. They are stubborn, material, stolid, restless. The chimpanzee, which has the hand most nearly resembling the human, shows the greatest weakness and want of intelligence in its undersized short thumb. And in the human race the long thumb may be taken as indicating the more intellectual nature.

OTTAWA, ONT.  
232 Cooper St.

You know what fearful trouble life time from constipation. I have suffered from chronic constipation and I have been treated by many have taken many kinds of projects without any benefit whatever. I to time which was prescribed by the late of Ottawa. Also for many more prescribed by Dr. A. F. Rogers, of seemed to do me any good. Finally Dr. Rogers to try "Fruit-a-tives", them for a few months I feel I am from this horrible complaint. I I with this complaint now for a lot certainly state that "Fruit-a-tives" I ever took that did me any constipation. I can conscient "Fruit-a-tives" to the public as, is the finest medicine ever produced.

D. A. VALLEAU, Asst. Superintendent.

less. The chimpanzee, which has the hand most nearly resembling the human, shows the greatest weakness and want of intelligence in its undersized short thumb. And in the human race the long thumb may be taken as indicating the more intellectual nature. The shorter the thumb the more brutal and passion governed the nature.

The relative length of the joints also plays an important part. The first indicates the will power, the second denotes judgment, reason and logic, and the third, which controls the mount of Venus, indicates the affections and love of fellow beings. In a well balanced nature the first and second joints are about of equal length. This indicates a whole-some adjustment between the judgment and the will. If, however, the first joint is longer than the second the will exceeds the judgment, and the person is likely to be stubborn and often acts without reason. When the second joint is the longer a person plans better than he executes. In this way he often gets the reputation of being visionary and is frequently full of schemes which he lacks the will to carry out.

The third joint, or "ham," of the hand when too thick indicates ungovernable passions and an inordinate love of the opposite sex. Such a person will be "half fellow well met," a boon companion, but is likely to neglect the intellectual demands both of his home and his other self.

When the second joint is thin and small in circumference as compared with the first it is said to indicate great tact and niceties in judgment, even to the splitting of a hair. Whether the hand is firm or flabby it has a modifying influence in all cases.

### Idle Lives.

No idle life can produce a real man. A life of luxury calls out only the effeminate, destructive qualities. The creative forces are developed only by stern endeavor to better one's condition in the world.

## CAUGHT COLD ON THE C.P.R.

A. E. Mumford tells how Psychine cured him after the Doctors gave him up

"It is twelve years since Psychine cured me of galloping consumption." The speaker was Mr. A. E. Mumford, six feet tall, and looking just what he is a husky healthy farmer. He works his own farm near Magnetawan, Ont. "I caught my cold working as a fireman on the C.P.R.," he continued. "I had night sweats, chills and fever and frequently coughed up pieces of my lungs. I was sinking fast and the doctors said there was no hope for me. Two months treatment of Psychine put me right on my feet and I have had no return of lung trouble since."

If Mr. Mumford had started to take Psychine when he first caught cold he would have saved himself a lot of anxiety and suffering. Psychine cures all lung troubles by killing the germs—the roots of the disease.

### WOOD RAT TYPIFIES MAN.

He Is Small, but His Acquisitiveness Is Insatiable.

Too many Americans have the "wood rat instinct." The wood rat, the animal, is a native of southern Oregon, but the wood rat typified in man is not restricted to any small section of a state or nation, but is well high universal.

The wood rat is small, no larger than a common rat, but his ambition and acquisitiveness are insatiable. His one insane desire seems to be to increase the size of his pile of sticks. The neighboring field is placed under tribute. First, all the nearby sticks are gathered into the pile. Then, as these are cleaned up, he goes farther and farther away from home, and every twig is eagerly seized upon to increase the size of his pile of sticks.

The wood rat regards his pile of sticks as a refuge in time of trouble. On the first sound of alarm he rushes for the pile and crawls underneath. It is here that he often finds his destruction, for a summer fire sometimes sweeps through the woods, and the wood rat's pile of sticks makes a veritable furnace. The larger the pile the hotter the fire, and thus he has piled up the means of his own agony.

We do not need to carry the comparison any further. The lesson is obvious, but still many of us do not appear to realize that we are like the wood rat, worshipping a pile of sticks. We marry a man because of the size of his pile of sticks and not from an innate attractiveness. We call this man a success because he can gather sticks faster than any of his companions. We call this man "sharp" and "shrewd" because, after a fellow worker has laboriously made a huge pile, he steps in and ousts his fellow from the pile and appropriates all the sticks for his own.

Let us take warning from the wood rat and the summer fire—the larger the pile of sticks the fiercer burns the fire when the time of destruction finally arrives.—Montreal Star.

### FACTS ABOUT YOURSELF.

The average number of teeth is thirty-two.

The average weight of an adult is 150 pounds 6 ounces.

The weight of the circulating blood is twenty-nine pounds.

The brain of a man is more than twice that of any other animal.

A man breathes about twenty times a minute, or 1,200 times an hour.

Over 540 pounds, or one hoghead and one and one-fourth pints, of blood pass through the heart in an hour.

The average weight of the brain of a man is three and one-half pounds, that of a woman two pounds eleven ounces.

There are 175,000,000 cells in the lungs, which would cover a surface thirty times greater than the human body.

The average height of an American is five feet nine inches, of a Frenchman five feet four inches, of a German five feet seven inches.

### The Lid.

Johnnie—Say, pa, who was Pandora? Johnnie's Pa—Pandora, my son, was a little girl who started a lot of trouble because she didn't keep the lid down.

Never mind whom you praise, but be very careful whom you blame.—Gosse.

Coal Oil Stoves, MADOLE & WILSON

# IN THREE MONTHS "Fruit-a-tives" did what Doctors and drugs failed to do in THIRTY YEARS.

"Fruit-a-tives" cured the Hon. John Costigan of the worst case of chronic Constipation that the leading physicians of Ottawa ever saw. "Fruit-a-tives" gave this famous statesman what he had not had for 30 years—perfect health.

Mr. Costigan gives the credit where credit is due—to "FRUIT-A-TIVES"—the one remedy that can, and does, cure Constipation.

**Fruit-a-tives**  
ON FRUIT LIVER TABLETS

are the only remedy in the world really made of fruit. Juices of fresh Apples, Oranges, Figs and Prunes are so combined that the well known medicinal action of the fruit is increased many times. Tonics are added, and the whole pressed into fruit liver tablets.

"Fruit-a-tives" owe their wonderful power, and their wonderful success, to the fact that they are made of fruit—that they ARE fruit, INTENSIFIED.

It is the medicinal principles of fruit that can restore the great eliminating organs—the Kidneys, Bowels and Skin—to their normal condition. That is why "Fruit-a-tives"—made of fruit—cure Constipation and cause the bowels to move naturally—correct all Stomach, Liver, Kidney and Skin Troubles—and build up the entire system.

If you are suffering as the Hon. John Costigan did—CURE YOURSELF as he did—with "Fruit-a-tives."

50c a box—or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

**Fruit-a-tives Limited - Ottawa.**

## DAILY INSTRUCTION AND SANITARY INSPECTION OF FACTORIES AND CREAMERIES

The Dairy Instruction of the past few years has resulted in a marked improvement in the general equipment and sanitary conditions of factories. Many proprietors and makers have, however, stated to the instructors and members of the Dairyman's Associations that they were somewhat discouraged after going to the expense and trouble which were found necessary to make the improvements considered essential by the dairy instruction. "We have gone to considerable expense in order that the quality of cheese may be of a higher standard but our neighbor factories have gone on in the same old way manufacturing along cheap lines and they, for the most part, secure as high a price for their cheese as the better equipped factories. In many cases the poorly run factories manufacture for a lower rate than a well equipped and improved factory thus making the burden still greater for those who are anxious to do what is essential if the industry is to be placed on a more and permanent basis."
